FEATS

[Experience](#), talent, and training can lead to capabilities and proficiencies outside the ability origins - feats. No matter your race, background, and abilities, you can learn any of the feats as long as you meet the prerequisite and it makes sense with your backstory. If you ever lose a feat's prerequisite, you can't use that feat until you regain the prerequisite. Humans gain a feat as a racial trait, and ability origins offer feats on certain levels (ASI or Feat ability).

Actor

Ability score: Increase your Manipulation score by 1, to a maximum of 20.

- ❖ **Acting:** You gain advantage to Deception and Crafts & Art: Acting when you try to act like another person you have met.
- ❖ **Mimic:** You can mimic the speech or sounds of another creature. You must have heard the creature speaking or making sounds for at least 1 minute. A successful Empathy (Com) check contested by your Deception (Man) allows a listener to determine that the effect is faked.

Alert

- ❖ **Perceptive:** Gain a rank in Perception. You may gain rank 5 in the skill.
- ❖ **Unsurprised:** You can't be surprised while you are conscious. In addition, other creatures do not gain advantage on attack rolls against you as a result of being hidden from you.
- ❖ **Quick:** You gain a +5 bonus to initiative.

Athlete

Ability score: Increase your Brawn or Dexterity score by 1, to a maximum of 20

- ❖ **Athletic:** Gain a rank in Athletics. You may gain rank 5 in the skill.
- ❖ **Fast:** Increase your movement speed by 1 m.
- ❖ **Early Riser:** When you are prone, standing up uses only 1 m of your movement.
- ❖ **Climber:** Climbing doesn't cost you extra movement.
- ❖ **High Jumper:** You can make a running long jump or a running high jump after moving only 1 m on foot, rather than 2 m.

Charger

Ability score: Increase your Brawn or Dexterity score by 1, to a maximum of 20.

When you take the dash action on your turn, you may make one melee weapon attack or shove a creature. If you move at least 2 m in a straight line immediately before taking this action, you either gain a +5 bonus to the attack's damage roll (if you chose to make a melee attack and hit) or push the target up to 2 m away from you (if you chose to shove and you succeed).

Cloudshooter

- ❖ **Range:** Attacking at long range does not impose disadvantage on your ranged weapon attack rolls.
- ❖ **Aim:** If you do not move by choice during your turn, you can perform a special aim maneuver. Once per turn, when you make a ranged weapon attack, you may spend a bonus action to gain a bonus equal to 1d6 to either your attack roll or damage roll. This bonus must be applied before you make the attack or roll the damage.

Defensive Duelist

Prerequisite: Dexterity 13 or higher

Ability score: Increase your Dexterity score by 1, to a maximum of 20.

If you are wielding a finesse weapon that you are proficient with, you can use your reaction to add your proficiency bonus to your AV when a creature hits you with a melee attack.

Dual Wielder

- ❖ **Armor Value:** You gain a +1 bonus to AV while you are wielding a separate melee weapon in each hand.
- ❖ **Non-Light Weapons:** You can use two-weapon fighting even when the one-handed melee weapons you are wielding aren't light.
- ❖ **Stow:** You can draw or stow two one-handed weapons when you would normally be able to draw or stow only one (stowing or drawing the two weapons count as one item interaction, instead of two).

Durable

Ability score: Increase your Vitality score by 1, to a maximum of 20

- ❖ **Health Dice:** When you roll Hit Die to regain health points, the minimum number of health points you regain from one health dice equals twice your Vitality modifier (minimum of 2).
- ❖ **Temporary Health Points:** When you gain temporary health points from any source, double it.

Elemental Adept

Prerequisite: The ability to cast at least one spell

When you gain this feat, choose one of the following damage types: acid, cold, fire, lightning, poison, or thunder. Spells you cast ignore resistance to damage of the chosen type. In addition, when you roll damage for a spell you cast that deals damage of that type, you can reroll any dice with a result of 1, but you must keep the new result.

You can select this feat multiple times. Each time you do so, you must choose a different damage type.

Grapppler

Prerequisite: Brawn 13 or higher

Ability score: Increase your Brawn or Dexterity score by 1, to a maximum of 20

- ❖ **Advantage:** You have advantage on physical ability checks and attack rolls performed against a creature you are grappling.
- ❖ **Pin:** As an action, you can try to pin a creature grappled by you. To do so, make another grapple check. If you succeed, you and the creature are both restrained until the grapple ends.

Great Weapon Master

- ❖ **Extra Attack:** On your turn, when you score a natural 20 with a heavy melee weapon or reduce a creature to 0 health points with a melee weapon, you can make one melee weapon attack as a bonus action.
- ❖ **Risk and Reward:** Before you make a melee attack with a heavy weapon that you are proficient with, you can choose to suffer a -5 penalty to the attack roll. If the attack hits, you add +10 to the attack's damage of the damage type your weapon normally deals.

Healer

- ❖ **Medic:** Gain a rank in Medicine. You may gain rank 5 in the skill.
- ❖ **Stabilize:** When you use a Healer's Kit to stabilize a dying creature, that creature also regains 1 health point.
- ❖ **Healer's Kit:** As an action, you can spend one use of a Healer's kit to tend to a creature and restore 1d6+4 + the creature's maximum number of health dice to it. The creature can't regain health points from this feat again until it finishes a short or long rest.

Inspiring Leader

Prerequisite: Presence or Manipulation 13 or higher

- ❖ **Leadership:** Gain a rank in Leadership. You may gain rank 5 in the skill.
- ❖ **Inspiring Speech:** Choose up to six friendly creatures plus your Presence modifier (minimum +0, which includes yourself) who can see or hear you and who can understand you. Each creature can gain temporary health points equal to your level + your Manipulation modifier (minimum 1). A creature can't gain temporary health points from this feat again until it has finished a short or long rest.

Keen Mind

Ability score: Increase your Intelligence score by 1, to a maximum of 20

- ❖ **Internal Compass:** You always know which way is north and you seldom get lost. In addition, you know the basics of reading a star map.
- ❖ **Internal Clock:** You always know the number of hours left before the next sunrise or sunset in your home Realm.
- ❖ **Photographic Memory:** You can accurately recall anything you have seen or heard within the past month.

Linguist

Ability score: Increase your Intelligence score by 1, to a maximum of 20

- ❖ **Languages:** You learn a language at Academics (language of your choice) rank 1 and two languages at Academics (language of your choice) rank 2.
- ❖ **Cipher:** You can create written ciphers. Others can't decipher a code you create unless you teach them or they succeed on an Intelligence check (DV equal to your Intelligence score + your proficiency bonus). Magic can be used to decipher it.

Lucky

You gain 3 Luck Points. Whenever you make an attack roll, an ability check, or a saving throw, you can spend one Luck Point to roll an additional d20. You can choose to spend one of your Luck Points after you roll the die, but before the outcome is determined. You choose which of the d20s is used for the attack roll, ability check, or saving throw.

You can also spend one Luck Point when an attack roll is made against you. Roll a d20, and then choose whether the attack uses the attacker's roll or yours.

If more than one creature spends a Luck Point to influence the outcome of a roll, the points cancel each other out; no additional dice are rolled.

You regain your expended Luck Points when you finish a long rest.

Mage Slayer

- ❖ **Punish Spellcasting:** When a creature within melee range of you casts a spell, you can use your reaction to make a melee weapon attack against that creature.
- ❖ **Punish Concentration:** When you damage a creature that is concentrating on a spell, that creature has disadvantage on the saving throw it makes to maintain its concentration.
- ❖ **Spell Protection:** You have advantage on saving throws against spells cast by creatures explicitly targeting you, or is cast within 2 m of you.

Martial Adept

- ❖ **Weapon Techniques:** You learn two Weapon Techniques of your choice from among those available to the Grandmaster archetype for the [Tactics] ability origin. If a Technique you use requires your target to make a saving throw to resist the Technique's effects, the saving throw DV equals 8 + your proficiency bonus + your Brawn or Dexterity modifier (your choice).
- ❖ **Technique Dice:** If you already have Technique Dice, you gain one more. Otherwise, you gain three Technique Dice, which are d6s. These dice are used to fuel your Techniques and are expended when you use them. You regain your expended Technique Dice when you finish a short or long rest.

Mobile

- ❖ **Fast:** Your speed increases by 2 m.
- ❖ **Superior Dash:** When you use the dash action on your turn, difficult terrain doesn't cost you extra movement until the end of your turn.
- ❖ **Slippery:** When you make a melee attack against a creature, you don't provoke attacks of opportunity from that creature for the rest of your turn, whether you hit or not.

Mounted Combatant

- ❖ **High Horse:** You have advantage on melee attack rolls against any creature that is smaller than your mount whilst you are mounted.
- ❖ **Redirect:** You can force an attack targeted at your mount to target you instead as a reaction.
- ❖ **Equine Evasion:** If your mount is subjected to an effect that allows it to make a Dexterity saving throw to take only half damage, it instead takes no damage if it succeeds on the saving throw, and only half damage if it fails.

Observant

Ability score: Increase your Intelligence or Composure score by 1, to a maximum of 20

- ❖ **Investigative:** Gain a rank in Investigation. You may gain rank 5 with Investigation.
- ❖ **Read Lips:** If you can see a creature's mouth while it is speaking a language you understand, you can interpret what it's saying by reading its lips.
- ❖ **Vigilant:** You have a +5 bonus to your passive Perception score.

Resilient

Ability score: Increase one defensive ability score of your choice by +1, to a maximum of 20

- ❖ **Saving Throw:** You gain proficiency in a saving throw using the ability score you choose when picking this feat. If you already possess proficiency with that saving throw you gain proficiency with another defensive ability score of your choice.
- ❖ **Spring Back:** If you're dropped down below zero health points, but not dead completely, you automatically regain 1 health point. This effect is regained after a short or long rest.

Ritual Caster

Prerequisite: Intelligence or Cunning 13 or higher

- ❖ **Ritual Spellbook:** You have learned a number of spells that you can cast as rituals. These spells are written in a ritual spellbook, which you must have in hand while casting one of them. When you choose this feat, you acquire a ritual spellbook holding two 1st-level spells with the ritual tag of your choice.
- ❖ **Ritual Inscription:** If you come across a spell in written form, such as a magical spell scroll or a spellbook, you might be able to add it to your ritual spellbook. It must have the ritual tag. The process of copying the spell into your ritual spellbook takes 1 hour per level of the spell and requires the consumption of Soul power equal to the spell's level.
- ❖ **Ritual Stamina:** You can cast more ritual spells per long rest without suffering exhaustion. Increase both the number of ritual castings per long rest and the same spell being ritual cast per long rest with two.

Savage Attack

Once per turn when you roll damage for a melee weapon attack, you can reroll the damage dice and use either total.

Sentinel

- ❖ **Hinder Movement:** When you hit a creature with an opportunity attack, the creature's speed becomes zero for the rest of the turn.
- ❖ **Unescapable Provocation:** Creatures provoke opportunity attacks from you even if they take the disengage action before leaving your reach.

- ❖ **Punish Attack:** When a creature within melee range of you attacks a target other than you (and that target doesn't have this feat), you can use your reaction to make a melee weapon attack against the attacking creature.

Sharpshooter

- ❖ **Accurate Shot:** Your ranged weapon attacks ignore half cover and three-quarters cover.
- ❖ **Risk and Reward:** Before you attack with a ranged weapon that you are proficient with, you can choose to take a -5 penalty to the attack roll. If the attack hits, you add +10 to the attack's damage of the damage type your weapon normally deals.

Skilled

You gain five skill points to distribute in skills of your choice. You can gain rank 5 in one skill of your choice.

Skulker

Prerequisite: Dexterity 13 or higher

- ❖ **Superior Stealth:** You can try to hide when you are lightly obscured from the creature from which you are hiding.
- ❖ **Directionless Attacks:** When you are hidden from a creature and miss it with a ranged weapon attack, performing the attack doesn't reveal your position.
- ❖ **Gloom Vision:** Dim light doesn't impose disadvantage on your Perception checks relying on sight.

Spell Sniper

Prerequisite: The ability to cast at least one spell

- ❖ **Distant Spells:** When you cast a spell that requires you to make an attack roll, the spell's range is doubled up to a maximum of 120 m.
- ❖ **Accurate Spells:** Your ranged spell attacks ignore half cover and three-quarters cover.
- ❖ **Cantrip:** You learn one cantrip of your choice that requires an attack roll.

Tough

Your health point maximum increases by an amount equal to twice your level when you gain this feat. Whenever you gain a level thereafter, your health point maximum increases by an additional 2 health points.

War Caster

- ❖ **Greater Concentration:** You have advantage on Resolve saving throws that you make to maintain your concentration on a spell when you take damage.
- ❖ **Somatic Ease:** You can perform the somatic components of spells even when you have weapons or a shield in one or both hands.
- ❖ **Casting Opportunity:** When a hostile creature's movement provokes an opportunity attack from you, you can use your reaction to cast a spell targeting the creature, rather than making an opportunity melee attack. The spell must have a casting time of 1 action and must target only that creature.

WEAPON FEATS

Bladed Mastery

- ❖ **Accuracy:** You gain a +1 bonus to attack rolls you make with all weapons included in the blades proficiency group.
- ❖ **Parrying Stance:** On your turn, you can use your reaction to assume a parrying stance, provided you are wielding a weapon from the blades proficiency group. Doing so grants a

+1 bonus to your AV until the start of your next turn or until you are not holding the weapon.

- ❖ **Superior Opportunities:** When you make an opportunity attack with a weapon included in the blades proficiency group, you have advantage on the attack roll.

Brawler

Ability score: Increase your Brawn or Vitality score by 1, to a maximum of 20

- ❖ **Improvised Weapons:** You are proficient with improvised weapons.
- ❖ **Unarmed Power:** Your unarmed strikes use a d4 for damage.
- ❖ **Quick Grapple:** When you hit a creature with an unarmed strike or an improvised weapon on your turn, you can use a bonus action to attempt to grapple the target.

Crossbow Expert

- ❖ **Quick Reload:** You ignore the loading quality of hand crossbows, and can reload light and heavy crossbows with a bonus action.
- ❖ **Ranged Melee:** Being within 1 m of a hostile creature doesn't impose disadvantage on your ranged attack rolls when you attack with a hand crossbow.
- ❖ **Combo Attack:** When you use the attack action and attack with a one-handed weapon, you can use a bonus action to attack with a hand crossbow you are holding in the other.

Fell Handed

- ❖ **Accuracy:** You gain a +1 bonus to attack rolls you make with weapons from the Fell Handed proficiency group (handaxe, battle-axe, great-axe, maul, warhammer, and war pick).
- ❖ **Forceful Attack:** Whenever you have advantage on a melee attack roll you make with a fell-handed weapon and hit, you can knock the target prone if the lower of the two d20 rolls would also hit the target.
- ❖ **Violent Attacks:** Whenever you have disadvantage on a melee attack roll you make with a fell handed weapon, the target takes bludgeoning damage equal to your Brawn modifier (minimum of 1) if the attack misses and if the higher of the two d20 rolls would have hit.
- ❖ **Knock Away:** If you use the help action to aid an ally's melee attack while you're wielding a fell handed weapon, you knock the target's shield aside momentarily. The ally gains advantage on the attack roll and gains a +2 bonus to the roll if the target is using a shield.

Flail Mastery

- ❖ **Accuracy:** You gain a +1 bonus to attack rolls you make with the flail.
- ❖ **Knock Away:** As a bonus action on your turn, you can prepare yourself to extend your flail to sweep over targets' shields. Until the end of that turn, your attack rolls with a flail gain a +5 bonus against any target using a shield.
- ❖ **Forceful Attack:** When you hit with an opportunity attack using a flail, the target must succeed on a Brawn saving throw (DV 8 + your proficiency bonus + your Brawn modifier) or be knocked prone.

Polearm Master

- ❖ **Pommel Strike:** When you use the attack action with only a glaive, halberd, pike, quarterstaff, or a spear, you can use a bonus action to make a melee attack with the opposite end of the weapon. This attack uses the same modifiers as your normal attack with the polearm. The weapon's damage die for this attack is a d4, and the attack deals bludgeoning damage.
- ❖ **Distant Opportunity:** While you are wielding a glaive, halberd, pike, quarterstaff, or spear, other creatures provoke an opportunity attack from you when they enter the reach you have with that weapon.

Shield Master

- ❖ **Shove:** If you take the attack action on your turn, you can use a bonus action to try to shove a creature within 1 m of you with your shield.
- ❖ **Shield Defense:** If you aren't incapacitated, you can add your shield's AV bonus to any Dexterity saving throw you make against a harmful effect that targets you.
- ❖ **Shield Evasion:** If you are subjected to an effect that allows you to make a Dexterity saving throw to take only half damage, you can use your reaction to take no damage if you succeed on the saving throw, interposing your shield between yourself and the source of the effect.

Spear Mastery

- ❖ **Accuracy:** You gain a +1 bonus to attack rolls you make with a weapon from the spears proficiency group.
- ❖ **Deadly Spear:** When you use a spear, its damage die changes from a d6 to a d8, and from a d8 to a d10 when wielded with two hands. (This benefit does not affect if another feature has already improved the weapon's die.)
- ❖ **Brace:** You can set your weapon from the spears proficiency group to receive a charge. As a bonus action, choose a creature you can see that is at least 12 m away from you. If that creature moves within your weapon's reach on its next turn, you can make a melee attack against it with your weapon as a reaction. If the attack hits, the target takes an extra 1d8 piercing damage, or an extra 1d10 piercing damage if you wield the weapon with two hands. You can't use this ability if the creature used the disengage action before moving.
- ❖ **Extended Range:** As a bonus action on your turn, you can increase your reach with a weapon from the spears proficiency group by 1 m for the rest of your turn if the weapon did not already have extended reach.

Weapon Master

Ability score: Increase your Brawn or Dexterity score by 1, to a maximum of 20
You gain proficiency with all simple and martial weapons.

ARMOR FEATS

Lightly Armored

Ability score: Increase your Brawn or Dexterity score by 1, to a maximum of 20
You gain proficiency with light armor and shields.

Light Armor Master

Prerequisite: Light Armor Proficiency

Ability score: Increase your Dexterity score by 1, to a maximum of 20
Increase your AV by +1 and your Dexterity saving throw score by +4.

Moderately Armored

Prerequisite: Light Armor Proficiency

Ability score: Increase your Brawn or Dexterity score by 1, to a maximum of 20
You gain proficiency with medium armor and shields.

Medium Armor Master

Prerequisite: Medium armor proficiency

- ❖ **Stealthy:** Wearing medium armor doesn't impose disadvantage on your Stealth (Dex) checks.
- ❖ **Maneuverability:** When you wear medium armor, you can add +3, rather than +2, to your AV if you have a Dexterity of 16 or higher.

Heavily Armored

Prerequisite: Medium armor proficiency

Ability score: Increase your Brawn score by +1, to a maximum of 20.

You gain proficiency with heavy armor and shields.

Heavy Armored Master

Prerequisite: Heavy armor proficiency

Ability score: Increase your Brawn score by +1, to a maximum of 20

While you are wearing heavy armor, bludgeoning, piercing, and slashing damage that you take from non-magical weapons is reduced by -3 points of damage.

SKILL FEATS

Acrobat

Ability score: Increase your Brawn or Dexterity score by 1, to a maximum of 20

- ❖ **Athletic:** Gain a rank in Athletics. You may gain rank 5 in the skill.
- ❖ **Light Feet:** As a bonus action, you can make a DV 15 Athletics (Dex) check. If you succeed, difficult terrain doesn't cost you extra movement until the end of your current turn.

Animal Handling

Ability score: Increase your Cunning score by 1, to a maximum of 20

- ❖ **Zoologist:** Gain a rank in Animal Handling. You may gain rank 5 in the skill.
- ❖ **Command Animal:** You can use a bonus action on your turn to command one friendly animal within 6 m of you that can hear you and that isn't currently following the command of someone else. You can command what action the animal will take and where it will move during its next turn, or you issue a general command that lasts for 1 minute.

Diplomat

Ability score: Increase your Manipulation score by 1, to a maximum of 20

- ❖ **Persuasive:** Gain a rank in Persuasion. You may gain rank 5 in this skill.
- ❖ **Charming:** If you spend 1 minute talking to someone who can understand what you say, you can make a Persuasion check contested by the creature's Empathy (Com). If you or your companions are fighting the creature, your check automatically fails. If your check succeeds, the target is charmed by you as long as it remains within 12 m of you and for 1 minute thereafter.

Empathic

Ability score: Increase your Composure score by 1, to a maximum of 20

- ❖ **Empathic:** Gain a rank in Empathy. You may gain rank 5 in the skill.
- ❖ **Observe:** You can use your action to try to acquire an uncanny insight about one humanoid you can see within 6 m of you. Make an Empathy (Com) check contested by the target's Deception (Pre/Man). If your check succeeds, you have advantage on attack rolls and ability checks against the target until the end of your next turn.

Historian

Ability score: Increase your Intelligence score by 1, to a maximum of 20

- ❖ **Historian:** Gain a rank in Academics (history). You may gain rank 5 in the skill.
- ❖ **Lecture:** When you take the help action to aid another creature's ability check, you can make a DV 15 History check. On a success, that creature's check gains a bonus equal to your proficiency bonus, as you share pertinent advice and historical examples. To receive this bonus, the creature must be able to understand what you're saying.

Investigator

Ability score: Increase your Cunning score by 1, to a maximum of 20

- ❖ **Investigative:** Gain a rank in Investigation. You may gain rank 5 in the skill.
- ❖ **Lie Detector:** Whenever you make an Empathy (Com) check to determine whether a creature is lying, treat a roll of 7 or lower on the d20 as an 8.
- ❖ **Quick Survey:** You can use a bonus action to make a Perception check to spot a hidden creature or object. In addition, you can use a bonus action to make an Investigation (Cun) check to uncover or decipher clues.

Medic

Ability score: Increase your Intelligence or Cunning score by 1, to a maximum of 20

- ❖ **Medic:** Gain a rank in Medicine. You may gain rank 5 in the skill.
- ❖ **First Aid:** During a short rest, you can clean and bind the wounds of up to six willing animals and humanoids. Make a DV 15 Medicine check for each creature. If you succeed a check a creature gains a number of benefits:
 - Any nonmagical poisons or diseases are cured.
 - Immune to disease until the creature finishes a long rest.
 - If the creature spends any health dice to regain health points, they regain the full value of a number of health dice equal to your proficiency bonus. Which health dice this target is up to the creature.
 - The creature gains a number of temporary health points equal to the full value of their highest health dice.

Menacing

Ability score: Increase your Presence score by 1, to a maximum of 20

- ❖ **Intimidating:** Gain a rank in Deception or Persuasion. You may gain rank 5 in the skill.
- ❖ **Demoralize:** When you take the attack action on your turn, you can replace one attack with an attempt to demoralize one humanoid you can see within 6 m of you that can see and hear you. Make a Persuasion or Deception check (depending upon what you chose above) contested by the target's Empathy (Res). If your check succeeds, the target is frightened until the end of your next turn. If your check fails, the target can't be frightened by you in this way for 1 hour.

Naturalist

Ability score: Increase your Intelligence score by 1, to a maximum of 20

- ❖ **Naturalist:** Gain a rank in Academics: Nature. You may gain rank 5 in the skill.
- ❖ **Cantrip:** You learn Druidcraft as Soul Mastery.
- ❖ **Soul Spell:** You learn Commune with Nature as Soul Mastery. You can cast this spell once per seven days.

Occultist

Ability score: Increase your Intelligence score by 1, to a maximum of 20

- ❖ **Arcanist:** Gain a rank in Occult. You may gain rank 5 in the skill.
- ❖ **Cantrip:** You learn Prestidigitation as Soul Mastery.
- ❖ **Soul Spells:** You can cast Detect Magic and Identify as Soul Mastery once per long rest.

Perceptive

Ability score: Increase your Intelligence or Composure score by 1, to a maximum of 20

- ❖ **Perceptive:** Gain a rank in Perception. You may gain rank 5 in the skill.
- ❖ **Piercing Gaze:** Being in a lightly obscured area doesn't impose disadvantage on your Perception checks if you can both see and hear.

Performer

Ability score: Increase your Dexterity or Manipulation score by 1, to a maximum of 20

- ❖ **Performer:** Gain a rank in Arts & Craft (a performance skill of your choice). You may gain rank 5 in the skill.
- ❖ **Mesmerize:** While performing, you can try to distract one humanoid you can see. The humanoid must see and hear you. Make a Dexterity or Manipulation: Arts & Craft check contested by the humanoid's Empathy (Com) check. If your check succeeds, you grab the humanoid's attention enough that it makes Perception and Investigation checks with disadvantage until you stop performing.

Quick-Fingered

Ability score: Increase your Dexterity score by 1, to a maximum of 20

- ❖ **Devious:** Gain a rank in Subterfuge. You may gain rank 5 in the skill.
- ❖ **Dipping & Lifting:** As a bonus action, you can make a Subterfuge (Dex) check to plant something on someone else, conceal an object on a creature, lift a purse, or take something from a pocket.

Silver-Tongued

Ability score: Increase your Manipulation score by 1, to a maximum of 20

- ❖ **Witty:** Gain a rank in Persuasion or Deception. You may gain rank 5 in the skill.
- ❖ **Verbal Feint:** When you take the attack action on your turn, you can replace one attack with an attempt to deceive one humanoid you can see within 18 m of you that can see and hear you. Make a Persuasion (Man) or Deception (Man) check contested by the target's Empathy (Com). If your check succeeds, your movement doesn't provoke opportunity attacks from the target and your attack rolls against it have advantage; both benefits last until the end of your next turn or until you use this ability on a different target. If your check fails, the target can't be deceived by you in this way for 1 hour.

Stealthy

Ability score: Increase your Dexterity or your Cunning score by 1, to a maximum of 20

- ❖ **Sneaky:** Gain a rank in Stealth. You may gain rank 5 in the skill.
- ❖ **Tip-Toe:** If you are hidden, you can move up to 2 m in the open without revealing yourself if you end the move in a position where you're not clearly visible.

Survivalist

Ability score: Increase your Cunning score by 1, to a maximum of 20

- ❖ **Survivalist:** Gain a rank in Survival. You may gain rank 5 in the skill.
- ❖ **Casual Forage:** You make rations or meals caught in the wild last twice as long for four Medium creatures.
- ❖ **Devious Traps:** Creatures attempting to spot a trap you have made have disadvantage to their check.
- ❖ **Insidious Traps:** Any trap that you have made that causes a creature to roll a saving throw does so with disadvantage.

Theologian

Ability score: Increase your Intelligence score by 1, to a maximum of 20

- ❖ **Theologian:** Gain a rank in Academics (one Ennead of your choice) or Academics (religion of your choice). You may gain rank 5 in the skill.
- ❖ **Cantrips:** You learn Thaumaturgy as Soul Mastery.
- ❖ **Soul Spells:** You can cast Ceremony and Sanctuary as Soul Mastery once per long rest.

TOOL FEATS

Alchemist

Ability score: Increase your Intelligence score by 1, to a maximum of 20

- ❖ **Alchemist:** Gain a rank in Academics: Alchemy. You may gain rank 5 in the skill.
- ❖ **Potion Master:** As an action, you can identify one potion within 3 m of you, as if you had tasted it. You must see the liquid for this benefit to work.
- ❖ **Healing Potion Potency:** Throughout any short rest, you can temporarily improve the potency of one potion of healing of any rarity. To use this benefit, you must have Alchemist's supplies with you, and the potion must be within reach. If the potion is drunk no before the party completes a long rest, the creature drinking the potion can forgo the potion's die roll and regain the maximum number of health points that the potion can restore.

Gourmand

Ability score: Increase your Vitality score by 1, to a maximum of 20

- ❖ **Chef:** Gain a rank in Arts & Craft: Cooking. You may gain rank 5 in the skill.
- ❖ **Sniff Out Impurity:** As an action, you can inspect a drink or plate of food within 3 m of you and determine whether it is poisoned, provided that you can see and smell it.
- ❖ **Grandma's Recipe:** During a long rest, you can prepare and serve a meal that helps you and your allies recover from the rigors of adventuring, provided you have suitable food, cook's utensils, and other supplies on hand. The meal serves up to six people, and each person who eats it regains two additional health dice at the end of the long rest. In addition, those who partake of the meal have advantage on Vitality saving throws against disease and poison for the next 24 hours.

Master of Disguise

Ability score: Increase your Manipulation or Presence score by +1, to a maximum of 20

- ❖ **Devious:** Gain a rank in Subterfuge. You may gain rank 5 in the skill.
- ❖ **Copy Likeness:** If you spend 1 hour observing a creature, you can then spend 8 hours crafting a disguise you can quickly don to mimic that creature. Making the disguise requires a disguise kit. You must make checks as normal to disguise yourself, but you can assume the disguise as an action.

SPELLCASTING

Magic in the World

Before the Enneade gifted their creations with Soul Marks, most magic in the World came from the gods. Smaller magical expression through Soul Mastery was the most common, and grand magic was generally considered divine providence. By the time of the War of Collapse, the perception of magic had thoroughly changed as the Enneade bequeathed Soul Marks and taught spells to any loyal subject they could get their hands on with some talent.

In comparison to limited magical expressions of a creature's Soul, spellcasting is a replication of the Enneade's own magical power, albeit way less potent. The Enneade are great springs of Soul energies - the most powerful form of energy in the World, which is the source of all forms of incredible creation, transformation, and destruction. For a plant or creature to come alive, they require a small amount of Soul energy. The Enneade uses this energy to give life to its Enna and perform their godlike powers. When the Enneade gave spellcasting to their subjects, they allowed them to store Soul energy as they could. With this external source of energy, the Enna and the humans could learn how to manipulate this energy into diverse magical expressions - spells.

As mortal cultures were permeated with magical knowledge and the Enneade's numbers were reduced to only seven members, the relationship between the divine and the mortals changed slightly. With their magical prowess, Enna and humans could control their environment like never before without the constant aid of the Enneade. The complete reliance on the gods for magical aid decreased even further with the discovery that magic can be fully transferred and taught between mortal to mortal, without any interjection of an Enneade. A lot of magical knowledge has been forgotten in Frostmark after the magical purge of the empire. In the other Realms, magic has become necessary for protection and authority and continues to flourish and develop.

This section introduces you to the concept of magic and spellcasting in the World of Frostmark RPG.

Soul Mastery

All living things possess a Soul. The Soul gives a creature its consciousness, and each Soul is unique because of the living being's species, biological traits, experiences, and personality. Depending upon the being's species, they start off with different amounts of Soul energy. Then, during that being's life, they accumulate training and experiences, causing their Soul to grow and personalize itself further. Through their racial heritage, when they have reached a certain maturity, a race's Soul can manifest specific powers in its members. Other times, training and activities can lead to unlocking supernatural abilities.

Any trait, feat, or ability that gives your character a supernatural capability or a magical effect, is Soul Mastery. There are also traits, feats, and abilities that can give you the ability to cast a spell as Soul Mastery. Casting a spell with Soul Mastery means that you can cast the spell without a Soul Check, without Potency requirement, or even a Soul Mark.

Soul Magic

Soul Magic is the capability to cast spells through spell slots with spells known. You purchase spell known and spell slots with the pool of Potential you receive every level up. To use Soul Magic your character must have a Soul Mark.

Soul Mark

Any character with the ability to cast spells with spell slots possesses a Soul Mark - a magical tattoo somewhere on the caster's body. The Soul Mark stores Potency used to cast spells. The tattoo's style for your character you decide, but it should be aligned with your character's theme and spells. For example, a character with many fire spells could have a tattoo with some kind of fiery design. The size of the tattoo grows and swells with the proficiency of the caster. A first-level character would start with a tattoo the size of a small symbol. For a level 20 character, the tattoo will cover most of a body part (a whole arm, leg, chest, back, etc.).

Your Soul Mark will light up as you cast spells, and thus, if you don't cover it up, it will reveal you as a caster. If you cast a spell with no somatic or verbal requirements, such as casting a spell with the Subtle Metamagic option, the Soul Mark does not shine. Because of the Soul Marks, tattooing is a normal decoration in the World. Therefore, as long as you do not cast a spell, the unactivated Soul Mark does not automatically reveal you as a caster if it is visible.

Acquiring Magic

Spellcasting requires the acquisition of two things, a Soul Mark and Soul energies (Potency). A Soul Mark is more than just ink; it requires a ritual that may include ceremonious gestures, arcane symbols, and words spoken in Copta. The ritual doesn't always look the same, depending upon which Enneade taught it to their followers.

What is always present, and a requirement, in the Soul Mark ritual is Soul energies - Potency. When a Soul Mark is created, the consumption of at least 10 Soul Potency is required. Any excess ends up in the Soul Mark, ready to use for spellcasting.

Many cults go for the easiest route by sacrificing living beings during the ritual. Archmages usually remove enough Potency from their own Soul Mark to give their apprentice a Mark. Someone fortunate could stumble upon Soul Gems with enough Potency within, or someone equally rich could buy Soul Gems if they have access to the right market. An Enneade can directly reward a character by bestowing them with a Soul Mark.

If the player wants their character to possess spellcasting, the GM and the player should work together to come up with a plausible explanation of how their character obtained their Soul Mark and how they learn spells.

What spells a player can select for their character depends upon their character's backstory and their theme. Example themes could be schools of magic like "illusion," or themes like "fire," "manipulation," "healing light," etc. This is up to the GM and the player to discuss together. Then they pick the spells that they think fit their character's theme from the spell list.

What is a Spell?

For the Enneade, magic is natural. With their vast intellect and nature consisting of pure Soul energies, they wield vast amounts of magic instinctively. They simply will use their Soul energy to take a specific form or to cause a particular effect - and it happens. However, their power, accuracy, and elegance with their own divine aspects are more profound.

Ya'ammu, the Enneade of magic and sacrifice, was the first Enneade to attempt to teach its Enna how to wield magic. Ya'ammu gave some of its knowledge to them, but its Enna couldn't manipulate their Soul to take such various forms. Ya'ammu discovered that, compared to Enneade's Soul energies, a creature's Soul wasn't as flexible in nature. Ya'ammu pondered how to turn the rigidity of a creature's Soul soft when the creature wanted to use magic. At this point, several other Enneade became interested in his research for their own various reasons. Amongst these Enneade were: Vettias, the Enneade of wisdom and skill, Moqatri, the Enneade of creation and the forge, and Amaknuphis, the Enneade of oppression and subjugation. Collaboration

between these gods was not smooth, but their individual expertise led them to groundbreaking results. Besides, this event took place long before Amaknuphis corrupted a tribe of dwarves into the duergar and would make any semblance of tolerance between him and Moqatri impossible. Together they realized that if Enna and humans would ever cast magic similar to them, they must use other Souls than their own. But Enna and humans could not interact with other creature's Souls in that way. Therefore, an intermediary device had to be created - the Soul Mark. With the Soul Mark, a human or an Enna could store Souls. Some Enneade protested against this invention, fearing that Enna and humans would steal Soul energies from them. But when war would eventually come, any advantage was accepted, and today, Soul Marks are entrenched into the World's cultures.

Still, humans and Enna were incapable of casting magic reliably. Even with the Soul Mark and the ability to use Soul energies through it, Enna and humans couldn't reliably turn the Soul energy into the magical expressions they desired. It was complicated for them, required a great deal of concentration and work, and sometimes backfire into undesired consequences. Ya'ammu had to make magic easier to use for the mortals. Ya'ammu and Vettias consulted, and then, together, they turned to Sokari, the Enneade of writing and communication.

They asked Sokari to link Soul energies and magic to the Enneades' language, Copta - a complicated but elegant language that includes both sounds and movements. Sokari informed them that such was within his power, as he was the one to create Copta, to begin with, but it would require massive amounts of Soul energies to achieve. Vettias and Sokari, while intrigued, were not willing to forfeit parts of their Soul energies enough to cripple their power forever. Ya'ammu had another relationship with self-sacrifice. For the cause of magical progress, Ya'ammu sacrificed vast amounts of his power to Sokari's spell. Ya'ammu would never recover and fade into a minor player who quickly was destroyed once the War of Collapse started, but Sokari's spell changed the destiny of mortals forever.

As magic was linked to Copta, it could be quantified, demystified, and denominated through the language. Turning sentences and words into specific magical expressions is still beyond the vast majority of mortals. Before Ya'ammu disappeared utterly, the Enneade created special magical effects in Copta and then shared them. These crafted magical effects came to be known as spells. When casting a spell without a verbal component or a somatic component, the caster still has learned the correct words and movements. Even if they do not use it in the casting, it is still within the caster's mind.

Spells can be versatile tools, weapons, or protective wards. They can deal damage or undo it, impose or remove conditions, drain life away, and restore life to the dead. Uncounted thousands of spells have been created throughout history, and many have been lost to time. Some might yet lie recorded in crumbling spellbooks hidden in ancient ruins or trapped in the minds of dead Enneade. Or they might someday be reinvented by a character who has amassed enough power and wisdom to do so.

Learning Spells

Learning Spells may come from different sources, enlightenment from a divine source, unlocking sleeping ancestry potential in your blood, learning it from an occult text, etc. Either way, once you've learned a spell, it is stored within your memory and your Soul Mark, expanding in size and complexity as you learn and can cast more spells. How this is represented is up to the player, but the chosen spells should influence the arcane markings with their theme.

How to Cast Spells

Whenever you want to cast spells you must abide by these requirements and rules.

Spellcasting Modifier

How accurate and potent your spellcasting depends upon your spellcasting modifier. Your spellcasting modifier consists of two things; your proficiency modifier and your spellcasting ability score modifier. You decide which ability score modifier you want for your character if you have spellcasting or require one for Soul Mastery.

The ability score modifier must be one of the mental or social ability scores, and once you have decided on an ability score for your spellcasting modifier it will remain that ability score modifier for the rest of the game. You should choose a spellcasting modifier for your character that makes sense for them. Which ability score modifier would your character lean towards to learn and master spellcasting?

Your spellcasting modifier is calculated as:

Proficiency bonus + ability score modifier (mental/social) = spellcasting modifier

Spell Level

Every spell has a level from 0 to 9. A spell's level is a general indicator of how powerful it is. Cantrips (level 0 spells) are simple but powerful spells that characters can cast without spell slots. The higher a spell's level, the more experienced a spellcaster must be to use the spell.

Spells Known

Spells you have available to cast are your "spells known." You can gain spells known through race traits, feats, and abilities. You can also purchase spells known by spending Potential.

Spell Slots

Regardless of how many spells a caster knows, they can only cast only a limited number of spells before resting. Manipulating and channeling Soul energy into even a simple spell is physically and mentally taxing. **You purchase spell slots which decides the number of spells** (in any combination of spells known) **of a certain level you can cast per short or long rest.** As cantrips are far more readily performed, you can cast them unlimited times. Some abilities let you cast spells without spell slots, which is then considered Soul Mastery.

You regain spell slots of level 3 and below after a short rest and recover spell slots of level 4 and above after a long rest.

Spell Attack Rolls

Some spells require the caster to make an attack roll to determine whether the spell effect hits the intended target. Your attack bonus with a spell attack equals

1d20 + spellcasting ability score modifier + proficiency bonus

Most spells that require attack rolls involve ranged attacks. Remember that you have disadvantage on a ranged attack roll if you are within 1 m of a hostile creature that can see you and that isn't incapacitated.

Saving Throws

Many spells specify that a target can make a saving throw to avoid some or all of a spell's effects. The spell specifies the ability that the target uses for the save and what happens on a success or failure. The DV to resist one of your spells equals:

8 + spellcasting ability score modifier + proficiency bonus

SOULS AND SPELLCASTING

[Souls](#) are an essential part of Soul Magic as they power your Soul Magic casting. This section presents all rules, limitations and mechanics with Souls and your Soul Magic casting.

Potency

The amount of energy within a Soul depends upon a creature's race and sometimes age. Some humanoids' Souls, like dwarves', elves' and humans', possess the trait of great potential. Through training, traumatic events, and personal growth, some humanoids' Souls grow with their experience. In game terms; The power of a Soul depends upon a creature's CR or level.

The higher the level of a spell is, the more Soul energies it requires. Soul energy is quantified in a Potency (Pot) value. To power a spell of a specific level, you require at least an equal amount of Potency in your Soul Mark. For example, a level 3 spell requires at least 3 Potency in your Soul Mark. This Potency can be just one Soul with Potency 3, or a combination of smaller Souls that equals Potency 3.

Spells of level 4 and above require at least one Soul of a specific Potency value to be cast. For example, when you cast one spell of level 4, you require at least a Potency 2 Soul in the total Soul and Potency toll. The rest of the Potency necessary to cast the level 4 spell can be of any value, as long as the end total equals at least Potency 4.

These Potency requirements can be found in this table:

Level of spell	Require at least one:
1st	Potency 1 Soul
2nd	Potency 1 Soul
3rd	Potency 1 Soul
4th	Potency 2 Soul
5th	Potency 2 Soul
6th	Potency 3 Soul
7th	Potency 3 Soul
8th	Potency 4 Soul
9th	Potency 5 Soul

Soul Check

Whenever you cast a spell, your Soul Mark must hold enough Potency (and Potency of specific values for higher level spell casting). In addition to this, whenever you cast a spell you must also decide which Souls you use in the casting if you have several options.

Souls are completely secure in Soul Marks, but as soon as a caster casts a spell, they bring out of Souls with enough Potency to cast the spell from the Soul Mark. In that moment of casting, the caster cannot pay full attention to the Souls and they have an opportunity to escape the caster. This is not a personal choice for the Souls, it is simply something in their nature.

When you cast a spell of level 1 and above, you must make a Soul Check. A Soul Check is a check to see if your character is able to keep control of the Souls used in the casting. The higher the level of the spell cast, increases the strain on the caster's concentration.

Cantrips require less attention from the caster and does not require a Soul Check. A spell cast as a ritual (see below) allows the caster to take their time with the spell and therefore also does not need to make a Soul Check. A spell that requires Soul Consumption (see below) consumes all Souls used in the casting anyway so no Soul Check is needed.

The Soul Check is the caster's spellcasting ability modifier rolled against the DV of the spell.

D20 + proficiency bonus + spellcasting ability score modifier vs. DV of the spell level

Level	DV
1st	13
2nd	14
3rd	15
4th	16
5th	17
6th	18
7th	19
8th	20
9th	22

You succeed at the Soul Check if you roll equal higher than the DV. If the D20 roll is a 1, it is always considered a Soul Check failure. If you succeed on the Soul check, you cast the spell as per normal and all the Souls used in the casting return to your Soul Mark.

If you fail the check, you still cast the spell successfully, but you lose Potency. If only 1 Soul is used in the casting, you lose that Soul. If several Souls are used in the casting, you lose one Soul at random.

Soul Fragments

Not all creatures carry Souls with Potency values of 1 and above and the Partial Soul Drain Ritual may give you less Soul energy than Potency 1. These smaller Potency values are called Soul Fragments. Fragments can only exist in three values, $\frac{1}{4}$, $\frac{1}{2}$ and $\frac{3}{4}$. Potency values of 1 and above cannot have fractions (only full values like 1, 2 and 3).

A cantrip only requires $\frac{1}{2}$ Potency to be successfully cast, but Soul Fragments cannot be used to cast spells of all levels. $\frac{1}{4}$ Soul Fragments can be used to cast spells of level 0 and 1, but not level 2 and above. No Soul Fragments can be added to the Potency count for spells level 4 and above.

Transforming Soul Fragments

Any caster with a Soul Mark it can intrinsically transform Soul Fragments into a Potency 1 Soul if they want to. By spending 10 minutes in focused concentration, a caster can take at least 1.5 Potency and turn it into Potency 1, consuming (losing) $\frac{1}{2}$ Potency in the process. Any excess of this 1.5 Potency value is also lost. If you would lose concentration during this process you still consume $\frac{1}{2}$ Potency and the rest of the Potency remain untransformed. You will have to start again with the process, consuming 0.5 Soul Power again. You decide from which source $\frac{1}{2}$ Potency is spent. Potency cannot exist in fractions above $\frac{3}{4}$ Potency, so any excess of the Soul consumed is also lost.

For example, if you would consume $\frac{1}{2}$ of a Potency 2 Soul, it cannot end up as 1.5. Instead 1 Potency is consumed and the Soul is left as a Potency 1 Soul. On the other hand, if you would consume $\frac{1}{2}$ Potency from a $\frac{3}{4}$ Potency Fragment, $\frac{1}{4}$ is left of the Soul.

You create a new Soul this way with Potency 1. It is considered a whole and cannot be broken down into Fragments. This way you can add together Soul Fragments in your Soul Mark into higher Potency Souls for spell level requirements.

Casters who have the Partial Soul Drain trait can form Souls into even higher Potency values. The process takes the same amount of time and requires concentration. These casters can transform Soul Fragments and normal Potency Souls into higher Potency Souls. The Consumption cost has no limitations of specific Potency values, any Soul Potency can be used to pay it.

The Consumption tax increases with the Potency of the new Soul:

New Pot.	Consumption Pot. Cost
2	1
3	1
4	2
5	2
6	3
7	3
8	4
9	5

The Church of Riahn instructs their priests that combining Souls, which they describe as "maturing" the power that has been bestowed onto them by Riahn, is done through prayer sessions. Whilst not a requirement, the prayer session does offer the necessary concentration required and can be an effective tool to teach discipline.

Losing and Releasing Souls

Losing a Soul means that you have lost control of it and you must subtract it from your available Souls. When the Soul has left a caster for good it disappears to rejoin the mass of Soul energies present in the World or within an Enneade.

On the other hand, consumption of a Soul's Potency depletes the Soul. A depleted Soul loses identity, personality and memories. If a Soul's Potency is completely consumed, the Soul's experiences and personality disappears, and it is reduced to a single spark of Soul energy - the spark that their unconscious body received at birth from the World or an Enneade. That spark is too small and too elusive for any caster to control, and it rejoins the Soul Energies of the World or an Enneade.

If a caster would die, the Soul Mark power ceases to function. At the start of your turn after death, a random Soul escapes your Soul Mark until there's nothing left inside.

Resurrection and Souls

To resurrect a creature, their Soul must be somewhat intact. Resurrecting a creature whose Soul hasn't been drained simply means that the spell recalls Soul to the body and heals the creature to a point where the body can sustain life. While it is a harrowing event, it doesn't necessarily need to negatively impact the creature.

Resurrection spells can also trump Soul Marks. If a caster has drained a creature of its Soul, the spellcaster who cast the resurrection spell must roll a Resolve saving throw against DV 10 + the owner of the Soul Mark's level (or CR)/2 (min 10). The resurrection spell forces the Soul out of the Soul Mark and into its original body on a success. On a fail, the Soul Mark keeps the Soul, and the resurrection spell fails.

If a Soul has been partially consumed, a resurrected creature will not be the same person anymore. Severe memory loss, loss of levels, personality change, lethargy, and other mental issues may afflict the creature - for a period or forever. The GM and/or the player decide what such a fate will do to a creature, as well as how and if it can be treated or recovered.

A Soul that is wholly consumed cannot be resurrected. Nothing of the original identity is left, and the Soul energy wouldn't be enough to cause the mature body to function anyway.

Giving Souls

Creatures can also give Souls to each other safely by spending 1 minute in concentration. If concentration is disturbed, the Soul is lost. This can also be performed as an action, but the one transferring the Soul to another must make a Resolve saving throw against a DV of 10 + Potency of the Soul (min 10). On a success, the Soul is given to the other spellcaster, on a fail the Soul is lost

Soul Drain Ritual

How a character acquires Potency in their Soul Mark is through a Soul Drain ritual. A Soul Drain ritual requires an undrained corpse that has not been dead for more than 6 minutes. You cannot Soul Drain a corpse that doesn't have Souls (like a skeleton or zombie created through the *Animate Dead* spell). Performing a Soul Drain ritual usually takes an action.

The ability to perform a Soul Drain ritual is automatically given to a creature when they gain a Soul Mark. If a character is devoted to an Enneade, they might reveal their preferred Soul Drain ritual to the character. Otherwise, the creature chooses their own ritual. How the Soul Drain ritual is performed is for thematic reasons and to add flavor to the ritual.

Soul Drain Ritual on other Spellcasters

When a spellcaster has recently died, another spellcaster with a Soul Mark can attempt to catch one Soul escaping the spellcaster. Within 1 minute of the spellcaster's death, one creature can try to gain control of one random Soul that is slipping out of the dead spellcaster's Soul Mark. The spellcasters trying to catch a Soul must make a DV 15 Resolve saving throw. On a failure, they fail to catch any Soul and on a success they catch a Soul at random.

Enneade Rituals and other Example Rituals

Riahn

Utter a sentence or two of genuine respect to your fallen foe or found treasure and then seek the sun with your eyes, let it burn your vision slightly, in that blinding moment, the Soul is yours. If there is no sun to be found, close your eyes, and see your mind's sun. The ritual is a bonus action to perform in direct sunlight, two actions in complete Darkness and in all other light environments an action to perform.

Gera

The body must return to the natural cycle of the world. Either a part must be eaten or laid to rest in the earth to be decayed. Devotees of Gera make it a habit to carry around a pouch of dirt, so whenever they are in areas where digging is impossible, they can cut off a lock of hair, a nail, take some blood, or even a body part, and place it within the dirt to complete the ritual.

Teranis

Acknowledge what your foe taught you before they died, or recollect a valuable lesson you've learned in the past. Then make a cut into their forehead so their Soul can seep out of them and into your control.

Lapuana

You must justify why the premature end of their life will serve you better than their continued existence. It does not need to be significant but needs to be honest. Then, shed a tear, stop blood flow, or pour a drink in their mouth, or perform some other kind of shift or movement of liquid.

Borias

Even when they're dead, you must show your superiority to bring the message through - you are stronger. You must somehow mutilate the corpse, break a bone, sever the head, take a trophy, etc. No pretty words are necessary.

Suhlmis

Offer a performance, creation, or even money to the dead, to lure their spirit to you.

Vegomo

You must inspect the host of the Soul you're about to drain to discover some nugget of information about them. When enlightenment has been reached, the Soul is yours.

The World

- ❖ Lay them to rest appropriately, moving the body, cleaning something up, or giving back their dropped weapon so they can grasp it even in death.
- ❖ Drink a mouthful of their blood to pass their spirit into you.
- ❖ Whisper a secret of yours into their ear.

Feel free to come up with your own rituals and discuss them with your GM.

Priests of Riahn and Partial Soul Drain

As the Church of Riahn vehemently finds taking people's Souls to be morally evil, they teach their Priests Partial Soul Drain instead. The Church and the empire tried to erase the knowledge of Soul Drain even, and flavored Partial Soul Drain as the power given to the priests from their services to Riahn - rather than taken from the participants in a Soul Drain ritual.

In Frostmark, priests of Riahn perform Partial Soul Drain with a living person participating in a Rianish ceremony, often including spoken scriptures in Rianish and some in Copta and traditional gestures and movements. Examples of Rianish rituals that citizens may participate in can be simple blessings, birth ceremonies, coming of age ceremonies, weddings, and funerals. A Partial Soul Drain ritual takes typically 1 hour to complete, which cannot suffer prolonged disturbance. If it is sufficiently disturbed (up to the GM), the priest must redo the ceremony from the beginning. It also affects up to participants. Partial Soul Drain can also be conducted through the Ceremony spell, then only taking 10 minutes to perform but can only affect one creature at a time.

A participating creature must be able to agree to the terms set in the Soul Drain ritual; in return for a blessing, they give the bless-giver a part of their Soul energy. However, the creature participating is not required to understand what they agree to, just give their compliance. Today, there are only very few individuals that know the true nature of Souls, Soul Magic and Soul Drain in Frostmark. The empire, sacred arms, and the Church have quite successfully removed this knowledge from the public who believes Soul Marks, Soul Magic and Partial Soul Drain comes directly from Riahn.

With Partial Soul Drain, you receive a part of the participant's Potency - a fourth of their total (rounded down). If one participant cannot provide at least $\frac{1}{4}$ Soul Fragment, you do not receive any Potency. If you are performing the more extended ceremony of 1 hour and you have two participants, they could give you a $\frac{1}{4}$ Fragment if their individual Potency together adds up to at least $\frac{1}{4}$ Potency.

Creatures participating in the Partial Soul Drain Ritual

A creature receives two exhaustion levels until they finish a long rest after participating in a Partial Soul Drain ritual. And they need a full week to recover completely before they could

potentially join in another Partial Soul Drain ritual. During this time, a participant cannot level up.

If a creature would participate in a Partial Soul Drain ritual before they had rested for a week, they are afflicted with three levels of exhaustion for 4 weeks, and during that time, they cannot level up.

If the creature would participate in another Partial Soul Drain ritual during that time, they fall unconscious and start rolling death saving throws immediately. If they do not die, they are afflicted with exhaustion of level 5 for 7 weeks, and they cannot level up during this time. If they agree to a fourth Soul Drain Ritual, the participant dies, and their Soul is considered consumed.

Potency value of Souls

The Potency value of a Soul depends upon two factors; the Soul's race and its CR/level. Animals, the prototype of all life, were created with minimal potential for magical expression and supernatural growth. Animals have, therefore, the least Potency. With their valuable trait of Freedom of Worship, humans start off with the powerful Souls in comparison to their CR/level. Enna exists somewhere between animals and humans.

Animals

CR/level	Potency
CR 1/2 to CR 2	No Potency Fragment large enough to absorb
CR 3	0.25 Soul Fragment
CR 4	0.25 Soul Fragment
CR 5	0.5 Soul Fragment
CR 5	0.5 Soul Fragment
CR 6	0.75 Soul Fragment
CR 7	0.75 Soul Fragment
CR 8	1 Potency
CR 9	1 Potency
CR 10	1 Potency
CR 11	1 Potency
CR 12	2 Potency
Every 5 CR level	+1 Potency

Enna

CR/level	Potency
CR 1/2	0.5 Soul Fragment
CR 1	0.5 Soul Fragment
CR 2	1 Potency

CR 3	1 Potency
CR 4	1 Potency
CR 5	1 Potency
CR 6	2 Potency
CR 7	2 Potency
CR 8	2 Potency
CR 9	2 Potency
CR 10	3 Potency
Every 4 CR/levels thereafter	+1 Potency

Humans

CR/level	Potency
CR 1/2	0.75 Soul Fragment
CR 1	1 Potency
CR 2	1 Potency
CR 3	1 Potency
CR 4	1 Potency
CR 5	2 Potency
CR 6	2 Potency
CR 7	2 Potency
CR 8	2 Potency
CR 9	3 Potency
Every 4 CR/levels thereafter	+1 Potency

The GM is also free to decide their own Potency values for specific creatures. Perhaps a Soul has become dimmer from severe sickness or become stronger from a divine boon? The GM has the final say of how Potency that can be harvested from a creature.

SPELL MECHANICS

When a character casts any spell, the same basic rules are followed, regardless of the character's ability origin picks or the spell's effects. Each spell description begins with a block of information, including the spell's name, level, school of magic, casting time, range, components, and duration. The rest of a spell entry describes the spell's effect.

Casting Time: Bonus Action

A spell cast with a bonus action is especially swift. You must use a bonus action on your turn to cast the spell, provided that you haven't already taken a bonus action this turn. You can't cast another spell with 1 action casting time during the same turn except if **any** of the spells, either the one action spell or the bonus action spell, is level 1 or lower.

Reactions

Some spells can be cast as reactions. These spells take a fraction of a second to bring about and are cast in response to some event. If a spell can be cast as a reaction, the spell description tells you exactly when you can do so.

Longer Casting Times

Certain spells (including spells cast as rituals) require more time to cast: minutes or even hours. When you cast a spell with a casting time longer than a single action or reaction, you must spend your action each turn casting the spell, and you must maintain your concentration while doing so (see "concentration" below). If your concentration is broken, the spell fails, but you don't expend a spell slot. If you want to try casting the spell again, you must start over.

Rituals

Certain spells have a special tag: ritual. Such a spell can be cast following the normal rules for spellcasting, or the spell can be cast as a ritual. The ritual version of a spell takes 10 minutes longer to cast than normal. It also does not expend a spell or require a Soul Check as you take your time with handling the Soul.

Rituals are however lengthy processes that require great concentration. After casting several rituals per day, the caster is going to experience mental fatigue. You can cast three spells through ritual casting once per long rest with no side-effects, but any consecutive ritual casting before you take a long rest afflicts you with a level of exhaustion. However, if you cast the same spell with ritual casting more than twice before a long rest, you gain a level of exhaustion. Furthermore, if you have 5 levels of exhaustion you cannot cast a ritual spell that would cause you to gain 6 levels of exhaustion.

Components

A spell's components are the physical requirements you must meet in order to cast it. Each spell's description indicates whether it requires Verbal (V), Somatic (S), or Soul Consumption (SC) components. If you can't provide one or more of a spell's components, you are unable to cast the spell.

Verbal (V)

Most spells require the chanting of Copta, the language of the Enneade and magic. The words themselves aren't just the source of the spell's power. It also requires a particular combination of sounds that sets the vibrations of magic in motion. Thus, a character who is gagged or in an area of silence, such as one created by the *Silence* spell, can't cast a spell with a verbal component.

Somatic (S)

Spellcasting gestures might include a forceful gesticulation or an intricate set of gestures. If a spell requires a somatic component, the caster must have free use of at least one hand to perform these gestures. If a spell requires a somatic component, the caster must have free use of at least one hand to perform these gestures.

Soul Consumption (SC)

Some spells are more taxing on the Souls in your Soul Mark than others, those spells will have Soul Consumption as a component. Casting a spell with Soul Consumption results in consuming one or some Souls used in the casting. Souls that are consumed by the spell cannot be resurrected. You don't have to roll a Soul Check when casting a spell with Soul Consumption.

The Potency consumed by the spell equals half of the level of the spell slot used, rounded down, except for level 5. See the table below. This Potency does not have to be represented by one Soul, instead a total Potency amount is required. You may also consume parts of the Potency in a Soul, permanently changing that Soul's Potency going forward.

Spell Slot	Total Potency	Spell Slot	Total Potency
Cantrip	-	5th	2
1st	0.5	6th	3
2nd	1	7th	3
3rd	1	8th	4
4th	2	9th	5

Duration

A spell's duration is the length of time the spell persists. A duration can be expressed in rounds, minutes, hours, or even years. Some spells specify that their effects last until the spells are dispelled or destroyed.

Instantaneous

Many spells are instantaneous. The spell harms, heals, creates, or alters a creature or an object in a way that can't be dispelled because its magic exists only for an instant.

Concentration

Some spells require you to maintain concentration to keep their magic active. If you lose concentration, the spell, and its effects, end.

If a spell must be maintained with concentration, it is written in the spell's entry, specifically after the title of the spell in the parenthesis as "Conc." The spell specifies how long you can concentrate on it. You can end concentration at any time (no action required).

Normal activity, such as moving and attacking, doesn't interfere with concentration. The following factors can break concentration:

- ❖ **Casting another spell that requires concentration:** You lose concentration on a spell if you cast another spell that requires concentration. You can't concentrate on two spells at once.
- ❖ **Taking damage:** Whenever you take damage while you are concentrating on a spell, you must make a Resolve saving throw to maintain your concentration. The DV equals 10 or half the damage you take, whichever number is higher. If you take damage from multiple sources, such as an arrow and a dragon's breath, you make a separate saving throw for each source of damage.
- ❖ **Being incapacitated or killed:** You lose concentration on a spell if you are incapacitated or if you die.

The GM might also decide that certain environmental phenomena, such as a wave crashing over you while you're on a storm-tossed ship, require you to succeed on a DV 10 Resolve saving throw to maintain concentration on a spell.

Casting in Armor

Because of the mental focus and precise gestures required for spellcasting, you must be proficient with the armor you are wearing to cast a spell. You are otherwise too distracted and physically hampered by armor for spellcasting.

Targets

A typical spell requires you to pick one or more targets to be affected by the spell's magic. A spell's description tells you whether the spell targets creatures, objects, or a point of origin for an area of effect (described below).

Unless a spell has a perceptible effect, a creature might not know it was targeted by a spell at all. An effect like crackling lightning is obvious, but a more subtle effect, such as an attempt to read a creature's thoughts, typically goes unnoticed, unless a spell says otherwise.

A Clear Path to the Target

To target something, you must have a clear path to it, so it can't be behind total cover. If you place an area of effect at a point that you can't see and an obstruction, such as a wall, is between you and the point, the point of origin comes into being on the near side of that obstruction.

Targeting Yourself

If a spell targets a creature of your choice, you can choose yourself, unless the creature must be hostile or specifically a creature other than you. If you are in the area of effect of a spell you cast, you can target yourself.

Range

The target of a spell must be within the spell's range. A spell can either have an individual target or an area of effect. Most spells have ranges expressed in m. Some spells can target only a creature (including you) that you touch. Other spells only affect you. These spells have a range of "self".

Spells that create cones or lines of effect that originate from you also have a range of self, indicating that the origin point of the spell's effect must be you. Once a spell is cast, its effects aren't limited by its range, unless the spell's description says otherwise.

Areas of Effect

An area of effect spell allows you to affect multiple creatures at once. A spell's description specifies its area of effect, which typically has one of five different shapes: cone, cube, cylinder, line, or sphere. Every area of effect has a point of origin, a location from which the spell's energy erupts. The rules for each shape specify how you position its point of origin. Typically, a point of origin is a point in space, but some spells have an area whose origin is a creature or an object.

A spell's effect expands in straight lines from the point of origin. If no unblocked straight line extends from the point of origin to a location within the area of effect, that location isn't included in the spell's area. To block one of these imaginary lines, an obstruction must provide total cover.

Cone

A cone extends in a direction you choose from its point of origin. A cone's width at a given point along its length is equal to that point's distance from the point of origin. A cone's area of effect specifies its maximum length.

A cone's point of origin is not included in the cone's area of effect unless you decide otherwise.

Cube

You select a cube's point of origin, which lies anywhere on the face of the cubic effect. The cube's size is expressed as the length of each side. A cube's point of origin is not included in the cube's area of effect unless you decide otherwise.

Cylinder

A cylinder's point of origin is the center of a circle of a particular radius, as given in the spell description. The circle must either be on the ground or at the height of the spell effect. The energy in a cylinder expands in straight lines, from the point of origin to the perimeter of the circle, forming the base of the cylinder. The spell's effect then shoots up from the base or down from the top, to a distance equal to the height of the cylinder. A cylinder's point of origin is included in the cylinder's area of effect.

Line

A line extends from its point of origin in a straight patch up to its length and covers an area defined by its width. A line's point of origin is not included in the line's area of effect unless you decide otherwise.

Sphere

You select a sphere's point of origin and the sphere extends outward from that point. The sphere's size is expressed as a radius in m that extends from the point. A sphere's point of origin is included in the sphere's area of effect.

Combining Magical Effects

The effects of different spells add together while the durations of those spells overlap. The effects of the same spell cast multiple times don't combine, however. Instead, the most potent effect - such as the highest bonus - from those castings applies while their durations overlap.

The Schools of Magic

The schools of magic help describe spells; they have no rules of their own, although, some rules refer to the schools.

- ❖ **Abjuration:** Are spells that are protective in nature, though some of them have aggressive uses. Abjuration creates magical barriers, negates harmful effects, harms trespassers, or banishes creatures to other Realms.
- ❖ **Conjuration:** Are spells that involve the transportation of objects and creatures from one location to another. Some spells summon creatures or objects to the caster's side, whereas others allow the caster to teleport to another location. Some conjurations create objects or effects out of nothing.
- ❖ **Divination:** Are spells that reveal information, whether in the form of secrets long forgotten, glimpses of the future, the locations of hidden things, the truth behind illusions, or visions of distant people or places.
- ❖ **Enchantment:** Are spells that affect the minds of others, influencing, or controlling their behavior. Such spells can make enemies see the caster as a friend, force creatures to take a course of action, or even control another creature like a puppet.
- ❖ **Evocation:** Are spells that manipulate magical energy to produce a desired effect. Some call up blasts of fire or lightning. Others channel Soul energy to heal wounds.
- ❖ **Illusion:** Are spells that deceive the senses or minds of others. They cause people to see things that are not there, to miss things that are there, to hear phantom noises, or to remember things that never happened. Some illusions create phantom images that any creature can see, but the most insidious illusions plant an image directly in the mind of a creature.
- ❖ **Necromancy:** Are spells that manipulate the energies of life and death. Such spells can grant an extra reserve of life force, drain the life energy from another creature, create the undead, or even bring the dead back to life.
- ❖ **Transmutation:** Are spells that change the properties of a creature, object, or environment. They might turn an enemy into a harmless creature, bolster the strength of an ally, make an object move at the caster's command, or enhance a creature's innate healing abilities to rapidly recover from injury.

SPELL DESCRIPTIONS

[Down](#) below you'll find the complete list of spells sorted between the magical schools, level, and alphabetical order.

ABJURATION

[Abjuration](#) spells create effects that are protective in nature, though some of them have aggressive uses. They create magical barriers, negate harmful effects, harm trespassers, or banish creatures to other Realms.

Cantrips

Blade Ward (0, abj.)

Casting Time: 1 action

Duration: 2 rounds

Components: S, V

Range/Area: Self

Attack/Save: None

Effect: Warding

For the duration, you have resistance against bludgeoning, piercing, and slashing damage dealt by weapon attacks.

Resistance (0, abj., conc)

Casting Time: 1 action

Duration: Conc, 1 minute

Components: S

Range/Area: Self

Attack/Save: None

Effect: None

You touch one willing creature. Once before the spell ends, the target can roll a saving throw of their choice with advantage. It can roll one more die as advantage before or after making the saving throw. The spell then ends.

Level 1

Absorb Elements (1st, abj.)

Casting Time: 1 reaction

Duration: 1 round

Components: S

Range/Area: Self

Attack/Save: None

Effect: Multiple

When you are hit with a spell that deals acid, cold, fire, lightning, or thunder damage, you may spend a reaction to gain resistance against the triggering damage type. The first time you hit with a melee attack on your next turn, a target takes an extra 1d6 damage of the triggering type, and the spell ends.

At higher levels: The damage increases with 1d6 for each spell slot above 1st.

Alarm (1st, abj., ritual)

Casting Time: 1 minute

Duration: 8 hours

Components: S, V

Range/Area: 6 m

Attack/Save: None

Effect: Detection

Choose a door, a window, or an area within range that is no larger than 4 m cube. Until the spell ends, an alarm alerts you whenever a Tiny or larger creature touches or enters the warded area. When you cast the spell, you can designate creatures that won't set off the alarm. You also choose whether the alarm is mental or audible.

A mental alarm alerts you with a ping in your mind if you are within 2 km of the warded area. This ping awakens you if you are sleeping.

An audible alarm produces the sound of a handbell for 10 seconds within 12 m.

Armor of Cold (1st, abj.)

Casting Time: 1 action

Range/Area: Self

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Buff

You gain 5 temporary health points for the duration. If a creature hits you with a melee attack while you have these health points, the creature takes 5 cold damage.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, both the temporary health points and the cold damage increase by 5 for each slot level above 1st.

Ceremony (1st, abj., ritual)

Casting Time: 1 hour

Range/Area: Touch

Duration: Instant

Attack/Save: None (Can be partial Soul Drain)

Components: S, V

Effect: Buff

When you pick this spell as one of your spells known, choose an Enneade or the World. You can only cast this spell for their benefit. The Ceremony spell can be combined with Partial Soul Drain, you gain the benefits of both the spell and the ritual when you finish the casting of this spell.

When you cast the spell, choose one of the following rites, the target of which must be within 24 m of you throughout the casting. If this spell is successfully cast on a human their Soul's devotion is changed to whomever the caster is dedicated to. This spell immediately fails when this spell targets an Enna that is not naturally devoted to the same Enneade as the caster is.

- ❖ **Dedication:** You touch one humanoid who wishes to be dedicated to your Enneade's or the World's service. For the next 24 hours, whenever the target makes a saving throw, it can roll a d4 and add the number rolled to the save.
- ❖ **Naming:** You touch two parents to a small child. For the next 7 days, each target gains +1 AV and +5 HP times their proficiency bonus as temporary HP while they are within 6 m of the child. A creature can benefit from this rite again only with a new child.
- ❖ **Farewell:** You touch one corpse, and for the next 7 days, the target can't become undead by any means short of a Wish spell. If you cast this Ceremony with a Partial Soul Drain ritual, you drain the closest family member of the deceased.
- ❖ **Rising:** You touch one humanoid who is a young adult. For the next 24 hours, whenever the target makes an ability check, it can roll a d4 and add the number rolled to the ability check. A creature can benefit from this rite only once.
- ❖ **Union:** You touch adult humanoids willing to be bonded together in marriage. For the next 7 days, each target gains a +2 bonus to AV while they are within 6 m of each other. A creature can benefit from this rite again only if widowed.

Mage Armor (1st, abj.)

Casting Time: 1 action

Range/Area: Touch

Duration: 8 hours

Attack/Save: None

Components: S

Effect: Buff

You touch a willing creature who isn't wearing armor, and the target's base AV becomes 13+ its Dexterity modifier. The spell ends if the target dons armor or if you dismiss the spell as an action.

Repelling Ward (1st, abj., conc.)

Casting Time: 1 bonus action

Range/Area: 12 m

Duration: Conc, 10 minutes

Attack/Save: None

Components: S

Effect: Buff

A creature of your choice within range, granting it a +2 bonus to AV for the duration.

Sanctuary (1st, abj.)

Casting Time: 1 bonus action

Range/Area: 6 m

Duration: 1 minute

Attack/Save: Res save

Components: S, V

Effect: Warding

Until the spell ends, any creature who targets the warded creature with an attack or a harmful spell must first make a Resolve saving throw. On a failed save, the creature must choose a new

target or lose the attack or spell. This spell doesn't protect the warded creature from area effects, such as the explosion of a Fireball.

If the warded creature makes an attack, casts a spell that affects an enemy, or deals damage to another creature, this spell ends.

Shield (1st, abj.)

Casting Time: 1 reaction

Range/Area: Self

Duration: 1 round

Attack/Save: None

Components: S

Effect: Warding

Until the start of your next turn, you have a +4 bonus to AV, including against the triggering attack, and you take no damage from Magic Missile.

Level 2

Aid (2nd, abj.)

Casting Time: 1 action

Range/Area: 6 m

Duration: 8 hours

Attack/Save: None

Components: S, V

Effect: Buff

Choose up to three creatures within range. Each target's health point maximum and current health points increase by 10 for the duration.

At higher levels: A target's health points increase by an additional 5 for each slot level above 2nd.

Arcane Lock (2nd, abj.)

Casting Time: 1 action

Range/Area: Touch

Duration: Until dispelled

Attack/Save: None

Components: S, V

Effect: Utility

You touch a closed door, window, gate, chest, or another entryway, and it becomes locked for the duration. You and the creatures you designate when you cast this spell can open the object normally. You can also set a password that, when spoken within 1 m of the object, suppresses this spell for 1 minute. Otherwise, it is impassable until it is broken or the spell is dispelled or suppressed. Casting Knock on the object suppresses Arcane Lock for 10 minutes.

While affected by this spell, the object is more difficult to break or force open; the DV to break it or pick any locks on it increases by 10.

Freedom of Movement (2th, abj., conc.)

Casting Time: 1 action

Range/Area: Touch

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Buff

You touch a willing creature. For the duration, the target's movement is unaffected by difficult terrain, and spells and other magical effects can neither reduce the target's speed nor cause the target to be paralyzed or restrained.

The target can also spend 1 m of movement to automatically escape from nonmagical restraints, such as manacles or a creature that has it grappled.

Lesser Restoration (2nd, abj.)

Casting Time: 1 action

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Healing

You touch a creature and can end either one disease or one condition afflicting it. The condition can be blinded, deafened, paralyzed, or poisoned.

Pass Without A Trace (2nd, abj. conc.)

Casting Time: 1 action

Range/Area: Self (6 m)

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Buff

For the duration, each creature you choose within 6 m of you (including you) has a +10 bonus to Stealth (Dex/Cun) checks and can't be tracked except by magical means. A creature that receives this bonus leaves behind no tracks or other traces of its passage.

Protection From Conditions (2nd, abj. conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 1 minute

Attack/Save: None

Components: S, V

Effect: Warding

Until the spell ends, willing creatures equal to or lower than your proficiency bonus within 6 m of you, are protected from certain conditions.

The target can't be charmed, frightened, paralyzed, petrified, poisoned, possessed, or stunned. If the target is already affected by one of these conditions, the target has advantage on any new saving throw against the relevant effect.

Warding Bond (2nd, abj.)

Casting Time: 1 action

Range/Area: Touch

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Buff

Until this spell ends, you and a willing target become magically connected. While the target is within 12 m of you, it gains a +1 bonus to AV and saving throws, and it has resistance to all damage. Also, each time it takes damage, you take the same amount of damage.

The spell ends if you drop to 0 health points or if you and the target become separated by more than 12 m. It also ends if the spell is cast again on either of the connected creatures. You can also dismiss the spell as an action.

Level 3

Beacon of Hope (3rd, abj., conc)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 1 minute

Attack/Save: None

Components: V, S

Effect: Buff

Choose any number of creatures within range. For the duration, each target has advantage on Resolve saving throws and death saving throws, and regains the maximum number of health points possible from any healing.

Counterspell (3rd, abj.)

Casting Time: 1 reaction

Range/Area: 12 m

Duration: Instant

Attack/Save: None

Components: S

Effect: Negation

You attempt to deny a creature casting a spell. If the creature is casting a spell of 3rd level or lower, its spell fails and does not affect. If it is casting a spell of 4th level or higher, make an ability check using your spellcasting ability. The DV equals 10 + the spell's level. On a success, the creature's spell fails and does not affect.

At higher levels: The interrupted spell does not affect if its level is less than or equal to the level of the spell slot you used when you cast this spell using a spell slot of 4th level or higher.

Dispel Magic (3rd, abj.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Control

Choose one creature, object, or magical effect within range. Any spell of 3rd level or lower on the target ends. For each spell of 4th level or higher on the target, make an ability check using your spellcasting ability. The DV equals 10 + the spell's level. On a successful check, the spell ends.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, you automatically end the effects of a spell on the target if the spell's level is equal to or less than the level of the spell slot you used.

Glyph of Warding (3rd, abj.)

Casting Time: 1 hour

Range/Area: Touch

Duration: Dispelled/triggered

Attack/Save: Dex save

Components: S, V, SC

Effect: Control

When you cast this spell, you inscribe a glyph that later unleashes a magical effect. You inscribe it either on a surface (such as a table or a section of floor or wall) or within an object that can be closed (such as a book, a scroll, or a treasure chest) to conceal the glyph. The glyph can cover an area no larger than 2 m in diameter. If the surface or object is moved more than 2 m from where you cast this spell, the glyph is broken, and the spell ends without being triggered.

The glyph is nearly invisible and requires a successful Investigation check against your spell save DV to be found.

You decide what triggers the glyph when you cast the spell. For glyphs inscribed on a surface, the most typical triggers include touching or standing on the glyph, removing another object covering the glyph, approaching within a certain distance of the glyph, or manipulating the object on which the glyph is inscribed. For glyphs inscribed within an object, the most common triggers include opening that object, approaching within a certain distance of the object, or seeing or reading the glyph. Once a glyph is triggered, this spell ends.

You can further refine the trigger so the spell activates only under certain circumstances or according to physical characteristics (such as height or weight), or creature kind (for example, the ward could be set to affect aberrations or a specific race). You can also set conditions for creatures that don't trigger the glyph, such as those who say a certain password.

When you inscribe the glyph, choose explosive runes or a spell glyph:

- ❖ **Explosive Runes:** When triggered, the glyph erupts with magical energy in a 4-m-radius sphere centered on the glyph. The sphere spreads around corners. Each creature in the area must make a Dexterity saving throw. A creature takes 5d8 acid, cold, fire, lightning, or thunder damage on a failed saving throw (your choice when you create the glyph), or half as much damage on a successful one.
- ❖ **Spell Glyph:** You can store a prepared spell of 3rd level or lower in the glyph by casting it as part of creating the glyph. The spell must target a single creature or an area. The spell being stored has no immediate effect when cast in this way. When the glyph is triggered, the stored spell is cast. If the spell has a target, it targets the creature that triggered the glyph. If the spell affects an area, the area is centered on that creature. If the spell summons hostile creatures or creates harmful objects or traps, they appear as close as possible to the intruder and attack it. If the spell requires concentration, it lasts until the end of its full duration.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, the damage of an explosive runes glyph increases by 1d8 for each slot level above 3rd. If you create a spell glyph, you can store any spell of up to the same level as the slot you use for the glyph of warding.

Protection From Energy (3rd, abj., conc.)

Casting Time: 1 action

Range/Area: Touch

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Buff

For the duration, the willing creature you touch has resistance to one damage type of your choice: acid, cold, fire, lightning, or thunder.

Protection From Soul Aspects (3rd, abj.)

Casting Time: 1 action

Range/Area: 2 m (2 m cylinder)

Duration: 1 hour

Attack/Save: Pre/Man save

Components: S, V, SC

Effect: Control

You create a 2 m radius, 4 m tall cylinder of magical energy centered on a point on the ground that you can see within range. Glowing runes appear wherever the cylinder intersects with the floor or other surface.

Choose one or more of the following types of creatures: celestials, elementals, fey, fiends, or undead. The circle affects a creature of the chosen type in the following ways:

- ❖ The creature can't willingly enter the cylinder by nonmagical means. If the creature tries to use teleportation or inter-Realm travel to do so, it must first succeed on a Pre/Man saving throw.
- ❖ The creature has disadvantage on attack rolls against targets within the cylinder.
- ❖ Targets within the cylinder can't be charmed, frightened, or possessed by the creature.

When you cast this spell, you can elect to cause its magic to operate in the reverse direction, preventing a creature of the specified type from leaving the cylinder and protecting targets outside it.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, the duration increases by 1 hour for each slot level above 3rd.

Level 4

Banishment (4th, abj. conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 minute

Attack/Save: Pre/Man

Components: V, S

Effect: Banishment

You attempt to send one creature that you can see within range to another Realm. The target must succeed on a Pre/Man saving throw or be banished.

If the target is native to the Realm you're in, you banish the target to a harmless pocket realm.

While there, the target is incapacitated. The target remains there until the spell ends, at which point the target reappears in the space it left or in the nearest unoccupied space if that space is occupied.

If the target is native to a different Realm than the one you're on, the target is banished with a faint popping noise, returning to its home Realm. If the spell ends before 1 minute has passed, the target reappears in the space it left or in the nearest unoccupied space if that space is occupied. Otherwise, the target does not return.

At higher levels: You can target one additional creature for each slot level above 4th.

Death Ward (4th, abj.)

Casting Time: 1 action

Range/Area: Touch

Duration: 8 hours

Attack/Save: None

Components: V, S

Effect: Buff

You touch a creature and the first time that creature would drop to 0 health points as a result of taking damage, the target instead drops to 1 health point, and the spell ends.

If the spell is still in effect when the target is subjected to an effect that would kill it instantaneously without dealing damage, that effect is instead negated against the target, and the spell ends.

Elemental Shield (4th, abj.)

Casting Time: 1 action

Range/Area: Self

Duration: 10 minutes

Attack/Save: None

Components: S, V

Effect: Multiple

You shed bright light in a 2 m radius and dim light for an additional 2 m. You can end the spell early by using an action to dismiss it.

You gain resistance to one damage type of your choice between acid, cold, fire, lightning, poison, or thunder, for the duration.

In addition, whenever a creature within 1 m of you hits you with a melee attack, the shield erupts with elemental retribution. The attacker takes 2d8 damage to the type of shield you choose when casting this spell.

Private Sanctum (4th, abj.)

Casting Time: 10 minutes

Range/Area: 24 m

Duration: 48 hours

Attack/Save: None

Components: S, V, SC

Effect: Control

Choose an area. The area is a cube that can be as small as 1 m to as large as 20 m on each side. The spell lasts for the duration or until you use an action to dismiss it.

When you cast the spell, you decide what sort of security the spell provides, choosing any or all of the following properties:

- ❖ Sound can't pass through the barrier at the edge of the warded area.
- ❖ The barrier of the warded area appears dark and foggy, preventing vision (including darkvision) through it.
- ❖ Sensors created by divination spells can't appear inside the protected area or pass through the barrier at its perimeter.
- ❖ Creatures in the area can't be targeted by divination spells.
- ❖ Nothing can teleport into or out of the warded area.
- ❖ Realm and planar travel is blocked within the warded area.

Casting this spell on the same spot for seven days makes this effect permanent.

At higher levels: When you cast this spell using a spell slot of 5th level or higher, you can increase the size of the cube by 20 m for each slot level beyond 4th. Thus you could protect a cube that can be up to 40 m on one side by using a spell slot of 5th level.

Resilient Sphere (4th, evo., conc.)

Casting Time: 1 action

Range/Area: 6 m (sphere)

Duration: Conc, 1 minute

Attack/Save: Dex save

Components: S

Effect: Control

An unwilling creature of Large size or smaller within must make a Dexterity saving throw. On a failed save, the creature is enclosed for the duration.

Nothing, not physical objects, energy, or other spell effects, can pass through the barrier, in or out, though a creature in the sphere can breathe there. The sphere is immune to all damage, and a creature or object inside cannot be damaged by attacks or effects originating from outside, nor can a creature inside the sphere damage anything outside it.

The sphere is weightless and just large enough to contain the creature or object inside. An enclosed creature can use its action to push against the sphere's walls and thus roll the sphere at up to half the creature's speed. Similarly, the globe can be picked up and moved by other creatures.

A Disintegrate spell targeting the globe destroys it without harming anything inside it.

Stoneskin (4th, abj., conc.)

Casting Time: 1 action

Range/Area: Touch

Duration: Conc, 10 minutes

Attack/Save: None

Components: S

Effect: Buff

Until the spell ends, the target has resistance to nonmagical bludgeoning, piercing, and slashing damage.

Level 5

Antilife Shell (5th, abj. conc.)

Casting Time: 1 action

Range/Area: Self (2 m)

Duration: Conc, 1 hour

Attack/Save: None

Components: V

Effect: Control

A barrier extends out from you in a 2-m radius and moves with you, remaining centered on you and hedging out creatures other than undead and constructs. The barrier lasts for the duration.

The barrier prevents an affected creature from passing or reaching through. An affected creature can cast spells or make attacks with ranged or reach weapons through the barrier.

If you move so that an affected creature is forced to pass through the barrier, the spell ends.

Dispel Soul Aspect (5th, abj. conc.)

Casting Time: 1 action

Range/Area: Self

Duration: Conc, 1 minute

Attack/Save: None

Components: V

Effect: Buff

For the duration, celestials, elementals, fey, fiends, and undead have disadvantage on attack rolls against you.

You can end the spell early by using either of the following special functions.

- ❖ **Break Enchantment:** As your action, you touch a creature you can reach that is charmed, frightened, or possessed by a celestial, an elemental, a fey, a fiend, or an undead. The creature you touch is no longer charmed, frightened, or possessed by such creatures.
- ❖ **Dismissal:** As your action, make a melee spell attack against a celestial, a fey, a fiend, or an undead you can reach. On a hit, you attempt to drive the creature back to its home Realm. The creature must succeed on a Pre/Man saving throw or be sent back to its home Realm (if it is not there already).

Greater Restoration (5th, abj.)

Casting Time: 1 action

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Healing

You touch one creature to reduce the target's exhaustion level by one, or end one of the following effects on the target:

- ❖ One effect that charmed or petrified the target.
- ❖ One curse, including the target's attunement to a cursed magic item.
- ❖ Any reduction to one of the target's ability scores.
- ❖ One effect reducing the target's health point maximum.

Planar Binding (5th, abj.)

Casting Time: 1 hour

Range/Area: 12 m

Duration: 24 hours

Attack/Save: Pre/Man

Components: S, V, SC

Effect: Control

You attempt to bind a celestial, an elemental, a fey, or a fiend to your service. The creature must be within range for the entire casting of the spell. (Typically, the creature is first summoned into the center of an inverted Protection from Soul Aspects spell in order to keep it trapped while this spell is cast.) At the completion of the casting, the target must make a Pre/Man saving throw. On a failed save, it is bound to serve you for the duration. If the creature was summoned or created by another spell, that spell's duration is extended to match the duration of this spell.

A bound creature must follow your instructions to the best of its ability. You might command the creature to accompany you on an adventure, to guard a location, or to deliver a message. The creature obeys the letter of your instructions, but if the creature is hostile to you, it strives to twist your words to achieve its own objectives. If the creature carries out your instructions completely before the spell ends, it travels to you to report this fact if you are within the same Realm. If you are within a different Realm, it returns to the place where you bound it and remains there until the spell ends.

At higher levels: When you cast this spell using a spell slot of a higher level, the duration increases to 10 days with a 6th-level slot, to 30 days with a 7th-level slot, to 180 days with an 8th-level slot, and to a year and a day with a 9th-level spell slot.

Level 6

Forbiddance (6th, abj., ritual)

Casting Time: 10 min

Range/Area: Touch (8,000m²)

Duration: 24 hours

Attack/Save: None

Components: S, V, SC

Effect: Radiant

You designate an area up to 8,000 square meters of floor space to a height of 6 m above the floor. For the duration, creatures cannot teleport into the area or use portals, such as those created by the Gate spell, to enter the area. The spell proofs the area against Realm travel and therefore prevents creatures from accessing the area by way of the Stellar Expanse, Ethereal Dimension, or the Realm Shift spell.

In addition, the spell damage types of creatures that you choose when you cast it. Choose one or more of the following: Celestials, elementals, fey, fiends, and undead. When a chosen creature enters the spell's area for the first time on a turn or starts its turn there, the creature takes 5d10 radiant or necrotic damage (your choice when you cast this spell).

When you cast this spell, you can designate a password. A creature that speaks the password as it enters the area takes no damage from the spell.

The spell's area cannot overlap with the area of another *Forbiddance* spell. If you can cast this spell in the same area for seven days straight the effects of the spell lasts for seven months instead (this effect triggers automatically on the eighth day), or until dispelled.

Globe of Invulnerability (6th, abj., conc.)

Casting Time: 1 action

Range/Area: Self (2 m)

Duration: Conc, 1 minute

Attack/Save: None

Components: V

Effect: Negation

You create a barrier in a 2 m radius around you. Any spell of 5th level or lower cast from outside the barrier cannot affect creatures or objects within it, even if the spell is cast using a higher-level spell slot. Such a spell can target creatures and objects within the barrier, but the spell does not affect them. Similarly, the area within the barrier is excluded from the areas affected by such spells.

At higher levels: When you cast this spell using a spell slot of 7th level or higher, the barrier blocks spells of one level higher for each slot level above 6th.

Guards and Wards (6th, abj.)

Casting Time: 10 minutes

Range/Area: Touch (100 m²)

Duration: 24 hours

Attack/Save: None

Components: S, V, SC

Effect: Control

You create a ward that protects up to 100 square meters of floor space (an area 10 meters square, or one hundred 1 meter squares or fifty 2 meter squares). The warded area can be up to 4 m tall and shaped as you desire. You can ward several stories of a stronghold by dividing the area among them, as long as you can walk into each contiguous area while you are casting the spell. When you cast this spell, you can specify individuals that are unaffected by any or all of the effects that you choose. You can also specify a password that, when spoken aloud, makes the speaker immune to these effects.

Guards and Wards create the following effects within the warded area.

- ❖ **Corridors:** Fog fills all the warded corridors, making them heavily obscured. In addition, at each intersection or branching passage offering a choice of direction, there is a 50 percent chance that a creature other than you will believe it is going in the opposite direction from the one it chooses.
- ❖ **Doors:** All doors in the warded area are magically locked as if sealed by an arcane lock spell. In addition, you can cover up to ten doors with an illusion (equivalent to the illusory object function of the minor illusion spell) to make them appear as plain sections of wall.
- ❖ **Stairs:** Webs fill all stairs in the warded area from top to bottom, as the web spell. These strands regrow in 10 minutes if they are burned or torn away while Guards and Wards last.
- ❖ **Other Spell Effect:** You can place your choice of one of the following magical effects within the warded area of the stronghold.
 - Place Light (dancing) in four corridors. You can designate a simple program that the lights repeat as long as Guards and Wards lasts.
 - Place Magic Mouth in two locations.

- Place Stinking Cloud in two locations. The vapors appear in the places you designate; they return within 10 minutes if dispersed by wind while Guards and Wards last.
- Place a constant Gust of Wind in one corridor or room.
- Place a Suggestion in one location. You select an area of up to 1 m square, and any creature that enters or passes through the area receives the Suggestion mentally.

The whole warded area radiates magic. A Dispel Magic cast on a specific effect, if successful, removes only that effect.

You can create a permanently guarded and warded structure by casting this spell there every day for 7 days.

Primordial Ward (6th, abj., conc)

Casting Time: 1 action

Range/Area: Self

Duration: Conc, 1 minute

Attack/Save: None

Components: S, V

Effect: Warding

You have resistance to acid, cold, fire, lightning, and thunder damage for the spell's duration.

When you take damage of one of those types, you can use your reaction to gain immunity to that type of damage, including against the triggering damage.

If you do so, the resistances end, and you have the immunity until the end of your next turn, at which time the spell ends.

Level 7

Forcecage (7th, evo.)

Casting Time: 1 action

Range/Area: 20 m (square)

Duration: 1 hour

Attack/Save: Pre/Man save

Components: S, V, SC

Effect: Control

This spell can create a force cage or a solid box, as you choose. The shape of a cage can be up to 4 m on a side and is made from 0.1 m diameter bars spaced 0.1 m apart. The shape of a box can be up to 2 m on a side, creating a solid barrier that prevents any matter from passing through it and blocking any spells cast into or out from the area.

When you cast the spell, any creature that is completely inside the cage's area is trapped.

Creatures only partially within the area, or those too large to fit inside the area, are pushed away from the center of the area until they are completely outside the area.

A creature inside the cage cannot leave it by nonmagical means. If the creature tries to use Teleportation or inter-realm travel to leave the cage, it must first make a Pre/Man saving throw.

On a success, the creature can use that magic to exit the cage. On a failure, the creature cannot exit the cage and wastes the use of the spell or effect. The cage also extends into the Ethereal Dimension, blocking ethereal travel. This spell cannot be dispelled by Dispel Magic.

Symbol (7th, abj.)

Casting Time: 1 minute

Range/Area: 12 m radius

Duration: Dispelled/triggered

Attack/Save: None

Components: S, V, SC

Effect: Necrotic

When you cast this spell, you inscribe a glyph either on a surface (such as a section of floor, a wall, or a table) or within an object that can be closed to conceal the glyph (such as a book, a scroll, or a treasure chest). If you choose a surface, the glyph can cover an area of the surface no larger than 2 m in diameter. If you choose an object, that object must remain in its place; if the object is moved more than 2 m from where you cast this spell, the glyph is broken, and the spell ends without being triggered.

The glyph is nearly invisible, requiring an Investigation (Cun) check against your spell save DV to find it.

You decide what triggers the glyph when you cast the spell. For glyphs inscribed on a surface, the most typical triggers include touching or stepping on the glyph, removing another object covering it, approaching within a certain distance of it, or manipulating the object that holds it.

For glyphs inscribed within an object, the most common triggers are opening the object, approaching within a certain distance of it, or seeing or reading the glyph. You can further refine the trigger so the spell is activated only under certain circumstances or according to a creature's physical characteristics (such as height or weight), or physical kind (for example, the ward could be set to affect Hags or Shapechangers). You can also specify creatures that don't trigger the glyph, such as those who say a certain password. When you inscribe the glyph, choose one of the options below for its effect. Once triggered, the glyph glows, filling a 12 m radius sphere with dim light for 10 minutes, after which time the spell ends. Each creature in the sphere when the glyph activates is targeted by its effect, as is a creature that enters the sphere for the first time on a turn or ends its turn there.

- ❖ **Death:** Each target must make a Vitality saving throw, taking 10d10 necrotic damage on a failed save, or half as much damage on a successful save.
- ❖ **Discord:** Each target must make a Vitality saving throw. On a failed save, a target bickers and argues with other creatures for 1 minute. During this time, it is incapable of meaningful communication and has disadvantage on attack rolls and ability checks.
- ❖ **Fear:** Each target must make a Resolve saving throw and becomes frightened for 1 minute on a failed save. While frightened, the target drops whatever it is holding and must move at least 6 m away from the glyph on each of its turns, if able.
- ❖ **Hopelessness:** Each target must make a Composure saving throw. On a failed save, the target is overwhelmed with despair for 1 minute. During this time, it can't attack or target any creature with harmful abilities, spells, or other magical effects.
- ❖ **Insanity:** Each target must make an Int/Cun saving throw. On a failed save, the target is driven insane for 1 minute. An insane creature can't take actions, can't understand what other creatures say, can't read, and speaks only in gibberish. The GM controls its movement, which is erratic.
- ❖ **Pain:** Each target must make a Vitality saving throw and becomes incapacitated with excruciating pain for 1 minute on a failed save.
- ❖ **Sleep:** Each target must make a Resolve saving throw and falls unconscious for 10 minutes on a failed Save. A creature awakens if it takes damage or if someone uses an action to shake or slap it awake.
- ❖ **Stunning:** Each target must make a Composure saving throw and becomes stunned for 1 minute on a failed save.

Level 8

Antimagic Field (8th, abj., conc.)

Casting Time: 1 action

Range/Area: Self (2 m)

Duration: Conc, 1 hour

Attack/Save: None

Components: V

Effect: Control

A 2 m radius invisible sphere surrounds you. Within the sphere, spells cannot be cast, summoned creatures disappear, and even magic items become mundane. Until the spell ends, the sphere moves with you, centered on you.

Spells and other magical effects, except those created by an artifact or a deity, are suppressed in the sphere and cannot protrude into it. A slot expended to cast a suppressed spell is consumed. While an effect is suppressed, it does not function, but the time it spends suppressed counts against its duration.

- ❖ **Targeted Effects:** Spells and other magical effects, such as magic missile and charm person, that target a creature or an object in the sphere do not affect that target.
- ❖ **Areas of Magic:** The area of another spell or magical effect, such as Fireball, cannot extend into the sphere. If the sphere overlaps an area of magic, the part of the area that is covered by the sphere is suppressed. For example, the flames created by a Wall of Fire are suppressed within the sphere, creating a gap in the wall if the overlap is large enough.
- ❖ **Spells:** Any active spell or another magical effect on a creature or an object in the sphere is suppressed while the creature or object is in it.
- ❖ **Magic Items:** The properties and powers of magic items are suppressed in the sphere. For example, a longsword, +1 in the sphere functions as a nonmagical longsword.

A magic weapon's properties and powers are suppressed if it is used against a target in the sphere or wielded by an attacker in the sphere. If a magic weapon or a piece of magic ammunition fully leaves the sphere (for example, if you fire a magic arrow or throw a magic spear at a target outside the sphere), the magic of the item ceases to be suppressed as soon as it exists.

- ❖ **Magical Travel:** Teleportation and Realm travel fail to work in the sphere, whether the sphere is the destination or the departure point for such magical travel. A portal to another location, as well as an opening to an extradimensional space such as that created by the Teleportation Circle spell, temporarily closes while in the sphere.
- ❖ **Creatures and Objects:** A creature or object summoned or created by magic temporarily winks out of existence in the sphere. Such a creature instantly reappears once the space the creature occupied is no longer within the sphere.
- ❖ **Dispel Magic:** Spells and magical effects such as Dispel Magic do not affect the sphere. Likewise, the spheres created by different Antimagic Field spells do not nullify each other.

Holy Aura (8th, abj., conc.)

Casting Time: 1 action

Range/Area: Self (6 m radius)

Duration: Conc, 1 minute

Attack/Save: Vit save

Components: S, V

Effect: Blinded

Creatures of your choice in that radius when you cast this spell shed dim light in a 1 m radius and have advantage on all saving throws and other creatures have disadvantage on attack rolls against them until the spell ends. In addition, choose a creature type (undead, fiend, celestial, etc.), when that creature type hits an affected creature with a melee attack, the aura flashes with brilliant light. The attacker must succeed on a Vitality saving throw or be blinded until the spell ends.

Mind Blank (8th, abj.)

Casting Time: 1 action

Range/Area: Self

Duration: 24 hours

Attack/Save: None

Components: S, V

Effect: Buff

Until the spell ends, one willing creature you touch is immune to psychic damage, any effect that would sense its emotions or read its thoughts, divination spells, and the charmed condition. The spell even foils Wish spells and spells or effects of similar power used to affect the target's mind or to gain information about the target.

Level 9

Imprisonment (9th, abj.)

Casting Time: 1 minute

Range/Area: 6 m

Duration: Until dispelled

Attack/Save: Res save

Components: S, V, SC

Effect: Restrained

The target must succeed on a Resolve saving throw or be bound by the spell; if it succeeds, it is immune to this spell if you cast it again. While affected by this spell, the creature doesn't need to breathe, eat, or drink, and it doesn't age. Divination spells can't locate or perceive the target. When you cast the spell, you choose one of the following forms of imprisonment.

- ❖ **Burial:** The target is entombed far beneath the earth in a sphere of magical force that is just large enough to contain the target. Nothing can pass through the sphere, nor can any creature teleport or use Realm or planar travel to get into or out of it.
- ❖ **Chaining:** Heavy chains, firmly rooted in the ground, hold the target in place. The target is restrained until the spell ends, and it can't move or be moved by any means until then.
- ❖ **Minimus Containment:** The target shrinks to a height of 2 cm and is imprisoned inside a gemstone or similar object. Light can pass through the gemstone normally (allowing the target to see out and other creatures to see in), but nothing else can pass through, even utilizing teleportation or Realm or planar travel. The gemstone can't be cut or broken while the spell remains in effect.

❖ **Slumber:** The target falls asleep and can't be awoken.

During the casting of the spell, in any of its versions, you can specify a condition that will cause the spell to end and release the target. The condition can be as specific or as elaborate as you choose, but the GM must agree that the condition is reasonable and has a likelihood of coming to pass. The conditions can be based on a creature's name, identity, or deity but otherwise must be based on observable actions or qualities and not based on intangibles such as level, class, or health points.

A Dispel Magic spell can end the spell only if it is cast as a 9th-level spell, targeting either the prison or the special component used to create it.

Prismatic Wall (9th, abj.)

Casting Time: 1 action

Range/Area: 12 m

Duration: 1 minute

Attack/Save: None

Components: S, V, SC

Effect: Energy

You create a wall up to 18 m long, 6 m high, and 2 cm thick, centered on a point you can see within range. Alternatively, you can shape the wall into a sphere up to 6 m in diameter centered on a point you choose within range. The wall remains in place for the duration. If you position the wall so that it passes through a space occupied by a creature, the spell fails, and your action and the spell slot are wasted.

The wall sheds bright light out to a range of 20 m and dim light for an additional 20 m. You and creatures you designate at the time you cast the spell can pass through and remain near the wall without harm. If another creature that can see the wall moves to within 4 m of it or starts its turn there, the creature must succeed on a Vitality saving throw or become blinded for 1 minute.

The wall consists of seven layers, each with a different color. When a creature attempts to reach into or pass through the wall, it does so one layer at a time through all the wall's layers. As it passes or reaches through each layer, the creature must make a Dexterity saving throw or be affected by that layer's properties as described below.

The wall can be destroyed, also one layer at a time, in order from red to violet, by means specific to each layer. Once a layer is destroyed, it remains so for the duration of the spell. Antimagic Field does not affect the wall and Dispel Magic can affect only the violet layer.

1. Red: The creature takes 10d6 fire damage on a failed save, or half as much damage on a successful one. While this layer is in place, nonmagical ranged attacks cannot pass through the wall. The layer can be destroyed by dealing at least 25 cold damage to it.

2. Orange: The creature takes 10d6 acid damage on a failed save, or half as much damage on a successful one. While this layer is in place, magical ranged attacks cannot pass through the wall. The layer is destroyed by a strong wind.

3. Yellow: The creature takes 10d6 lightning damage on a failed save, or half as much damage on a successful one. This layer can be destroyed by dealing at least 60 force damage to it.

4. Green: The creature takes 10d6 poison damage on a failed save, or half as much damage on a successful one. A Passwall spell, or another spell of equal or greater level that can open a portal on a solid surface, destroys this layer.

5. Blue: The creature takes 10d6 cold damage on a failed save, or half as much damage on a successful one. This layer can be destroyed by dealing at least 25 fire damage to it.

6. Indigo: On a failed save, the creature is restrained. It must then make a Vitality saving throw at the end of each of its turns. If it successfully saves three times, the spell ends. If it fails its save three times, it permanently turns to stone and is subjected to the petrified condition. The successes and failures do not need to be consecutive; keep track of both until the creature collects three of a kind. While this layer is in place, spells cannot be cast through the wall. The layer is destroyed by bright light shed by a Daylight spell or a similar spell of equal or higher level.

7. Violet: On a failed save, the creature is blinded. It must then make a Resolve saving throw at the start of your next turn. A successful save ends the blindness. If it fails that save, the creature is transported to another Realm of the GM's choosing and is no longer blinded. (Typically, a creature that is in a Realm that isn't its home Realm is banished home, while other creatures are usually cast into the Stellar Expanse or Ethereal

Dimension.) This layer is destroyed by a Dispel Magic spell or a similar spell of equal or higher level that can end spells and magical effects.

CONJURATION

[Conjuration](#) spells create effects that involve the transportation of objects and creatures from one location to another. Some spells summon creatures or objects to the caster's side, whereas others allow the caster to teleport to another location. Some conjurations create objects or effects out of nothing.

Cantrips

Acid Splash (0, conj.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Acid

Choose one or two creatures you can see within range. If you choose two, they must be within 1 m of each other. A target must succeed on a Dexterity saving throw or take 1d6 acid damage. This spell's damage increases by 1d6 when you reach 5th total level (2d6), 11th total level (3d6), and 17th total level (4d6).

Create Bonfire (0, conj., conc.)

Casting Time: 1 action

Range/Area: 12 m (1 m cube)

Duration: Conc, 1 minute

Attack/Save: Dex save

Components: S, V

Effect: Fire

Designate a square within range that you can see. Until the spell ends, the bonfire fills a 1 m cube. Any creature in the bonfire's space when you cast the spell must succeed on a Dexterity saving throw or take 1d8 fire damage. A creature must also make the saving throw when it moves into the bonfire's space for the first time on a turn or ends its turn there.

The bonfire ignites flammable objects in its area that aren't being worn or carried.

The spell's damage increases by 1d8 when you reach 5th total level (2d8), 11th total level (3d8), and 17th total level (4d8).

Mage Hand (0, conj.)

Casting Time: 1 action

Range/Area: 6 m

Duration: 1 minute

Attack/Save: None

Components: S, V

Effect: Utility

An invisible hand appears at a point you choose within range. The hand lasts for the duration or until you dismiss it as an action. The hand vanishes if it is ever more than 6 m away from you or if you cast this spell again.

You can use your action to control the hand. You can use the hand to manipulate an object, open an unlocked door or container, stow or retrieve an item from an open container, or pour the contents out of a vial. You can move the hand up to 6 m each time you use it.

The hand can't attack, activate magic items, or carry more than 5 kg.

Poison Spray (0, conj.)

Casting Time: 1 action

Range/Area: 2 m

Duration: Instant

Attack/Save: Vit save

Components: S, V

Effect: Poison

The target must succeed on a Vitality saving throw or take 1d12 poison damage.

This spell's damage increases by 1d12 when you reach 5th total level (2d12), 11th total level (3d12), and 17th total level (4d12).

Sword Burst (0, conj.)

Casting Time: 1 action

Range/Area: Self (1 m radius)

Duration: Instant

Attack/Save: Dex save

Components: V

Effect: Force

Each creature within range, other than you, must succeed on a Dexterity saving throw or take 1d6 force damage.

At higher levels: This spell's damage increases by 1d6 when you reach 5th level (2d6), 11th level (3d6), and 17th level (4d6).

Level 1

Arms of An'her (1st, conj.)

Casting Time: 1 action

Range/Area: Self (2 m radius)

Duration: Instant

Attack/Save: Br save

Components: S, V

Effect: None

Each creature in a 2 m area must make a Brawn saving throw. On a failed save, a target takes 2d6 necrotic damage and cannot take reactions until its next turn. On a successful save, the creature takes half damage, but suffers no other effect.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, the damage increases by 1d6 for each slot level above 1st.

Entangle (1st, conj., conc.)

Casting Time: 1 action

Range/Area: 18 m (4 m square)

Duration: Conc, 1 minute

Attack/Save: Br save

Components: S, V

Effect: Restrain

Grasping weeds and vines sprout from the ground in a 4 m square starting from a point within range. For the duration, these plants turn the ground in the area into difficult terrain.

A creature in the area when you cast the spell must succeed on a Brawn saving throw or be restrained by the entangling plants until the spell ends. A creature restrained by the plants can use its action to make a Brawn check against your spell save DV. On a success, it frees itself. When the spell ends, the conjured plants wilt away.

Find Familiar (1st, conj., ritual)

Casting Time: 1 hour

Range/Area: 2 m

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Summoning

You gain the service of a familiar, a spirit that takes an animal form you choose: bat, cat, crab, frog (toad), hawk, lizard, octopus, owl, poisonous snake, fish (quipper), rat, raven, sea horse, spider, or weasel. Appearing in an unoccupied space within range, the familiar has the statistics of the chosen form, though it is a celestial, fey, or fiend (your choice) instead of a beast.

- ❖ Your familiar acts independently of you, but it always obeys your commands. In combat, it rolls its own initiative and acts on its own turn. A familiar can't attack, but it can take other actions as normal.
- ❖ When the familiar drops to 0 health points, it disappears, leaving behind no physical form. It reappears after you cast this spell again.
- ❖ While your familiar is within 20 m of you, you can communicate with it telepathically. Additionally, as an action, you can see through your familiar's eyes and hear what it hears until the start of your next turn, gaining the benefits of any special senses that the familiar has. During this time, you are deaf and blind concerning your own senses.
- ❖ As an action, you can temporarily dismiss your familiar. It disappears into a pocket dimension where it awaits your summons. Alternatively, you can dismiss it forever. As an action, while it is temporarily dismissed, you can cause it to reappear in any unoccupied space within 6 m of you.

- ❖ You can't have more than one familiar at a time. If you cast this spell while you already have a familiar, you instead cause it to adopt a new form. Choose one of the forms from the above list. Your familiar transforms into the chosen creature.
- ❖ Finally, when you cast a spell with a range of touch, your familiar can deliver the spell as if it had cast the spell. Your familiar must be within 20 m of you, and it must use its reaction to deliver the spell when you cast it. If the spell requires an attack roll, you use your attack modifier for the roll.

Fog Cloud (1st, conj., conc)

Casting Time: 1 action

Range/Area: 24 m (4 m radius sphere)

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Control

You create a 4 m radius sphere of fog centered on a point within range. The sphere spreads around corners, and its area is heavily obscured. It lasts for the duration or until a wind of moderate or greater speed (at least 5 m/s) disperses it.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, the radius of the fog increases by 4 m for each slot level above 1st.

Hail of Thorns (1st, conj., conc)

Casting Time: 1 bonus action

Range/Area: Self

Duration: Conc, up to 1 min

Attack/Save: Dex save

Components: V

Effect: Piercing

The next time you hit a creature with a ranged weapon attack before the spell ends, this spell creates a rain of thorns that sprouts from your ranged weapon or ammunition. In addition to the normal effect of the attack, the target of the attack, and each creature within 1 m of it must make a Dexterity saving throw. A creature takes 1d10 piercing damage on a failed save, or half as much damage on a successful one.

At higher levels: If you cast this spell using a spell slot of 2nd level or higher, the damage increases by 1d10 for each slot level above 1st (to a maximum of 6d10).

Ice Knife (1st, conj.)

Casting Time: 1 action

Range/Area: 12 m (1 m radius)

Duration: Instant

Attack/Save: Dex save

Components: S

Effect: Cold

You create a shard of ice and fling it at one creature within range. Make a ranged spell attack against the target. On a hit, the target takes 2d6 piercing damage. Hit or miss, the shard then explodes. To determine where the Ice Knife impacts if you would miss, you roll a 1d4 and a 1d8 or 1d6. The 1d4 determines how many meters away from the intended target the Ice Knife lands at. Roll a 1d8 to determine which direction the Ice Knife lands at for a square grid and a 1d6 for a hex grid. Any target where the Ice Knife lands and each creature within 1 m of it must succeed on a Dexterity saving throw or take 1d10 cold damage.

At higher levels: For each higher even spell slot you cast this spell at, increase the piercing damage with 1d6. For each higher odd spell slot you cast this spell at, increase the cold damage with a 1d10.

Unseen Servant (1st, conj., ritual)

Casting Time: 1 action

Range/Area: 12 m

Duration: 1 hour

Attack/Save: None

Components: S

Effect: Control

This spell creates an invisible, mindless, shapeless, force that performs simple tasks at your command until the spell ends. The servant springs into existence in an unoccupied space on the ground within range. It has AV 10, 1 health point, and a Brawn score of 2, and it can't attack. If it drops to 0 health points, the spell ends.

Once on each of your turns as a bonus action, you can mentally command the servant to move up to 3 m and interact with an object. The servant can perform simple tasks that a human servant could do, such as fetching things, cleaning, mending, folding clothes, lighting fires, serving food,

and pouring wine. Once you give the command, the servant performs the task to the best of its ability until it completes the task, then waits for your next command. If you command the servant to perform a task that would move it more than 12 m away from you, the spell ends.

Level 2

Create or Destroy Food and Water (2nd, conj.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Creation

You create or destroy food and/or water. Choose either create or destroy when you cast this spell.

- ❖ You create 20 kg of food and 140 liters of clean water on the ground or in containers within range, enough to sustain up to fifteen humanoids or five steeds for 24 hours. The food is bland but nourishing and spoils if uneaten after 24 hours. Alternatively, the waterfall as rain in a 6 m cube within range, extinguishing exposed flames in the area.
- ❖ You destroy up to 20 kg of food or 140 liters of water in an open container within range. Alternatively, you destroy fog in a 6 m cube within range.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, you create or destroy 40 additional liters of water, or the size of the cube increases by 1 m, for each slot level above 1st.

Dust Devil (2nd, conj., conc.)

Casting Time: 1 action

Range/Area: Self

Duration: 1 minute

Attack/Save: Br save

Components: S

Effect: Bludgeoning

Choose an unoccupied 1 m cube of air that you can see within range. Any creature that ends its turn within 1 m of the dust devil must make a Brawn saving throw. On a failed save, the creature takes 1d8 bludgeoning damage and is pushed 2 m away. On a successful save, the creature takes half as much damage and isn't pushed.

As a bonus action, you can move the dust devil up to 6 m in any direction. If the dust devil moves over sand, dust, loose dirt, or small gravel, it sucks up the material and forms a 2 m radius cloud of debris around itself that lasts until the start of your next turn. The cloud heavily obscures its area.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, the damage increases by 1d8 for each slot level above 2nd.

Find Steed (2nd, conj.)

Casting Time: 10 minutes

Range/Area: 6 m

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Summoning

Appearing in an unoccupied space within range, the steed takes on a form that you choose: a warhorse, a pony, a camel, an elk, or a mastiff. (Your GM might allow other animals to be summoned as steeds.) The Bestiary has the statistics of the chosen form, though it is a celestial, fey, or fiend (your choice) instead of its normal type. Additionally, if your steed has an Intelligence of 5 or less, its Intelligence becomes 6, and it gains the ability to understand one language of your choice that you speak.

Your steed serves you as a mount, both in combat and out, and you have an instinctive bond with it that allows you to fight as a seamless unit. While mounted on your steed, you can make any spell you cast that targets only you also target your steed.

When the steed drops to 0 health points, it disappears, leaving behind no physical form. You can also dismiss your steed at any time as an action, causing it to disappear. In either case, casting this spell again summons the same steed, restored to its health point maximum.

While your steed is within 2 km from you, you can communicate with each other telepathically.

You cannot have more than one steed bonded by this spell at a time. As an action, you can release the steed from its bond at any time, causing it to disappear.

Flaming Sphere (2nd, conj.)

Casting Time: 1 action

Range/Area: 12 m (1 m sphere)

Duration: 1 minute

Attack/Save: Dex save

Components: S

Effect: Fire

A 1 m diameter sphere of fire appears in an unoccupied space of your choice within range and lasts for the duration. Any creature that ends its turn within 1 m of the sphere must make a Dexterity saving throw. The creature takes 2d6 fire damage on a failed save, or half as much damage on a successful one.

As a bonus action, you can move the sphere up to 6 m. If you ram the sphere into a creature, that creature must make the saving throw against the sphere's damage, and the sphere stops moving this turn.

When you move the sphere, you can direct it over barriers up to 1 m tall and jump it across pits up to 2 m wide. The sphere ignites flammable objects not being worn or carried, and it sheds bright light in a 4 m radius and dim light for an additional 4 m.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, the damage increases by 1d6 for each slot level above 2nd.

Misty Step (2nd, conj.)

Casting Time: 1 bonus action

Range/Area: Self

Duration: Instant

Attack/Save: None

Components: V

Effect: Teleportation

You teleport up to 6 m to an unoccupied space that you can see.

Web (2nd, conj., conc.)

Casting Time: 1 action

Range/Area: 12 m (4 m cube)

Duration: Conc, 1 hour

Attack/Save: Dex save

Components: S, V

Effect: Restrained

You conjure a web at a point of your choice within range. The webs fill a 4 m cube from that point for the duration. The webs are difficult terrain and lightly obscure their area.

If the webs aren't anchored between two solid masses (such as walls or trees) or layered across a floor, wall, or ceiling, the conjured web collapses on itself, and the spell ends at the start of your next turn. Webs layered over a flat surface have a depth of 1 m.

Each creature that starts its turn in the webs or that enters them during its turn must make a Dexterity saving throw. On a failed save, the creature is restrained as long as it remains in the webs or until it breaks free.

A creature restrained by the webs can use its action to make a Brawn check against your spell save DV. If it succeeds, it is no longer restrained.

The webs are flammable. Any 1 m cube of webs exposed to fire burns away in 1 round, dealing 2d4 fire damage to any creature that starts its turn in the fire.

Level 3

Call Lightning (3rd, conj., conc.)

Casting Time: 1 action

Range/Area: 24 m (12 m cylinder)

Duration: Conc, 10 minutes

Attack/Save: Dex save

Components: S, V

Effect: Lightning

A storm cloud appears in the shape of a cylinder that is 2 m tall with a 12 m radius, centered on a point you can see within range directly above you. The spell fails if you can't see a point in the air where the storm cloud could appear (for example, if you are in a room that can't accommodate the cloud).

When you cast the spell, choose a point you can see under the cloud. A bolt of lightning flashes down from the cloud to that point. Each creature within 1 m of that point must make a Dexterity

saving throw. A creature takes 3d10 lightning damage on a failed save, or half as much damage on a successful one. On each of your turns, until the spell ends, you can use your action to call down lightning in this way again, targeting the same point or a different one.

If you are outdoors in stormy conditions when you cast this spell, the spell gives you control over the existing storm instead of creating a new one. Under such conditions, the spell's damage increases by 1d10.

At higher levels: When you cast this spell using a spell slot of 4th or higher level, the damage increases by 1d10 for each slot level above 3rd.

Conjure Animals (3rd, conj., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Summoning

You summon fey spirits in the form of animals that appear in unoccupied spaces that you can see within range. Choose one of the following options for what appears:

- ❖ One beast of challenge rating 2 or lower
- ❖ Two beasts of challenge rating 1 or lower
- ❖ Four beasts of challenge rating 1/2 or lower
- ❖ Eight beasts of challenge rating 1/4 or lower

Each animal is considered also fey, and they disappear when they drop to 0 health points or when the spell ends.

The summoned creatures are friendly to you and your companions. Roll initiative for the summoned creatures as a group, which has its own turns. They obey any verbal commands that you issue to them (no action required by you). If you do not issue any commands to them, they defend themselves from hostile creatures, but otherwise, take no actions.

The Bestiary has the creatures' statistics. Sample creatures can be found below.

At higher levels: When you cast this spell using certain higher-level spell slots, you choose one of the summoning options above, and more creatures appear: twice as many with a 5th-level slot, three times as many with a 7th-level slot, and four times as many with a 9th-level slot.

Sample Creatures

CR	Creature Name
0	Frog, sea horse, baboon, badger, bat, cat, crab, deer, eagle, goat, hawk, hyena, jackal, lizard, octopus, owl, quipper, rat, raven, scorpion, spider, vulture, weasel
1/2	Blood hawk, camel, giant crab, a giant rat, giant weasel, mastiff, mule, poisonous snake, pony
1	Axe beak, boar, constrictor snake, draft horse, elk, giant badger, giant bat, giant centipede, giant frog, giant lizard, giant owl, giant poisonous snake, giant wolf spider, panther, riding a horse, a swarm of bats, a swarm of rats, a swarm of ravens, wolf
2	Ape, black bear, crocodile, giant goat, giant sea horse, giant wasp, reef shark, a swarm of insects, warhorse
3	Brown bear, dire wolf, giant eagle, giant hyena, giant octopus, a giant spider, giant toad, giant vulture, lion, a swarm of quippers, tiger
4	Giant boar, giant constrictor snake, giant elk, hunter shark, polar bear, saber-toothed tiger, a swarm of poisonous snakes

Conjure Barrage (3rd, conj.)

Casting Time: 1 action

Range/Area: Self (12 m cone)

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Ranged attack

Each creature in a 12 m cone must succeed on a Dexterity saving throw. A creature takes 3d8 damage on a failed save, or half as much damage on a successful one. As part of casting this spell, you must wield a nonmagical weapon or shoot a piece of nonmagical ammunition. The damage type is the same as that of the weapon or ammunition used with the spell.

Hunger of An'her (3rd, conj., conc.)

Casting Time: 1 action

Range/Area: 30 m

Duration: Conc, up to 1 min

Attack/Save: Dex save

Components: S, V

Effect: Cold

This spell can be heard up to 6 m away and the area is difficult terrain. No light, magical or otherwise, can illuminate the area, and creatures fully within the area are blinded.

Any creature that starts its turn in the area takes 2d6 cold damage. Any creature that ends its turn in the area must succeed on a Dexterity saving throw or take 2d6 acid damage.

Iola's Tower (3rd, conj.)

Casting Time: 10 minutes

Range/Area: 6 m

Duration: 24

Attack/Save: None

Components: S, V

Effect: None

You conjure a two-story tower made of stone, wood, or similar suitably sturdy materials. The tower can be round or square in shape. Each level of the tower is 3 m tall and has an area of up to 10 square m. Access between levels consists of a simple ladder and hatch. Each level takes one of the following forms, chosen by you when you cast the spell:

- ❖ A bedroom with a bed, chairs, chest, and magical fireplace
- ❖ A study with desks, books, bookshelves, parchments, ink, and ink pens
- ❖ A dining space with a table, chairs, magical fireplace, containers, and cooking utensils
- ❖ A lounge with couches, armchairs, side tables, and footstools
- ❖ A washroom with toilets, washtubs, a magical brazier, and sauna benches
- ❖ An observatory with a telescope and maps of the night sky
- ❖ An unfurnished, empty room

The interior of the tower is warm and dry, regardless of conditions outside. Any equipment or furnishings conjured with the tower dissipate into smoke if removed from it. At the end of the spell's duration, all creatures and objects within the tower that were not created by the spell appear safely outside on the ground, and all traces of the tower and its furnishings disappear.

You can cast this spell again while it is active to maintain the tower's existence for another 24 hours. You can create a permanent tower by casting this spell in the same location and with the same configuration for seven days and if the last cast of this spell is Soul Consumption.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, the tower can have one additional story for each slot level beyond 3rd.

Sleet Storm (3rd, conj., conc.)

Casting Time: 1 action

Range/Area: 30 m (8 m cylinder)

Duration: Conc, 1 minute

Attack/Save: Dex save

Components: S, V

Effect: Prone

Until the spell ends, sleet falls in a 4 m tall cylinder with an 8 m radius centered on a point you choose within range. The area is heavily obscured, and exposed flames in the area are doused.

The ground in the area is covered with slick ice, making it difficult terrain. When a creature enters the spell's area for the first time on a turn or starts its turn there, it must make a Dexterity saving throw. On a failed save, it falls prone.

If a creature starts its turn in the spell's area and is concentrating on a spell, the creature must make a successful Vitality saving throw against your spell save DV or lose concentration.

Stinking Cloud (3rd, conj., conc.)

Casting Time: 1 action

Range/Area: 18 m (4 m radius sphere)

Duration: Conc, 1 minute

Attack/Save: Vit save

Components: S, V

Effect: Control

You create a 4 m radius sphere of yellow, nauseating gas centered on a point within range. The cloud spreads around corners, and its area is heavily obscured. The cloud lingers in the air for the duration.

Each creature that is completely within the cloud at the start of its turn must make a Vitality saving throw against poison. On a failed save, the creature spends its action that turns retching and reeling. Creatures that do not need to breathe or are immune to poison automatically succeed on this saving throw.

A moderate wind (at least 5 m/s) disperses the cloud after 4 rounds. A strong wind (at least 10 m/s) disperses it after 1 round.

Tidal Wave (3rd, conj.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Prone, Bludgeoning

The area can be up to 6 m long, up to 2 m wide, and up to 2 m tall. Each creature in that area must make a Dexterity saving throw. On a failed save, a creature takes 4d8 force damage and is knocked prone. On a successful save, a creature takes half as much damage and isn't knocked prone. The water then spreads out across the ground in all directions, extinguishing unprotected flames in its area and within 6 m of it, and then it vanishes.

Level 4

Black Tentacles (4th, conj., conc.)

Casting Time: 1 action

Range/Area: 18 m (4 m square)

Duration: Conc, 1 minute

Attack/Save: Dex save

Components: S, V

Effect: Restrain, bludgeoning

You designate a 4 m area that becomes difficult terrain. When a creature enters the affected area for the first time on a turn or starts its turn there, the creature must succeed on a Dexterity saving throw or take 3d6 bludgeoning damage and be restrained by the tentacles until the spell ends. A creature that starts its turn in the area and is already restrained by the tentacles takes 3d6 bludgeoning damage.

A creature restrained by the tentacles can use its action to make a Brawn or Dexterity check (it's choice) against your spell save DV. On a success, it frees itself.

Conjure Woodland Beings (4th, conj., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Summoning

You summon fey creatures that appear in unoccupied spaces that you can see within range.

Choose one of the following options for what appears:

- ❖ One fey creature of challenge rating 4 or lower
- ❖ Two fey creatures of challenge rating 3 or lower
- ❖ Four fey creatures of challenge rating 2 or lower
- ❖ Eight fey creatures of challenge rating 1 or lower

A summoned creature disappears when it drops to 0 health points or when the spell ends.

The summoned creatures are friendly to you and your companions. Roll initiative for the summoned creatures as a group, which have their own turns. They obey any verbal commands that you issue to them (no action required by you). If you don't issue any commands to them, they defend themselves from hostile creatures, but otherwise, take no actions.

The Bestiary has the creatures' statistics. You can see some sample creatures below.

At higher levels: When you cast this spell using certain higher-level spell slots, you choose one of the summoning options above, and more creatures appear: twice as many with a 6th-level slot and three times as many with an 8th-level slot.

Dimension Door (4th, conj.)

Casting Time: 1 action

Range/Area: 100 m

Duration: Instant

Attack/Save: None

Components: V

Effect: Teleportation

You teleport yourself from your current location to any other spot within range. You arrive at exactly the spot desired. It can be a place you can see, one you can visualize, or one you can describe by stating distance and direction, such as "40 m straight downward" or "upward to the northwest at a 45-degree angle, 60 m."

You can bring along objects as long as their weight doesn't exceed what you can carry. You can also bring one willing creature of your size or smaller who is carrying gear up to its carrying capacity. The creature must be within 1 m of you when you cast this spell.

If you would arrive in a place already occupied by an object or a creature, you and any creature traveling with you each take 4d6 force damage, and the spell fails to teleport you.

Faithful Hound (4th, conj.)

Casting Time: 1 action

Range/Area: 6 m

Duration: 8 hours

Attack/Save: None

Components: S, V

Effect: Summoning

You conjure a phantom dog in an unoccupied space that you can see within range, where it remains for the duration until you dismiss it as an action, or until you move more than 20 m away from it.

The hound is invisible to all creatures except you and can't be harmed. When a Small or larger creature comes within 6 m of it without first speaking the password that you specify when you cast this spell, the hound starts barking loudly. The hound sees invisible creatures and can see into the Ethereal Dimension. It ignores illusions.

At the start of each of your turns, the hound attempts to bite one creature within 1 m of it that is hostile to you. The hound's attack bonus is equal to your spellcasting ability modifier + your proficiency bonus. On a hit, it deals 4d8 piercing damage.

Find Greater Steed (4th, conj.)

Casting Time: 10 minutes

Range/Area: 6 m

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Summoning

Appearing in an unoccupied space within range, the spirit takes on a form you choose: a griffon, a pegasus, a dire wolf, a rhinoceros, or a saber-toothed tiger. The creature has the statistics provided in the Bestiary for the chosen form, though it is a celestial, a fey, or a fiend (your choice) instead of its normal creature type. Additionally, if it has an Intelligence score of 5 or lower, its Intelligence becomes 6, and it gains the ability to understand one language of your choice that you speak. You control the mount in combat. While the mount is within 1 mile of you, you can communicate with it telepathically. While mounted on it, you can make any spell you cast that targets only you also target the mount. The mount disappears temporarily when it drops to 0 health points or when you dismiss it as an action. Casting this spell again re-summons the bonded mount, with all its health points restored and any conditions removed. You can't have more than one mount bonded by this spell or find steed at the same time. As an action, you can release a mount from its bond, causing it to disappear permanently. Whenever the mount disappears, it leaves behind any objects it was wearing or carrying.

Grasping Vine (4th, conj., conc.)

Casting Time: 1 bonus action

Range/Area: 6 m

Duration: Conc, up to 1 min

Attack/Save: Dex save

Components: S, V

Effect: Control

When you cast this spell, you can direct a vine to lash out at a creature within 6 m of it that you can see. That creature must succeed on a Dexterity saving throw or be pulled 4 m directly toward the vine.

Until the spell ends, you can direct the vine to lash out at the same creature or another one as a bonus action on each of your turns.

Guardian of Faith (4th, conj.)

Casting Time: 1 action

Range/Area: 6 m

Duration: 8 hours

Attack/Save: Dex save

Components: V

Effect: Radiant

A Large guardian appears and hovers for the duration in an unoccupied space of your choice that you can see within range. The guardian occupies that space and is indistinct except for a gleaming sword and shield emblazoned with the symbol of your deity.

Any creature hostile to you that moves to a space within 2 m of the guardian for the first time on a turn must succeed on a Dexterity saving throw. The creature takes 20 radiant damage on a failed save, or half as much damage on a successful one. The guardian vanishes when it has dealt a total of 60 damage.

Watery Sphere (4th, conj., conc.)

Casting Time: 1 action

Range/Area: 18 m (1 m radius sphere)

Duration: Conc, 1 minute

Attack/Save: Br save

Components: S, V

Effect: Restrained

You conjure up a sphere of water with a 1 m radius at a point you can see within range. The sphere can hover but no more than 2 m off the ground. The sphere remains for the spell's duration.

Any creature in the sphere's space must make a Brawn saving throw. On a successful save, a creature is ejected from that space to the nearest unoccupied space of the creature's choice outside the sphere. A Huge or larger creature succeeds on the saving throw automatically, and a Large or smaller creature can choose to fail it. On a failed save, a creature is restrained by the sphere and is engulfed by the water. At the end of each of its turns, a restrained target can repeat the saving throw, ending the effect on itself on a success.

The sphere can restrain as many as four Medium or smaller creatures or one Large creature. If the sphere restrains a creature that causes it to exceed this capacity, a random creature that was already restrained by the sphere falls out of it and lands prone in a space within 1 m of it.

As an action, you can move the sphere up to 6 m in a straight line. If it moves over a pit, a cliff, or another drop-off, it safely descends until it is hovering 2 m above the ground. Any creature restrained by the sphere moves with it. You can ram the sphere into creatures, forcing them to make the saving throw.

When the spell ends, the sphere falls to the ground and extinguishes all normal flames within 6 m of it. Any creature restrained by the sphere is knocked prone in the space where it falls. The water then vanishes.

Level 5

Cloudkill (5th, conj., conc.)

Casting Time: 1 action

Range/Area: 24 m (4 m radius sphere)

Duration: Conc, 10 minutes

Attack/Save: Vit save

Components: S, V

Effect: Poison

You create a 4 m radius sphere of poisonous fog centered on a point you choose within range. The fog spreads around corners. It lasts for the duration or until strong wind disperses the fog, ending the spell. Its area is heavily obscured.

When a creature enters the spell's area for the first time on a turn or starts its turn there, that creature must make a Vitality saving throw. The creature takes 5d8 poison damage on a failed save, or half as much damage on a successful one. Creatures are affected even if they hold their breath or do not need to breathe.

The fog moves 2 m away from you at the start of each of your turns, rolling along the surface of the ground. The vapors, being heavier than air, sink to the lowest level of the land, even pouring down openings.

At higher levels: When you cast this spell using a spell slot of 6th level or higher, the damage increases by 1d8 for each slot level above 5th.

Conjure Elemental (5th, conj., conc.)

Casting Time: 1 minute

Range/Area: 18 m

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Summoning

Choose an area of air, earth, fire, or water that fills a 2 m cube within range. An *air*, *earth*, *fire* and *water elemental* (your choice) appear in an unoccupied space within 2 m of it. For example, a *fire elemental* emerges from a bonfire, and an *earth elemental* rises up from the ground. The elemental disappears when it drops to 0 health points or when the spell ends.

The elemental is friendly to you and your companions for the duration. Roll initiative for the elemental, which has its own turns. It obeys any verbal commands that you issue to it (no action required by you). If you do not issue any commands to the elemental, it defends itself from hostile creatures but otherwise takes no actions.

If your concentration is broken, the elemental does not disappear. Instead, you lose control of the elemental, it becomes hostile toward you and your companions, and it might attack. An uncontrolled elemental cannot be dismissed by you, and it disappears 1 hour after you summoned it. The Bestiary has the elemental's statistics. Sample elementals can be found below.

Conjure Volley (5th, conj.)

Casting Time: 1 action

Range/Area: 30 m

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Ranged attack

You fire a piece of nonmagical ammunition from a ranged weapon or throw a nonmagical weapon into the air and choose a point within range.

Hundreds of duplicates of the ammunition or weapon fall in a volley from above and then disappear. Each creature in an 8 m radius, 4 m high cylinder centered on that point must make a Dexterity saving throw. A creature takes 8d8 damage on a failed save, or half as much damage on a successful one. The damage type is the same as that of the ammunition or weapon.

Infernal Calling (5th, conj., conc.)

Casting Time: 1 minute

Range/Area: 18 m

Duration: Conc, up to 1 hour

Attack/Save: None

Components: S, V, SC

Effect: None

You summon a devil. You choose the devil's type, which must be one of challenge rating 6 or lower, such as a barbed devil or a bearded devil. The devil appears in an unoccupied space that you can see within range. The devil disappears when it drops to 0 health points or when the spell ends.

The devil is unfriendly toward you and your companions. Roll initiative for the devil, which has its own turns. It is under the GM's control and acts according to its nature on each of its turns, which might result in its attacking you if it thinks it can prevail or trying to tempt you to undertake an evil act in exchange for limited service. The Bestiary has the creature's statistics.

On each of your turns, you can try to issue a verbal command to the devil (no action required by you). It obeys the command if the likely outcome is following its desires. Otherwise, you must make a Deception (Pre/Man) or Persuasion (Pre/Man) check contested by its Empathy (Com) check. You make the check with advantage if you say the devil's true name. If your check fails, the devil becomes immune to your verbal commands for the duration of the spell, though it can still carry out your commands if it chooses. If your check succeeds, the devil carries out your command—such as “attack my enemies,” “explore the room ahead,” or “bear this message to the queen”—until it completes the activity, at which point it returns to you to report having done so. If your concentration ends before the spell reaches its full duration, the devil doesn't disappear if it has become immune to your verbal commands. Instead, it acts in whatever manner it chooses for 3d6 minutes, and then it disappears.

At higher levels: When you cast this spell using a spell slot of 6th level or higher, the challenge rating increases by 1 for each slot level above 5th.

Insect Plague (5th, conj., conc.)

Casting Time: 1 action

Range/Area: 60 m (4 m radius sphere)

Duration: Conc, 10 minutes

Attack/Save: Vit save

Components: S, V

Effect: Piercing

Insects fill a 4 m radius sphere centered on a point you choose within range. The sphere spreads around corners. The sphere remains for the duration, and its area is lightly obscured. The sphere's area is difficult terrain.

When the area appears, each creature in it must make a Vitality saving throw. A creature takes 4d10 piercing damage on a failed save, or half as much damage on a successful one. A creature must also make this saving throw when it enters the spell's area for the first time on a turn or ends its turn there.

At higher levels: When you cast this spell using a spell slot of 6th level or higher, the damage increases by 1d10 for each slot level above 5th.

Teleportation Circle (5th, conj.)

Casting Time: 1 minute

Range/Area: 2 m

Duration: 1 round

Attack/Save: None

Components: V, SC

Effect: Teleportation

As you cast the spell, you draw a 2 m diameter circle on the ground inscribed with sigils that link your location to a permanent Teleportation Circle of your choice whose sigil sequence you know and that is on the same Realm as you. A shimmering portal opens within the circle you drew and remains open until the end of your next turn. Any creature that enters the portal instantly appears within 1 m of the destination circle or in the nearest unoccupied space if that space is occupied.

Each such circle includes a unique sigil sequence, a string of Copta runes arranged in a particular pattern. When you first gain the ability to cast this spell, you may learn up to two sigil sequences for two destinations, if the GM allows it. You can learn additional sigil sequences during your adventures. You can commit a new sigil sequence to memory after studying it for 1 minute.

You can create a permanent Teleportation Circle by casting this spell in the same location for seven days. If you do, you have created another fixed Teleportation Circle destination. When casting Teleportation Circle with a permanent Teleportation Circle you cast without paying Soul Consumption.

Tree Stride (5th, conj.)

Casting Time: 1 action

Range/Area: Self

Duration: 1 minute

Attack/Save: None

Components: S, V

Effect: Movement

You gain the ability to enter a tree and move from inside it to inside another tree of the same kind within 200 m. Both trees must be living and at least the same size as you. You must use 1 m of movement to enter a tree. You instantly know the location of all other trees of the same kind within 200 m and, as part of the move used to enter the tree, can either pass into one of those trees or step out of the tree you're in. You appear in a spot of your choice within 1 m of the destination tree, using another 1 m of movement. If you have no movement left, you appear within 1 m of the tree you entered.

You can use this transportation ability once per round for the duration. You must end each turn outside a tree.

Level 6

Conjure Fey (6th, conj., conc.)

Casting Time: 1 minute

Range/Area: 18 m

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Summoning

You summon a fey creature of challenge rating 6 or lower, or a fey spirit that takes the form of a beast or animal of challenge rating 6 or lower. It appears in an unoccupied space that you can see

within range. The fey creature disappears when it drops to 0 health points or when the spell ends.

The fey creature is friendly to you and your companions for the duration. Roll initiative for the creature, which has its own turns. It obeys any verbal commands that you issue to it (no action required by you), as long as they don't violate its personality. If you do not issue any commands to the fey creature, it defends itself from hostile creatures but otherwise takes no actions.

If your concentration is broken, the fey creature doesn't disappear. Instead, you lose control of the fey creature, it becomes hostile toward you and your companions, and it might attack. An uncontrolled fey creature can't be dismissed by you, and it disappears 1 hour after you summoned it.

The Bestiary has the fey creature's statistics. Some sample creatures are listed below.

At higher levels: When you cast this spell using a spell slot of 7th level or higher, the challenge rating increases by 1 for each slot level above 6th.

Realmwalker (6th, conj.)

Casting Time: 10 minutes

Range/Area: 12 m

Duration: 24 hours

Attack/Save: None

Components: S, V, SC

Effect: Summoning

You ask a powerful entity for aid. The being must be known to you: an Enneade, an ancient elemental, a demon lord, or some other being of cosmic power. That entity sends a celestial, an elemental, or a fiend loyal to it to aid you, making the creature appear in an unoccupied space within range. If you know a specific creature's name, you can speak that name when you cast this spell to request that creature, though you might get a different creature anyway (GM's choice). When the creature appears, it is under no compulsion to behave in any particular way. You can ask the creature to perform a service in exchange for payment, but it isn't obliged to do so. The requested task could range from simple (fly us across the chasm, or help us fight a battle) to complex (spy on our enemies, or protect us during our foray into the dungeon). You must be able to communicate with the creature to bargain for its services.

However, creatures rarely accept tasks that seem suicidal.

After the creature completes the task, or when the duration of service expires, the creature returns to its home Realm after reporting back to you, if appropriate to the task and if possible. If you are unable to agree on a task, the creature immediately returns to its home Realm.

Transport via Plants (6th, conj.)

Casting Time: 1 action

Range/Area: 2 m

Duration: 1 round

Attack/Save: None

Components: S, V

Effect: Teleportation

This spell creates a magical link between a Large or larger inanimate plant within range and another plant, at any distance, within the same Realm. You must have seen or touched the destination plant at least once before. For the duration, any creature can step into the target plant and exit from the destination plant by using 1 m of movement.

Wall of Thorns (6th, conj., conc.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Conc, 10 minutes

Attack/Save: Dex save

Components: S, V

Effect: Piercing, slashing

You create a wall of thorns. The wall appears within range on a solid surface and lasts for the duration. You choose to make the wall up to 12 m long, 2 m high, and 1 m thick or a circle that has a 4 m diameter and is up to 4 m high and 1 m thick. The wall blocks line of sight.

When the wall appears, each creature within its area must make a Dexterity saving throw. On a failed save, a creature takes 7d8 piercing damage, or half as much damage on a successful save.

A creature can move through the wall, albeit slowly and painfully. For every 0.2 m a creature moves through the wall, it must spend 1 m of movement. Furthermore, the first time a creature enters the wall on a turn or ends its turn there, the creature must make a Dexterity saving throw. It takes 7d8 slashing damage on a failed save, or half as much damage on a successful one.

At higher levels: When you cast this spell using a spell slot of 7th level or higher, both types of damage increase by 1d8 for each slot level above 6th.

Word of Recall (6th, conj.)

Casting Time: 1 action

Range/Area: 1 m

Duration: Instant

Attack/Save: None

Components: V

Effect: Teleportation

You and up to five willing creatures within 1 m of you instantly teleport to a previously designated sanctuary. You and any creatures that teleport with you appear in the nearest unoccupied space to the spot you designated when you prepared your sanctuary (see below). If you cast this spell without first preparing a sanctuary, the spell does not affect you. You must designate a sanctuary by casting this spell within a location, such as a temple, dedicated to or strongly linked to your deity. If you attempt to cast the spell in this manner in an area that is not dedicated to your deity, the spell has no effect.

Level 7

Conjure Celestial (7th, conj., conc.)

Casting Time: 1 minute

Range/Area: 18 m

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Summoning

You summon a celestial of challenge rating 4 or lower, which appears in an unoccupied space that you can see within range. The celestial disappears when it drops to 0 health points or when the spell ends.

The celestial is friendly to you and your companions for the duration. Roll initiative for the celestial, which has its own turns. It obeys any verbal commands that you issue to it (no action required by you), as long as they don't violate its personality. If you don't issue any commands to the celestial, it defends itself from hostile creatures but otherwise takes no actions.

The Bestiary has the celestial's statistics.

At higher levels: When you cast this spell using a 9th-level spell slot, you summon a celestial of challenge rating 5 or lower.

Magnificent Mansion (7th, conj.)

Casting Time: 1 minute

Range/Area: 200 m cube

Duration: 7 days

Attack/Save: None

Components: S, V, SC

Effect: Sanctuary

You conjure an extradimensional mansion in range that lasts for the duration. You choose where its one entrance is located. The entrance shimmers faintly and is 1 m wide and 2 m tall. You and any creature you designate when you cast the spell can enter the extradimensional dwelling as long as the portal remains open. You can open or close the portal if you are within 6 m of it.

While closed, the portal is invisible.

Beyond the portal is a magnificent foyer with numerous chambers beyond. The atmosphere is clean, fresh, and warm.

You can create any floor plan you like, but the space cannot exceed 50 cubes, each cube being 4 m on each side. The place is furnished and decorated as you choose. It contains sufficient food to serve a nine-course banquet for up to 100 people. A staff of 100 near-transparent servants attends all who enter. You decide the visual appearance of these servants and their attire. They are completely obedient to your orders. Each servant can perform any task a normal human servant could perform, but they cannot attack or take any action that would directly harm another creature. Thus the servants can fetch things, clean, mend, fold clothes, light fires, serve food, pour wine, and so on. The servants can go anywhere in the mansion but cannot leave it. Furnishings and other objects created by this spell dissipate into smoke if removed from the mansion. When the spell ends, any creatures inside the extradimensional space are expelled into the open spaces nearest to the entrance.

Realm Shift (7th, conj.)

Casting Time: 1 action

Duration: Instant

Components: S, V, SC

Range/Area: Touch

Attack/Save: None

Effect: Banishment, teleportation

You and up to eight willing creatures who link hands are transported to a different Realm. You can specify a target destination in general terms, such as The Eye in the Realm of Eternal Suns or the palace of Lapuana far below the surface of Atlas, and you appear in or near that destination. If you are trying to reach The Eye, for example, you might arrive in its Garden District, before the gates of the Law District, or looking at the city from across the desert sands, at the GM's discretion.

Alternatively, if you know the sigil sequence of a Teleportation Circle within another Realm, this spell can take you to that circle. If the Teleportation Circle is too small to hold all the creatures you transported, they appear in the closest unoccupied spaces next to the circle.

You can use this spell to banish an unwilling creature to another Realm. Choose a creature within your reach and make a melee spell attack against it. On a hit, the creature must make a Pre/Man saving throw. If the creature fails this save, it is transported to a random location within a Realm you specify. A creature so transported must find its own way back to your current Realm.

Teleport (7th, conj.)

Casting Time: 1 action

Duration: Instant

Components: V

Range/Area: 2 m

Attack/Save: None

Effect: Teleport

This spell instantly transports you and up to eight willing creatures of your choice that you can see within range, or a single object that you can see within range, to a destination you select. If you target an object, it must be able to fit entirely inside a 4 m cube, and it cannot be held or carried by an unwilling creature.

The destination you choose must be known to you, and it must be within the same Realm as you. Your familiarity with the destination determines whether you arrive there successfully. The GM rolls d100 and consults the table.

Familiarity	Mishap	Similar Area	Off Target	On Target
Permanent circle	-	-	-	01-100
Associated object	-	-	-	01-100
Very familiar	01-05	06-13	14-24	25-100
Seen casually	01-33	34-43	44-53	54-100
Viewed once	01-43	44-53	54-73	74-100
Description	01-43	44-53	54-73	74-100
False destination	01-50	51-100	-	-

- ❖ **Permanent circle:** Means a permanent Teleportation Circle whose sigil sequence you know.
- ❖ **Associated object:** Means that you possess an object taken from the desired destination within the last six months, such as bed linen from a royal suite.
- ❖ **Very familiar:** Is a place you have been very often, a place you have carefully studied, or a place you can see when you cast the spell.
- ❖ **Seen casually:** Is someplace you have seen more than once but with which you aren't very familiar.
- ❖ **Viewed once:** Is a place you have seen once, possibly using magic.

- ❖ **Description:** Is a place whose location and appearance you know through someone else's description, perhaps from a map.
- ❖ **False destination:** Is a place that doesn't exist. Perhaps you tried to scry an enemy's sanctum but instead viewed an illusion, or you are attempting to teleport to a familiar location that no longer exists.
- ❖ **On Target:** You and your group (or the target object) appear where you want to.
- ❖ **Off Target:** You and your group (or the target object) appear a random distance away from the destination in a random direction. Distance off target is $1d10 \times 1d10$ percent of the distance that was to be traveled. For example, if you tried to travel 200 km, landed off target, and rolled a 5 and 3 on the two d10s, then you would be off target by 15 percent or 30 km. The GM determines the direction off target randomly by rolling a d8 and designating 1 as north, 2 as northeast, 3 as east, and so on around the points of the compass. If you were teleporting to a coastal city and wound up 30 km out at sea, you could be in trouble.
- ❖ **Similar Area:** You and your group (or the target object) wind up in a different area that's visually or thematically similar to the target area. If you are heading for your home laboratory, for example, you might wind up in another's laboratory or in an alchemical supply shop that has many of the same tools and implements as your laboratory. Generally, you appear in the closest similar place, but since the spell has no range limit, you could conceivably wind up anywhere on the Realm.
- ❖ **Mishap:** The spell's unpredictable magic results in a difficult journey. Each teleporting creature (or the target object) takes 3d10 force damage, and the GM rerolls on the table to see where you wind up (multiple mishaps can occur, dealing damage each time).

Temple of the Gods (7th, conj.)

Casting Time: 1 hour

Range/Area: 30 m

Duration: 24 hour

Attack/Save: None

Components: S, V, SC

Effect: Creation

You conjure forth a temple dedicated to one Enneade. The temple must fit within an unoccupied cube of space, up to 30 m on each side.

You make all decisions about the temple's appearance. The interior is enclosed by a floor, walls, and a roof, with one door granting access to the interior and as many windows as you wish. Only you and any creatures you designate when you cast the spell can open or close the door.

- ❖ The temple's interior is an open space with an idol or altar at one end. You decide whether the temple is illuminated and whether that illumination is bright light or dim light. The smell of burning incense fills the air within, and the temperature is mild.
- ❖ The temple opposes types of creatures that are the favored enemies of the Enneade of the temple. If a creature of the chosen type attempts to enter the temple, that creature must make a Pre/Man saving throw. On a failed save, it can't enter the temple for 24 hours. Even if the creature can enter the temple, the magic there hinders it; whenever it makes an attack roll, an ability check, or a saving throw inside the temple, it must roll a d4 and subtract the number rolled from the d20 roll.
- ❖ In addition, the sensors created by divination spells can't appear inside the temple, and creatures within can't be targeted by divination spells.
- ❖ Finally, whenever any creature in the temple regains health points from a spell of 1st level or higher, the creature regains additional health points equal to your Resolve modifier (minimum 1 health point).

The temple is made from opaque magical force that extends into the Ethereal Dimension, thus blocking ethereal travel into the temple's interior. Nothing can physically pass through the temple's exterior. It cannot be dispelled by dispel magic, and *Antimagic Field* does not affect it. A *Disintegrate* spell destroys the temple instantly.

Casting this spell on the same spot every day for a year makes this effect permanent.

Level 8

Incendiary Cloud (8th, conj., conc.)

Casting Time: 1 action

Range/Area: 30 m (4 m radius sphere)

Duration: Conc, 1 minute

Attack/Save: Dex save

Components: S, V

Effect: Fire

A swirling cloud of smoke shot through with white-hot embers appears in a 4 m radius sphere centered on a point within range. The cloud spreads around corners and is heavily obscured. It lasts for the duration or until a wind of moderate or greater speed (at least 5 m/s) disperses it. When the cloud appears, each creature in it must make a Dexterity saving throw. A creature takes 10d8 fire damage on a failed save, or half as much damage on a successful one. A creature must also make this saving throw when it enters the spell's area for the first time on a turn or ends its turn there.

The cloud moves 2 m directly away from you in a direction that you choose at the start of each of your turns.

Mighty Fortress (8th, conj.)

Casting Time: 1 minute

Range/Area: 2 km

Duration: 7 days

Attack/Save: Utility

Components: S, V, SC

Effect: None

A fortress of stone erupts from a square area of ground of your choice that you can see within range. The area is 40 m on each side, and it must not have any buildings or other structures on it. Any creatures in the area are harmlessly lifted up as the fortress rises.

The fortress has four turrets with square bases, each one 6 m on a side and 9 m tall, with one turret on each corner. The turrets are connected to each other by stone walls that are each 25 m long, creating an enclosed area. Each wall is 0.25 m thick and is composed of panels that are 3 m wide and 6 m tall. Each panel is contiguous with two other panels or one other panel and a turret. You can place up to four stone doors in the fortress's outer wall.

A small keep stands inside the enclosed area. The keep has a square base that is 15 m on each side, and it has three floors with 3 m high ceilings. Each of the floors can be divided into as many rooms as you like, provided each room is at least 3 m on each side. The floors of the keep are connected by stone staircases, its walls are 20 cm thick, and interior rooms can have stone doors or open archways as you choose. The keep is furnished and decorated however you like, and it contains sufficient food to serve a nine-course banquet for up to 100 people each day.

Furnishings, food, and other objects created by this spell crumble to dust if removed from the fortress.

A staff of one hundred invisible servants obeys any command given to them by creatures you designate when you cast the spell. Each servant functions as if created by the unseen servant spell.

The walls, turrets, and keep are all made of stone that can be damaged. Every 3 m by a 3 m section of stone has AV 15 and 175 hp for the outer walls and 150 hp for the inner walls. It is immune to poison and psychic damage. Reducing a section of stone to 0 health points destroys it and might cause connected sections to buckle and collapse at the GM's discretion.

After 7 days or when you cast this spell somewhere else, the fortress harmlessly crumbles and sinks back into the ground, leaving any creatures that were inside it safely on the ground.

Casting this spell on the same spot once every 7 days for 7 days makes the fortress permanent.

Tsunami (8th, conj., conc.)

Casting Time: 1 minute

Range/Area: Sight

Duration: Conc, up to 6 rounds

Attack/Save: Br save

Components: S, V

Effect: Force

A wall of water springs into existence at a point you choose within range. You can make the wall up to 100 m long, 100 m high, and 15 m thick. The wall lasts for the duration.

When the wall appears, each creature within its area must make a Brawn saving throw. On a failed save, a creature takes 6d10 force damage, or half as much damage on a successful save.

At the start of each of your turns after the wall appears, the wall, along with any creatures in it, moves 10 m away from you. Any Huge or smaller creature inside the wall or whose space the wall enters when it moves must succeed on a Brawn saving throw or take 5d10 force damage. A creature can take this damage only once per round. At the end of the turn, the wall's height is reduced by 15, and the damage creatures take from the spell on subsequent rounds is reduced by 1d10. When the wall reaches 0 m in height, the spell ends.

A creature caught in the wall can move by swimming. Because of the force of the wave, though, the creature must make a successful Athletics (Br) check against your spell save DV to move at all. If it fails the check, it can't move. A creature that moves out of the area falls to the ground.

Level 9

Gate (9th, conj., conc.)

Casting Time: 1 action

Duration: Conc, 1 minute

Components: S, V, SC

Range/Area: 12 m

Attack/Save: None

Effect: Control

You conjure a portal linking an unoccupied space you can see within range to a precise location in a different Realm. The portal is a circular opening, which you can make 1 to 4 m in diameter. You can orient the portal in any direction you choose. The portal lasts for the duration.

The portal has a front and a back on each Realm where it appears. Travel through the portal is possible only by moving through its front. Anything that does so is instantly transported to the other Realm, appearing in the unoccupied space nearest to the portal.

Enneade and other powerful Enna can prevent portals created by this spell from opening in their presence or anywhere within their domains.

When you cast this spell, you can speak the name of a specific creature (a pseudonym, title, or nickname doesn't work). If that creature is in a Realm other than the one you are on, the portal opens in the named creature's immediate vicinity and draws the creature through it to the nearest unoccupied space on your side of the portal. You gain no special power over the creature, and it is free to act as the GM deems appropriate. It might leave, attack you, or help you.

Storm of Vengeance (9th, conj., conc.)

Casting Time: 1 action

Duration: 1 minute

Components: S, V

Range/Area: Sight

Attack/Save: Vit save

Effect: Thunder

Stormcloud forms centered on a point you can see and spread to a radius of 70 m. Lightning flashes in the area, thunder booms, and strong winds roar. Each creature under the cloud (no more than 1500 m beneath the cloud) when it appears must make a Vitality saving throw. On a failed save, a creature takes 2d6 thunder damage and becomes deafened for 5 minutes.

Each round you maintain concentration on this spell, the storm produces different effects on your turn.

- ❖ **Round 2:** Acidic rain falls from the cloud. Each creature and object under the cloud takes 1d6 acid damage.
- ❖ **Round 3:** You call six bolts of lightning from the cloud to strike six creatures or objects of your choice beneath the cloud. A given creature or object can't be struck by more than one bolt. A struck creature must make a Dexterity saving throw. The creature takes 10d6 lightning damage on a failed save, or half as much damage on a successful one.
- ❖ **Round 4:** Hailstones rain down from the cloud. Each creature under the cloud takes 2d6 force damage.
- ❖ **Round 5–10:** Gusts and freezing rain assail the area under the cloud. The area becomes difficult terrain and is heavily obscured. Each creature there takes 1d6 cold damage. Ranged weapon attacks in the area are impossible. The wind and rain count as a severe distraction to maintain concentration on spells. Finally, gusts of strong wind (ranging from 10 to 20 m/s) automatically disperse fog, mists, and similar phenomena in the area, whether mundane or magical.

Wish (9th, conj.)

Casting Time: 1 action

Range/Area: Self

Duration: Instant

Attack/Save: None

Components: V, SC

Effect: Buff

By simply speaking aloud, you can alter the very foundations of reality in accord with your desires.

The basic use of this spell is to duplicate any other spell of 8th level or lower. You don't need to meet any requirements in that spell, including Soul Consumption. The spell simply takes effect. Alternatively, you can create one of the following effects of your choice:

- ❖ You create one object of up to 25,000 gp in value that isn't a magic item. The object can be no more than 100 m in any dimension, and it appears in an unoccupied space you can see on the ground.
- ❖ You allow up to twenty creatures that you can see to regain all health points, and you end all effects on them described in the Greater Restoration spell.
- ❖ You grant up to ten creatures that you can see resistance to a damage type you choose.
- ❖ You grant up to ten creatures you can see immunity to a single spell or another magical effect for 8 hours.
- ❖ You undo a single recent event by forcing a reroll of any roll made within the last round (including your last turn). Reality reshapes itself to accommodate the new result. For example, a *Wish* spell could undo an opponent's successful save, a foe's critical hit, or a friend's failed save. You can force the reroll to be made with advantage or disadvantage, and you can choose whether to use the reroll or the original roll.

You might be able to achieve something beyond the scope of the above examples. State your wish to the GM as precisely as possible. The GM has great latitude in ruling what occurs in such an instance; the greater the *Wish*, the greater the likelihood that something goes wrong. This spell might simply fail, the effect you desire might only be partly achieved, or you might suffer some unforeseen consequence as a result of how you worded the *Wish*. For example, wishing that a villain were dead might propel you forward in time to a period when that villain is no longer alive, effectively removing you from the game. Similarly, wishing for a legendary magic item or artifact might instantly transport you to the presence of the item's current owner.

The stress of casting this spell to produce any effect other than duplicating another spell weakens you. After enduring that stress, each time you cast a spell until you finish a long rest, you take 1d10 necrotic damage per level of that spell. This damage can't be reduced or prevented in any way. In addition, your Brawn drops to 3, if it isn't 3 or lower already, for 2d4 days. For each of those days that you spend resting and doing nothing more than light activity, your remaining recovery time decreases by 2 days.

DIVINATION

Divination spells reveal information, whether in the form of secrets long forgotten, glimpses of the future, the locations of hidden things, the truth behind illusions, or visions of distant people or places.

Cantrips

Guidance (0, div., conc.)

Casting Time: 1 action

Range/Area: Touch

Duration: Conc, 1 minute

Attack/Save: None

Components: S, V

Effect: Buff

You touch one willing creature. Once before the spell ends, the target can roll a d4 and add the number rolled to one ability check or a saving throw of its choice. It can roll the die before or after making the ability check. The spell then ends.

This spell's effectiveness increases to 1d6 when you reach 11th level and a d8 on 17th. level.

Truestrike (0, div., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, end of next turn

Attack/Save: None

Components: S

Effect: Precognition

Choose a creature within range. Until the end of your next turn, your next weapon attack roll gains advantage against that creature provided that this spell has not ended. In addition, if you hit the target, you add 1d4 to the damage. The damage type is equal to your weapon but is considered magical in nature.

This spell's damage increases with 1d4 when you reach 5th level (2d4), 11th level (3d4), and 17th level (4d4).

Level 1

Comprehend Languages (1st, div., ritual)

Casting Time: 1 action

Range/Area: Self

Duration: 1 hour

Attack/Save: None

Components: S

Effect: Social

For the duration, you understand the literal meaning of any spoken language that you hear. You also understand any written language that you see, but you must be touching the surface on which the words are written. It takes about 1 minute to read one page of text.

This spell doesn't decode secret messages in a text or a glyph, such as an arcane sigil, that isn't part of a written language.

Detect Magic (1st, div., conc., ritual)

Casting Time: 1 action

Range/Area: Self (12 m radius)

Duration: 10 minutes

Attack/Save: None

Components: S, V

Effect: Detection

For the duration, you sense the presence of magic within 6 m of you. If you sense magic in this way, you can use your action to see a faint aura around any visible creature or object in the area that bears magic, and you learn its school of magic if any.

The spell can penetrate most barriers, but it is blocked by 20 cm of stone, 2 cm of common metal, a thin sheet of lead, or 1 m of wood or dirt.

Detect Poison and Disease (1st, div., conc., ritual)

Casting Time: 1 action

Range/Area: Self (12 m radius)

Duration: Conc, up to 10 minutes

Attack/Save: None

Components: S, V

Effect: Utility

For the duration, you can sense the presence and location of poisons, poisonous creatures, and diseases within 12 m of you. You also identify the kind of poison, poisonous creature, or disease in each case. The spell can penetrate most barriers, but it is blocked by 20 cm of stone, 2 cm of common metal, a thin sheet of lead, or 1 m of wood or dirt. If any poison or disease can be found in nonmagical food and drink within the radius, you may decide to purify the food and drink as part of this spell.

Detect Soul Aspect (1st, div., conc.)

Casting Time: 1 action

Range/Area: Self (12 m radius)

Duration: Conc, 10 minutes

Attack/Save: None

Components: S, V

Effect: Detection

For the duration, you know if there are certain Soul aspects, aberration, celestial, elemental, fey, fiend, or undead within 12 m of you, as well as where the creature is located. Similarly, you know if there is a place or object within 12 m of you that has been magically attuned to celestials or attuned to fiends.

The spell can penetrate most barriers, but it is blocked by 2 cm of stone, 2 cm of common metal, a thin sheet of lead, or 1 m of wood or dirt.

Hunter's Mark (1st, div., conc.)

Casting Time: 1 bonus action

Range/Area: 18 m

Duration: Conc, up to 1 hour

Attack/Save: None

Components: V

Effect: Bludgeoning

You choose a creature you can see within range and mark it as your quarry. Until the spell ends, you deal an extra 1d6 damage to the target whenever you hit it with a weapon attack, and you have advantage on any Perception (Int) or Survival (Int/Cun) check you make to find it. If the target drops to 0 health points before this spell ends, you can use a bonus action on a subsequent turn of yours to mark a new creature.

At higher levels: When you cast this spell using a spell slot of 3rd or 4th level, you can maintain your concentration on the spell for up to 8 hours. When you use a spell slot of 5th level or higher, you can maintain your concentration on the spell for up to 24 hours.

Identify (1st, div., ritual)

Casting Time: 1 minute

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Detection

You choose one object that you must touch throughout the casting of the spell. If it is a magic item or some other magic-imbued object, you learn its properties and how to use them, whether it requires attunement to use, and how many charges it has, if any. You learn whether any spells are affecting the item and what they are. If the item was created by a spell, you learn which spell created it.

If you instead touch a creature throughout the casting, you learn what spells, if any, are currently affecting it.

Level 2

Augury (2nd, div., ritual)

Casting Time: 1 minute

Range/Area: Self

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Precognition

You receive an omen from an otherworldly entity about the results of a specific course of action that you plan to take within the next 30 minutes. The GM chooses from the following possible omens:

- ❖ Weal, for good results
- ❖ Woe, for bad results
- ❖ Weal and woe, for both good and bad results
- ❖ Nothing, for results that aren't especially good or bad

The spell doesn't take into account any possible circumstances that might change the outcome, such as the casting of additional spells or the loss or gain of a companion.

If you cast the spell two or more times before completing your next long rest, there is a cumulative 25 percent chance for each casting after the first that you get a random reading. The GM makes this roll in secret.

Beast Bond (2nd, div., conc.)

Casting Time: 1 action

Range/Area: Touch

Duration: Conc, 10 minutes

Attack/Save: None

Components: S, V

Effect: Buff

You establish a telepathic link with one beast or animal you touch that is friendly to you or charmed by you. The spell fails if the beast's or animal's Intelligence is 4 or higher. Through the link, the beast can understand your telepathic messages to it, and it can telepathically communicate simple emotions and concepts back to you. When you cast this spell choose one effect:

- ❖ **Share Insight:** This link is active while you and the beast or animal are within line of sight of each other. While the link is active, the beast or animal gains advantage on attack rolls against any creature within 1 m of you that you can see.
- ❖ **Share Senses:** You can use your action to see through the beast's eyes and hear what it hears and continue to do so until you use your action to return to your normal senses.

Detect Thoughts (2nd, div., conc.)

Casting Time: 1 action

Range/Area: Self

Duration: Conc, 1 minute

Attack/Save: Comp save

Components: S, V

Effect: Detection

When you cast the spell and as your action on each turn until the spell ends, you can focus your mind on any one creature that you can see within 6 m of you. If the creature you choose has an Intelligence of 3 or lower or doesn't speak any language, the creature is unaffected.

You initially learn the surface thoughts of the creature--what is most on its mind at that moment. As an action, you can either shift your attention to another creature's thoughts or attempt to probe deeper into the same creature's mind. If you probe deeper, the target must make a Composure saving throw. If it fails, you gain insight into its reasoning (if any), its emotional state, and something that looms large in its mind (such as something it worries over, loves, or hates). If it succeeds, the spell ends. Either way, the target knows that you are probing into its mind, and unless you shift your attention to another creature's thoughts, the creature can use its action on its turn to make an Intelligence check contested by your Intelligence check; if it succeeds, the spell ends.

Questions verbally directed at the target creature naturally shape the course of its thoughts, so this spell is particularly effective as part of an interrogation.

You can also use this spell to detect the presence of thinking creatures you can't see. When you cast the spell or as your action during the duration, you can search for thoughts within 6 m of you. The spell can penetrate barriers, but 20 cm of rock, 2 cm of any metal other than lead, or a thin sheet of lead blocks you. You can't detect a creature with an Intelligence of 3 or lower or one that doesn't speak any language.

Once you detect the presence of a creature in this way, you can read its thoughts for the rest of the duration as described above, even if you can't see it, but it must still be within range.

Locate Animals or Plants (2nd, div., ritual)

Casting Time: 1 action

Range/Area: Self

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Detection

Describe or name a specific kind of beast, animal, or plant. You learn the direction and distance to the closest creature or plant of that kind within 8 km if any are present.

Locate Object (2nd, div., conc.)

Casting Time: 1 action

Range/Area: Self

Duration: Conc, 10 minutes

Attack/Save: None

Components: S, V

Effect: Detection

Describe or name an object that is familiar to you. You sense the direction to the object's location, as long as that object is within 300 m of you. If the object is in motion, you know the direction of its movement.

The spell can locate a specific object known to you, as long as you have seen it up close -within 6 m- at least once. Alternatively, the spell can locate the nearest object of a particular kind, such as a certain kind of apparel, jewelry, furniture, tool, or weapon.

This spell cannot locate an object if any thickness of lead, even a thin sheet, blocks a direct path between you and the object.

Mind Spike (2nd, div., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, up to 1 hour

Attack/Save: Int/Cun save

Components: S

Effect: Psychic

The target must make an Int/Cun saving throw, taking 3d8 psychic damage on a failed save, or half as much damage on a successful one. On a failed save, you also always know the target's location until the spell ends, but only while the two of you are within the same Realm. While you have this knowledge, the target can't become hidden from you, and if it's invisible, it gains no benefit from that condition against you.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, the damage increases by 1d8 for each slot level above 2nd.

See Invisibility (2nd, div.)

Casting Time: 1 action

Range/Area: Self

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Detection

For the duration, you see invisible creatures and objects as if they were visible, and you can see into the Ethereal Dimension. Ethereal creatures and objects appear ghostly and translucent.

Level 3

Clairvoyance (3rd, div., conc.)

Casting Time: 10 minutes

Range/Area: 2 km

Duration: 10 minutes

Attack/Save: None

Components: S, V, SC

Effect: Detection

You create an invisible sensor within range in a location familiar to you (a place you have visited or seen before) or in an obvious location that is unfamiliar to you (such as behind a door, around a corner, or in a grove of trees). The sensor remains in place for the duration, and it can't be attacked or otherwise interacted with.

When you cast the spell, you choose seeing or hearing. You can use the chosen sense through the sensor as if you were in its space. As your action, you can switch between seeing and hearing. A creature that can see the sensor (such as a creature benefiting from See Invisibility or truesight) sees a luminous, intangible orb about the size of your fist.

Tongues (3rd, div.)

Casting Time: 1 action

Range/Area: Touch

Duration: 1 hour

Attack/Save: None

Components: V

Effect: Communication

This spell grants the creature you touch the ability to understand any spoken language it hears. Moreover, when the target speaks, any creature that knows at least one language and can hear the target understands what it says.

Level 4

Arcane Eye (4th, div., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Detection

You create an invisible eye within range that hovers in the air for the duration. You mentally receive visual information from the eye, which has normal vision and darkvision out to 6 m. The eye can look in every direction.

As an action, you can move the eye up to 6 m in any direction. There is no limit to how far away from you the eye can move, but it cannot enter another Realm. A solid barrier blocks the eye's movement, but the eye can pass through an opening as small as 1 cm in diameter.

Divination (4th, div., ritual)

Casting Time: 1 action

Range/Area: Self

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Precognition

You ask a single question concerning a specific goal, event, or activity to occur within 7 days. The GM offers a truthful reply. The reply might be a short phrase, a cryptic rhyme, or an omen. The spell doesn't take into account any possible circumstances that might change the outcome, such as the casting of additional spells or the loss or gain of a companion. If you cast the spell two or more times before finishing your next long rest, there is a cumulative 25 percent chance for each casting after the first that you get a random reading. The GM makes this roll in secret.

Locate Creature (4th, div., conc.)

Casting Time: 1 action

Range/Area: Self

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Detection

Describe or name a creature that is familiar to you. You sense the direction to the creature's location, as long as that creature is within 300 m of you. If the creature is moving, you know the direction of its movement.

The spell can locate a specific creature known to you or the nearest creature of a specific kind (such as a human or a unicorn), so long as you have seen such a creature up close -within 6 m- at least once. If the creature you described or named is in a different form, such as being under the effects of a Polymorph spell, this spell does not locate the creature.

This spell cannot locate a creature if running water at least 2 m wide blocks a direct path between you and the creature.

Level 5

Commune (5th, div., ritual)

Casting Time: 1 minute

Range/Area: Self

Duration: 1 minute

Attack/Save: None

Components: S, V

Effect: Precognition

You contact your deity or a divine proxy and ask up to three questions that can be answered with a yes or no. You must ask your questions before the spell ends. You receive a correct answer for each question.

Enneade isn't necessarily omniscient, so you might receive "unclear" as an answer if a question pertains to information that lies beyond the deity's knowledge. In a case where a one-word answer could be misleading or contrary to the deity's interests, the GM might offer a short phrase as an answer instead.

If you cast the spell two or more times before finishing your next long rest, there is a cumulative 25 percent chance for each casting after the first that you get no answer. The GM makes this roll in secret.

Commune with Nature (5th, div., ritual)

Casting Time: 1 minute

Range/Area: Self

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Environment

In the outdoors, the spell gives you knowledge of the land within 5 km of you. In caves and other natural underground settings, the radius is limited to 100 m. The spell does not function where nature has been replaced by construction, such as in dungeons and towns.

You instantly gain knowledge of up to three facts of your choice about any of the following subjects as they relate to the area:

- ❖ Terrain and bodies of water
- ❖ Prevalent plants, minerals, animals, or people
- ❖ Powerful celestials, fey, fiends, elementals, or undead
- ❖ Influence from other Realms
- ❖ Buildings

For example, you could determine the location of powerful undead in the area, the location of major sources of safe drinking water, and the location of any nearby towns.

Contact Other Realms (5th, div., ritual)

Casting Time: 1 minute

Range/Area: Self

Duration: 1 minute

Attack/Save: None

Components: V

Effect: Communication

You contact an extremely powerful Enna or some other mysterious entity from another Realm. Contacting this entity can strain or even break your mind. When you cast this spell, make a DV 15 Int/Cun saving throw. On a failure, you take 6d6 psychic damage and are insane until you finish a long rest. While insane, you cannot take actions, can't understand what other creatures say, can't read, and speak only in gibberish. A Greater Restoration spell cast on you ends this effect.

On a successful save, you can ask the entity up to five questions. You must ask your questions before the spell ends. The GM answers each question with one word, such as "yes," "no," "maybe," "never," "irrelevant," or "unclear" (if the entity does not know the answer to the question). If a one-word answer would be misleading, the GM might instead offer a short phrase as an answer.

Legend Lore (5th, div.)

Casting Time: 10 minutes

Range/Area: Self

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Utility

Name or describe a person, place, or object. The spell brings to your mind a brief summary of the significant lore about the thing you named. The lore might consist of current tales, forgotten stories, or even secret lore that has never been widely known. If the thing you named isn't of legendary importance, you gain no information. The more information you already have about the thing, the more precise and detailed the information you receive is.

The information you learn is accurate but might be couched in figurative language.

Scrying (5th, div., conc.)

Casting Time: 10 minutes

Range/Area: Self

Duration: Conc, 10 minutes

Attack/Save: Comp save

Components: S, V, SC

Effect: Detection

You can see and hear a particular creature you choose that is within the same Realm as you. The target must make a Composure saving throw, which is modified by how well you know the target and the sort of physical connection you have to it. If a target knows you're casting this spell, it can fail the saving throw voluntarily if it wants to be observed.

Knowledge	Save Modifier
Secondhand (you have heard of the target)	+5
Firsthand (you have met the target)	0
Familiar (you know the target well)	-5

Connection	Save Modifier
Likeness or picture	-2
Possession or garment	-4
Body part, lock of hair, a bit of nail, or the like	-10

On a successful save, the target is not affected, and you can't use this spell against it again for 24 hours.

On a failed save, the spell creates an invisible sensor within 2 m of the target. You can see and hear through the sensor as if you were there. The sensor moves with the target, remaining within

2 m of it for the duration. A creature that can see invisible objects sees the sensor as a luminous orb about the size of your fist.

Instead of targeting a creature, you can choose a location you have seen before as the target of this spell. When you do, the sensor appears at that location and does not move.

Telepathic Bond (5th, div., ritual)

Casting Time: 1 action

Range/Area: 6 m

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Communication

You forge a telepathic link among up to eight willing creatures of your choice within range, psychically linking each creature to all the others for the duration. Creatures with Intelligence scores of 2 or less are not affected by this spell.

Until the spell ends, the targets can communicate telepathically through the bond whether or not they have a common language. The communication is possible over any distance, though it cannot extend to other Realms.

Level 6

Find Path (6th, div., conc.)

Casting Time: 1 minute

Range/Area: Self

Duration: Conc, 1 day

Attack/Save: None

Components: S

Effect: Detection

This spell allows you to find the shortest, most direct physical route to a specific fixed location that you are familiar with within a Realm. If you name a destination on another Realm, a destination that moves, or a destination that isn't specific, the spell fails.

For the duration, as long as you are within the same Realm as the destination, you know how far it is and in what direction it lies. While you are traveling there, whenever you are presented with a choice of paths along the way, you automatically determine which path is the shortest and most direct route (but not necessarily the safest route) to the destination.

True Seeing (6th, div.)

Casting Time: 1 action

Range/Area: Touch

Duration: 1 hour

Attack/Save: None

Components: S, V, SC

Effect: Detection

This spell gives the willing creature you touch the ability to see things as they actually are. For the duration, the creature has truesight, notices secret doors hidden by magic, and can see into the Ethereal Dimension, all out to a range of 24 m.

Level 9

Foresight (9th, div.)

Casting Time: 1 minute

Range/Area: Touch

Duration: 8 hours

Attack/Save: None

Components: S, V, SC

Effect: Buff

You touch a willing creature and bestow a limited ability to see into the immediate future. For the duration, the target cannot be surprised and has advantage on attack rolls, ability checks, and saving throws. Additionally, other creatures have disadvantage on attack rolls against the target for the duration.

This spell immediately ends if you cast it again before its duration ends.

ENCHANTMENT

Enchantment spells affect the minds of others, influencing, or controlling their behavior. Such spells can make enemies see the caster as a friend, force creatures to take a course of action, or even control another creature like a puppet.

Cantrips

Vicious Mockery (0, ench.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: Comp save

Components: V

Effect: Psychic

If the target can hear you (though it need not understand you), it must succeed on a Composure saving throw or take 1d4 psychic damage and have disadvantage on the next attack roll it makes before the end of its next turn.

This spell's damage increases by 1d4 when you reach 5th level (2d4), 11th level (3d4), and 17th level (4d4).

Level 1

Animal Connection (1st, ench., ritual)

Casting Time: 1 action

Range/Area: 6 m

Duration: 24 hours

Attack/Save: Comp save

Components: S

Effect: Charmed

You gain the ability to comprehend and verbally communicate with beasts and animals for the duration. The knowledge and awareness of many beasts and animals are limited by their intelligence, but at minimum, beasts and animals can give you information about nearby locations and creatures, including whatever they can perceive or have perceived within the past day. In addition, you may attempt to charm the animal or beast you are communicating with. Choose a beast or animal that can see and hear you and vice versa. If the beast's or animal's Intelligence is 4 or higher, the charm condition automatically fails. Otherwise, the beast must succeed on a Composure saving throw or be charmed by you for the spell's duration. If you or one of your companions harms the target, the spell ends.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, you can affect one additional beast for each slot level above 1st.

Animal Messenger (1st, ench., ritual)

Casting Time: 1 action

Range/Area: 6 m

Duration: 24 hours

Attack/Save: None

Components: S, V

Effect: Communication

By means of this spell, you use an animal to deliver a message. Choose a tiny beast or animal you can see within range. You specify a location, which you must have visited, and a recipient who matches a general description. You also speak a message of up to twenty-five words. The target animal or beast travels for the duration of the spell toward the specified location, covering about 80 km per 24 hours for a flying messenger, or 40 km for other animals or beasts.

When the messenger arrives, it delivers your message to the creature that you described, replicating the sound of your voice. The messenger speaks only to a creature matching the description you gave. If the messenger doesn't reach its destination before the spell ends, the message is lost, and the beast or animal makes its way back to where you cast this spell.

At higher levels: If you cast this spell using a spell slot of 2nd level or higher, the duration of the spell increases by 48 hours for each slot level above 1st.

Bane (1st, ench., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 1 minute

Attack/Save: Pre/Man save

Components: S, V

Effect: Debuff

Up to three creatures of your choice that you can see within range must make Pre/Man saving throws. Whenever a target that fails this saving throw makes an attack roll or a saving throw before the spell ends, the target must roll a d4 and subtract the number rolled from the attack roll or saving throw.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, you can target one additional creature for each slot level above 1st.

Bless (1st, ench., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 1 minute

Attack/Save: None

Components: S, V

Effect: Buff

You bless up to three creatures of your choice within range. Whenever a target makes an attack roll or a saving throw before the spell ends, the target can roll a d4 and add the number rolled to the attack roll or saving throw.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, you can target one additional creature for each slot level above 1st.

Charm Person (1st, ench.)

Casting Time: 1 action

Range/Area: 6 m

Duration: 1 hour

Attack/Save: Comp save

Components: S, V

Effect: Charmed

You attempt to charm a humanoid you can see within range. It must make a Composure saving throw, and does so with advantage if you or your companions are fighting it. If it fails the saving throw, it is charmed by you until the spell ends or until you or your companions do anything harmful to it. The charmed creature regards you as a friendly acquaintance. When the spell ends, the creature knows it was charmed by you.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, you can target one additional creature for each slot level above 1st. The creatures must be within 6 m of each other when you target them.

Command (1st, ench.)

Casting Time: 1 action

Range/Area: 12 m

Duration: 1 round

Attack/Save: Res save

Components: V

Effect: Prone

You speak a one-word command to a creature you can see within range. The target must succeed on a Resolve saving throw or follow the command on its next turn. The spell does not affect if the target does not understand your language, or if your command is directly harmful to it.

Some typical commands and their effects follow. You might issue a command other than the one described here. If you do so, the GM determines how the target behaves. If the target can't follow your command, the spell ends.

- ❖ **Approach:** The target moves toward you by the shortest and most direct route, ending its turn if it moves within 1 m of you.
- ❖ **Drop:** The target drops whatever it is holding and then ends its turn.
- ❖ **Flee:** The target spends its turn moving away from you by the fastest available means.
- ❖ **Grovel:** The target falls prone and then ends its turn.
- ❖ **Halt:** The target does not move and takes no actions. A flying creature stays aloft, provided that it can do so. If it must move to stay aloft, it flies the minimum distance needed to remain in the air.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, you can affect one additional creature for each slot level above 1st. The creatures must be within 6 m of each other when you target them.

Heroism (1st, ench., conc.)

Casting Time: 1 action

Range/Area: Touch

Duration: Conc, 1 minute

Attack/Save: None

Components: S, V

Effect: Buff

Until the spell ends, a willing creature you touch is immune to being frightened and gains temporary health points equal to your spellcasting ability modifier at the start of each of its

turns. When the spell ends, the target loses any remaining temporary health points from this spell.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, you can target one additional creature for each slot level above 1st.

Hex (1st, ench., conc.)

Casting Time: 1 bonus action

Range/Area: 18 m

Duration: Conc, up to 1 min

Attack/Save: None

Components: S, V

Effect: Necrotic

Until the spell ends, you deal an extra 1d6 necrotic damage to the target whenever you hit it with an attack. Also, choose one ability when you cast the spell. The target has disadvantage on ability checks made with the chosen ability.

If the target drops to 0 health points before this spell ends, you can use a bonus action on a subsequent turn of yours to curse a new creature.

A spell that removes curses cast on the target ends this spell early.

At higher levels: When you cast this spell using a spell slot of 3rd or 4th level, you can maintain your concentration on the spell for up to 8 hours. When you use a spell slot of 5th level or higher, you can maintain your concentration on the spell for up to 24 hours.

Hideous Laughter (1st, ench., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: 1 minute

Attack/Save: Comp save

Components: S, V

Effect: Prone

The target must succeed on a Composure saving throw or fall prone, becoming incapacitated and unable to stand up for the duration. A creature with an Intelligence score of 4 or less isn't affected.

At the end of each of its turns, and each time it takes damage, the target can make another Composure saving throw. The target has advantage on the saving throw if it's triggered by damage. On a success, the spell ends.

Sleep (1st, ench.)

Casting Time: 1 action

Range/Area: 18 m (4 m sphere)

Duration: 1 minute

Attack/Save: None

Components: S, V

Effect: Unconscious

Roll 5d8; the total is how many health points of creatures this spell can affect. Creatures within 4 m of a point you choose within range are affected in ascending order of their current health points (ignoring unconscious creatures).

Starting with the creature that has the lowest current health points, each creature affected by this spell falls unconscious until the spell ends, the sleeper takes damage, or someone uses an action to shake or slap the sleeper awake. Subtract each creature's health points from the total before moving on to the creature with the next lowest health points. A creature's health points must be equal to or less than the remaining total for that creature to be affected.

Undead and creatures immune to being charmed aren't affected by this spell.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, roll an additional 2d8 for each slot level above 1st.

Level 2

Calm Emotions (2nd, ench., conc.)

Casting Time: 1 action

Range/Area: 12 m (4 m sphere)

Duration: Conc, 1 minute

Attack/Save: Comp save

Components: S

Effect: Charmed

Each humanoid in a 4 m radius sphere centered on a point you choose within range must make a Composure saving throw; a creature can choose to fail this saving throw if it wishes. If a creature fails its saving throw, choose one of the following two effects.

You can suppress any effect causing a target to be charmed or frightened. When this spell ends, any suppressed effect resumes, provided that its duration has not expired in the meantime. Alternatively, you can make a target indifferent about creatures of your choice that it is hostile toward. This indifference ends if the target is attacked or harmed by a spell or if it witnesses any of its friends being harmed. When the spell ends, the creature becomes hostile again, unless the GM rules otherwise.

Crown of Madness (2nd, ench., conc.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Conc, 1 minute

Attack/Save: Comp save

Components: S, V

Effect: Charmed

One humanoid or human of your choice that you can see within range must succeed on a Composure saving throw or become charmed by you for the duration.

While the creature is charmed this way, it is obvious for all who can see the creature that it is affected by a spell.

The charmed target must use its action before moving on each of its turns to make a melee attack against a creature other than itself that you mentally choose. The target can act normally on its turn if you choose no creature or if none are within its reach.

On your subsequent turns, you must use your action to maintain control over the target, or the spell ends. Also, the target can make a Composure saving throw at the end of each of its turns. On a success, the spell ends.

Enthrall (2nd, ench.)

Casting Time: 1 action

Range/Area: 12 m

Duration: 1 minute

Attack/Save: Res save

Components: S, V

Effect: Control

Creatures of your choice that you can see within range that can hear you must make a Resolve saving throw. Any creature that cannot be charmed succeeds on this saving throw automatically, and if you or your companions are fighting a creature, it has advantage on the save. On a failed save, the target has disadvantage on Perception (Int/Com) checks made to perceive any creature other than you until the spell ends or until the target can no longer hear you. The spell ends if you are incapacitated or can no longer speak.

Hold Person (2nd, ench., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 minute

Attack/Save: Res save

Components: S, V

Effect: Paralyzed

Choose a humanoid or human that you can see within range. The target must succeed on a Resolve saving throw or be paralyzed for the duration. At the end of each of its turns, the target can make another Resolve saving throw. On a success, the spell ends on the target.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, you can target one additional humanoid or human for each slot level above 2nd. The humanoids must be within 6 m of each other when you target them.

Suggestion (2nd, ench., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 8 hours

Attack/Save: Com save

Components: S, V

Effect: Control

You suggest a course of activity (limited to a sentence or two) and influence a creature you can see within range that can hear and understand you. Creatures that cannot be charmed are immune to this effect. The suggestion must be worded in such a manner as to make the course of action sound reasonable. Asking the creature to stab itself, throw itself onto a spear, immolate itself, or do some other obviously harmful act ends the spell.

The target must make a Composure saving throw. On a failed save, it pursues the course of action you described to the best of its ability. The suggested course of action can continue for

the entire duration. If the suggested activity can be completed in a shorter time, the spell ends when the subject finishes what it was asked to do.

You can also specify conditions that will trigger a special activity during the duration. If the condition is not met before the spell expires, the activity isn't performed.

If you or any of your companions damage the target, the spell ends.

Zone of Truth (2nd, ench.)

Casting Time: 1 action

Range/Area: 12 m (3 m sphere)

Duration: 10 minutes

Attack/Save: None

Components: S, V

Effect: Control

You create a magical zone that guards against deception in a 3 m radius sphere centered on a point of your choice within range. Until the spell ends, a creature that enters the spell's area for the first time on a turn or starts its turn there must make a Resolve saving throw. On a failed save, a creature can't speak a deliberate lie while in the radius. You know whether each creature succeeds or fails on its saving throw.

An affected creature is aware of the spell and can thus avoid answering questions to which it would normally respond with a lie. Such a creature can be evasive in its answers as long as it remains within the boundaries of the truth.

Level 3

Enemies Abound (3rd, ench.)

Casting Time: 1 action

Range/Area: 24 m

Duration: 1 minute

Attack/Save: Resolve save

Components: S, V

Effect: Control

One creature you can see must make a Resolve saving throw. A creature automatically succeeds if it is immune to being frightened. On a failed save, the target loses the ability to distinguish friend from foe, regarding all creatures it can see as enemies until the spell ends. Each time the target takes damage, it can repeat the saving throw, ending the effect on itself on a success.

Whenever the affected creature chooses another creature as a target, it must choose the target at random from among the creatures it can see within range of the attack, spell, or other ability it's using. If an enemy provokes an opportunity attack from the affected creature, the creature must make that attack if it can.

Fast Friends (3rd, ench., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, up to 1 hour

Attack/Save: Comp save

Components: V

Effect: Charmed

When you cast this spell, choose one humanoid or human within range that can see and hear you, and that can understand you. The creature must succeed on a Composure saving throw or become charmed by you for the duration. While the creature is charmed in this way, it undertakes to perform any services or activities you ask of it in a friendly manner, to the best of its ability.

You can set the creature new tasks when a previous task is completed, or if you decide to end its current task. If the service or activity might cause harm to the creature, or if it conflicts with the creature's normal activities and desires, the creature can make another Composure saving throw to try to end the effect. This save is made with advantage if you or your companions are fighting the creature. If the activity would result in certain death for the creature, the spell ends.

When the spell ends, the creature knows it was charmed by you.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, you can target one additional creature for each slot level above 3rd.

Level 4

Charm Monster (4th, ench.)

Casting Time: 1 action

Range/Area: 6 m

Duration: 1 hour

Attack/Save: Comp save

Components: S, V

Effect: Charmed

You attempt to charm a creature you can see within range. It must make a Composure saving throw, and it does so with advantage if you or your companions are fighting it. If it fails the saving throw, it is charmed by you until the spell ends or until you or your companions do anything harmful to it. The charmed creature is friendly to you. When the spell ends, the creature knows it was charmed by you.

At higher levels: When you cast this spell using a spell slot of 5th level or higher, you can target one additional creature for each slot level above 4th. The creatures must be within 6 m of each other when you target them.

Compulsion (4th, ench., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 1 minute

Attack/Save: Res save

Components: S, V

Effect: Charmed

Creatures of your choice that you can see within range and that can hear you must make a Resolve saving throw. A target automatically succeeds on this saving throw if it can't be charmed. On a failed save, a target is affected by this spell. Until the spell ends, you can use a bonus action on each of your turns to designate a direction that is horizontal to you.

Each affected target must use as much of its movement as possible to move in that direction on its next turn. It can take its action before it moves. After moving in this way, it can make another Resolve saving throw to try to end the effect.

A target is not compelled to move into an obviously deadly hazard, such as a fire or pit, but it will provoke opportunity attacks to move in the designated direction.

Confusion (4th, ench., conc.)

Casting Time: 1 action

Range/Area: 18 m (2 m sphere)

Duration: Conc, 1 minute

Attack/Save: Int/Cun save

Components: S, V

Effect: Control

This spell assaults and twists creatures' minds, spawning delusions and provoking uncontrolled action. Each creature in a 2 m radius sphere centered on a point you choose within range must succeed on an Int/Cun saving throw when you cast this spell or be affected by it.

An affected target cannot take reactions and must roll a d10 at the start of each of its turns to determine its behavior for that turn.

d10	Behavior
1	The creature uses all its movement to move in a random direction. To determine the direction, roll a d8, and assign a direction to each die face. The creature doesn't take an action this turn.
2-6	The creature doesn't move or take actions this turn.
7-8	The creature uses its action to make a melee attack against a randomly determined creature within its reach. If there is no creature within its reach, the creature does nothing this turn.
9-10	The creature can act and move normally.

At the end of each of its turns, an affected target can make an Int/Cun saving throw. If it succeeds, this effect ends for that target.

At higher levels: When you cast this spell using a spell slot of 5th level or higher, the radius of the sphere increases by 1 m for each slot level above 4th.

Dominate Beast (4th, ench., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 minute

Attack/Save: Res save

Components: S, V

Effect: Charmed

A beast or animal that you can see within range must succeed on a Resolve saving throw or be charmed by you for the duration. If you or creatures that are friendly to you are fighting it, it has advantage on the saving throw.

While the beast or animal is charmed, you have a telepathic link with it as long as the two of you are within the same Realm. You can use this telepathic link to issue commands to the creature while you are conscious (no action required), which it does its best to obey. You can specify a simple and general course of action. If the creature completes the order and doesn't receive further direction from you, it defends and preserves itself to the best of its ability.

You can use your action to take total and precise control of the target. Until the end of your next turn, the creature takes only the actions you choose and doesn't do anything that you don't allow it to do. During this time, you can also cause the creature to use a reaction, but this requires you to use your own reaction as well.

Each time the target takes damage, it makes a new Resolve saving throw against the spell. If the saving throw succeeds, the spell ends.

At higher levels: When you cast this spell with a 5th-level spell slot, the duration is concentration, up to 10 minutes. When you use a 6th-level spell slot, the duration is concentration, up to 1 hour. When you use a spell slot of 7th level or higher, the duration is concentration, up to 8 hours.

Level 5

Dominate Person (5th, ench., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 minute

Attack/Save: Res save

Components: S, V

Effect: Charmed

A humanoid or human that you can see within range must succeed on a Resolve saving throw or be charmed by you for the duration. If you or creatures that are friendly to you are fighting it, it has advantage on the saving throw.

While the target is charmed, you have a telepathic link with it as long as the two of you are within the same Realm. You can use this telepathic link to issue commands to the creature while you are conscious (no action required), which it does its best to obey. You can specify a simple and general course of action. If the creature completes the order and doesn't receive further direction from you, it defends and preserves itself to the best of its ability.

You can use your action to take total and precise control of the target. Until the end of your next turn, the creature takes only the actions you choose and doesn't do anything that you don't allow it to do. During this time you can also cause the creature to use a reaction, but this requires you to use your own reaction as well.

Each time the target takes damage, it makes a new Resolve saving throw against the spell. If the saving throw succeeds, the spell ends.

At higher levels: When you cast this spell using a 6th-level spell slot, the duration is concentration, up to 10 minutes. When you use a 7th-level spell slot, the duration is concentration, up to 1 hour. When you use a spell slot of 8th level or higher, the duration is concentration, up to 8 hours.

Geas (5th, ench.)

Casting Time: 1 minute

Range/Area: 12 m

Duration: 30 days

Attack/Save: Res save

Components: V

Effect: Charmed

You place a command on a creature that you can see within range. If the creature can understand you, it must succeed on a Resolve saving throw or become charmed by you for the duration. While the creature is charmed by you, it takes 5d10 psychic damage each time it acts in a manner directly counter to your instructions, but no more than once each day. A creature that cannot understand you is unaffected by the spell.

You can issue any command you choose, short of an activity that would result in certain death. Should you issue a suicidal command, the spell ends.

You can end the spell early by using an action to dismiss it. Greater Restoration or the Wish spell also ends it.

At higher levels: When you cast this spell using a spell slot of 7th or 8th level, the duration is 1 year. When you cast this spell using a spell slot of 9th level, the spell lasts until it is ended by one of the spells mentioned above.

Hold (5th, ench., conc.)

Casting Time: 1 action

Range/Area: 18 m

Duration: Conc, 1 minute

Attack/Save: Res save

Components: S, V

Effect: Paralyzed

Choose a creature that you can see within range. The target must succeed on a Resolve saving throw or be paralyzed for the duration. At the end of each of its turns, the target can make another Resolve saving throw. On a success, the spell ends on the target.

At higher levels: When you cast this spell using a spell slot of 6th level or higher, you can target one additional creature for each slot level above 5th. The creatures must be within 6 m of each other when you target them.

Modify Memory (5th, ench, conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 1 minute

Attack/Save: Int/Cun save

Components: S, V

Effect: Charmed

One creature that you can see must make an Int/Cun saving throw. If you are fighting the creature, it has advantage on the saving throw. On a failed save, the target becomes charmed by you for the duration. The charmed target is incapacitated and unaware of its surroundings, though it can still hear you. If it takes any damage or is targeted by another spell, this spell ends, and none of the target's memories are modified.

While this charm lasts, you can affect the target's memory of an event that it experienced within the last 24 hours and that lasted no more than 10 minutes. You can permanently eliminate all memory of the event, allow the target to recall the event with perfect clarity and exacting detail, change its memory of the details of the event, or create a memory of some other event.

You must speak to the target to describe how its memories are affected, and it must be able to understand your language for the modified memories to take root. Its mind fills in any gaps in the details of your description. If the spell ends before you have finished describing the modified memories, the creature's memory isn't altered. Otherwise, the modified memories take hold when the spell ends.

A modified memory doesn't necessarily affect how a creature behaves, particularly if the memory contradicts the creature's natural inclinations, alignment, or beliefs. An illogical modified memory, such as implanting a memory of how much the creature enjoyed dousing itself in acid, is dismissed, perhaps as a bad dream. The GM might deem a modified memory too nonsensical to affect a creature in a significant manner.

A spell that removes curses cast on the target restores the creature's true memory.

At higher levels: If you cast this spell using a spell slot of 6th level or higher, you can alter the target's memories of an event that took place up to 7 days ago (6th level), 30 days ago (7th level), 1 year ago (8th level), or any time in the creature's past (9th level).

Psychic Blast (5th, ench.)

Casting Time: 1 action

Range/Area: 24 m (4 m sphere)

Duration: Instant

Attack/Save: Comp save

Components: S, V

Effect: Psychic

Each creature in a 4 m radius sphere centered on that point must make a Composure saving throw. A creature with an Intelligence score of 2 or lower can't be affected by this spell. A target takes 8d6 psychic damage on a failed save, or half as much damage on a successful one.

After a failed save, a target has muddled thoughts for 1 minute. During that time, it rolls a d6 and subtracts the number rolled from all its attack rolls and ability checks, as well as its Resolve saving, throws to maintain concentration. The target can make an Intelligence saving throw at the end of each of its turns, ending the effect on itself on a success.

Level 6

Mass Suggestion (6th, ench.)

Casting Time: 1 action

Range/Area: 12 m

Duration: 24 hours

Attack/Save: Com save

Components: V

Effect: Charmed

You suggest a course of activity (limited to a sentence or two) and influence up to 12 creatures of your choice that you can see within range and that can hear and understand you. Creatures that cannot be charmed are immune to this effect. The suggestion must be worded in such a manner as to make the course of action sound reasonable. Asking the creature to stab itself, throw itself onto a spear, immolate itself, or do some other obviously harmful act automatically negates the effect of the spell.

Each target must make a Composure saving throw. On a failed save, it pursues the course of action you described to the best of its ability. The suggested course of action can continue for the entire duration. If the suggested activity can be completed in a shorter time, the spell ends when the subject finishes what it was asked to do.

You can also specify conditions that will trigger a special activity during the duration. For example, you might suggest that a group of soldiers give all their money to the first beggar they meet. If the condition isn't met before the spell ends, the activity isn't performed.

If you or any of your companions damage a creature affected by this spell, the spell ends for that creature.

At higher levels: When you cast this spell using a 7th-level spell slot, the duration is 10 days.

When you use an 8th-level spell slot, the duration is 30 days. When you use a 9th-level spell slot, the duration is a year and a day.

Irresistible Dance (6th, ench., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 1 minute

Attack/Save: Com save

Components: V

Effect: Control

Choose one creature that you can see within range. The target begins to dance in place for the duration. Creatures that cannot be charmed are immune to this spell.

A dancing creature must use all its movement to dance without leaving its space and has disadvantage on Dexterity saving throws and attack rolls. While the target is affected by this spell, other creatures have advantage on attack rolls against it. As an action, a dancing creature makes a Composure saving throw to regain control of itself. On a successful save, the spell ends.

Level 7

Coptic Word of Pain (7th, ench.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: Com save

Components: V

Effect: Debuff

You speak the Coptic word for pain. If the target has 100 health points or fewer, it is subject to the pain. Otherwise, the spell does not affect it. A target is also unaffected if it is immune to being charmed.

While the target is affected by crippling pain, any speed it has can be no higher than 12 m. The target also has disadvantage on attack rolls, ability checks, and saving throws, other than Composure saving throws. Finally, if the target tries to cast a spell, it must first succeed on a Resolve saving throw, or the casting fails and the spell is wasted.

A target suffering this pain can make a Composure saving throw at the end of each of its turns. On a successful save, the pain ends.

Level 8

Antipathy/Sympathy (8th, ench.)

Casting Time: 1 hour

Range/Area: 12 m (40 m square)

Duration: 10 days

Attack/Save: Res save

Components: S, V

Effect: Frightened

You target something within range, either a Huge or smaller object or creature or an area that is no larger than a 40 m cube. Then specify a type of intelligent creature, such as a humanoid or beast. You invest the target with an aura that either attracts or repels the specified creatures for the duration. Choose antipathy or sympathy as the aura's effect.

- ❖ **Antipathy:** When a creature can see the target or comes within 12 m of it, the creature must succeed on a Resolve saving throw or become frightened. The creature remains frightened while it can see the target or is within 12 m of it. While frightened by the target, the creature must use its movement to move to the nearest safe spot from which it can't see the target. If the creature moves more than 12 m from the target and can't see it, the creature is no longer frightened, but the creature becomes frightened again if it regains sight of the target or moves within 12 m of it.
- ❖ **Sympathy:** When such a creature can see the target or comes within 12 m of it, the creature must succeed on a Resolve saving throw or use its movement on each of its turns to enter the area or move within reach of the target. When the creature has done so, it can't willingly move away from the target.

If the target damages or otherwise harms an affected creature, the affected creature can make a Resolve saving throw to end the effect, as described below.

Ending the Effect: If an affected creature ends its turn while not within 12 m of the target or able to see it, the creature makes a Resolve saving throw. On a successful save, the creature is no longer affected by the target and recognizes the feeling of repugnance or attraction as magical. In addition, a creature affected by the spell is allowed another Resolve saving throw every 24 hours while the spell persists.

A creature that successfully saves against this effect is immune to it for 1 minute, after which time it can be affected again.

Coptic Word of Stun (8th, ench.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: Com save

Components: V

Effect: Stunned

You speak the Coptic word for stun. If the target has 150 health points or fewer, it is stunned. Otherwise, the spell has no effect.

The stunned target must make a Composure saving throw at the end of each of its turns. On a successful save, this stunning effect ends.

Dominate Monster (8th, ench., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 hour

Attack/Save: Res save

Components: S, V

Effect: Charmed

A creature that you can see within range must succeed on a Resolve saving throw or be charmed by you for the duration. If you or creatures that are friendly to you are fighting it, it has advantage on the saving throw.

While the creature is charmed, you have a telepathic link with it as long as the two of you are within the same Realm. You can use this telepathic link to issue commands to the creature while you are conscious (no action required), which it does its best to obey. You can specify a simple and general course of action. If the creature completes the order and doesn't receive further direction from you, it defends and preserves itself to the best of its ability.

You can use your action to take total and precise control of the target. Until the end of your next turn, the creature takes only the actions you choose and doesn't do anything that you don't allow it to do. During this time, you can also cause the creature to use a reaction, but this requires you to use your own reaction as well.

Each time the target takes damage, it makes a new Resolve saving throw against the spell. If the saving throw succeeds, the spell ends.

At higher levels: When you cast this spell with a 9th-level spell slot, the duration is concentration, up to 8 hours.

Feeblemind (8th, ench.)

Casting Time: 1 action

Range/Area: 25 m

Duration: Instant

Attack/Save: Int/Cun save

Components: S, V, SC

Effect: Psychic

The target takes 4d6 psychic damage and must make a Resolve saving throw.

On a failed save, the creature's mental and social ability scores become 1. The creature can't cast spells, activate magic items, understand language, or communicate in any intelligible way. The creature can, however, identify its friends, follow them, and even protect them.

At the end of every 7 days, the creature can repeat its saving throw against this spell. If it succeeds on its saving throw, the spell ends.

The spell can also be ended by the *Greater Restoration*, *Heal*, or *Wish* spells.

Level 9

Coptic Word of Death (9th, ench.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: None

Components: V

Effect: Control

You speak the Coptic word for death. If the creature you choose has 100 h health points or fewer, it dies. Otherwise, the spell has no effect.

EVOCATION

Evocation spells manipulate magical energy to produce a desired effect. Some call up blasts of fire or lightning. Others channel Soul potency to heal wounds.

Cantrips

Elemental Blade (0, evo.)

Casting Time: 1 action and bonus

Range/Area: 1 m

Duration: Instant

Attack/Save: Vit save

Components: S, V

Effect: Multiple

Spend a bonus action and an action to cast this spell, you must make a melee attack with a weapon against one creature within the spell's range, otherwise, the spell fails.

On a hit, the target suffers the attack's normal effects in addition to an extra 1d4 acid, cold, fire, lightning, poison, or thunder damage to the melee weapon attack's damage.

The spell's damage increases by 1d4 when you reach 5th level (2d4), 11th level (3d4), and 17th level (4d4).

Fire Bolt (0, evo.)**Casting Time:** 1 action**Range/Area:** 24 m**Duration:** Instant**Attack/Save:** Ranged**Components:** S, V**Effect:** Fire

Make a ranged spell attack against the target. On a hit, the target takes 1d10 fire damage. A flammable object hit by this spell ignites if it isn't being worn or carried.

This spell's damage increases by 1d10 when you reach 5th total level (2d10), 11th total level (3d10), and 17th total level (4d10).

Force Blast (0, evo.)**Casting Time:** 1 action**Range/Area:** 24 m**Duration:** Instant**Attack/Save:** Ranged**Components:** S, V**Effect:** Force

Make a ranged spell attack against the target. On a hit, the target takes 1d10 force damage.

The spell creates more than one beam when you reach higher levels: two beams at 5th level, three beams at 11th level, and four beams at 17th level. You can direct the beams at the same target or at different ones. Make a separate attack roll for each beam.

Frostbite (0, evo.)**Casting Time:** 1 action**Range/Area:** 12 m**Duration:** Instant**Attack/Save:** Vit save**Components:** S, V**Effect:** Cold

The target must make a Vitality saving throw. On a failed save, the target takes 1d6 cold damage, and it has disadvantage on the next weapon attack roll it makes before the end of its next turn.

The spell's damage increases by 1d6 when you reach 5th level (2d6), 11th level (3d6), and 17th level (4d6).

Lights (0, evo.)**Casting Time:** 1 action**Range/Area:** Touch**Duration:** 1 hour**Attack/Save:** Dex save**Components:** V**Effect:** Creation

You touch one object that is no larger than 2 m in any dimension. Until the spell ends, the object sheds bright light in a 4 m radius and dim light for an additional 4 m. The light can be colored as you like. Completely covering the object with something opaque blocks the light. The spell ends if you cast it again or dismiss it as an action.

If you target an object held or worn by a hostile creature, that creature must succeed on a Dexterity saving throw to avoid the spell.

Shocking Grasp (0, evo.)**Casting Time:** 1 action**Range/Area:** Touch**Duration:** Instant**Attack/Save:** Melee**Components:** S, V**Effect:** Lightning

Make a melee spell attack against the target. You have advantage on the attack roll if the target is wearing armor made of metal. On a hit, the target takes 1d8 lightning damage, and it can't take reactions until the start of its next turn.

The spell's damage increases by 1d8 when you reach 5th level (2d8), 11th level (3d8), and 17th level (4d8).

Thunderclap (0, evo.)**Casting Time:** 1 action**Range/Area:** 1 m**Duration:** Instant**Attack/Save:** Vit save**Components:** S**Effect:** Thunder

Each creature within range, other than you, must succeed on a Vitality saving throw or take 1d6 thunder damage. When this spell is cast it can be heard up to 30 m away.

The spell's damage increases by 1d6 when you reach 5th level (2d6), 11th level (3d6), and 17th level (4d6).

Level 1

Burning Hands (1st, evo.)

Casting Time: 1 action

Range/Area: Self (3 m cone)

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Fire

Each creature in a 3 m cone must make a Dexterity saving throw. A creature takes 3d6 fire damage on a failed save, or half as much damage on a successful one.

The fire ignites any flammable objects in the area that are not being worn or carried.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, the damage increases by 1d6 for each slot level above 1st.

Continual Flame (1st, evo.)

Casting Time: 1 action

Range/Area: Touch

Duration: Until dispelled

Attack/Save: None

Components: S, V, SC

Effect: Creation

You touch an object and it sets aflame. The effect looks like a regular flame with the brightness of a torch, but it creates no heat and doesn't use oxygen. A continual flame can be covered or hidden but not smothered or quenched.

Earth Tremor (1st, evo.)

Casting Time: 1 action

Range/Area: 2 m

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Force

Each creature other than you in that area must make a Dexterity saving throw. On a failed save, a creature takes 1d6 force damage and is knocked prone. If the ground in that area is loose earth or stone, it becomes difficult terrain until cleared, with each 1-m-diameter portion requiring at least 1 minute to clear by hand.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, the damage increases by 1d6 for each slot level above 1st.

Faerie Fire (1st, evo., conc.)

Casting Time: 1 action

Range/Area: 12 m (4 m square)

Duration: Conc, 1 minute

Attack/Save: Dex save

Components: V

Effect: Debuff

Any creature in the area when the spell is cast is outlined in light if it fails a Dexterity saving throw. For the duration, objects and affected creatures shed dim light in a 2 m radius.

Any attack roll against an affected creature or object has advantage if the attacker can see it, and the affected creature or object cannot benefit from being invisible.

Hellish Rebuke (1st, evo.)

Casting Time: 1 reaction

Range/Area: 12 m

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Fire

This spell is cast in response to being damaged by a creature within 12 m of you that you can see. The creature must make a Dexterity saving throw. It takes 2d10 fire damage on a failed save, or half as much damage on a successful one.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, the damage increases by 1d10 for each slot level above 1st.

Magic Missile (1st, evo.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Instant

Attack/Save: None

Components: S

Effect: Force

This spell creates three magic missiles. A missile deals 1d4 + 1 force damage to its target. The missiles all strike simultaneously, and you can direct them to hit one creature or several.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, the spell creates one more missile for each slot level above 1st.

Thunderwave (1st, evo.)

Casting Time: 1 action

Range/Area: Self (3 m square)

Duration: Instant

Attack/Save: Vit save

Components: S, V

Effect: Thunder

Each creature in a 3 m cube originating from you must make a Vitality saving throw. On a failed save, a creature takes 2d8 thunder damage and is pushed 2 m away from you. On a successful save, the creature takes half as much damage and is not pushed.

In addition, unsecured objects that are completely within the area of effect are automatically pushed 2 m away from you by the spell's effect, and the spell emits a thunderous boom audible out to 100 m.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, the damage increases by 1d8 for each slot level above 1st.

Level 2

Acid Arrow (2nd, evo.)

Casting Time: 1 action

Range/Area: 18 m

Duration: Instant

Attack/Save: Ranged

Components: S, V

Effect: Acid

Make a ranged spell attack against the target. On a hit, the target takes 4d4 acid damage immediately and 2d4 acid damage at the end of its next turn. On a miss, the arrow splashes the target with acid for half as much of the initial damage and no damage at the end of its next turn.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, the damage (both initial and later) increases by 1d4 for each slot level above 2nd.

Darkness (2nd, evo., conc.)

Casting Time: 1 action

Range/Area: 12 m (3 m sphere)

Duration: Conc, 1 minute

Attack/Save: None

Components: V

Effect: Control

Magical darkness fills a 3 m radius sphere for the duration in a point of your choice. The darkness spreads around corners. A creature with darkvision can't see through this darkness, and nonmagical light won't illuminate it.

If the point you choose is on an object you are holding or one that isn't being worn or carried, the darkness emanates from the object and moves with it. Completely covering the source of the darkness with an opaque object, such as a bowl or a helm, blocks the darkness.

Flame Blade (2nd, evo., conc.)

Casting Time: 1 bonus action

Range/Area: Self

Duration: Conc, 10 minutes

Attack/Save: Melee

Components: S, V

Effect: Fire

This spell creates a fiery one-handed weapon in one of your free hands for the duration. If you let go of the weapon, it disappears, but you can evoke the weapon again as bonus action.

You can use your action to make a melee spell attack with the fiery weapon. On a hit, the target takes 3d6 fire damage.

The flaming weapon sheds bright light in a 2 m radius and dim light for an additional 2 m.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, the damage increases by 1d6 for every two slot levels above 2nd.

Gust of Wind (2nd, evo., conc.)

Casting Time: 1 action

Range/Area: Self

Duration: Conc, 1 minute

Attack/Save: Br save

Components: S, V

Effect: Control

Each creature that starts its turn in a 12 m long and 2 m wide line that originates from you must succeed on a Brawn saving throw or be pushed 3 m away from you in a direction following the line.

Any creature in the line must spend 2 m of movement for every 1 m it moves when moving closer to you.

The gust disperses gas or vapor, and it extinguishes candles, torches, and similar unprotected flames in the area. It causes protected flames, such as those of lanterns, to dance wildly and has a 50 percent chance to extinguish them.

As a bonus action on each of your turns before the spell ends, you can change the direction in which the line blasts from you.

Moonbeam (2nd, evo., conc.)

Casting Time: 1 action

Range/Area: 24 m (1 m cylinder)

Duration: Conc, 1 minute

Attack/Save: Vit save

Components: S

Effect: Radiant

When a creature enters the spell's area, 1 m radius, 8 m high cylinder, for the first time on a turn or starts its turn there, it must make a vitality saving throw. It takes 2d10 radiant damage on a failed save, or half as much damage on a successful one.

A shapechanger makes its saving throw with disadvantage. If it fails, it also instantly reverts to its original form and can't assume a different form until it leaves the spell's light.

On each of your turns, after you cast this spell, you can use an action to move the beam up to 12 m in any direction.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, the damage increases by 1d10 for each slot level above 2nd.

Scorching Ray (2nd, evo.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Instant

Attack/Save: Ranged

Components: S, V

Effect: Fire

Make a ranged spell attack for three rays. You can target one or several creatures with the rays. On a hit, one ray deals 2d6 fire damage.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, you create one additional ray for each slot level above 2nd.

Shatter (2nd, Evo.)

Casting Time: 1 action

Range/Area: 12 m (2 m sphere)

Duration: Instant

Attack/Save: Vit save

Components: S, V

Effect: Thunder

Each creature in a 2 m radius sphere centered on that point must make a Vitality saving throw. A creature takes 3d8 thunder damage on a failed save, or half as much damage on a successful one. A creature made of an inorganic material such as stone, crystal, or metal has disadvantage on this saving throw.

A nonmagical object that isn't being worn or carried also takes the damage if it's in the spell's area.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, the damage increases by 1d8 for each slot level above 2nd.

Snowball Swarm (2nd, evo.)

Casting Time: 1 action

Range/Area: 18 m (1 m sphere)

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Cold

Each creature in a 1 m radius sphere centered on that point must make a Dexterity saving throw. A creature takes 3d6 cold damage on a failed save, or half as much damage on a successful one.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, the damage increases by 1d6 for each slot level above 2nd.

Spiritual Weapon (2nd, evo., conc)

Casting Time: 1 bonus action

Range/Area: 12 m

Duration: Conc, 1 minute

Attack/Save: Melee

Components: S, V

Effect: Force

When you cast the spell, you can make a melee spell attack against a creature within 1 m of the weapon. On a hit, the target takes force damage equal to 2d10 + your spellcasting ability modifier. As a bonus action on your turn, you can move the weapon up to 4 m and repeat the attack against a creature within 1 m of it.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, the damage increases by 1d10 for every two slot levels above 2nd.

The Scorcher (2nd, evo.)

Casting Time: 1 action

Range/Area: 6 m (6 m line)

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Fire

Each creature in a 6 m long line originating from you in a direction you choose, must make a Dexterity saving throw. A creature takes 3d8 fire damage on a failed save, or half as much damage on a successful one.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, the damage increases by 1d8 for each slot level above 2nd.

Warding Wind (2nd, evo., conc.)

Casting Time: 1 action

Range/Area: Self (2 m radius)

Duration: Conc, 10 minutes

Attack/Save: None

Components: V

Effect: Deafened

A strong wind (10 m/s) blows around you in a 2 m radius and moves with you, remaining centered on you. The wind lasts for the spell's duration.

The wind has the following effects:

- ❖ It deafens you and other creatures in its area.
- ❖ It extinguishes unprotected flames in its area that are torch-sized or smaller.
- ❖ It hedges out vapor, gas, and fog that can be dispersed by strong wind.
- ❖ The area is difficult terrain for creatures other than you.
- ❖ The attack rolls of ranged weapon attacks have disadvantage if the attacks pass in or out of the wind.

Level 3

Daylight (3rd, evo.)

Casting Time: 1 action

Range/Area: 12 m (12 m sphere)

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Control

A 12 m radius sphere of light appears on a point you choose within range. The sphere is a bright light and sheds dim light for an additional 12 m.

If you chose a point on an object you are holding or one that isn't being worn or carried, the light shines from the object and moves with it. Completely covering the affected object with an opaque object, such as a bowl or a helm, blocks the light.

Lightning Bolt (3rd, evo.)

Casting Time: 1 action

Range/Area: Self (20 m line)

Duration: Instant

Attack/Save: Dex save

Components: S

Effect: Lightning

A stroke of lightning forming a line 20 m long and 1 m wide blasts out from you in a direction you choose. Each creature in the line must make a Dexterity saving throw. A creature takes 8d6 lightning damage on a failed save, or half as much damage on a successful one.

The lightning ignites flammable objects in the area that aren't being worn or carried.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, the damage increases by 1d6 for each slot level above 3rd.

Minute Meteors (3rd, evo., conc.)

Casting Time: 1 action

Range/Area: Self

Duration: Conc, 10 minutes

Attack/Save: Dex save

Components: S, V

Effect: Fire

You create six tiny meteors in your space. When you cast the spell – and as a bonus action on each of your turns thereafter – you can expend one or two of the meteors, sending them streaking toward a point or points you choose within 24 m of you. Once a meteor reaches its destination or impacts against a solid surface, the meteor explodes. Each creature within 1 m of the point where the meteor explodes must make a Dexterity saving throw. A creature takes 2d6 fire damage on a failed save, or half as much damage on a successful one.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, the number of meteors created increases by two for each slot level above 3rd.

Sending (3rd, evo.)

Casting Time: 1 action

Range/Area: Unlimited

Duration: 1 round

Attack/Save: None

Components: S, V

Effect: Communication

You send a short message of twenty-five words or less to a creature with which you are familiar. The creature hears the message in its mind, recognizes you as the sender if it knows you, and can answer similarly immediately. The spell enables creatures with Intelligence scores of at least 1 to understand the meaning of your message.

You can send the message across any distance and even to other Realms, the Stellar Expanse and Ethereal Dimension, but if the target is in the Stellar Expanse, Ethereal Dimension or different Realm, there is a 5 percent chance that the message does not arrive.

Tiny Hut (3rd, evo., ritual)

Casting Time: 1 minute

Range/Area: Self (2 m sphere)

Duration: 8 hours

Attack/Save: None

Components: S, V

Effect: Utility

A 2 m radius immobile magical dome springs into existence around and above you and remains stationary for the duration. The spell ends if you leave its area.

Nine creatures of Medium size or smaller can fit inside the dome with you. The spell fails if its area includes a larger creature or more than nine creatures. Creatures and objects within the dome when you cast this spell can move through it freely. All other creatures and objects are barred from passing through it. Spells and other magical effects can't extend through the dome or be cast through it. The atmosphere inside the space is comfortable and dry, regardless of the weather outside.

Until the spell ends, you can command the interior to become dimly lit or dark. The dome is opaque from the outside, of any color you choose, but it is transparent from the inside.

Wall of Water (3rd, evo. conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 10 minutes

Attack/Save: None

Components: S, V

Effect: Control

You create a wall of water up to 6 m long, 2 m high, and 0.5 m thick, or you can make a ringed wall up to 4 m in diameter, 4 m high, and 0.5 m thick. The wall vanishes when the spell ends. The wall's space is difficult terrain.

Any ranged weapon attack that enters the wall's space has disadvantage on the attack roll, and fire damage is halved if the fire effect passes through the wall to reach its target. Spells that deal cold damage that pass through the wall cause the area of the wall they pass through to freeze solid (at least a 1-m-square section is frozen). Each 1-m-square frozen section has AV 5 and 15 health points. Reducing a frozen section to 0 health points destroys it. When a section is destroyed, the wall's water does not fill it.

Wind Wall (3rd, evo., conc.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Conc, 1 minute

Attack/Save: Br save

Components: S, V

Effect: Force

You create a wall of wind up to 10 m long, 3 m high, and 0.5 m thick. You can shape the wall in any way you choose so long as it makes one continuous path along the ground. The wall lasts for the duration.

When the wall appears, each creature within its area must make a Brawn saving throw. A creature takes 3d8 force damage on a failed save, or half as much damage on a successful one. The strong wind keeps fog, smoke, and other gases at bay. Small or smaller flying creatures or objects cannot pass through the wall. Loose, lightweight materials brought into the wall fly upward. Arrows, bolts, and other ordinary projectiles launched at targets behind the wall are deflected upward and automatically miss. (Boulders hurled by giants or siege engines, and similar projectiles, are unaffected.) Creatures in gaseous form cannot pass through it.

Level 4

Fireball (4th, evo.)

Casting Time: 1 action

Range/Area: 30 m (4 m sphere)

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Fire

Each creature in a 4 m radius sphere must make a Dexterity saving throw. A target takes 7d6 fire damage on a failed save, or half as much damage on a successful one.

The fire spreads around corners. It ignites flammable objects in the area that aren't being worn or carried.

At higher levels: When you cast this spell using a spell slot of 5th level or higher, the damage increases by 1d6 for each slot level above 5th.

Ice Storm (4th, evo.)

Casting Time: 1 action

Range/Area: 60 m (4 m cylinder)

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Cold, force

Each creature in a 4 m radius, 8 m high cylinder centered on a point within range, must make a Dexterity saving throw. A creature takes 2d8 force damage and 4d6 cold damage on a failed save, or half as much damage on a successful one.

Hailstones turn the storm's area of effect into difficult terrain until the end of your next turn.

At higher levels: When you cast this spell using a spell slot of 5th level or higher, the force damage increases by 1d8 for each slot level above 4th.

Storm Sphere (4th, evo., conc.)

Casting Time: 1 action

Range/Area: 30 m (4 m sphere)

Duration: Conc, 1 minute

Attack/Save: Br save

Components: S, V

Effect: Force, lightning

Each creature in the sphere when it appears or that ends its turn there must succeed on a Brawn saving throw or take 2d6 force damage. The sphere's space is difficult terrain.

Until the spell ends, you can use a bonus action on each of your turns to cause a bolt of lightning to leap from the center of the sphere toward one creature you choose within 12 m of the center. Make a ranged spell attack. You have advantage on the attack roll if the target is in the sphere. On a hit, the target takes 4d6 lightning damage.

Creatures within 6 m of the sphere have disadvantage on perception checks made to listen.

At higher levels: When you cast this spell using a spell slot of 5th level or higher, the damage increases for each of its effects by 1d6 for each slot level above 4th.

Vitriolic Sphere (4th, evo.)

Casting Time: 1 action

Range/Area: 30 m (4 m sphere)

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Acid

Each creature in a 4-m-radius sphere must make a Dexterity saving throw. On a failed save, a creature takes 10d4 acid damage and another 5d4 acid damage at the end of its next turn. On a successful save, a creature takes half the initial damage and no damage at the end of its next turn.

At higher levels: When you cast this spell using a spell slot of 5th level or higher, the initial damage increases by 2d4 for each slot level above 4th.

Wall of Fire (4th, evo., conc.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Conc, 1 minute

Attack/Save: Dex save

Components: S, V

Effect: Fire

You can make a firewall up to 12 m long, 4 m high, and 0.5 m thick, or a ringed wall up to 4 m in diameter, 4 m high, and 0.5 m thick. The wall is opaque and lasts for the duration.

When the wall appears, each creature within its area must make a Dexterity saving throw. On a failed save, a creature takes 5d8 fire damage, or half as much damage on a successful save.

One side of the wall, selected by you when you cast this spell, deals 5d8 fire damage to each creature that ends its turn within 2 m of that side or inside the wall. A creature takes the same damage when it enters the wall for the first time on a turn or ends its turn there. The other side of the wall deals no damage.

At higher levels: When you cast this spell using a spell slot of 5th level or higher, the damage increases by 1d8 for each slot level above 4th.

Level 5

Arcane Hand (5th, evo., conc.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Conc, 1 minute

Attack/Save: None

Components: S, V

Effect: Force

You create a Large hand of magical force. The hand lasts for the spell's duration, and it moves at your command, mimicking the movements of your own hand.

The hand is an object that has AV 20 and health points equal to your health point maximum. If it drops to 0 health points, the spell ends. It has a Brawn score of 26 (+8) and a Dexterity score of 10 (+0). The hand does not fill its space.

When you cast the spell and as a bonus action on your subsequent turns, you can move the hand up to 12 m and then cause one of the following effects with it.

Clenched Fist: The hand strikes one creature or object within 1 m of it. Make a melee spell attack for the hand using your game statistics. On a hit, the target takes 4d8 force damage.

Forceful Hand: The hand attempts to push a creature within 1 m of it in a direction you choose. Make a check with the hand's Brawn contested by the Athletics (Br) check of the target. If the target is Medium or smaller, you have advantage on the check. If you succeed, the hand pushes the target up to 1 m plus a number of m equal to your spellcasting ability modifier. The hand moves with the target to remain within 1 m of it.

Grasping Hand: The hand attempts to grapple a Huge or smaller creature within 1 m of it. You use the hand's Brawn score to resolve the grapple. If the target is Medium or smaller, you have advantage on the check. While the hand is grappling the target, you can use a bonus action to

have the hand crush it. When you do so, the target takes force damage equal to 2d6 + your spellcasting ability modifier.

Interposing Hand: The hand interposes itself between you and a creature you choose until you give the hand a different command. The hand moves to stay between you and the target, providing you with half cover against the target. The target can't move through the hand's space if its Brawn score is less than or equal to the hand's Brawn score. If its Brawn score is higher than the hand's Brawn score, the target can move toward you through the hand's space, but that space is difficult terrain for the target.

At higher levels: When you cast this spell using a spell slot of 6th level or higher, the damage from the clenched fist option increases by 2d8, and the damage from the grasping hand increases by 2d6 for each slot level above 5th.

Cone of Cold (5th, evo.)

Casting Time: 1 action

Range/Area: Self (12 m cone)

Duration: Instant

Attack/Save: Vit save

Components: S, V

Effect: Cold

Each creature in a 12 m cone must make a Vitality saving throw. A creature takes 7d8 cold damage on a failed save, or half as much damage on a successful one.

A creature killed by this spell becomes a frozen statue until it thaws.

At higher levels: When you cast this spell using a spell slot of 6th level or higher, the damage increases by 1d8 for each slot level above 5th.

Dawn (5th, evo., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc., up to 1 min

Attack/Save: Vit save

Components: S, V, SC

Effect: Radiant

Until the spell ends, you create a 6 m radius, 8 m high cylinder of bright light. This light is sunlight. When the cylinder appears, each creature in it must make a Vitality saving throw, taking 4d10 radiant damage on a failed save, or half as much damage on a successful one. A creature must also make this saving throw whenever it ends its turn in the cylinder. If you're within 12 m of the cylinder, you can move it up to 12 m as a bonus action on your turn.

Destructive Wave (5th, evo.)

Casting Time: 1 action

Range/Area: Self (6 m radius)

Duration: Instant

Attack/Save: Vit save

Components: V

Effect: Multiple

Each creature you choose within 6 m of you must succeed on a Vitality saving throw or take 5d6 thunder damage, as well as 5d6 radiant or necrotic damage (your choice), and be knocked prone. A creature that succeeds on its saving throw takes half as much damage and is not knocked prone.

Flame Strike (5th, evo.)

Casting Time: 1 action

Range/Area: 12 m (2 m cylinder)

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Fire, radiant

A vertical column of divine fire roars down from the heavens in a location you specify. Each creature in a 2 m radius, 4 m high cylinder centered on a point within range must make a Dexterity saving throw. A creature takes 4d6 fire damage and 4d6 radiant damage on a failed save, or half as much damage on a successful one.

At higher levels: When you cast this spell using a spell slot of 6th level or higher, the fire damage or the radiant damage (your choice) increases by 1d6 for each slot level above 5th.

Maelstrom (5th, evo., conc.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Conc, 1 minute

Attack/Save: Br save

Components: S, V

Effect: Force

1 m deep water appears in a 6 m radius centered on a point you can see within range. The point must be on the ground or in a body of water. Until the spell ends, that area is difficult terrain, and any creature that starts its turn there must succeed on a Brawn saving throw or take 6d6 force damage and be pulled 2 m toward the center.

Wall Force (5th, evo., conc.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Conc, 10 minutes

Attack/Save: None

Components: S, V

Effect: Control

A wall appears in any orientation you choose, as a horizontal or vertical barrier or at an angle. It can be free-floating or resting on a solid surface. You can form it into a hemispherical dome or a sphere with a radius of up to 2 m, or you can shape a flat surface made up of ten 2 m by 2 m panels. Each panel must be contiguous with another panel. In any form, the wall is 0.1 m thick. It lasts for the duration. If the wall cuts through a creature's space when it appears, the creature is pushed to one side of the wall (your choice which side).

Nothing can physically pass through the wall. It is immune to all damage and cannot be dispelled by Dispel Magic. A Disintegrate spell destroys the wall instantly, however. The wall also extends into the Ethereal Dimension, blocking ethereal travel through the wall.

Wall of Stone (5th, evo., conc.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Conc, 10 minutes

Attack/Save: Dex save

Components: S, V

Effect: Control

The stone wall is 0.2 m thick and is composed of ten 2 m by 2 m panels. Each panel must be contiguous with at least one other panel. Alternatively, you can create 2 m by 4 m panels that are only 0.1 m thick.

If the wall cuts through a creature's space when it appears, the creature is pushed to one side of the wall (your choice). If a creature would be surrounded on all sides by the wall (or the wall and another solid surface), that creature can make a Dexterity saving throw. On a success, it can use its reaction to move up to its speed so that it is no longer enclosed by the wall.

The wall can have any shape you desire, though it cannot occupy the same space as a creature or object. The wall does not need to be vertical or rest on any firm foundation. It must, however, merge with and be solidly supported by existing stone. Thus, you can use this spell to bridge a chasm or create a ramp.

If you create a span greater than 4 m in length, you must halve the size of each panel to create supports. You can crudely shape the wall to create crenellations, battlements, and so on.

The wall is an object made of stone that can be damaged and thus breached. Each panel has AV 15 and 90 health points per 0.1 m of thickness. Reducing a panel to 0 health points destroys it and might cause connected panels to collapse at the GM's discretion.

If you maintain your concentration on this spell for its whole duration, the wall becomes permanent and cannot be dispelled. Otherwise, the wall disappears when the spell ends.

Level 6

Blade Barrier (6th, evo., conc.)

Casting Time: 1 action

Range/Area: 18 m

Duration: Conc, 10 minutes

Attack/Save: Dex save

Components: S, V

Effect: Slashing

The wall appears within range and lasts for the duration. You can make a straight wall up to 20 m long, 4 m high, and 1 m thick, or a ringed wall up to 12 m in diameter, 4 m high, and 1 m thick. The wall provides three-quarters cover to creatures behind it, and its space is difficult terrain.

When a creature enters the wall's area for the first time on a turn or starts its turn there, the creature must make a Dexterity saving throw. On a failed save, the creature takes 6d10 slashing damage. On a successful save, the creature takes half as much damage.

Chain Lightning (6th, evo.)

Casting Time: 1 action

Range/Area: 30 m

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Lightning

You target one creature within range with this spell, then three bolts leap from that target to as many as three other targets, each of which must be within 6 m of the first target. A target can be a creature or an object and can be targeted by only one of the bolts.

A target must make a Dexterity saving throw. The target takes 10d8 lightning damage on a failed save, or half as much damage on a successful one.

At higher levels: When you cast this spell using a spell slot of 7th level or higher, one additional bolt leaps from the first target to another target for each slot level above 6th.

Contingency (6th, evo.)

Casting Time: 10 minutes

Range/Area: Self

Duration: 10 days

Attack/Save: None

Components: S, V, SC

Effect: Utility

Choose a spell of 5th level or lower that you can cast, that has a casting time of 1 action, and that can target you. You cast that spell, called the contingent spell, as part of casting *Contingency*, expending spell slots for both, but the contingent spell doesn't come into effect. Instead, it takes effect when a certain circumstance occurs. You describe that circumstance when you cast the two spells. For example, a *Contingency* cast with *Water Breathing* might stipulate that *Water Breathing* comes into effect when you are engulfed in water or a similar liquid.

The contingent spell takes effect immediately after the circumstance is met for the first time, whether or not you want it to, and then *Contingency* ends.

The contingent spell takes effect only on you, even if it can normally target others. You can use only one *Contingency* spell at a time.

If you cast this spell again, the effect of another *Contingency* spell on you ends. Also, *Contingency* ends on you if you do not possess enough Soul power to cast the spell.

Freezing Sphere (6th, evo.)

Casting Time: 1 action

Range/Area: 60 m (12 m sphere)

Duration: Instant

Attack/Save: Vit save

Components: S, V

Effect: Cold

Each creature within a 12-m-radius sphere must make a Vitality saving throw. On a failed save, a creature takes 10d6 cold damage. On a successful save, it takes half as much damage.

If the globe strikes a body of water or a liquid that is principally water (not including water-based creatures), it freezes the liquid to a depth of 0.2 m over an area 6 m square. This ice lasts for 1 minute. Creatures that were swimming on the surface of frozen water are trapped in the ice. A trapped creature can use an action to make a Brawn check against your spell save DV to break free.

You can refrain from firing the globe after completing the spell, if you wish. A small globe about the size of a sling stone, cool to the touch, appears in your hand. At any time, you or a creature you give the globe to can throw the globe (to a range of 8 m) or hurl it with a sling (to the sling's normal range). It shatters on impact, with the same effect as the normal casting of the spell. You can also set the globe down without shattering it. After 1 minute, if the globe has not already shattered, it explodes.

At higher levels: When you cast this spell using a spell slot of 7th level or higher, the damage increases by 1d6 for each slot level above 6th.

Gravity Fissure (6th, Evo)

Casting Time: 1 action

Range/Area: Self (20 m line)

Duration: Instant

Attack/Save: Vit save

Components: S, V

Effect: Force

You manifest a ravine of gravitational energy in a line originating from you that is 20 m long and 1 m wide. Each creature in that line must make a Vitality saving throw, taking 7d8 force damage on a failed save, or half as much damage on a successful one.

Each creature within 2 m of the line but not in it must succeed on a Vitality saving throw or take 4d8 force damage and be pulled toward the line until the creature is in its area.

At higher Levels: When you cast this spell using a spell slot of 7th level or higher, the damage in the center increases by 1d8 for each slot level above 6th.

Sunbeam (6th, evo., conc.)

Casting Time: 1 action

Range/Area: Self (12 m line)

Duration: Conc, 1 minute

Attack/Save: Vit save

Components: S, V

Effect: Radiant

Each creature in a 1 m wide, 12 m long line must make a Vitality saving throw. On a failed save, a creature takes 6d8 radiant damage and is blinded until your next turn. On a successful save, it takes half as much damage and is not blinded by this spell. Creatures living underground have disadvantage on this saving throw.

You can create a new line of radiance as your action on any turn until the spell ends.

For the duration, a mote of brilliant radiance shines in your hand. It sheds bright light in a 6 m radius and dim light for an additional 6 m. This light is sunlight.

Wall of Ice (6th, evo.)

Casting Time: 1 action

Range/Area: 24 m

Duration: 10 minutes

Attack/Save: Dex save

Components: S, V

Effect: Cold

You can form this spell as a hemispherical dome or a sphere with a radius of up to 2 m, or you can shape a flat surface made up of ten 2-m-square panels. Each panel must be contiguous with another panel. In any form, the wall is 0.1 m thick and lasts for the duration.

If the wall cuts through a creature's space when it appears, the creature within its area is pushed to one side of the wall and must make a Dexterity saving throw. On a failed save, the creature takes 10d6 cold damage, or half as much damage on a successful save.

The wall is an object that can be damaged and thus breached. It has AV 12 and 30 health points per 2 m section, and it is vulnerable to fire damage. Reducing a 2 m section of wall to 0 health points destroys it and leaves behind a sheet of frigid air in the space the wall occupied. A creature moving through the sheet of frigid air for the first time on a turn must make a Vitality saving throw. That creature takes 5d6 cold damage on a failed save, or half as much damage on a successful one.

At higher levels: When you cast this spell using a spell slot of 7th level or higher, the damage the wall deals when it appears increases by 2d6, and the damage from passing through the sheet of frigid air increases by 1d6, for each slot level above 6th.

Level 7

Coptic Word of Soul Blasting (7th, evo.)

Casting Time: 1 bonus action

Range/Area: 6 m

Duration: Instant

Attack/Save: Res save

Components: V

Effect: Multiple

You utter a divine word in Copta, which was used to shape the world at the dawn of creation.

Choose any number of creatures you can see within range. Each creature that can hear you must make a Resolve saving throw. On a failed save, a creature suffers an effect based on its current health points:

- ❖ 50 health points or fewer: Deafened for 10 rounds.

- ❖ 40 health points or fewer: Deafened and blinded for 10 minutes.
- ❖ 30 health points or fewer: Blinded, deafened, and stunned for 1 hour.
- ❖ 20 health points or fewer: killed instantly.

Regardless of its current health points, a celestial, an elemental, a fey, or a fiend that fails its save is forced back to its home Realm (if it is not there already) and cannot return to your current Realm for 24 hours by any means short of a Wish spell.

Crown of Stars (7th, evo.)

Casting Time: 1 action

Range/Area: Self

Duration: 1 hour

Attack/Save: Ranged Spell Attack

Components: S, V

Effect: Radiant

Seven nodules of radiant energy orbits around you. You can use a bonus action to send one of the nodules streaking toward one creature or object within 24 m of you. When you do so, make a ranged spell attack. On a hit, the target takes 4d12 radiant damage. Whether you hit or miss, the nodule is expended. The spell ends early if you expend the last nodule. If you have four or more nodules remaining, they shed bright light in a 6 m radius and dim light for an additional 6 m. If you have one to three nodules remaining, they shed dim light in a 6 m radius.

At higher level: When you cast this spell using a spell slot of 8th level or higher, the number of nodules created increases by two for each slot level above 7th.

Fire Storm (7th, evo.)

Casting Time: 1 action

Range/Area: 30 m

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Fire

The area of this spell consists of up to ten 2 m cubes, which you can arrange as you wish. Each cube must have at least one face adjacent to the face of another cube. Each creature in the area must make a Dexterity saving throw. It takes 7d10 fire damage on a failed save, or half as much damage on a successful one.

The fire damages objects in the area and ignites flammable objects that are not being worn or carried. If you choose plant life in the area is unaffected by this spell.

Prismatic Spray (7th, evo.)

Casting Time: 1 action

Range/Area: Self (12 m cone)

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Multiple

This spell evokes 8 different rays. Each ray is a different color and has a different power and purpose. Each creature in a 12 m cone must make a Dexterity saving throw. For each target, roll a d8 to determine which color ray affects it.

1. Red: The target takes 10d6 fire damage on a failed save, or half as much damage on a successful one.

2. Orange: The target takes 10d6 acid damage on a failed save, or half as much damage on a successful one.

3. Yellow: The target takes 10d6 lightning damage on a failed save, or half as much damage on a successful one.

4. Green: The target takes 10d6 poison damage on a failed save, or half as much damage on a successful one.

5. Blue: The target takes 10d6 cold damage on a failed save, or half as much damage on a successful one.

6. Indigo: On a failed save, the target is restrained. It must then make a Vitality saving throw at the end of each of its turns. If it successfully saves three times, the spell ends. If it fails its save three times, it permanently turns to stone and is subjected to the petrified condition. The successes and failures do not need to be consecutive; keep track of both until the target collects three of a kind.

7. Violet: On a failed save, the target is blinded. It must then make a Composure saving throw at the start of your next turn. A successful save ends the blindness. If it fails that save, the creature is transported to another Realm of the GM's choosing and is no longer

blinded. (Typically, a creature that is in a Realm that is not its home is banished home, while other creatures can be cast into the Ethereal Dimension.)

8. Special: The target is struck by two rays. Roll twice more, rerolling any 8.

Sword of Force (7th, evo., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 minute

Attack/Save: Melee

Components: S, V, SC

Effect: Force

When the sword appears, you make a melee spell attack against a target of your choice within 1 m of the sword. On a hit, the target takes 3d10 force damage. Until the spell ends, you can use a bonus action on each of your turns to move the sword up to 4 m to a spot you can see and repeat this attack against the same target or a different one.

Whirlwind (7th, evo., conc.)

Casting Time: 1 action

Range/Area: 60 m (2 m cylinder)

Duration: Conc, 1 minute

Attack/Save: Dex save

Components: V

Effect: Force

The whirlwind is a 2 m radius, 6 m high cylinder centered on that point. Until the spell ends, you can use your action to move the whirlwind up to 6 m in any direction along the ground. The whirlwind sucks up any Medium or smaller objects that aren't secured to anything and that aren't worn or carried by anyone.

A creature must make a Dexterity saving throw the first time on a turn that it enters the whirlwind or that the whirlwind enters its space, including when the whirlwind first appears. A creature takes 10d6 force damage on a failed save, or half as much damage on a successful one. In addition, a Large or smaller creature that fails the save must succeed on a Brawn saving throw or become restrained in the whirlwind until the spell ends. When a creature starts its turn restrained by the whirlwind, the creature is pulled 1 m higher inside it, unless the creature is at the top. A restrained creature moves with the whirlwind and falls when the spell ends unless the creature has some means to stay aloft.

A restrained creature can use an action to make a Brawn or Dexterity check against your spell save DV. If successful, the creature is no longer restrained by the whirlwind and is hurled $3d6 \times 2$ m away from it in a random direction.

Level 8

Dark Star (8th, evo., conc)

Casting Time: 1 action

Range/Area: 30 m (8-m sphere)

Duration: Conc, up to 1 min

Attack/Save: Vit Save

Components: S, V

Effect: Force

This spell creates a sphere centered on a point you choose within range. The sphere can have a radius of up to 8 m. The area within this sphere is filled with magical darkness and crushing gravitational force.

For the duration, the spell's area is difficult terrain. A creature with darkvision can't see through the magical darkness, and nonmagical light can't illuminate it. No sound can be created within or pass through the area. Any creature or object entirely inside the sphere is immune to thunder damage, and creatures are deafened while entirely inside it. Casting a spell that includes a verbal component is impossible there.

Any creature that enters the spell's area for the first time on a turn or starts its turn there must make a Vitality saving throw. The creature takes 8d10 force damage on a failed save, or half as much damage on a successful one. A creature reduced to 0 health points by this damage is disintegrated. A disintegrated creature and everything it is wearing and carrying, except magic items, are reduced to a pile of fine gray dust.

Earthquake (8th, evo., conc.)

Casting Time: 1 action

Range/Area: 100 m

Duration: Conc, 1 minute

Attack/Save: Dex save

Components: S, V

Effect: Force

The ground in a 20-m radius circle becomes difficult terrain. Each creature on the ground that is concentrating must make a Vitality saving throw. On a failed save, the creature's concentration is broken.

When you cast this spell and at the end of each turn you spend concentrating on it, each creature on the ground in the area must make a Dexterity saving throw. On a failed save, the creature is knocked prone.

This spell can have additional effects depending on the terrain in the area, as determined by the GM.

- ❖ **Fissures:** Fissures open throughout the spell's area at the start of your next turn after you cast the spell. A total of 1d6 such fissures open in locations chosen by the GM. Each is 1d10 × 2 m deep, 2 m wide, and extends from one edge of the spell's area to the opposite side. A creature standing on a spot where a fissure opens must succeed on a Dexterity saving throw or fall in. A creature that successfully saves moves with the fissure's edge as it opens.
A fissure that opens beneath a structure causes it to automatically collapse (see below).
- ❖ **Structures:** The tremor deals 50 force damage to any structure in contact with the ground in the area when you cast the spell and at the start of each of your turns until the spell ends. If a structure drops to 0 health points, it collapses and potentially damages nearby creatures. A creature within half the distance of a structure's height must make a Dexterity saving throw. On a failed save, the creature takes 5d6 force damage, is knocked prone, and is buried in the rubble, requiring a DV 20 Athletics (Br) check as an action to escape. The GM can adjust the DV higher or lower, depending on the nature of the rubble. On a successful save, the creature takes half as much damage and doesn't fall prone or become buried.

Maddening Darkness (8th, evo., conc.)

Casting Time: 1 action

Range/Area: 30 m (12 m radius)

Duration: Conc., up to 10 min

Attack/Save: Int/Cun save

Components: S

Effect: Psychic

Magical darkness spreads from a point you choose within range to fill a 12 m radius sphere until the spell ends. The darkness spreads around corners. A creature with darkvision cannot see through this darkness. Nonmagical light, as well as light created by spells of 8th level or lower, can't illuminate the area. Whenever a creature starts its turn in the sphere, it must make an Int/Cun saving throw, taking 8d8 psychic damage on a failed save, or half as much damage on a successful one.

Sunburst (8th, evo.)

Casting Time: 1 action

Range/Area: 30 m (12 m radius)

Duration: Instant

Attack/Save: Vit save

Components: S

Effect: Radiant

Brilliant sunlight flashes in a 12-m radius centered on a point you choose within range. Each creature in that light must make a Vitality saving throw. On a failed save, a creature takes 12d6 radiant damage and is blinded for 1 minute. On a successful save, it takes half as much damage and is not blinded by this spell. Any creature who lives underground has disadvantage on this saving throw.

A creature blinded by this spell makes another Vitality saving throw at the end of each of its turns. On a successful save, it is no longer blinded.

Level 9

Meteor Swarm (9th, evo.)

Casting Time: 1 action

Range/Area: 1 km (8 m sphere)

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Bludgeoning, fire

Blazing orbs of fire plummet to the ground at four different points you can see within range. Each creature in an 8 m radius sphere centered on each point you choose must make a Dexterity saving throw. The sphere spreads around corners. A creature takes 20d6 fire damage and 20d6 bludgeoning damage on a failed save, or half as much damage on a successful one. A creature in the area of more than one fiery burst is affected only once.

The spell damages objects in the area and ignites flammable objects that aren't being worn or carried.

ILLUSION

Illusion spells deceive the senses or minds of others. They cause people to see things that are not there, to miss things that are there, to hear phantom noises, or to remember things that never happened. Some illusions create phantom images that any creature can see, but the most insidious illusions plant an image directly in the mind of a creature.

Cantrips

Minor Illusion (0, ill.)

Casting Time: 1 action

Range/Area: 6 m (1 m square)

Duration: 1 minute

Attack/Save: None

Components: S

Effect: Control

You create a sound or an image of an object within range that lasts for the duration. The illusion also ends if you dismiss it as an action or cast this spell again.

If you create a sound, its volume can range from a whisper to a scream. It can be your voice, someone else's voice, a lion's roar, a beating of drums, or any other sound you choose. The sound continues unabated throughout the duration, or you can make discrete sounds at different times before the spell ends.

If you create an image of an object, such as a chair, muddy footprints, or a small chest, it must be no larger than a 1 m cube. The image can't create a sound, light, smell, or any other sensory effect. Physical interaction with the image reveals it to be an illusion, because things can pass through it.

If a creature uses its action to examine the sound or image, the creature can determine that it is an illusion with a successful Investigation (Cun) check against your spell save DV. If a creature discerns the illusion for what it is, the illusion becomes faint to the creature.

Level 1

Color Spray (1st, ill.)

Casting Time: 1 action

Range/Area: Self (3 m cone)

Duration: 1 round

Attack/Save: None

Components: S, V

Effect: Blinded

Roll 6d10; the total is how many health points of creatures this spell can affect. Creatures in a 3 m cone originating from you are affected in ascending order of their current health points (ignoring unconscious creatures and creatures that can't see).

Starting with the creature that has the lowest current health points, each creature affected by this spell is blinded until the end of your next turn. Subtract each creature's health points from the total before moving on to the creature with the next lowest health points. A creature's health points must be equal to or less than the remaining total for that creature to be affected.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, roll an additional 2d10 for each slot level above 1st.

Disguise Self (1st, ill.)

Casting Time: 1 action

Range/Area: Self

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Shapechanging

You make yourself - including your clothing, armor, weapons, and other belongings on your person - look different until the spell ends or until you use your action to dismiss it. You can seem 0.2 m shorter or taller and can appear thin, fat, or in between. You cannot change your body type, so you must adopt a form that has the same basic arrangement of limbs. Otherwise, the extent of the illusion is up to you.

The changes wrought by this spell fail to hold up to physical inspection. For example, if you use this spell to add a hat to your outfit, objects pass through the hat, and anyone who touches it would feel nothing or would feel your head and hair. If you use this spell to appear thinner than you are, the hand of someone who reaches out to touch you would bump into you while it was seemingly still in midair.

To discern that you are disguised, a creature can use its action to inspect your appearance and must succeed on an Investigation (Cun) check against your spell save DV.

Magic Mouth (1st, ill., ritual)

Casting Time: 1 minute

Range/Area: 6 m

Duration: Until dispelled

Attack/Save: None

Components: S, V

Effect: Communication

You implant a message within an object in range, a message that is uttered when a trigger condition is met. Choose an object that you can see and that isn't being worn or carried by another creature. Then speak the message, which must be 25 words or less, though it can be delivered over as long as 10 minutes. Finally, determine the circumstance that will trigger the spell to deliver your message.

When that circumstance occurs, a magical mouth appears on the object and recites the message in your voice and at the same volume you spoke. If the object you chose has a mouth or something that looks like a mouth (for example, the mouth of a statue), the magical mouth appears there so that the words appear to come from the object's mouth. When you cast this spell, you can have the spell end after it delivers its message, or it can remain and repeat its message whenever the trigger occurs.

The triggering circumstance can be as general or as detailed as you like, though it must be based on visual or audible conditions that occur within 6 m of the object. For example, you could instruct the mouth to speak when any creature moves within 6 m of the object or when a silver bell rings within 6 m of it.

Silent Image (1st, ill., conc.)

Casting Time: 1 action

Range/Area: 12 m (3 m square)

Duration: Conc, 10 minutes

Attack/Save: None

Components: S, V

Effect: Control

You create the image of an object, a creature, or some other visible phenomenon that is no larger than a 3 m cube. The image appears at a spot within range and lasts for the duration. The image is purely visual; it is not accompanied by sound, smell, or other sensory effects.

You can use your action to cause the image to move to any spot within range. As the image changes location, you can alter its appearance so that its movements appear natural for the image. For example, if you create an image of a creature and move it, you can alter the image so that it appears to be walking.

Physical interaction with the image reveals it to be an illusion, because things can pass through it. A creature that uses its action to examine the image can determine that it is an illusion with a successful Investigation (Cun) check against your spell save DV. If a creature discerns the illusion for what it is, the creature can see through the image.

Level 2

Blur (2nd, ill., conc.)

Casting Time: 1 action

Duration: Conc, 1 minute

Components: V

Range/Area: Self

Attack/Save: None

Effect: Deception

For the duration, any creature has disadvantage on attack rolls against you. An attacker is immune to this effect if it does not rely on sight, as with blindsight, or can see through illusions, as with truesight.

Invisibility (2nd, ill., conc.)

Casting Time: 1 action

Duration: Conc, 1 hour

Components: S, V

Range/Area: Touch

Attack/Save: None

Effect: Invisible

A creature you touch becomes invisible until the spell ends. Anything the target is wearing or carrying is invisible as long as it is on the target's person. The spell ends for a target that attacks or casts a spell.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, you can target one additional creature for each slot level above 2nd.

Nondetection (2nd, ill.)

Casting Time: 1 action

Duration: 24 hours

Components: S, V

Range/Area: Touch

Attack/Save: None

Effect: Deception

For the duration, you shield a creature or an object you touch from divination spells.

The target can be a willing creature or an object no more than 4 cubic meters and that isn't being carried or worn by another creature. When you cast the spell, choose one effect. The effect lasts for the duration. If you cast this spell on the same creature or object every day for 30 days, placing the same effect on it each time, the illusion lasts until it is dispelled.

- ❖ **False Aura:** You change the way the target appears to spells and magical effects, such as Detect Magic, that detect magical auras. You can make a nonmagical object appear magical, a magical object appears nonmagical, or change the object's magical aura so that it appears to belong to a specific school of magic that you choose. When you use this effect on an object, you can make the false magic apparent to any creature that handles the item.
- ❖ **Mask:** You change the way the target appears to spells and magical effects that detect creature types, such as Divine Sense or the trigger of a Symbol spell. You choose a creature type and other spells and magical effects treat the target as if it were a creature of that type or of that alignment.
- ❖ **Veil:** The target can't be targeted by any divination magic or perceived through magical scrying sensors.

Mirror Image (2nd, ill.)

Casting Time: 1 action

Duration: 1 minute

Components: S, V

Range/Area: Self

Attack/Save: None

Effect: Deception

Three illusory duplicates of yourself appear in your space. Until the spell ends, the duplicates move with you and mimic your actions, shifting position so it's impossible to track which image is real. You can use your action to dismiss the illusory duplicates.

Each time a creature targets you with an attack during the spell's duration, roll a d20 to determine whether the attack instead targets one of your duplicates.

If you have three duplicates, you must roll a 6 or higher to change the attack's target to a duplicate. With two duplicates, you must roll an 8 or higher. With one duplicate, you must roll an 11 or higher.

A duplicate's AV equals 10 + your Dexterity modifier. If an attack hits a duplicate, the duplicate is destroyed. A duplicate can be destroyed only by an attack that hits it. It ignores all other damage and effects. The spell ends when all three duplicates are destroyed.

A creature is unaffected by this spell if it can't see, if it relies on senses other than sight, such as blindsight, or if it can perceive illusions as false, as with truesight.

Phantasmal Force (2nd, ill., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, up to 1 min

Attack/Save: Int/Cun

Components: S, V

Effect: Psychic

The target must make an Int/Cun saving throw. On a failed save, you create a phantasmal object, creature, or another visible phenomenon of your choice that is no larger than a 2 m cube and that is perceivable only to the target for the duration. This spell does not affect undead or constructs.

The phantasm includes sound, temperature, and other stimuli, also evident only to the creature. The target can use its action to examine the phantasm with an Investigation (Cun) check against your spell save DV. If the check succeeds, the target realizes that the phantasm is an illusion, and the spell ends.

While a target is affected by the spell, the target treats the phantasm as if it were real. The target rationalizes any illogical outcomes from interacting with the phantasm. For example, a target attempting to walk across a phantasmal bridge that spans a chasm falls once it steps onto the bridge. If the target survives the fall, it still believes that the bridge exists and comes up with some other explanation for its fall: it was pushed, it slipped, or a strong wind might have knocked it off.

An affected target is so convinced of the phantasm's reality that it can even take damage from the illusion. A phantasm created to appear as a creature can attack the target. Similarly, a phantasm created to appear as fire, a pool of acid, or lava can burn the target. Each round on your turn, the phantasm can deal 1d6 psychic damage to the target if it is in the phantasm's area or within 1 m of the phantasm, provided that the illusion is of a creature or hazard that could logically deal damage, such as by attacking. The target perceives the damage as a type appropriate to the illusion.

Shadow Blade (2nd, ill., conc.)

Casting Time: 1 bonus action

Range/Area: Self

Duration: Conc, up to 1 min

Attack/Save: None

Components: S, V

Effect: Psychic

This magic sword lasts until the spell ends. It counts as a simple melee weapon with which you are proficient. It deals 2d8 psychic damage on a hit and has the finesse, light, and thrown properties (range 4/12). In addition, when you use the sword to attack a target that is in dim light or darkness, you make the attack roll with advantage.

If you drop the weapon or throw it, it dissipates at the end of the turn. Thereafter, while the spell persists, you can use a bonus action to cause the sword to reappear in your hand.

At higher levels: When you cast this spell using a 3rd- or 4th-level spell slot, the damage increases to 3d8. When you cast it using a 5th- or 6th-level spell slot, the damage increases to 4d8. When you cast it using a spell slot of 7th level or higher, the damage increases to 5d8.

Silence (2nd, ill., conc., ritual)

Casting Time: 1 action

Range/Area: 24 m (4 m sphere)

Duration: Conc, 10 minutes

Attack/Save: None

Components: S, V

Effect: Control

For the duration, no sound can be created within or pass through a 4 m radius sphere centered on a point you choose within range. Any creature or object entirely inside the sphere is immune to thunder damage, and creatures are deafened while entirely inside it. Casting a spell that includes a verbal component is impossible there.

Level 3

Fear (3rd, ill., conc.)

Casting Time: 1 action

Duration: Conc, 1 minute

Components: S, V

Range/Area: Self (6 m cone)

Attack/Save: Res save

Effect: Frightened

Each creature in a 6 m cone must succeed on a Resolve saving throw or drop whatever it is holding and become frightened for the duration.

While frightened by this spell, a creature must take the dash action and move away from you by the safest available route on each of its turns, unless there is nowhere to move. If the creature ends its turn in a location where it does not have line of sight to you, the creature can make a Resolve saving throw. On a successful save, the spell ends for that creature.

Hypnotic Pattern (3rd, ill., conc.)

Casting Time: 1 action

Duration: Conc, 1 minute

Components: S

Range/Area: 24 m (6 m square)

Attack/Save: Comp save

Effect: Charmed

Each creature in the area who sees you casting the spell must make a Composure saving throw. On a failed save, the creature becomes charmed for the duration. While charmed by this spell, the creature is incapacitated and has a speed of 0.

The spell ends for an affected creature if it takes any damage or if someone else uses an action to shake the creature out of its stupor.

Major Image (3rd, ill., conc.)

Casting Time: 1 action

Duration: Conc, 10 minutes

Components: S, V

Range/Area: 24 m (4 m square)

Attack/Save: None

Effect: Control

You create the image of an object, a creature, or some other visible phenomenon that is no larger than a 4 m cube. The image appears at a spot that you can see within range and lasts for the duration. It seems completely real, including sounds, smells, and temperature appropriate to the thing depicted. You cannot create sufficient heat or cold to cause damage, a sound loud enough to deal thunder damage or deafen a creature, or a smell that might sicken a creature.

As long as you are within range of the illusion, you can use your action to cause the image to move to any other spot within range. As the image changes location, you can alter its appearance so that its movements appear natural for the image. For example, if you create an image of a creature and move it, you can alter the image so that it appears to be walking. Similarly, you can cause the illusion to make different sounds at different times, even making it carry on a conversation, for example.

Physical interaction with the image reveals it to be an illusion, because things can pass through it. A creature that uses its action to examine the image can determine that it is an illusion with a successful Investigation check against your spell save DV. If a creature discerns the illusion for what it is, the creature can see through the image, and its other sensory qualities become faint to the creature.

At higher levels: When you cast this spell using a spell slot of 6th level or higher, the spell lasts until dispelled, without requiring your concentration.

Phantom Steed (3rd, ill., ritual)

Casting Time: 1 minute

Duration: 1 hour

Components: S, V

Range/Area: 6 m

Attack/Save: None

Effect: Movement

You decide the creature's appearance, but it is equipped with a saddle, bit, and bridle. Any of the equipment created by the spell vanishes in a puff of smoke if it is carried more than 2 m away from the steed.

For the duration, you or a creature you choose can ride the steed. The creature uses the statistics for a riding horse, except it has a speed of 20 m and can travel 15 km in an hour, or 20

km at a fast pace. When the spell ends, the steed gradually fades, giving the rider 1 minute to dismount. The spell ends if you use an action to dismiss it or if the steed takes any damage.

Level 4

Greater Invisibility (4th, ill., conc.)

Casting Time: 1 action **Range/Area:** Touch

Duration: Conc, 1 minute **Attack/Save:** None

Components: S, V **Effect:** Invisible

You or a creature you touch becomes invisible until the spell ends. Anything the target is wearing or carrying is invisible as long as it is on the target's person.

Hallucinatory Terrain (4th, ill.)

Casting Time: 10 minutes **Range/Area:** 60 m (30 m square)

Duration: 24 hours **Attack/Save:** None

Components: S, V **Effect:** Control

You make natural terrain in a 30 m cube in range look, sound, and smell like some other sort of natural terrain. Thus, open fields or a road can be made to resemble a swamp, hill, crevasse, or some other difficult or impassable terrain. A pond can be made to seem like a grassy meadow, a precipice like a gentle slope, or a rock-strewn gully like a wide and smooth road. Manufactured structures, equipment, and creatures within the area are not changed in appearance.

The tactile characteristics of the terrain are unchanged, so creatures entering the area are likely to see through the illusion. If the difference is not obvious by touch, a creature carefully examining the illusion can attempt an Investigation check against your spell save DV to disbelieve it. A creature who discerns the illusion for what it is, sees it as a vague image superimposed on the terrain.

Phantasmal Killer (4th, ill., conc.)

Casting Time: 1 action **Range/Area:** 24 m

Duration: Conc, 1 minute **Attack/Save:** Multiple

Components: S **Effect:** Psychic

The target must make a Resolve saving throw. On a failed save, the target becomes frightened for the duration. At the end of each of the target's turns, before the spell ends, the target must succeed on an Int/Cun saving throw or take 4d10 psychic damage. On a successful save, the creature takes half the damage.

The illusion seems real to the creature, but can't be interacted with by the target and can't be seen by anyone else. If the target uses an action to examine the phantasmal killer they can determine that it is an illusion by succeeding on an Investigation (Res) check against your spell save DV. If the target discerns the illusion for what it is, the spell ends.

At higher levels: When you cast this spell using a spell slot of 5th level or higher, the damage increases by 1d10 for each slot level above 4th.

Level 5

Creation (5th, ill.)

Casting Time: 1 minute **Range/Area:** 6 m (1 m square)

Duration: Special **Attack/Save:** None

Components: S, V **Effect:** Creation

With this spell, you can create a nonliving object of vegetable matter within range: soft goods, rope, wood, or something similar. You can also use this spell to create mineral objects such as stone, crystal, or metal. The object created must be no larger than a 1 m cube, and the object must be of a form and material that you have seen before.

The duration depends on the object's material. If the object is composed of multiple materials, use the shortest duration.

Material	Duration
Vegetable matter	1 day
Stone or crystal	12 hours
Precious metals	1 hour
Gems	10 minutes
Adamantine or mithril	1 minute

At higher levels: When you cast this spell using a spell slot of 6th level or higher, the cube increases by 1 m for each slot level above 5th.

Dream (5th, ill.)

Casting Time: 1 minute

Duration: 8 hours

Components: S, V

Range/Area: Self

Attack/Save: Res save

Effect: Communication

Choose a creature known to you as the target of this spell. The target must be within the same Realm as you. Creatures that don't sleep, such as elves, can't be contacted by this spell. You, or a willing creature you touch, enter a trance state, acting as a messenger. While in the trance, the messenger is aware of his or her surroundings, but can't take actions or move.

If the target is asleep, the messenger appears in the target's dreams and can converse with the target as long as it remains asleep, through the duration of the spell. The messenger can also shape the environment of the dream, creating landscapes, objects, and other images. The messenger can emerge from the trance at any time, ending the effect of the spell early. The target recalls the dream perfectly upon waking. If the target is awake when you cast the spell, the messenger knows it, and can either end the trance (and the spell) or wait for the target to fall asleep, at which point the messenger appears in the target's dreams.

You can make the messenger appear monstrous and terrifying to the target. If you do, the messenger can deliver a message of no more than ten words, and then the target must make a Resolve saving throw. On a failed save, echoes of the phantasmal monstrosity spawn a nightmare that lasts the duration of the target's sleep and prevents the target from gaining any benefit from that rest. In addition, when the target wakes up, it takes 3d6 psychic damage.

If you have a body part, lock of hair, clipping from a nail, or similar portion of the target's body, the target makes its saving throw with disadvantage.

Mislead (5th, ill., conc.)

Casting Time: 1 action

Duration: Conc, 1 hour

Components: S

Range/Area: Self

Attack/Save: None

Effect: Deception

You become invisible at the same time that an illusory double of you appears where you are standing. The double lasts for the duration, but the invisibility ends if you attack or cast a spell. You can use your action to move your illusory double up to twice your speed and make it gesture, speak, and behave in whatever way you choose.

You can see through its eyes and hear through its ears as if you were located where it is. On each of your turns as a bonus action, you can switch from using its senses to using your own, or back again. While you are using its senses, you are blinded and deafened regarding your own surroundings.

Seeming (5th, ill.)

Casting Time: 1 action

Duration: 8 hours

Components: S, V

Range/Area: 6 m

Attack/Save: Pre/Man save

Effect: Control

This spell allows you to change the appearance of any number of creatures that you can see within range. You give each target you choose a new, illusory appearance. An unwilling target can make a Pre/Man saving throw, and if it succeeds, it is unaffected by this spell.

The spell disguises physical appearance as well as clothing, armor, weapons, and equipment. You can make each creature seem 0.1 m shorter or taller and appear thin, fat, or in between. You can't change a target's body type, so you must choose a form that has the same basic arrangement of limbs. Otherwise, the extent of the illusion is up to you. The spell lasts for the duration unless you use your action to dismiss it sooner.

The changes wrought by this spell fail to hold up to physical inspection. For example, if you use this spell to add a hat to a creature's outfit, objects pass through the hat, and anyone who touches it would feel nothing or would feel the creature's head and hair. If you use this spell to appear thinner than you are, the hand of someone who reaches out to touch you would bump into you while it was seemingly still in midair.

A creature can use its action to inspect a target and make an Investigation (Cun) check against your spell save DV. If it succeeds, it becomes aware that the target is disguised.

Level 6

Programmed Illusion (6th, ill.)

Casting Time: 1 action

Range/Area: 24 m (6 m square)

Duration: Until dispelled

Attack/Save: None

Components: S, V, SC

Effect: Control

You create an illusion of an object, a creature, or some other visible phenomenon within range that activates when a specific condition occurs. The illusion is imperceptible until then. It must be no larger than a 6 m cube, and you decide when you cast the spell how the illusion behaves and what sounds it makes. This scripted performance can last up to 5 minutes.

When the condition you specify occurs, the illusion springs into existence and performs in the manner you described. Once the illusion finishes performing, it disappears and remains dormant for 10 minutes. After this time, the illusion can be activated again.

The triggering condition can be as general or as detailed as you like, though it must be based on visual or audible conditions that occur within 6 m of the area. For example, you could create an illusion of yourself to appear and warn off others who attempt to open a trapped door, or you could set the illusion to trigger only when a creature says the correct word or phrase.

Physical interaction with the image reveals it to be an illusion, because things can pass through it. A creature that uses its action to examine the image can determine that it is an illusion with a successful Investigation check against your spell save DV. If a creature discerns the illusion for what it is, the creature can see through the image, and any noise it makes sounds hollow to the creature.

Level 7

Mental Prison (7th, ill., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, up to 1 min

Attack/Save: Int/Cun save

Components: S

Effect: Psychic

One creature you can see within range must make an Int/Cun saving throw. The target succeeds automatically if it is immune to being charmed. On a successful save, the target takes 5d10 psychic damage, and the spell ends. On a failed save, the target takes 5d10 psychic damage, and you make the area immediately around the target's space appear dangerous to it in some way.

You might cause the target to perceive itself as being surrounded by fire, floating razors, or hideous maws filled with dripping teeth. Whatever form the illusion takes, the target can't see or hear anything beyond it and is restrained for the spell's duration. If the target is moved out of the illusion, makes a melee attack through it, or reaches any part of its body through it, the target takes 10d10 psychic damage, and the spell ends.

Mirage Arcane (7th, Ill.)

Casting Time: 10 minutes

Range/Area: Sight (2 km)

Duration: 10 minutes

Attack/Save: None

Components: S, V

Effect: Control

You make terrain in an area up to 2 km square look, sound, smell, and even feel like some other sort of terrain. The terrain's general shape remains the same, however. Open fields or a road could be made to resemble a swamp, hill, crevasse, or some other difficult or impassable terrain. A pond can be made to seem like a grassy meadow, a precipice like a gentle slope, or a rock-strewn gully like a wide and smooth road.

Similarly, you can alter the appearance of structures, or add them where none are present. The spell does not disguise, conceal, or add creatures.

The illusion includes audible, visual, tactile, and olfactory elements, so it can turn clear ground into difficult terrain (or vice versa) or otherwise impede movement through the area. Any piece of the illusory terrain (such as a rock or stick) that is removed from the spell's area disappears immediately.

Creatures with truesight can see through the illusion to the terrain's true form; however, all other elements of the illusion remain, so while the creature is aware of the illusion's presence, the creature can still physically interact with the illusion.

Project Image (7th, ill., conc.)

Casting Time: 1 action

Range/Area: 800 km

Duration: Conc, 1 day

Attack/Save: None

Components: S, V, SC

Effect: Control

You create an illusory copy of yourself that lasts for the duration. The copy can appear at any location within range that you have seen before, regardless of intervening obstacles. The illusion looks and sounds like you but is intangible. If the illusion takes any damage, it disappears, and the spell ends.

You can use your action to move this illusion up to twice your speed, and make it gesture, speak, and behave in whatever way you choose. It mimics your mannerisms perfectly.

You can see through its eyes and hear through its ears as if you were in its space. On your turn as a bonus action, you can switch from using its senses to using your own, or back again. While you are using its senses, you are blinded and deafened regarding your own surroundings.

Physical interaction with the image reveals it to be an illusion, because things can pass through it. A creature that uses its action to examine the image can determine that it is an illusion with a successful Investigation (Cun) check against your spell save DV. If a creature discerns the illusion for what it is, the creature can see through the image, and any noise it makes sounds hollow to the creature.

Simulacrum (7th, ill.)

Casting Time: 12 hours

Range/Area: Touch

Duration: Until dispelled

Attack/Save: None

Components: S, V, SC

Effect: Deception

You shape an illusory duplicate of one beast or humanoid that is within range for the entire casting time of the spell. The duplicate is a creature, partially real and formed from ice or snow, and it can take actions and otherwise be affected as a normal creature. It appears to be the same as the original, but it has half the creature's health point maximum and is formed without any equipment. Otherwise, the illusion uses all the statistics of the creature it duplicates, except that it is a construct.

The Simulacrum is friendly to you and creatures you designate. It obeys your spoken commands, moving and acting per your wishes and acting on your turn in combat. The simulacrum cannot learn or become more powerful, so it never increases its level or other abilities, nor can it regain expended spell slots.

If the Simulacrum is damaged, you can repair it in an alchemical laboratory, using rare herbs and minerals worth 100 gp per health point it regains. The simulacrum lasts until it drops to 0 health points, at which point it reverts to snow and melts instantly.

If you cast this spell again, any duplicate you created with this spell is instantly destroyed.

Level 8

Glibness (8th, ill.)

Casting Time: 1 action

Duration: 1 hour

Components: V

Range/Area: Self

Attack/Save: None

Effect: Social

Until the spell ends, when you make a social ability check, you can replace the number you roll with a 15. Additionally, no matter what you say, magic that would determine if you are telling the truth indicates that you are being truthful.

Illusory Dragon (7th, ill., conc.)

Casting Time: 1 action

Duration: Conc, up to 1 min

Components: S

Range/Area: 24 m

Attack/Save: Res save

Effect: Multiple

You create a Huge dragon in an unoccupied space that you can see within range. The illusion lasts for the spell's duration and occupies its space as if it were a creature.

When the illusion appears, any of your enemies that can see it must succeed on a Resolve saving throw or become frightened of it for 1 minute. If a frightened creature ends its turn in a location where it does not have line of sight to the illusion, it can repeat the saving throw, ending the effect on itself on a success.

As a bonus action on your turn, you can move the illusion up to 12 m. At any point during its movement, you can cause it to exhale a blast of energy in a 12 m cone originating from its space. When you create the dragon, choose a damage type: acid, cold, fire, lightning, necrotic, or poison. Each creature in the cone must make an Int/Cun saving throw, taking 7d6 damage of the chosen damage type on a failed save, or half as much damage on a successful one.

The illusion is tangible, but attacks miss it automatically. It succeeds on all saving throws, and it is immune to all damage and conditions. A creature that uses an action to examine the dragon can determine that it is an illusion by succeeding on an Investigation (Cun) check against your spell save DV. If a creature discerns the illusion for what it is, the creature can see through it and has advantage on saving throws against its breath.

Level 9

Weird (9th, ill., conc.)

Casting Time: 1 action

Duration: Conc, 1 minute

Components: S, V

Range/Area: 24 m (6 m sphere)

Attack/Save: Multiple

Effect: Psychic

Each creature in a 6 m radius sphere centered on a point of your choice within range must make a Resolve saving throw. On a failed save, a creature becomes frightened for the duration. The illusion calls on the creature's deepest fears, manifesting its worst nightmares as an implacable threat. At the end of each of the frightened creature's turns, it must succeed on an Int/Cun saving throw or take 4d10 psychic damage. On a successful save, the spell ends for that creature.

TRANSMUTATION

Transmutation spells change the properties of a creature, object, or environment. They might turn an enemy into a harmless creature, bolster the strength of an ally, make an object move at the caster's command, or enhance a creature's innate healing abilities to rapidly recover from injury.

Cantrips

Druidcraft (0, trans.)

Casting Time: 1 action

Duration: Instant

Components: S, V

Range/Area: 6 m

Attack/Save: None

Effect: Control

You create one of the following effects within range:

- ❖ You create a tiny, harmless sensory effect that predicts what the weather will be at your location for the next 24 hours. The effect might manifest as a golden orb for clear skies, a cloud for rain, falling snowflakes for snow, and so on. This effect persists for 1 round.
- ❖ You instantly make a flower blossom, a seed pod open, or a leaf bud bloom.
- ❖ You create an instantaneous, harmless sensory effect, such as falling leaves, a puff of wind, the sound of a small animal, or the faint odor of skunk. The effect must fit in a 1 m cube.
- ❖ You instantly light or snuff out a candle, a torch, or a small campfire.

Gust (0, trans.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Instant

Attack/Save: Br save

Components: S, V

Effect: Control

You create one of the following effects at a point you can see within range:

- ❖ One Medium or smaller creature that you choose must succeed on a Brawn saving throw or be pushed up to 1 m away from you.
- ❖ You create a small blast of air capable of moving one object that is neither held nor carried and that weighs no more than 2 kg. The object is pushed up to 2 m away from you. It isn't pushed with enough force to cause damage.
- ❖ You create a harmless sensory effect using air, such as causing leaves to rustle, wind to slam shutters shut, or your clothing to ripple in a breeze.

Mending (0, trans.)

Casting Time: 1 minute

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: V, S

Effect: Utility

This spell repairs a single break or tears in an object you touch, such as a broken chain link, two halves of a broken key, a torn cloak, or a leaking wineskin. As long as the break or tear is no larger than 1 foot in any dimension, you mend it, leaving no trace of the former damage.

This spell can physically repair a magic item or construct, but the spell can't restore magic to such an object.

Message (0, trans.)

Casting Time: 1 action

Range/Area: 24 m

Duration: 1 round

Attack/Save: None

Components: V

Effect: Communication

You target a creature within range and whisper a message. The target, and only the target, hears the message and can reply in a whisper that only you can hear.

You can cast this spell through solid objects if you are familiar with the target and know it is beyond the barrier. Magical Silence, 0.5 m of stone, 2 cm of common metal, a thin sheet of lead, or 1 m of wood blocks the spell. The spell does not have to follow a straight line and can travel freely around corners or through openings.

Mold Earth (0, trans.)

Casting Time: 1 action

Range/Area: 6 m (1 m cube)

Duration: Instant

Attack/Save: None

Components: S

Effect: Control

You choose a portion of dirt or stone that you can see within range and that fits within a 1 m cube. You manipulate it in one of the following ways:

- ❖ If you target an area of loose earth, you can instantaneously excavate it, move it along the ground, and deposit it up to 1 m away. This movement does not have enough force to cause damage.
- ❖ You cause shapes, colors, or both to appear on the dirt or stone, spelling out words, creating images, or shaping patterns. The changes last for 1 hour.

- ❖ If the dirt or stone you target is on the ground, you cause it to become difficult terrain. Alternatively, you can cause the ground to become normal terrain if it is already difficult terrain. This change lasts for 1 hour.

If you cast this spell multiple times, you can have no more than two of its non-instantaneous effects active at a time, and you can dismiss such an effect as an action.

Prestidigitation (0, trans.)

Casting Time: 1 action

Range/Area: 2 m

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Utility

You create one of the following magical effects within range:

- ❖ You create an instantaneous, harmless sensory effect, such as a shower of sparks, a puff of wind, faint musical notes, or an odd odor.
- ❖ You instantaneously light or snuff out a candle, a torch, or a small campfire.
- ❖ You instantaneously clean or soil an object no larger than 30 liters.
- ❖ You chill, warm, or flavor up to 30 liters of nonliving material for 1 hour.
- ❖ You make a color, a small mark, or a symbol appear on an object or a surface for 1 hour.
- ❖ You create a nonmagical trinket or an illusory image that can fit in your hand and that lasts until the end of your next turn.

If you cast this spell multiple times, you can have up to three of its non-instantaneous effects active at a time, and you can dismiss such an effect as an action.

Primal Savagery (0, trans.)

Casting Time: 1 action

Range/Area: Self

Duration: Instant

Attack/Save: Melee

Components: S

Effect: Acid

Make a melee spell attack against one creature within 1 m of you. On a hit, the target takes 1d10 acid damage.

The spell's damage increases by 1d10 when you reach 5th level (2d10), 11th level (3d10), and 17th level (4d10).

Shape Water (0, trans.)

Casting Time: 1 action

Range/Area: 6 m (1 m cube)

Duration: Instant

Attack/Save: None

Components: S

Effect: None

You choose an area of water that you can see within range and that fits within a 1 m cube. You manipulate it in one of the following ways:

- ❖ You instantaneously move or otherwise change the flow of the water as you direct, up to 1 m in any direction. This movement does not have enough force to cause damage.
- ❖ You cause the water to form into simple shapes and animate at your direction. This change lasts for 1 hour.
- ❖ You change the water's color or opacity. The water must be changed in the same way throughout. This change lasts for 1 hour.
- ❖ You freeze the water, provided that there are no creatures in it. The water unfreezes in 1 hour.

If you cast this spell multiple times, you can have no more than two of its non-instantaneous effects active at a time, and you can dismiss such an effect as an action.

Shillelagh (0, trans.)

Casting Time: 1 bonus action

Range/Area: Touch

Duration: 1 minute

Attack/Save: Melee

Components: S, V

Effect: Bludgeoning

For the duration, you can use your spellcasting ability instead of Brawn for the attack and damage rolls of melee attacks using a club or quarterstaff, and the weapon's damage die becomes a d8. The weapon also becomes magical, if it isn't already. The spell ends if you cast it again or if you let go of the weapon.

Thaumaturgy (0, trans.)

Casting Time: 1 action

Range/Area: 6 m

Duration: 1 minute

Attack/Save: None

Components: V

Effect: Control

You manifest a minor wonder, a sign of supernatural power, within range. You create one of the following magical effects within range:

- ❖ Your voice booms up to three times as loud as normal for 1 minute.
- ❖ You cause flames to flicker, brighten, dim, or change color for 1 minute.
- ❖ You cause harmless tremors in the ground for 1 minute.
- ❖ You create an instantaneous sound that originates from a point of your choice within range, such as a rumble of thunder, the cry of a raven, or ominous whispers.
- ❖ You instantaneously cause an unlocked door or window to fly open or slam shut.
- ❖ You alter the appearance of your eyes for 1 minute.

If you cast this spell multiple times, you can have up to three of its 1-minute effects active at a time, and you can dismiss such an effect as an action.

Level 1

Expeditious Retreat (1st, trans., conc.)

Casting Time: 1 bonus action

Range/Area: Self

Duration: Conc, 10 minutes

Attack/Save: None

Components: S, V

Effect: Movement

When you cast this spell, and then as a bonus action on each of your turns until the spell ends you can take the dash action.

Feather Fall (1st, trans.)

Casting Time: 1 reaction

Range/Area: 12 m

Duration: 1 minute

Attack/Save: None

Components: V

Effect: Exploration

Choose up to five falling creatures within range. A falling creature's rate of descent slows to 12 meters per round until the spell ends. If the creature lands before the spell ends, it takes no falling damage and can land on its feet, and the spell ends for that creature.

Goodberry (1st, trans.)

Casting Time: 1 action

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Healing

You create up to ten magical berries for the duration. A creature can use its action to eat one berry. Eating a berry restores 1 health point, and the berry provides enough nourishment to sustain a creature for one day.

The berries disappear if they have not been consumed within 24 hours of the casting of this spell.

Jump (1st, trans.)

Casting Time: 1 action

Range/Area: Touch

Duration: 1 minute

Attack/Save: None

Components: S, V

Effect: Movement

You touch a creature. The creature's jump distance is tripled until the spell ends.

Longstrider (1st, trans.)

Casting Time: 1 action

Range/Area: Touch

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Buff

You touch a creature. The target's speed increases by 2 m until the spell ends.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, you can target one additional creature for each slot level above 1st.

Magnify Gravity (1st, trans.)

Casting Time: 1 action

Range/Area: 6 m, 1 m sphere

Duration: 1 round

Attack/Save: Vit Save

Components: S, V

Effect: Force, control

The gravity in a 1 m radius sphere centered on a point you can see within range increases for a moment. Each creature in the sphere on the turn when you cast the spell must make a Vitality saving throw. On a failed save, a creature takes 1d8 force damage, and its speed is halved until the end of its next turn. On a successful save, a creature takes half as much damage and suffers no reduction to its speed.

Until the start of your next turn, any object that isn't being worn or carried in the sphere requires a successful Brawn check against your spell save DV to pick up or move.

At Higher Levels: When you cast this spell using a spell slot of 2nd level or higher, the damage increases by 1d8 for each slot level above 1st.

Level 2

Alter Self (2nd, trans., conc.)

Casting Time: 1 action

Range/Area: Self

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Shapechanging

When you cast the spell, choose one of the following options, the effects of which last for the duration of the spell. While the spell lasts, you can end one option as an action to gain the benefits of a different one.

- ❖ **Aquatic Adaptation:** You adapt your body to an aquatic environment, sprouting gills, and growing webbing between your fingers. You can breathe underwater and gain a Swimming Speed equal to your walking speed.
- ❖ **Change Appearance:** You transform your appearance. You decide what you look like, including your height, weight, facial features, sound of your voice, hair length, coloration, and distinguishing characteristics, if any. You can make yourself appear as a member of another race, though none of your statistics change. You also can't appear as a creature of a different size than you, and your basic shape stays the same; if you're bipedal, you can't use this spell to become quadrupedal, for instance. At any time for the duration of the spell, you can use your action to change your appearance in this way again.
- ❖ **Natural Weapons:** You grow claws, fangs, spines, horns, or a different natural weapon of your choice. Your unarmed strikes deal 1d6 bludgeoning, piercing, or slashing damage, as appropriate to the natural weapon you chose, and you are proficient with your unarmed strikes. Finally, the natural weapon is magic and you have a +1 bonus to the attack and damage rolls you make using it.

Barkskin (2nd, trans.)

Casting Time: 1 action

Range/Area: Touch

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Buff

You touch a willing creature. Until the spell ends, the target's skin has a rough, bark-like appearance, and the target's AV cannot be less than 16, regardless of what kind of armor it is wearing.

Darkvision (2nd, trans.)

Casting Time: 1 action

Range/Area: Touch

Duration: 8 hours

Attack/Save: None

Components: S, V

Effect: Buff

You touch a willing creature to grant it the ability to see in the dark. For the duration, that creature has darkvision out to a range of 12 meters.

Earthen Grasp (2nd, trans., conc.)

Casting Time: 1 action **Range/Area:** 6 m (1 m cube)
Duration: Conc., up to 1 min **Attack/Save:** Br save
Components: S, V **Effect:** Force

You choose a 1 m square unoccupied space on the ground that you can see within range. A Medium earthen hand reaches for one creature you can see within 1 m of it. The target must make a Brawn saving throw. On a failed save, the target takes 2d6 force damage and is restrained for the spell's duration.

As an action, you can cause the hand to crush the restrained target, who must make a Brawn saving throw. It takes 2d6 bludgeoning damage on a failed save, or half as much damage on a successful one.

To break out, the restrained target can use its action to make a Brawn check against your spell save DV. On a success, the target escapes and is no longer restrained by the hand.

As an action, you can cause the hand to reach for a different creature or to move to a different unoccupied space within range. The hand releases a restrained target if you do either.

Enhance Ability (2nd, trans., conc.)

Casting Time: 1 action **Range/Area:** Touch
Duration: Conc, 1 hour **Attack/Save:** None
Components: S, V **Effect:** Buff

You touch a creature and bestow upon it a magical enhancement. Choose one of the following effects: the target gains that effect until the spell ends.

- ❖ **Badger's Bravery:** The target has advantage on resolve skill checks and concentration checks.
- ❖ **Bear's Endurance:** The target has advantage on vitality checks. It also gains 2d6 temporary health points, which are lost when the spell ends.
- ❖ **Bull's Strength:** The target has advantage on brawn checks, and his or her carrying capacity doubles.
- ❖ **Cat's Grace:** The target has advantage on Dexterity checks. It also doesn't take damage from falling 6 m or less if it isn't incapacitated.
- ❖ **Fox's Cunning:** The target has advantage on Cunning skill checks.
- ❖ **Owl's Wisdom:** The target has advantage on Intelligence skill checks.
- ❖ **Peacock's Aura:** The target has advantage on Presence skill checks.
- ❖ **Snake's Conniving:** The target has advantage on Manipulation skill checks.
- ❖ **Whale's Solitude:** The target has advantage on Composure skill checks and can not be surprised for the duration of the spell.

At Higher Levels: When you cast this spell using a spell slot of 3rd level or higher, you can target one additional creature for each slot level above 2nd.

Enlarge/Reduce (2nd, trans., conc.)

Casting Time: 1 action **Range/Area:** Touch
Duration: Conc, 1 minute **Attack/Save:** Vit save
Components: S, V **Effect:** Buff

You cause a creature or an object you can see within range to grow larger or smaller for the duration. Choose either a creature or an object that is neither worn nor carried. If the target is unwilling, it can make a Vitality saving throw. On a success, the spell has no effect.

If the target is a creature, everything it is wearing and carrying changes in size with it. Any item dropped by an affected creature returns to normal size at once.

- ❖ **Enlarge:** The target's size doubles in all dimensions, and its weight is multiplied by eight. This growth increases its size by one category-- from Medium to Large, for example. If there is not enough room for the target to double its size, the creature or object attains the maximum possible size in the space available. Until the spell ends, the target also has advantage on Brawn checks and Brawn saving throws. The target's weapons also grow to

match its new size. While these weapons are enlarged, the target's attacks with them deal 1d4 extra damage.

- ❖ **Reduce:** The target's size is halved in all dimensions, and its weight is reduced to one-eighth of normal. This reduction decreases its size by one category--from Medium to Small, for example. Until the spell ends, the target also has disadvantage on Brawn checks and Brawn saving throws. The target's weapons also shrink to match its new size. While these weapons are reduced, the target's attacks with them deal 1d4 less damage (this cannot reduce the damage below 1).

Heat Metal (2nd, trans., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 minute

Attack/Save: None

Components: S, V

Effect: Fire

Choose a manufactured metal object, such as a metal weapon or a suit of heavy or medium metal armor, that you can see within range. Any creature in physical contact with the object takes 2d8 fire damage when you cast the spell. Until the spell ends, you can use a bonus action on each of your subsequent turns to cause this damage again. The spell also ends if the target is ever outside the spell's range or if it has total cover from you.

If a creature is holding or wearing the object and takes the damage from it, the creature must succeed on a Vitality saving throw or drop the object if it can. If it doesn't drop the object, it has disadvantage on attack rolls and ability checks until the start of your next turn.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, the damage increases by 1d8 for each slot level above 2nd.

Knock (2nd, trans.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: None

Components: S

Effect: Utility

Choose a locked object that you can see within range. A target that is held shut by a mundane lock or that is stuck or barred becomes unlocked, unstuck, or unbarred. If the object has multiple locks, only one of them is unlocked.

If you choose a target that is held shut with Arcane Lock, that spell is suppressed for 10 minutes, during which time the target can be opened and shut normally.

When you cast the spell, a loud knock, audible from as far away as 100 m, emanates from the target object.

Levitate (2nd, trans., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: 10 minutes

Attack/Save: Vit save

Components: S, V

Effect: Movement

One creature or lose the object of your choice that you can see within range rises vertically, up to 4 meters, and remains suspended there for the duration. The Spell can Levitate a target that weighs up to 250 kg. An unwilling creature that succeeds on a Vitality Saving Throw is unaffected.

The target can move only by pushing or pulling against a fixed object or surface within reach (such as a wall or a ceiling), which allows it to move as if it were climbing. You can change the target's altitude by up to 4 meters in either direction on your Turn. If you are the target, you can move up or down as part of your move. Otherwise, you can use your Action to move the target, which must remain within the Spell's range.

When the Spell ends, the target floats gently to the ground if it is still aloft.

Magic Weapon (2nd, trans., conc.)

Casting Time: 1 bonus action

Range/Area: Touch

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Buff

You touch a nonmagical weapon. Until the spell ends, that weapon becomes a magic weapon with a +1 bonus to attack rolls and damage rolls.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, the bonus increases to +2. When you use a spell slot of 6th level or higher, the bonus increases to +3.

Spider Climb (2nd, trans., conc.)

Casting Time: 1 action

Range/Area: Touch

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Buff

Until the spell ends, one willing creature you touch gains the ability to move up, down, and across vertical surfaces and upside down along ceilings, while leaving its hands free. The target also gains a climbing speed equal to its walking speed.

Spike Growth (2nd, trans.)

Casting Time: 1 action

Range/Area: 48 m (4 meter radius)

Duration: 10 minutes

Attack/Save: None

Components: S, V

Effect: Control

A 4 meter radius centered on a point within range area becomes difficult terrain for the duration. When a creature moves into or within the area, it takes 2d4 piercing damage for every 1 meter it travels.

The transformation of the ground is camouflaged to look natural. Any creature that can't see the area at the time the spell is cast must make a Perception (Int) check against your spell save DV to recognize the terrain as hazardous before entering it.

Level 3

Blink (3rd, trans.)

Casting Time: 1 action

Range/Area: Self

Duration: 1 minute

Attack/Save: None

Components: S, V

Effect: Utility

Roll a d20 at the end of each of your turns for the duration of the spell. On a roll of 11 or higher, you vanish from your current location and appear in the Ethereal Dimension (the spell fails and the casting is wasted if you were already on that Realm, Stellar Expanse or Ethereal Dimension). At the start of your next turn, and when the spell ends if you are in the Ethereal Dimension, you return to an unoccupied space of your choice that you can see within 2 m of the space you vanished from. If no unoccupied space is available within that range, you appear in the nearest unoccupied space (chosen at random if more than one space is equally near). You can dismiss this spell as an action.

While in the Ethereal Dimension, you can see and hear the normal world, which is cast in shades of gray, and you cannot see anything there more than 12 meters away. You can only affect and be affected by other creatures in the Ethereal Dimension. Creatures that are not there cannot perceive you or interact with you unless they can do so.

Divine Weapon (3rd, trans., conc.)

Casting Time: 1 action

Range/Area: Touch

Duration: Conc, 1 hour

Attack/Save: Melee

Components: S, V

Effect: Multiple

A nonmagical weapon you touch becomes magical for the duration. Choose radiant or necrotic. For the duration, the weapon has a +1 bonus to attack rolls and deals an extra 1d4 damage of the chosen type when it hits.

At higher levels: When you cast this spell using a spell slot of 5th or 6th level, the bonus to attack rolls increases to +2, and the extra damage increases to 2d4.

When you use a spell slot of 7th level or higher, the bonus increases to +3, and the extra damage increases to 3d4.

Elemental Weapon (3rd. trans., conc.)

Casting Time: 1 action **Range/Area:** Touch
Duration: Conc, 1 hour **Attack/Save:** Melee
Components: S, V **Effect:** Multiple

A nonmagical weapon you touch becomes magical for the duration. Choose one of the following damage types: acid, cold, fire, lightning, or thunder. For the duration, the weapon has a +1 bonus to attack rolls and deals an extra 1d4 damage of the chosen type when it hits.

At higher level: When you cast this spell using a spell slot of 5th or 6th level, the bonus to attack rolls increases to +2, and the extra damage increases to 2d4.

When you use a spell slot of 7th level or higher, the bonus increases to +3, and the extra damage increases to 3d4.

Erupting Earth (3rd, trans.)

Casting Time: 1 action **Range/Area:** 24 m (4 m cube)
Duration: Instant **Attack/Save:** Dex save
Components: S, V **Effect:** Force

Choose a point you can see on the ground within range. Each creature in a 4 m cube must make a Dexterity saving throw. A creature takes 3d12 bludgeoning damage on a failed save, or half as much damage on a successful one. Additionally, the ground in that area becomes difficult terrain until cleared. Each 1 m square portions of the area require at least 1 minute to clear by hand.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, the damage increases by 1d12 for each slot level above 3rd.

Flame Arrows (3rd, trans., conc.)

Casting Time: 1 action **Range/Area:** Touch
Duration: Conc, 1 hour **Attack/Save:** None
Components: S, V **Effect:** Fire

You touch a quiver containing arrows or bolts. When a target is hit by a ranged weapon attack using a piece of ammunition drawn from the quiver, the target takes an extra 1d6 fire damage. The spell's magic ends on the piece of ammunition when it hits or misses, and the spell ends when twelve pieces of ammunition have been drawn from the quiver.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, the number of pieces of ammunition you can affect with this spell increases by two for each slot level above 3rd.

Fly (3rd, trans., conc.)

Casting Time: 1 action **Range/Area:** Touch
Duration: Conc, 10 minutes **Attack/Save:** None
Components: S, V **Effect:** Movement

You touch a willing creature. The target gains a flying speed of 12 m for the duration. When the spell ends, the target falls if it is still aloft, unless it can stop the fall.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, you can target one additional creature for each slot level above 3rd.

Gaseous Form (3rd, trans., conc.)

Casting Time: 1 action **Range/Area:** Touch
Duration: Conc, 1 hour **Attack/Save:** None
Components: S, V **Effect:** Buff

You transform a willing creature you touch, along with everything it's wearing and carrying, into a misty cloud for the duration. The spell ends if the creature drops to 0 health points. An incorporeal creature is not affected.

While in this form, the target's only method of movement is a flying speed of 2 meters. The target can enter and occupy the space of another creature. The target has resistance to nonmagical damage, and it has advantage on Brawn, Dexterity, and Vitality saving throws. The target can pass through small holes, narrow openings, and even mere cracks, though it treats liquids as though

they were solid surfaces. The target cannot fall and remains to hover in the air even when stunned or otherwise incapacitated.

Haste (3rd, trans., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 1 minute

Attack/Save: None

Components: S, V

Effect: Buff

Choose a willing creature that you can see within range. Until the spell ends, the target's speed is doubled, it gains a +2 bonus to AV, it has advantage on Dexterity saving throws, and it gains an additional action on each of its turns. That action can be used only to take the attack (one weapon attack only), dash, disengage, hide, or use an object action.

When the spell ends, the target cannot move or take actions until after its next turn, as a wave of lethargy sweeps over it.

Meld into Stone (3rd, trans., ritual)

Casting Time: 1 action

Range/Area: Touch

Duration: 8 hours

Attack/Save: None

Components: S, V

Effect: Movement

Using your movement, you step into stone at a point you can touch as long as the stone is large enough to contain your whole body and equipment. Nothing of your presence remains visible or otherwise detectable by nonmagical senses.

While merged with the stone, your equipment merges with you, you cannot see what occurs outside it, and any Perception (Int) checks you make to hear sounds outside it are made with disadvantage. You remain aware of the passage of time and can cast spells on yourself while merged in the stone. You can use your movement to leave the stone where you entered it, which ends the spell. You otherwise cannot move.

Minor physical damage to the stone does not harm you, but its partial destruction or a change in its shape (to the extent that you no longer fit within it) expels you and deals 6d6 bludgeoning damage to you. The stone's complete destruction (or transmutation into a different substance) expels you and deals 50 bludgeoning damage to you. If expelled, you fall prone in an unoccupied space closest to where you first entered.

Plant Growth (3rd, trans.)

Casting Time: Special

Range/Area: 48 m

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Control

There are two possible uses for the spell, granting either immediate or long-term benefits.

If you cast this spell using 1 action, choose a point within range. All normal plants in a 30-meter radius centered on that point become thick and overgrown. A creature moving through the area must spend 4 meters of movement for every 1 meter it moves.

You can exclude one or more areas of any size within the spell's area from being affected.

If you cast this spell over 8 hours, you enrich the land. All plants in an 800 meter radius centered on a point within range become enriched for 1 year. The plants yield twice the normal amount of food when harvested.

Slow (3rd, trans.)

Casting Time: 1 action

Range/Area: 24 m (8 m cube)

Duration: 1 minute

Attack/Save: Res save

Components: S, V

Effect: Control

Each target in an 8 m cube within range must succeed on a Resolve saving throw or be affected by this spell for the duration.

An affected target's speed is halved, it takes a -2 penalty to AV and Dexterity saving throws, and it cannot use reactions. On its turn, it can use either an action or a bonus action, not both.

Regardless of the creature's abilities or magic items, it cannot make more than one melee or ranged attack during its turn.

If the creature attempts to cast a spell with a casting time of 1 action, roll a d20. On an 11 or higher, the spell does not take effect until the creature's next turn, and the creature must use its action on that turn to complete the spell. If it cannot, the spell is wasted.

A creature affected by this spell makes another Resolve saving throw at the end of each of its turns. On a successful save, the effect ends for it.

Water Breathing (3rd, trans., ritual)

Casting Time: 1 action

Range/Area: 6 m

Duration: 24 hours

Attack/Save: None

Components: S, V

Effect: Buff

This spell grants up to ten willing creatures you can see within range the ability to breathe underwater until the spell ends. Affected creatures also retain their normal mode of respiration.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, all creatures affected by this spell suffer no penalties on the target's movement or attacks by being underwater.

Water Walk (3rd, trans., ritual)

Casting Time: 1 action

Range/Area: 6 m

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Movement

This spell grants the ability to move across any liquid surface, such as water, acid, mud, snow, quicksand, or lava, as if it were harmless solid ground (creatures crossing molten lava can still take damage from the heat). Up to ten willing creatures you can see within range gain this ability for the duration.

If you target a creature submerged in a liquid, the spell carries the target to the surface of the liquid at a rate of 12 meters per round.

Level 4

Control Water (4th, trans., conc.)

Casting Time: 1 action

Range/Area: 96 m

Duration: Conc, 10 minutes

Attack/Save: Brawn save

Components: S, V

Effect: Force

Until the spell ends, you control any freestanding water inside an area you choose that is a cube up to 30 meters on a side. You can choose from any of the following effects when you cast this spell. As an action on your turn, you can repeat the same effect or choose a different one.

- ❖ **Flood:** You cause the water level of all standing water in the area to rise by as much as 4 meters. If the area includes a shore, the flooding water spills over onto dry land. If you choose an area in a large body of water, you instead create a 4-meter tall wave that travels from one side of the area to the other and then crashes down. Any Huge or smaller vehicles in the wave's path are carried with it to the other side. Any Huge or smaller vehicles struck by the wave have a 25 percent chance of capsizing. The water level remains elevated until the spell ends or you choose a different effect. If this effect produces a wave, the wave repeats at the start of your next turn while the flood effect lasts.
- ❖ **Part Water:** You cause water in the area to move apart and create a trench. The trench extends across the spell's area, and the separated water forms a wall to either side. The trench remains until the spell ends or you choose a different effect. The water then slowly fills in the trench over the course of the next round until the normal water level is restored.
- ❖ **Redirect Flow:** You cause flowing water in the area to move in a direction you choose, even if the water has to flow over obstacles, up walls, or in other unlikely directions. The water in the area moves as you direct it, but once it moves beyond the spell's area, it resumes its flow based on the terrain conditions. The water continues to move in the direction you choose until the spell ends or you choose a different effect.

- ❖ **Whirlpool:** This effect requires a body of water at least 10 meters square and 5 meters deep. You cause a whirlpool to form in the center of the area. The whirlpool forms a vortex that is 1 meter wide at the base, up to 10 meters wide at the top, and 5 meters tall. Any creature or object in the water and within 5 meters of the vortex is pulled 2 meters toward it. A creature can swim away from the vortex by making an Athletics (Br) check against your spell save DV.

When a creature enters the vortex for the first time on a turn or starts its turn there, it must make a Brawn saving throw. On a failed save, the creature takes 2d8 force damage and is caught in the vortex until the spell ends. On a successful save, the creature takes half damage, and isn't caught in the vortex. A creature caught in the vortex can use its action to try to swim away from the vortex as described above but has disadvantage on the Athletics (Br) check to do so. The first time each turn that an object enters the vortex, the object takes 2d8 force damage; this damage occurs each round it remains in the vortex.

Elemental Bane (4th, trans., conc.)

Casting Time: 1 action

Range/Area: 18 m

Duration: Conc, 1 minute

Attack/Save: Vit save

Components: S, V

Effect: Multiple

Choose one creature you can see within range and choose one of the following damage types: acid, cold, fire, lightning, or thunder. The target must succeed on a Vitality saving throw or be affected by the spell for its duration. The first time each turn the affected target takes damage of the chosen type, the target takes an extra 2d6 damage of that type. Moreover, the target loses any resistance to that damage type until the spell ends.

At higher levels: When you cast this spell using a spell slot of 5th level or higher, you can target one additional creature for each slot level above 4th. The creatures must be within 6 m of each other when you target them.

Fabricate (4th, trans.)

Casting Time: 10 minutes

Range/Area: 36 m

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Creation

You convert raw materials into products of the same material. For example, you can fabricate a wooden bridge from a clump of trees, a rope from a patch of hemp, and clothes from flax or wool. Choose raw materials that you can see within range. You can fabricate a Large or smaller object (contained within a 2-meter cube, or eight connected 1-meter cubes), given a sufficient quantity of raw material. If you are working with metal, stone, or another mineral substance, however, the fabricated object can be no larger than Medium (contained within a single 1-meter cube). The quality of objects made by the spell is commensurate with the quality of the raw materials.

Creatures or magic items cannot be created or transmuted by this spell. You also can't use it to create items that ordinarily require a high degree of craftsmanship, such as jewelry, weapons, glass, or armor, unless you have proficiency with the type of Artisan's Tools used to craft such objects.

Giant Insect (4th, trans., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 10 minutes

Attack/Save: None

Components: S

Effect: Summoning

You transform up to ten centipedes, three spiders, five wasps, or one scorpion within range into giant versions of their natural forms for the duration. A centipede becomes a giant centipede, a spider becomes a giant spider, a wasp becomes a giant wasp, and a scorpion becomes a giant scorpion.

Each creature obeys your verbal commands, and in combat, they act on your turn each round.

The GM has the statistics for these creatures and resolves their actions and movement.

A creature remains in its giant size for the duration, until it drops to 0 health points, or until you use an action to dismiss the effect on it.

The GM might allow you to choose different targets. For example, if you transform a bee, its giant version might have the same statistics as a giant wasp.

Polymorph (4th, trans. conc)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 hour

Attack/Save: Com save

Components: S, V

Effect: None

This spell transforms a creature that you can see within range into a new form. An unwilling creature must make a Composure saving throw to avoid the effect. The spell does not affect a shapechanger or a creature with 0 health points.

The transformation lasts for the duration, or until the target drops to 0 health points or dies. The new form can be any animal or beast whose challenge rating is equal to or less than the target's. The target's game statistics, including mental and social ability scores, are replaced by the statistics of the chosen beast. It retains its alignment and personality.

The target assumes the health points of its new form. When it reverts to its normal form, the creature returns to the number of health points it had before it transformed. If it reverts as a result of dropping to 0 health points, any excess damage carries over to its normal form. As long as the excess damage doesn't reduce the creature's normal form to 0 health points, it isn't knocked unconscious.

The creature is limited in the actions it can perform by the nature of its new form, and it cannot speak, cast spells, or take any other action that requires hands or speech.

The target's gear melds into the new form. The creature cannot activate, use, wield, or otherwise benefit from any of its equipment.

Stone Shape (4th, trans.)

Casting Time: 1 action

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Control

You touch a stone object of Medium size or smaller or a section of stone no more than 1 meter in any dimension and form it into any shape that suits your purpose. So, for example, you could shape a large rock into a weapon, idol, or coffer, or make a small passage through a wall, as long as the wall is less than 1 meter thick. You could also shape a stone door or its frame to seal the door shut. The object you create can have up to two hinges and a latch, but finer mechanical detail is not possible.

Level 5

Animate Object (5th, trans., conc.)

Casting Time: 1 action

Range/Area: Self

Duration: Conc, 1 minute

Attack/Save: None

Components: S, V

Effect: Creation

Choose up to ten nonmagical objects within range that are not being worn or carried. Medium targets count as two objects, Large targets count as four objects, Huge targets count as eight objects. You cannot animate any object larger than Huge. Each target animates and becomes a creature under your control until the spell ends or until reduced to 0 health points.

As a bonus action, you can mentally command any creature you made with this spell if the creature is within 150 meters of you (if you control multiple creatures, you can command any or all of them at the same time, issuing the same command to each one). You decide what action the creature will take and where it will move during its next turn, or you can issue a general command, such as to guard a particular chamber or corridor. If you issue no commands, the creature only defends itself against hostile creatures. Once given an order, the creature continues to follow it until its task is complete.

Size	HP	AC	Br	Dex	Attack
------	----	----	----	-----	--------

Tiny	20	18	4	18	+8 to hit, 1d4+4 damage
Small	25	16	6	14	+6 to hit, 1d8+2 damage
Medium	40	13	10	12	+5 to hit, 2d6+1 damage
Large	50	10	14	10	+6 to hit, 2d10+2 damage
Huge	80	10	18	6	+8 to hit, 2d12+4 damage

An animated object is a construct with AV, health points, attacks, Brawn, and Dexterity determined by its size. Its Vitality is 10 and its mental and social scores are 3. Its speed is 6 meters; if the object lacks legs or other appendages it can use for locomotion, it instead has a flying speed of 6 meters and can hover. If the object is securely attached to a surface or a larger object, such as a chain bolted to a wall, its speed is 0. It has blindsight with a radius of 6 m and is blind beyond that distance. When the animated object drops to 0 health points, it reverts to its original object form, and any remaining damage carries over to its original object form.

At higher levels: If you cast the spell using a spell slot of 6th level or higher, you can animate two additional objects for each slot level above 5th.

Awaken (5th, trans.)

Casting Time: 8 hours

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Charm

You touch a Huge or smaller beast or plant. The target must have either no Intelligence score or an Intelligence of 3 or less. The target gains an Intelligence of 10. The target also gains the ability to speak one language you know. If the target is a plant, it gains the ability to move its limbs, roots, vines, creepers, and so forth, and it gains senses similar to a human's. Your GM chooses statistics appropriate for the awakened plant, such as the statistics for the Awakened Shrub or the Awakened Tree.

The Awakened Beast or Plant is charmed by you for 30 days or until you or your companions do anything harmful to it. When the charmed condition ends, the awakened creature chooses whether to remain friendly to you, based on how you treated it while it was charmed.

Control Winds (5th, trans., conc.)

Casting Time: 1 action

Range/Area: 60 m (20 m cube)

Duration: Conc, up to 1 hour

Attack/Save: Br save

Components: S

Effect: Prone

Choose one of the following effects when you cast the spell. The effect lasts for the spell's duration unless you use your action on a later turn to switch to a different effect. You can also use your action to temporarily halt the effect or to restart one you've halted.

- ❖ **Gusts:** A wind picks up within the cube, continually blowing in a horizontal direction you designate. You choose the intensity of the wind: calm, moderate, or strong. If the wind is moderate or strong, ranged weapon attacks that enter or leave the cube or pass through it have disadvantage on their attack rolls. If the wind is strong, any creature moving against the wind must spend 1 m of movement for each m moved.
- ❖ **Downdraft:** You cause a sustained blast of strong wind to blow downward from the top of the cube. Ranged weapon attacks that pass through the cube or that are made against targets within it have disadvantage on their attack rolls. A creature must make a Brawn saving throw if it flies into the cube for the first time on a turn or starts its turn there flying. On a failed save, the creature is knocked prone.
- ❖ **Updraft:** You cause a sustained updraft within the cube, rising upward from the cube's bottom side. Creatures that end a fall within the cube take only half damage from the fall. When a creature in the cube makes a vertical jump, the creature can jump up to 2 m higher than normal.

Passwall (5th, trans.)

Casting Time: 1 action

Range/Area: 6 m

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Control

A passage appears at a point of your choice that you can see on a wooden, plaster, or stone surface (such as a wall, a ceiling, or a floor) within range, and lasts for the duration. You choose the opening's dimensions: up to 1.5 meters wide, 2.5 meters tall, and 4 meters deep. The passage creates no instability in a structure surrounding it.

When the opening disappears, any creatures or objects still in the passage created by the spell are safely ejected to an unoccupied space nearest to the surface on which you cast the spell.

Telekinesis (5th, trans., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 10 minutes

Attack/Save: None

Components: S, V

Effect: Control

You gain the ability to move or manipulate creatures or objects by thought. When you cast the spell, and as your action each round for the duration, you can exert your will on one creature or object that you can see within range, causing the appropriate effect below. You can affect the same target round after round, or choose a new one at any time. If you switch targets, the prior target is no longer affected by the spell.

- ❖ **Creature:** You can try to move a Huge or smaller Creature. Make an ability check with your spellcasting ability contested by the creature's Brawn check. If you win the contest, you move the creature up to 6 meters in any direction, including upward but not beyond the range of this spell. Until the end of your next turn, the creature is restrained in your telekinetic grip. A creature lifted upward is suspended in mid-air. On subsequent rounds, you can use your action to attempt to maintain your telekinetic grip on the creature by repeating the contest.
- ❖ **Object:** You can try to move an object that weighs up to 450 kg. If the object isn't being worn or carried, you automatically move it up to 6 meters in any direction, but not beyond the range of this spell.

If the object is worn or carried by a creature, you must make an ability check with your spellcasting ability contested by that creature's Brawn check. If you succeed, you pull the object away from that creature and can move it up to 6 meters in any direction but not beyond the range of this spell.

You can exert fine control on objects with your telekinetic grip, such as manipulating a simple tool, opening a door or a container, stowing or retrieving an item from an open container, or pouring the contents from a vial.

Transmute Rock (5th, trans.)

Casting Time: 1 action

Range/Area: 24 m (8 m cube)

Duration: Until dispelled

Attack/Save: Dex save

Components: S, V

Effect: Force

You choose an area of stone or mud that you can see that fits within an 8 m cube and is within range, and choose one of the following effects.

- ❖ **Transmute Rock to Mud:** Nonmagical rock of any sort in the area becomes an equal volume of thick, flowing mud that remains for the spell's duration. The ground in the spell's area becomes muddy enough that creatures can sink into it. Every 1 m that a creature moves through the mud costs 2 m of movement, and any creature on the ground when you cast the spell must make a Brawn saving throw. A creature must also make the saving throw when it moves into the area for the first time on a turn or ends its turn there. On a failed save, a creature sinks into the mud and is restrained, though it can use an action to end the restrained condition on itself by pulling itself free of the mud. If you cast the spell on a ceiling, the mud falls. Any creature under the mud when it falls must make a Dexterity saving throw. A creature takes 4d8 force damage on a failed save, or half as much damage on a successful one.

- ❖ **Transmute Mud to Rock:** Nonmagical mud or quicksand in the area no more than 2 m deep transforms into soft stone for the spell's duration. Any creature in the mud when it transforms must make a Dexterity saving throw. On a successful save, a creature is shunted safely to the surface in an unoccupied space. On a failed save, a creature becomes restrained by the rock. A restrained creature, or another creature within reach, can use an action to try to break the rock by succeeding on a DV 20 Brawn check or by dealing damage to it. The rock has AV 15 and 25 health points, and it is immune to poison and psychic damage.

Level 6

Bones of the Earth (6th, trans.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Force

You cause up to six pillars of stone to appear from the ground that you can see within range.

Each pillar is a cylinder that has a diameter of 1 m and a height of up to 6 m. The ground where a pillar appears must be wide enough for its diameter, and you can target ground under a creature if that creature is Medium or smaller. Each pillar has AV 5 and 30 health points. When reduced to 0 health points, a pillar crumbles into rubble, which creates an area of difficult terrain with a 2 m radius. The rubble lasts until cleared.

If a pillar is created under a creature, that creature must succeed on a Dexterity saving throw or be lifted by the pillar. A creature can choose to fail the save.

If a pillar is prevented from reaching its full height because of a ceiling or other obstacle, a creature on the pillar takes 6d6 force damage and is restrained, pinched between the pillar and the obstacle. The restrained creature can use an action to make a Brawn or Dexterity check (the creature's choice) against the spell's saving throw DV. On a success, the creature is no longer restrained and must either move off the pillar or fall off it.

At higher levels: When you cast this spell using a spell slot of 7th level or higher, you can create two additional pillars for each slot level above 6th.

Disintegrate (6th, trans.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Force

The target can be a creature, an object, or a creation of magical force, such as the wall created by a *Wall Of Force*.

A creature targeted by this spell must make a Dexterity saving throw. On a failed save, the target takes 15d6+20 force damage. The target is disintegrated if this damage leaves it with 0 health points.

A disintegrated creature and everything it is wearing and carrying, except magic items, are reduced to a pile of fine gray dust. The creature can be restored to life only using a *True Resurrection* or a *Wish* spell.

This spell automatically disintegrates a Large or smaller nonmagical object or a creation of magical force. If the target is a Huge or larger object or creation of force, this spell disintegrates a 2 m cube portion of it. A magic item is unaffected by this spell.

At higher levels: When you cast this spell using a spell slot of 7th level or higher, the damage increases by 3d6 for each slot level above 6th.

Flesh to Stone (6th, trans., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 minute

Attack/Save: Vit save

Components: S, V

Effect: Petrified

You attempt to petrify one creature that you can see within range. If the target's body is made of flesh, the creature must make a Vitality saving throw. On a failed save, it is restrained as its flesh begins to harden. On a successful save, the creature is not affected.

A creature restrained by this spell must make another Vitality saving throw at the end of each of its turns. If it successfully saves against this spell three times, the spell ends. If it fails its saves three times, it is turned to stone and subjected to the petrified condition for the duration. The successes and failures do not need to be consecutive; keep track of both until the target collects three of a kind.

If the creature is physically broken while petrified, it suffers from similar deformities if it reverts to its original state.

If you maintain your concentration on this spell for the entire possible duration, the creature is turned to stone until the effect is removed.

Move Earth (6th, trans., conc.)

Casting Time: 1 action

Range/Area: 24 m

Duration: Conc, 2 hours

Attack/Save: None

Components: S, V

Effect: Control

Choose an area of terrain no larger than 8 meters on a side within range. You can reshape dirt, sand, or clay in the area in any manner you choose for the duration. You can raise or lower the area's elevation, create, or fill in a trench, erect or flatten a wall, or form a pillar. The extent of any such changes cannot exceed half the area's largest dimension. So, if you affect an 8-meter square, you can create a pillar up to 4 meters high, raise or lower the square's elevation by up to 4 meters, dig a trench up to 4 meters deep, and so on. It takes 10 minutes for these changes to complete.

At the end of every 10 minutes, you spend concentrating on the spell, you can choose a new area of terrain to affect.

Because the terrain's transformation occurs slowly, creatures in the area cannot usually be trapped or injured by the ground's movement.

This spell cannot manipulate natural stone or stone construction. Rocks and structures shift to accommodate the new terrain. If the way you shape the terrain would make a structure unstable, it might collapse.

Similarly, this spell does not directly affect plant growth. The moved earth carries any plants along with it.

Wind Walk (6th, trans.)

Casting Time: 1 minute

Range/Area: 6 m

Duration: 8 hours

Attack/Save: None

Components: S, V

Effect: Buff

You and up to ten willing creatures you can see within range assume a gaseous form for the duration. While in this cloud form, a creature has a flying speed of 18 meters and has resistance to damage from nonmagical weapons. The only actions a creature can take in this form are the dash action or to revert to its normal form. Reverting takes 1 minute, during which time a creature is incapacitated and cannot move. Until the spell ends, a creature can revert to cloud form, which also requires the 1 minute transformation.

If a creature is in cloud form and flying when the effect ends, the creature descends 12 meters per round for 1 minute until it lands, which it does safely. If it cannot land after 1 minute, the creature falls the remaining distance.

Level 7

Etherealness (7th, trans.)

Casting Time: 1 action

Range/Area: Self

Duration: 8 hours

Attack/Save: None

Components: S

Effect: Buff

You step into the Ethereal Dimension. You remain in the Ethereal Dimension for the duration or until you use your action to dismiss the spell. During this time, you can Move in any direction. If you move up or down, every m of movement costs an extra meter. You can see and hear the Realm you originated from, but everything there looks gray, and you cannot see anything more than 12 m away.

While in the Ethereal Dimension, you can only affect and be affected by other creatures in that Dimension. Creatures that are not in the Ethereal Dimension cannot perceive you and cannot interact with you unless a special ability or magic has given them the ability to do so.

You ignore all objects and effects that are not in the Ethereal Dimension, allowing you to move through objects you perceive on the Realm you originated from.

When the spell ends, you immediately return to the Realm you originated from in the spot you currently occupy. If you occupy the same spot as a solid object or creature when this happens, you are immediately shunted to the nearest unoccupied space that you can occupy and take force damage equal to twice the number of m you are moved.

This spell does not affect if you cast it while you are in the Ethereal Dimension.

At higher levels: When you cast this spell using a spell slot of 8th level or higher, you can target up to three willing creatures (including you) for each slot level above 7th. The creatures must be within 2 m of you when you cast the spell.

Regenerate (7th, trans.)

Casting Time: 1 minute

Range/Area: Touch

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Healing

The target regains 4d8+15 health points. For the duration of the spell, the target regains 1 health point at the start of each of its turns (10 health points each minute).

The target's severed body members (fingers, legs, tails, and so on), if any, are restored after 2 minutes. If you have the severed part and hold it to the stump, the spell instantaneously causes the limb to knit to the stump.

Reverse Gravity (7th, trans., conc.)

Casting Time: 1 action

Range/Area: 30 meters (15 meter cylinder)

Duration: Conc, 1 minute

Attack/Save: Dex save

Components: S, V

Effect: Control

This spell reverses gravity in a 15-meter radius, 30 meters high cylinder centered on a point within range. All creatures and objects that are not somehow anchored to the ground in the area fall upward and reach the top of the area when you cast this spell. A creature can make a Dexterity saving throw to grab onto a fixed object it can reach, thus avoiding the fall.

If some solid object (such as a ceiling) is encountered in this fall, falling objects and creatures strike it just as they would during a normal downward fall. If an object or creature reaches the top of the area without striking anything, it remains there, oscillating slightly, for the duration. At the end of the duration, affected objects and creatures fall back down.

Sequester (7th, trans.)

Casting Time: 1 action

Range/Area: Touch

Duration: Until dispelled

Attack/Save: None

Components: S, V, SC

Effect: Deception

Using this spell, a willing creature or an object can be hidden away, safe from detection for the duration. When you cast the spell and touch the target, it becomes invisible and cannot be targeted by divination spells or perceived through scrying sensors created by divination spells. If the target is a creature, it falls into a state of suspended animation. Time ceases to flow for it, and it does not grow older.

You can set a condition for the spell to end early. The condition can be anything you choose, but it must occur or be visible within 1500 meters of the target. This spell also ends if the target takes any damage.

Level 8

Animal Shapes (8th, trans., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 24 hours

Attack/Save: None

Components: S, V

Effect: Shapechanging

Choose any number of willing creatures that you can see within range. You transform each target into the form of a Large or smaller beast or animal with a challenge rating of 4 or lower. On subsequent turns, you can use your action to transform affected creatures into new forms.

The transformation lasts for the duration for each target, or until the target drops to 0 health points or dies. You can choose a different form for each target. A target's game statistics are replaced by the statistics of the chosen beast or animal, though the target retains its alignment and mental and social ability scores. The target assumes the health points of its new form, and when it reverts to its normal form, it returns to the number of health points it had before it transformed. If it reverts as a result of dropping to 0 health points, any excess damage carries over to its normal form. As long as the excess damage doesn't reduce the creature's normal form to 0 health points, it isn't knocked unconscious. The creature is limited in the actions it can perform by the nature of its new form, and it cannot speak or cast spells.

The target's gear melds into the new form. The target can't activate, wield, or otherwise benefit from any of its equipment.

Control Weather (8th, trans., conc.)

Casting Time: 10 minutes

Range/Area: Self (8 kilometre radius)

Duration: Conc, 8 hours

Attack/Save: None

Components: S, V

Effect: Control

You must be outdoors to cast this spell. Moving to a place where you don't have a clear path to the sky ends the spell early.

When you cast the spell, you change the current weather conditions, which are determined by the GM based on the climate and season. You can change precipitation, temperature, and wind. It takes 1d4×10 minutes for the new conditions to take effect. Once they do so, you can change the conditions again. When the spell ends, the weather gradually returns to normal.

When you change the weather conditions, find a current condition on the following tables, and change its stage by one, up or down. When changing the wind, you can change its direction.

Temperature

Stage	Condition
1	Unbearable heat
2	Hot
3	Warm
4	Cool
5	Cold
6	Arctic cold

Wind

Stages	Condition
1	Calm
2	Moderate wind

3	Strong wind
4	Gale
5	Storm

Precipitation

Stage	Condition
1	Clear
2	Light clouds
3	Overcast or ground fog
4	Rain, hail, or snow
5	Torrential rain, driving hail, or blizzard

Level 9

Shapechange (9th, trans., conc.)

Casting Time: 1 action

Range/Area: Self

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V, SC

Effect: Shapechanging

You assume the form of a different creature for the duration. The new form can be of any creature with a challenge rating equal to your level or lower. The creature cannot be a construct or an undead, and you must have seen the sort of creature at least once. You transform into an average example of that creature, one without any AO levels or the spellcasting trait.

Your game statistics are replaced by the statistics of the chosen creature, though you retain your personality and social and mental ability scores. You also retain all of your skill ranks and saving throw proficiencies, in addition to gaining those of the creature. If the creature has the same proficiency as you and the bonus listed in its statistics is higher than yours, use the creature's bonus in place of yours. You cannot use any legendary actions or lair actions of the new form.

You assume the health points and health dice of the new form. When you revert to your normal form, you return to the number of health points you had before you transformed. If you revert as a result of dropping to 0 health points, any excess damage carries over to your normal form. As long as the excess damage doesn't reduce your normal form to 0 health points, you aren't knocked unconscious.

You retain the benefit of any features from your AO abilities, race, or other source and can use them, provided that your new form is physically capable of doing so. You cannot use any special senses you have (for example, darkvision) unless your new form also has that sense. You can only speak if the creature can normally speak.

When you transform, you choose whether your equipment falls to the ground, merges into the new form, or is worn by it. Worn equipment functions as normal. The GM determines whether it is practical for the new form to wear a piece of equipment, based on the creature's shape and size. Your equipment does not change shape or size to match the new form, and any equipment that the new form can't wear must either fall to the ground or merge into your new form.

Equipment that merges does not affect that state.

During this spell's duration, you can use your action to assume a different form following the same restrictions and rules for the original form, with one exception: if your new form has more health points than your current one, your health points remain at their current value.

True Polymorph (9th, trans., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 1 hour

Attack/Save: Com save

Components: S, V

Effect: Buff

Choose one creature or a nonmagical object that you can see within range. You transform the creature into a different creature, the creature into a nonmagical object, or the object into a creature (the object must be neither worn nor carried by another creature). The transformation lasts for the duration, or until the target drops to 0 health points or dies. If you concentrate on this spell for the full duration, the spell lasts until it is dispelled.

This spell does not affect a shapechanger or a creature with 0 health points. An unwilling creature can make a Composure saving throw, and if it succeeds, it is not affected by this spell.

- ❖ **Creature into Creature:** If you turn a creature into another kind of creature, the new form can be any kind you choose whose challenge rating is equal to or less than the target's (or its level, if the target does not have a challenge rating). The target's game statistics, including mental and social ability scores, are replaced by the statistics of the new form. It retains its personality.
The target assumes the health points of its new form, and when it reverts to its normal form, the creature returns to the number of health points it had before it transformed. If it reverts as a result of dropping to 0 health points, any excess damage carries over to its normal form. As long as the excess damage doesn't reduce the creature's normal form to 0 health points, it isn't knocked unconscious.
The creature is limited in the actions it can perform by the nature of its new form, and it cannot speak, cast spells, or take any other action that requires hands or speech unless its new form is capable of such actions.
The target's gear melds into the new form. The creature cannot activate, use, wield, or otherwise benefit from any of its equipment.
- ❖ **Object into Creature:** You can turn any object into any kind of creature, as long as the creature's size is no larger than the object's size and the creature's challenge rating is 9 or lower. The creature is friendly to you and your companions. It acts on each of your turns. You decide what action it takes and how it moves. The GM has the creature's statistics and resolves all of its actions and movement.
If the spell becomes permanent, you no longer control the creature. It might remain friendly to you, depending on how you have treated it.
- ❖ **Creature into Object:** If you turn a creature into an object, it transforms along with whatever it is wearing and carrying into that form, as long as the object's size is no larger than the creature's size. The creature's statistics become those of the object, and the creature has no memory of time spent in this form after the spell ends and it returns to its normal form.

VISMANCY

Vismancy spells manipulate the energies of life and death. Such spells can grant an extra reserve of life force, drain the life energy from another creature, create the undead, or even bring the dead back to life.

Cantrips

Chill Touch (0, vis.)

Casting Time: 1 action

Range/Area: 24 m

Duration: 1 round

Attack/Save: Ranged

Components: S, V

Effect: Necrotic

Make a ranged spell attack against the creature to assail it with the chill of the grave. On a hit, the target takes 1d8 necrotic damage, and it cannot regain health points until the start of your next turn. Until then, the hand clings to the target.

If you hit an undead target, it also has disadvantage on attack rolls against you until the end of your next turn.

This spell's damage increases by 1d8 when you reach 5th level (2d8), 11th level (3d8), and 17th level (4d8).

Sacred Flame (0, vis.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: Dex save

Components: S, V

Effect: Radiant

The target must succeed on a Dexterity saving throw or take 1d8 radiant damage. The target gains no benefit from cover for this saving throw.

The spell's damage increases by 1d8 when you reach 5th level (2d8), 11th level (3d8), and 17th level (4d8).

Spare the Dying (0, vis.)

Casting Time: 1 action

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Healing

You touch a living creature that has 0 health points. The creature becomes stable. This spell does not affect undead or constructs.

Level 1

Armor of Life (1st, vis.)

Casting Time: 1 action

Range/Area: Self

Duration: 1 hour

Attack/Save: None

Components: S, V

Effect: Healing

You gain 1d4+4 temporary health points for the duration.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, you gain 5 additional temporary health points for each slot level above 1st.

Cure Wounds (1st, vis.)

Casting Time: 1 action

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Healing

A creature you touch regains a number of health points equal to 1d8 + your spellcasting ability modifier. This spell does not affect constructs.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, the healing increases by 1d8 for each slot level above 1st.

Gentle Repose (1st, vis., ritual)

Casting Time: 1 action

Range/Area: Touch

Duration: 10 days

Attack/Save: None

Components: S, V

Effect: Warding

You touch a corpse or other remains. For the duration, the target is protected from decay and cannot become undead.

The spell also effectively extends the time limit on raising the target from the dead, since days spent under the influence of this spell do not count against the time limit of spells such as Raise Dead.

Guiding Bolt (1st, vis.)

Casting Time: 1 action

Range/Area: 24 m

Duration: 1 round

Attack/Save: Ranged

Components: S, V

Effect: Radiant

Make a ranged spell attack against the target. On a hit, the target takes 4d6 radiant damage, and the next attack roll made against this target before the end of your next turn has advantage, thanks to the mystical dim light glittering on the target until then.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, the damage increases by 1d6 for each slot level above 1st.

Healing Word (1st, vis.)

Casting Time: 1 bonus action

Range/Area: 12 m

Duration: Instant

Attack/Save: None

Components: V

Effect: Healing

A creature of your choice that you can see within range regains health points equal to 1d4+ your spellcasting ability modifier. This spell does not affect constructs.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, the healing increases by 1d4 for each slot level above 1st.

Inflict Wounds (1st, vis.)

Casting Time: 1 action

Range/Area: Touch

Duration: Instant

Attack/Save: Melee

Components: S, V

Effect: Necrotic

Make a melee spell attack against a creature you can reach. On a hit, the target takes 3d10 necrotic damage.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, the damage increases by 1d10 for each slot level above 1st.

Ray of Sickness (1st, vis.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: Vit save

Components: S, V

Effect: Poison

Make a ranged spell attack against the target. On a hit, the target takes 2d8 poison damage and must make a Vitality saving throw. On a failed save, it is also poisoned until the end of your next turn.

At higher levels: When you cast this spell using a spell slot of 2nd level or higher, the damage increases by 1d8 for each slot level above 1st.

Level 2

Blindness/Deafness (2nd, vis.)

Casting Time: 1 action

Range/Area: 6 m

Duration: 1 minute

Attack/Save: Vit save

Components: V

Effect: Debuff

Choose one creature that you can see within range to make a Vitality saving throw. If it fails, the target is either blinded or deafened (your choice) for the duration. At the end of each of its turns, the target can make a Vitality saving throw. On a success, the spell ends.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, you can target one additional creature for each slot level above 2nd.

Prayer of Healing (2nd, vis.)

Casting Time: 10 minutes

Range/Area: 6 m

Duration: Instant

Attack/Save: None

Components: V

Effect: Healing

Up to six creatures of your choice that you can see within range each regain health points equal to 2d8+ your spellcasting ability modifier. This spell does not affect constructs.

At higher levels: When you cast this spell using a spell slot of 3rd level or higher, the healing increases by 1d8 for each slot level above 2nd.

Ray of Enfeeblement (2nd, vis., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 minute

Attack/Save: Vit save

Components: S, V

Effect: Debuff

Make a ranged spell attack against the target. On a hit, the target deals only half damage with weapon attacks that use Brawn until the spell ends. At the end of each of the target's turns, it can make a Vitality saving throw against the spell. On a success, the spell ends.

Level 3

Animate Dead (3rd, vis.)

Casting Time: 1 minute

Range/Area: 2 m

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Creation

This spell creates up to two undead servants. Choose a pile of bones or a corpse of a Medium or Small humanoid within range. The target becomes a skeleton if you chose bones or a zombie if you chose a corpse (the Bestiary has the creature's game statistics).

On each of your turns, you can use a bonus action to mentally command any creature you made with this spell if the creature is within 12 m of you (if you control multiple creatures, you can command any or all of them at the same time, issuing the same command to each one). You decide what action the creature will take and where it will move during its next turn, or you can issue a general command, such as to guard a particular chamber or corridor. If you issue no commands, the creature only defends itself against hostile creatures. Once given an order, the creature continues to follow it until its task is complete.

The creature is under your control for 24 hours, after which it stops obeying any command you've given it. To maintain control of the creature for another 24 hours, you must cast this spell on the creature again before the current 24-hour period ends. This use of the spell reasserts your control over up to four creatures you have animated with this spell, rather than animating a new one. Whenever this spell is cast to reassert control over the undead rather than create new ones, the spell does not require Soul Consumption.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, you animate or reassert control over two additional undead creatures for each slot level above 3rd. Each of the creatures must come from a different corpse or pile of bones.

Bestow Curse (3rd, vis., conc.)

Casting Time: 1 action

Range/Area: Touch

Duration: Conc, 1 minute

Attack/Save: Pre/Man save

Components: S, V

Effect: Debuff

You touch a creature, and that creature must succeed on a Pre/Man saving throw or become cursed for the duration of the spell. When you cast this spell, choose the nature of the curse from the following options:

- ❖ Choose one ability score: While cursed, the target has disadvantage on ability checks and saving throws made with that ability score.
- ❖ While cursed, the target has disadvantage on attack rolls against you.
- ❖ While cursed, the target must make a Pre/Man saving throw at the start of each of its turns. If it fails, it wastes its action that turns doing nothing.
- ❖ While the target is cursed, your attacks and spells deal an extra 1d8 necrotic damage to the target.

A spell that removes curses ends this effect. At the GM's option, you may choose an alternative curse effect, but it should be no more powerful than those described above. The GM has final say on such a curse's effect.

At higher levels: If you cast this spell using a spell slot of 4th level or higher, the duration is concentration, up to 10 minutes. If you use a spell slot of 5th level or higher, the duration is 8 hours. If you use a spell slot of 7th level or higher, the duration is 24 hours. If you use a 9th level spell slot, the spell lasts until it is dispelled. Using a spell slot of 5th level or higher grants a duration that does not require concentration.

Mass Healing Word (3rd, vis.)

Casting Time: 1 bonus action

Range/Area: 12 m

Duration: Instant

Attack/Save: None

Components: V

Effect: Healing

As you call out words of restoration, up to six creatures of your choice that you can see within range regain health points equal to 1d4+ your spellcasting ability modifier. This spell does not affect constructs.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, the healing increases by 1d4 for each slot level above 3rd.

Revivify (3rd, vis.)

Casting Time: 1 action

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Healing

You touch a creature that has died within the last minute. That creature returns to life with 1 health point. This spell cannot return to life a creature that has died of old age, nor can it restore any missing body parts.

Speak With Dead (3rd, vis.)

Casting Time: 1 action

Range/Area: 2 m

Duration: 10 minutes

Attack/Save: None

Components: S, V

Effect: Communication

You grant the semblance of life and intelligence to a corpse of your choice within range, allowing it to answer the questions you pose. The corpse must still have a mouth and cannot be undead. The spell fails if the corpse was the target of this spell within the last 10 days.

Until the spell ends, you can ask the corpse up to five questions. The corpse knows only what it knew in life, including the languages it knew. Answers are usually brief, cryptic, or repetitive, and the corpse is under no compulsion to offer a truthful answer if you are hostile to it or it recognizes you as an enemy. This spell does not return the creature's Soul to its body, only its animating spirit. Thus, the corpse cannot learn new information, does not comprehend anything that has happened since it died, and can't speculate about future events.

Vampiric Touch (3rd, vis., conc.)

Casting Time: 1 action

Range/Area: Self

Duration: Conc, 1 minute

Attack/Save: Melee

Components: S, V

Effect: Necrotic

Make a melee spell attack against a creature within your reach. On a hit, the target takes 3d6 necrotic damage, and you regain health points equal to half the amount of necrotic damage dealt. Until the spell ends, you can make the attack again on each of your turns as an action.

At higher levels: When you cast this spell using a spell slot of 4th level or higher, the damage increases by 1d6 for each slot level above 3rd.

Level 4

Blight (4th, vis.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Instant

Attack/Save: Vit save

Components: S, V

Effect: Necrotic

The target must make a Vitality saving throw. The target takes 8d8 necrotic damage on a failed save, or half as much damage on a successful one. This spell does not affect constructs.

If you target a plant creature or a magical plant, it makes the saving throw with disadvantage, and the spell deals maximum damage to it.

If you target a nonmagical plant that isn't a creature, such as a tree or a shrub, it doesn't make a saving throw; it simply withers and dies.

At higher levels: When you cast this spell using a spell slot of 5th level or higher, the damage increases by 1d8 for each slot level above 4th.

Shadows of Djosqet (4th, vis., conc.)

Casting Time: 1 action

Range/Area: 6 m

Duration: Conc, 1 minute

Attack/Save: Vit save

Components: S, V

Effect: Necrotic

The shadows turn dim light within 2 m of you into darkness, and bright light in the same area to dim light.

Until the spell ends, you have resistance to radiant damage. In addition, whenever a creature within 2 m of you hits you with an attack, the shadows lash out at that creature, dealing it 2d8 necrotic damage.

Level 5

Contagion (5th, vis.)

Casting Time: 1 action

Range/Area: Touch

Duration: 7 days

Attack/Save: Vit save

Components: S, V

Effect: Blinded

Make a melee spell attack against a creature within your reach. On a hit, the target is poisoned. At the end of each of the poisoned target's turns, the target must make a Vitality saving throw. If the target succeeds on three of these saves, it is no longer poisoned, and the spell ends. If the target fails three of these saves, the target is no longer poisoned, but choose one of the diseases below. The target is subjected to the chosen disease for the spell's duration.

Since this spell induces a natural disease in its target, any effect that removes a disease or otherwise ameliorates a disease's effects apply to it.

- ❖ **Blinding Sickness:** Pain grips the creature's mind, and its eyes turn milky white. The creature has disadvantage on mental checks and Resolve saving throws and is blinded.
- ❖ **Bloody Doom:** The creature begins to bleed uncontrollably. The creature has disadvantage on Vitality checks and Vitality saving throws. In addition, whenever the creature takes damage, it is stunned until the end of its next turn.
- ❖ **Fever:** A raging fever sweeps through the creature's body. The creature has disadvantage on Brawn checks, Brawn saving throws, and attack rolls that use Brawn.
- ❖ **Flesh Rot:** The creature's flesh decays. The creature has disadvantage on social checks and vulnerability to all damage.
- ❖ **Mindfire:** The creature's mind becomes feverish. The creature has disadvantage on mental checks and Int/Cun saving throws, and the creature behaves as if under the effects of the Confusion spell during combat.
- ❖ **Seizure:** The creature is overcome with shaking. The creature has disadvantage on Dexterity checks, Dexterity saving throws, and attack rolls that use dexterity.

Danse Macabre (5th, vis., conc.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Conc, 1 hour

Attack/Save: None

Components: S, V

Effect: Control

Up to five Small or Medium corpses you can see within range immediately stands up and becomes undead. You decide whether it is a zombie or a skeleton (the statistics for zombies and skeletons are in the Bestiary), and it gains a bonus to its attack and damage rolls equal to your spellcasting ability modifier. You can use a bonus action to mentally command the creatures you make with this spell, issuing the same command to all of them. To receive the command, a creature must be within 12 m of you. You decide what action the creatures will take and where they will move during their next turn, or you can issue a general command, such as to guard a chamber or passageway against your foes. If you issue no commands, the creatures do nothing except defend themselves against hostile creatures. Once given an order, the creatures continue to follow it until their task is complete.

The creatures are under your control until the spell ends, after which they become inanimate once more.

At higher levels: When you cast this spell using a spell slot of 6th level or higher, you animate up to two additional corpses for each slot level above 5th.

Hallow (5th, vis.)

Casting Time: 24 hours

Range/Area: Touch (12 m sphere)

Duration: Until dispelled

Attack/Save: Pre/Man save

Components: S, V, SC

Effect: Buff

You touch a point and infuse an area around it with divine power. The area can have a radius up to 12 m, and the spell fails if the radius includes an area already under the effect of a Hallow spell. The affected area is subject to the following effects:

- ❖ First, celestials, elementals, fey, fiends, and undead cannot enter the area, nor can such creatures charm, frighten, or possess creatures within it. Any creature charmed, frightened, or possessed by such a creature is no longer charmed, frightened, or possessed upon entering the area. You can exclude one or more of those types of creatures from this effect.
- ❖ Second, you can bind an extra effect to the area. Choose the effect from the following list, or choose an effect offered by the GM. Some of these effects apply to creatures in the area; you can designate whether the effect applies to all creatures, creatures that follow a specific deity or leader, or creatures of a specific sort, such as orcs or trolls. When a creature that would be affected enters the spell's area for the first time on a turn or starts its turn there, it can make a Pre/Man saving throw. On a success, the creature ignores the extra effect until it leaves the area.
 - **Courage:** Affected creatures cannot be frightened while in the area.
 - **Darkness:** Magical darkness fills the area.
 - **Daylight:** Magical bright light fills the area.
 - **Energy Protection:** Affected creatures in the area have resistance to one damage type of your choice, except for bludgeoning, piercing, or slashing.
 - **Energy Vulnerability:** Affected creatures in the area have vulnerability to one damage type of your choice, except for bludgeoning, piercing, or slashing.
 - **Everlasting Rest:** Dead bodies interred in the area cannot be turned into undead.
 - **Extradimensional Interference:** Affected creatures cannot move or travel using teleportation or by extradimensional or interplanar means.
 - **Fear:** Affected creatures are frightened while in the area.
 - **Silence:** No sound can emanate from within the area, and no sound can reach into it.
 - **Tongues:** Affected creatures can communicate with any other creature in the area, even if they do not share a common language.

Mass Cure Wounds (5th, vis.)

Casting Time: 1 action

Range/Area: 12 m (6 m sphere)

Duration: Instant

Attack/Save: None

Components: S

Effect: Healing

Choose up to six creatures in a 6 m radius sphere centered on that point. Each target regains health points equal to 3d8+ your spellcasting ability modifier. This spell does not affect constructs.

At higher levels: When you cast this spell using a spell slot of 6th level or higher, the healing increases by 1d8 for each slot level above 5th.

Necrotic Wave (5th, vis.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: Vit save

Components: V

Effect: Necrotic

Unless the target is undead, it must make a Vitality saving throw, taking 5d12 necrotic damage on a failed save, or half as much damage on a successful one. A target killed by this damage rises up

as a zombie at the start of your next turn. The zombie pursues whatever creature it can see that is closest to it. Statistics for the zombie are in the Bestiary. If you target an undead with this spell, the target does not make a saving throw. Instead, roll 5d12. The target gains half the total as temporary health points.

Raise Dead (5th, vis.)

Casting Time: 1 hour

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Healing

You return a dead creature you touch to life, provided that it has been dead no longer than 10 days. If the creature's soul is both willing and at liberty to rejoin the body, the creature returns to life with 1 health point.

This spell also neutralizes any poisons and cures nonmagical diseases that affected the creature at the time it died. This spell does not, however, remove magical diseases, curses, or similar effects; if these are not first removed before casting the spell, they take effect when the creature returns to life. The spell cannot return an undead creature to life.

This spell closes all mortal wounds, but it does not restore missing body parts. If the creature is lacking body parts or organs integral for its survival, its head, for instance, the spell automatically fails.

Coming back from the dead is an ordeal. The target takes a –4 penalty to all attack rolls, saving throws, and ability checks. Every time the target finishes a long rest, the penalty is reduced by 1 until it disappears.

Level 6

Circle of Death (6th, vis.)

Casting Time: 1 action

Range/Area: 30 m (12 m sphere)

Duration: Instant

Attack/Save: Vit save

Components: S, V, SC

Effect: Necrotic

Choose creatures in a 12 m radius sphere must make a Vitality saving throw. A target takes 8d6 necrotic damage on a failed save, or half as much damage on a successful one.

At higher levels: When you cast this spell using a spell slot of 7th level or higher, the damage increases by 2d6 for each slot level above 6th.

Create Undead (6th, vis.)

Casting Time: 1 minute

Range/Area: 2 m

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Control

Choose up to three corpses of Medium or Small humanoids within range. Each corpse becomes a ghoul under your control. (The GM has game statistics for these creatures.)

As a bonus action on each of your turns, you can mentally command any creature you animated with this spell if the creature is within 24 m of you (if you control multiple creatures, you can command any or all of them at the same time, issuing the same command to each one). You decide what action the creature will take and where it will move during its next turn, or you can issue a general command, such as to guard a particular chamber or corridor. If you issue no commands, the creature only defends itself against hostile creatures. Once given an order, the creature continues to follow it until its task is complete.

The creature is under your control for 24 hours, after which it stops obeying any command you have given it. To maintain control of the creature for another 24 hours, you must cast this spell on the creature before the current 24-hour period ends. This use of the spell reasserts your control over up to three creatures you have animated with this spell, rather than animating new ones. Whenever this spell is cast to reassert control over the undead rather than create new ones, the spell does not require Soul Consumption.

At higher levels: When you cast this spell using a 7th-level spell slot, you can animate or reassert control over four ghouls. When you cast this spell using an 8th-level spell slot, you can animate or reassert control over five ghouls or two ghosts or wights. When you cast this spell using a 9th-

level spell slot, you can animate or reassert control over six ghouls, three ghasts or wights, or two mummies.

Eyebite (6th, vis., conc.)

Casting Time: 1 action

Range/Area: Self

Duration: Conc, 1 minute

Attack/Save: Res save

Components: S, V

Effect: Unconscious

One creature of your choice within 12 m of you that you can see must succeed on a Resolve saving throw or be affected by one of the following effects of your choice for the duration. On each of your turns, until the spell ends, you can use your action to target another creature but cannot target a creature again if it has succeeded on a saving throw against this casting of Eyebite.

- ❖ **Asleep:** The target falls unconscious. It wakes up if it takes any damage or if another creature uses its action to shake the sleeper awake.
- ❖ **Panicked:** The target is frightened of you. On each of its turns, the frightened creature must take the dash action and move away from you by the safest and shortest available route, unless there is nowhere to move. If the target moves to a place at least 12 m away from you where it can no longer see you, this effect ends.
- ❖ **Sickened:** The target has disadvantage on attack rolls and ability checks. At the end of each of its turns, it can make another Resolve saving throw. If it succeeds, the effect ends.

Heal (6th, vis.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Healing

Choose a creature that you can see within range. The creature regains 70 health points. This spell also ends blindness, deafness, and any diseases affecting the target. This spell does not affect constructs.

At higher levels: When you cast this spell using a spell slot of 7th level or higher, the amount of healing increases by 10 for each slot level above 6th.

Harm (6th, vis.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: Vit save

Components: S, V

Effect: Necrotic

The target must make a Vitality saving throw. On a failed save, it takes 14d6 necrotic damage, or half as much damage on a successful save. The damage can't reduce the target's health points below 1. If the target fails the saving throw, its health point maximum is reduced for 1 hour by an amount equal to the necrotic damage it took. Any effect that removes a disease allows a creature's health point maximum to return to normal before that time passes.

Level 7

Finger of Death (7th, vis.)

Casting Time: 1 action

Range/Area: 18m

Duration: Instant

Attack/Save: Vit save

Components: S, V

Effect: Necrotic

The target must make a Vitality saving throw. It takes 7d8+30 necrotic damage on a failed save, or half as much damage on a successful one.

A humanoid killed by this spell rises at the start of your next turn as a zombie that is permanently under your command, following your verbal orders to the best of its ability.

Resurrection (7th, vis.)

Casting Time: 1 hour

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Healing

You touch a dead creature that has been dead for no more than a century, that did not die of old age, and that is not undead. If its Soul is free and willing, the target returns to life with all its health points.

This spell neutralizes any poisons and cures normal diseases afflicting the creature when it died. It does not, however, remove magical diseases, curses, and the like; if such effects are not removed before casting the spell, they afflict the target on its return to life.

This spell closes all mortal wounds and restores any missing body parts.

Coming back from the dead is an ordeal. The target takes a -4 penalty to all attack rolls, saving throws, and ability checks. Every time the target finishes a long rest, the penalty is reduced by 1 until it disappears.

Casting this spell to restore life to a creature that has been dead for one year or longer taxes you greatly. Until you finish a long rest, you cannot cast spells again, and you have disadvantage on all attack rolls, ability checks, and saving throws.

Level 8

Clone (8th, vis.)

Casting Time: 1 hour

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V, SC

Effect: Utility

This spell grows an inert duplicate of a living, Medium creature as a safeguard against death. This clone forms inside a sealed vessel and grows to full size and maturity after 120 days; you can also choose to have the clone be a younger version of the same creature. It remains inert and endures indefinitely, as long as its vessel remains undisturbed. At any time after the clone matures, if the original creature dies, its Soul transfers to the clone, provided that the Soul is free and willing to return. The clone is physically identical to the original and has the same personality, memories, and abilities, but none of the original's equipment. The original creature's physical remains, if they still exist, become inert and cannot thereafter be restored to life, since the creature's Soul is elsewhere.

Level 9

Coptic Word of Healing (9th, vis.)

Casting Time: 1 action

Range/Area: Touch

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Healing

The target regains all its health points. If the creature is charmed, frightened, paralyzed, or stunned, the condition ends. If the creature is prone, it can use its reaction to stand up. This spell does not affect constructs.

Mass Heal (9th, vis.)

Casting Time: 1 action

Range/Area: 12 m

Duration: Instant

Attack/Save: None

Components: S, V

Effect: Blinded

You restore up to 700 health points, divided as you choose among any number of creatures that you can see within range. Creatures healed by this spell are also cured of all diseases and any effect making them blinded or deafened. This spell does not affect constructs.

True Resurrection (9th, vis.)**Casting Time:** 1 hour**Range/Area:** Touch**Duration:** Instant**Attack/Save:** None**Components:** S, V, SC**Effect:** Healing

You touch a creature that has been dead for no longer than 200 years and that died for any reason except old age. If the creature's Soul is free and willing, the creature is restored to life with all its health points.

This spell closes all wounds, neutralizes any poison, cures all diseases, and lifts any curses affecting the creature when it died. The spell replaces damaged or missing organs and limbs. If the creature was undead it is restored to its non-undead form.

The spell can even provide a new body if the original no longer exists, in which case you must speak the creature's name. The creature then appears in an unoccupied space you choose within 6 meters of you.

MAGICAL ITEMS

Rarity

The rarity of a magic item corresponds with the power level of the item. The more powerful the magical item is, the more difficult it is to craft, and thus fewer copies of it exist in the World. Indeed, some items can be so unique or powerful that only one version of them exists. The majority of the most powerful and rarest magical items were created during the War of Collapse by divine inspiration and touch by the Enneade, and therefore most of these items can't be replicated as their creators are gone. Magic items can be categorized into five different tiers of rarity; common, uncommon, rare, very rare, and legendary.

In the Age of Riahn and the start of the Age of Resurgence in Frostmark, even common magical items would be extremely rare. As the inquisition gathered all magical artifacts and either hid them away, exiled them to another Realm, or even destroyed some, there are no magical items to be found in any normal marketplace. A few magical items can have slipped the inquisition's attention by being hidden by a cult, masquerading as a family heirloom of non-descript value, or forgotten in an ancient tomb, ruin or crack somewhere in the corners of Frostmark. On the other hand, in bazaars and marketplaces of the other Realms where magical items are far from outlawed, larger communities usually have a shop or two that peddles such items. Even so, magical items do not fall from trees like apples. Common magical items in the other Realms are still rare, but still prevalent.

As the rarity gives a hint towards how powerful a magical item is, the GM should be careful with rewarding their players with too many and/or too strong of magical items depending upon the party's level. However, feel free to give powerful magical items at lower levels if you as GM have ideas on how to incorporate them into the narrative and enrich the story

Identifying Magical Items

What effect a particular magical item has is not obvious when a character picks it up. Some magical items do not look anything different from their non-magical

counterparts even, but once held by a character there is no denying their magical nature. For magical items with non-complex effects, the GM can hint at what the effect is

as flavor. For example, when a character attaches Amulet of Health to themselves for the first time the GM can say "You feel uncharacteristically hearty and healthy". A potion can be tasted where the character will experience a weaker version or a shorter version of the potion's effects. The players can then guess what they have picked up. If the item has any command words, they are usually branded upon the item in some way.

A more sure way to discover the powers of a magical item is to spend a short rest with the item, experimenting with it until its effects have been realized. Alternatively, an Identify spell will instantly reveal its nature. If the item can be guessed through a quick encounter with it, a short rest or an Identify spell is up to the GM.

Attunement

Some magical items require a connection to their wielder, a direct link to their wielder's Soul to be truly enabled and utilized. There are several rules to abide by when dealing with a magical item that requires attunement.

- ❖ You attune to an item by spending an uninterrupted short rest (otherwise it fails) whilst having physical contact with the item (learning a magical item's properties and attuning to an item can be done in the same short rest)
- ❖ When you have attuned you learn every property of the item, including any command words but excluding any cursed effects

- ❖ You can only attune to three items at once
- ❖ You can't attune, or remained attuned, to a magic item with a prerequisite you don't meet
- ❖ You can't attune to a copy of an item you are already attuned to
- ❖ Any items you wear that you have not attuned to still work as normal items, but any magical properties, beyond basic +1 to +3 enhancements to weapons and armor as well as magical damage dealt, does not activate. An item can only be attuned to one wielder
- ❖ You lose attunement to an item that has been more than 30 m away from you for at least 24 hours
- ❖ You can voluntarily switch one of your attunements to another by spending a short rest

Cursed Items

For whatever nefarious reasons, some items are created or turned cursed. The item's description will reveal if the item is cursed or not. Cursed items enchant the wearer, some curses last after the wearer has stopped using the item. All stated identifying methods, including the Identify spell, will fail to reveal the cursed status of the item. Only any potential history about the item may hint towards it. Without breaking the curse, like a Remove Curse spell, the attunement of the item can't be ended voluntarily.

Armors

You can only wear a magical armor of a type for which you are proficient. Some armors state what type of armor they are, those who don't the GM may decide which type they are or determine it randomly. Unless specified, a character needs to wear the armor for its effects, both mundane and magical, to take effect.

Potions

Potions are consumables that take effect immediately and are subsequently used up. They are made of some kind of liquid, be it from some kind of brew, some special source, or created as an oil to be coated on items. Using a potion, chugging it down yourself, or administering it to a teammate, is an action. The time it takes to coat an item in an oil-based potion is specified in its description. Most potions consist of about 3 dl of liquid.

Rings

Magic rings must be worn on a finger, or a similar digit, for their fantastical magical powers to take effect.

Rods

A rod is usually about 1 to 2 kg heavy, 0.5 to 1 m long, and about 2 to 4 cm thick, thus a heavy and long cylinder. These scepters are usually made out of wood, metal, or bone.

Scrolls

A scroll is another type of consumable magical item and when the magic within is invoked the scroll is used up. Usually, a scroll is a stored spell and Soul. Most scrolls take the form of a piece of parchment, rolled up, and stored within some kind of casing, like a box or tube made out of leather, wood, metal, stone, etc. It is an action to open up a scroll and read the contents within, which activates the magical effect, after which the Soul escapes to reincarnation, the words fade or the scroll turns to dust. The scroll is written in Copta and carries an enchantment that causes anyone that reads it to understand its contents.

Staffs

Staffs come in different forms, some smooth, some gnarly and can be made out of metal, stone, bone, or wood. They can have ornamental details, like runs, carvings, crystals, shapes, etc. Most staffs are however about 1.5 to 1.8 m long and weigh between 1 to 3 kg depending upon its materials. As long as the Staff's description doesn't state otherwise, the staff can be used as a quarterstaff.

Wands

Wands are similar to staffs, though much shorter. Most wands are created to be about 40 cm long.

Weapons

You can only use a magical weapon of a type with which you are proficient. Some weapons state what type of weapons they are, for those who don't the GM may decide which type they are or determine it randomly.

Wondrous Items

This category is a catchall one, including any magical items that the above categories do not state. Outside of objects, such as carpets, crystals, figurines, and sensors, wearable items are also common in this category, such as boots, belts, cloaks, jewelry, etc.

Wearing and Wielding Items

To utilize a magical item's powers, the item must be worn or wielded correctly if it is of the wearable or wieldable type. For example, a helmet should be worn on the head and a shield should be strapped to your arm. In most cases, magical items change their size and shape for their owner. A halfling could use a magical armor that a goliath was wearing beforehand, the armor shrinking to its new master's size. By the GM's decision, some magical items do not need to abide by this rule. If a particular item was created for a specific race, for example, it may not be able to be worn by a member of another race. Take a dwarven armor for example, especially crafted to be used and worn by dwarves, might not fit an elf for example. Whether a non-humanoid can wear a magical item should be handled on a case to case basis. A snake creature can't wear boots, but a creature with tentacles might be able to sport a magical ring.

No creature, character or not, can't however wear two magical items of the same kind. Technically a character might be able to wear two cloaks or fasten more than one amulet around their necks, but only one magical item worn in its proper place will have its properties activated. For example, when dressing up for a gala at the royal court a character might want to pimp themselves out by wearing as many of their most expensive necklaces as possible. In this case, the character needs to inform the GM which necklace is the active magical item. If the character wishes to switch the active one, the character needs to remove any other magical items worn in the same place. Any creature can possess two active magical rings, however.

As for paired items, like boots or gloves, for their magical properties to work both of the paired items need to be worn properly.

Activating a Magical Item

Some items require some kind of activation to work their magic and such details can be found in the item's description. Most often it takes the form of speaking out loud some kind of command word. A command word can be a single word or a specific sentence and an item can't be activated if it requires a command word in an environment where speaking is prevented, such as within the range of a Silent spell. If the item's description specifies that the item requires an action to activate, the action isn't a part of the category of "use an item actions".

Spells

Some staffs, rods, wands, scrolls, potions, etc., allow the wielder to cast spells. This spellcasting does not consume any Souls (as the Souls are already trapped within the item), or spell slots and keeps every property of its normal casted spell counterpart unless it specifies otherwise. It may require the user to use concentration (including spells cast that normally requires concentration) and might ask for a spellcasting ability modifier. If the creature does not possess a spellcasting modifier, simply use their proficiency bonus instead.

Charges

Several magical items have something called charges, which details how many times a magical item can perform a certain ability. Whenever the ability is activated, a charge is expended. How many charges a magic item possesses currently can be gleaned through an Identify spell or attunement, in addition, attunement also allows the character to learn how many charges the item has recovered.

Magic Item Resilience

All magical items, since a Soul in some capacity inhabits the objects, are incredibly sturdy and have resistance to all damage. More rare items might even be indestructible and incredibly hard to destroy.

MAGICAL ITEMS LIST

Magic items are presented in alphabetical order. A magic item's description gives the item's name, its category, its rarity, and its magical properties.

Adamantine Armor

Armor (medium or heavy, but not hide), uncommon

While you're wearing this suit of armor reinforced with adamantine, any critical hit against you is a normal hit.

Ammunition, +1, +2, or +3

Weapon (any ammunition), uncommon (+1), rare (+2), or very rare (+3)

You have a bonus to attack and damage rolls made with this piece of magic ammunition. The bonus is determined by the rarity of the ammunition. Once it hits a target, the ammunition is no longer magical.

Amulet of Health

Wondrous item, rare (requires attunement)

Your Vitality score is 19 while you wear this amulet. It has no effect on you if your Vitality is already 19 or higher.

Amulet of Proof against Detection and Location

Wondrous item, uncommon (requires attunement)

While wearing this amulet, you are hidden from divination magic. You can't be targeted by such magic or perceived through magical scrying sensors.

Amulet of the Realms

Wondrous item, very rare (requires attunement)

While wearing this amulet, you can use an action to name a location that you are familiar with within another Realm. Then make a DV 15 Intelligence check. On a successful check, you cast the Realm Shift spell. On a failure, you and each creature and object within 3 m of you travel to a random destination. Roll a d100. On a 1–60, you travel to a random location within a Realm you named. On a 61–100, you travel to a randomly determined Realm.

Animated Shield

Armor (shield), Very Rare (requires attunement)

While holding this shield, you can speak its command word as a bonus action to cause it to animate. The shield floats in the air and levitates in front of you, in your space to protect you as if you were wielding it, leaving your hands free. The shield remains animated for 1 minute, until you use a bonus action to end this effect, or until you are incapacitated or die, at which point the shield falls to the ground or into your hand if you have one free.

Armor, +1, +2, or +3

Armor (light, medium, or heavy), rare (+1), very rare (+2), or legendary (+3)

You have a bonus to AV while wearing this armor. The bonus is determined by its rarity.

Armor of Invulnerability

Armor (plate), legendary (requires attunement)

You have resistance to nonmagical damage while you wear this armor. Additionally, you can use an action to make yourself immune to nonmagical damage for 10 minutes or until you are no longer wearing the armor. Once this special action is used, it can't be used again until the next dawn.

Armor of Resistance

Armor (light, medium, or heavy), rare (requires attunement)

You have resistance to one type of damage while you wear this armor. The GM chooses the type or determines it randomly from the options below.

d10 Damage Type	d10 Damage Type
------------------------	------------------------

1 - acid	6 - necrotic
2 - cold	7 - poison
3 - fire	8 - psychic
4 - force	9 - radiant
5 - lightning	10 - thunder

Armor of Vulnerability

Armor (plate), rare (requires attunement)

While wearing this armor, you have resistance to one of the following damage types: bludgeoning, piercing, or slashing. The GM chooses the type or determines it randomly.

Curse: This armor is cursed, a fact that is revealed only when an *Identify* spell is cast on the armor or you attune to it. Attuning to the armor curses you until you are targeted by the *Greater Restoration* spell or similar magic; removing the armor fails to end the curse. While cursed, you have vulnerability to two of the three damage types associated with the armor (not the one to which it grants resistance).

Arrow-Catching Shield

Armor (shield), rare (requires attunement)

You gain a +2 bonus to AV against ranged attacks while you wield this shield. This bonus is in addition to the shield's normal bonus to AV. In addition, whenever an attacker makes a ranged attack against a target within 1 m of you, you can use your reaction to become the target of the attack instead.

Arrow of Slaying

Weapon (arrow), very rare

An Arrow of Slaying is a magic weapon meant to slay a particular kind of creature. Some are more focused than others; for example, there are both Arrows of Dragon Slaying and Arrows of Blue Dragon Slaying. If a creature belonging to the type, race, or group associated with an Arrow of Slaying takes damage from the arrow, the creature must make a DV 17 Pre/Man saving throw, taking an extra 6d10 piercing damage on a failed save, or half as much extra damage on a successful one. Once an Arrow of Slaying deals its extra damage to a creature, it becomes a nonmagical arrow. Other types of magic ammunition of this kind exist, such as Bolts of Slaying meant for a crossbow, though arrows are most common.

Bag of Beans

Wondrous item, rare

Inside this heavy cloth bag are 3d4 dry beans. The bag weighs 0.2 kg plus 0.1 kg for each bean it contains. If you dump the bag's contents out on the ground, they explode in a 2 m radius, extending from the beans. Each creature in the area, including you, must make a DV 15 Dexterity saving throw, taking 5d4 fire damage on a failed save, or half as much damage on a successful

one. The fire ignites flammable objects in the area that aren't being worn or carried. If you remove a bean from the bag, plant it in dirt or sand, and then water it, the bean produces an effect 1 minute later from the ground where it was planted. The GM can choose an effect from the following table, determine it randomly, or create an effect.

d100	Effect
01	5d4 toadstools sprout. If a creature eats a toadstool, roll any die. On an odd roll, the eater must succeed on a DV 15 Vitality saving throw or take 5d6 poison damage and become poisoned for 1 hour. On an even roll, the eater gains 5d6 temporary health points for 1 hour.
02–10	A geyser erupts and spouts water, beer, berry juice, tea, vinegar, wine, or oil (GM's choice) 6 m into the air for 1d12 rounds.
11–20	A <i>treant</i> sprouts. There's a 50 percent chance that the <i>treant</i> is aggressive and attacks.
21–30	An animate, immobile stone statue in your likeness rises. It makes verbal threats against you. If you leave it and others come near, it describes you as the most heinous of villains and directs the newcomers to find and attack you. If you are within the same Realm as the statue, it knows where you are. The statue becomes inanimate after 24 hours.
31–40	A campfire with blue flames springs forth and burns for 24 hours (or until it is extinguished).
41–50	1d6 + 6 <i>shriekers</i> sprout.
51–60	1d4 + 8 bright pink toads crawl forth. Whenever a toad is touched, it transforms into a Large or smaller monster of the GM's choice. The creature remains for 1 minute, then disappears in a puff of bright pink smoke.
61–70	A hungry <i>bulette</i> burrows up and attacks.
71–80	A fruit tree grows. It has 1d10 + 20 fruit, 1d8 of which act as randomly determined magic potions, while one acts as an ingested poison of the GM's choice. The tree vanishes after 1 hour. Picked fruit remains, retaining any magic for 30 days.
81–90	A nest of 1d4 + 3 eggs springs up. Any creature that eats an egg must make a DV 20 Vitality saving throw. On a successful save, a creature permanently increases its lowest ability score by 1, randomly choosing among equally low scores. On a failed save, the creature takes 10d6 force damage from an internal magical explosion.
91–99	A pyramid with a 20 m square base bursts upward. Inside is a sarcophagus containing a <i>mummy lord</i> . The pyramid is treated as the <i>mummy lord</i> 's lair, and its sarcophagus contains treasure of the GM's choice.
00	A giant beanstalk sprouts, growing to a height of the GM's choice. The top leads where the GM chooses, such as to a great view, a <i>cloud giant</i> 's castle, or to a different Realm.

Once upon a time, Nalhotep, the Enneade of all kinds of revelry, threw a party. Now this is something common for Nalhotep, but during the festivities of this party, he and his guests ran out of food! Seeking to satisfy his guests, and himself, he sneaked into Mepti's realm and stole her magical instant-bearing fruit beans. When his chaotic magic mingled with Mepti's creation magic, the Bag

of Beans were created. The Beans that were released during the party, before Nalhotep realized their destructive tendencies, became legendary stories that Nalhotep shared with his guests for centuries to come, reducing them to puddles of laughter in the process.

Bag of Devouring

Wondrous item, Very Rare

This bag superficially resembles a *Bag of Holding* but is a feeding orifice for a gigantic extra-dimensional creature. Turning the bag inside out closes the orifice.

The extra-dimensional creature attached to the bag can sense whatever is placed inside the bag. Animal or vegetable matter placed wholly in the bag is devoured and lost forever. When part of a living creature is placed in the bag, as happens when someone reaches inside it, there is a 50 percent chance that the creature is pulled inside the bag. A creature inside the bag can use its action to try to escape with a successful DV 15 Brawn check.

Another creature can use its action to reach into the bag to pull a creature out, doing so with a successful DV 20 Brawn check (provided it isn't pulled inside the bag first). Any creature that starts its turn inside the bag is devoured, and transported to a random location within a random Realm. Inanimate objects can be stored in the bag, which can hold 30 liters of such material. However, once each day, the bag swallows any objects inside it and spits them out into another Realm. The GM determines the Realm. If the bag is pierced or torn, it is destroyed, and anything contained within it is transported to a random location in a random Realm.

When Bags of Holding were starting to become popular in the Age of Genesis, Shu, the Enneade of Thievery, created and spread Bags of Devouring across the Realms. The Bags of Devouring are made to be indistinguishable from normal Bags of Holding, so when a Bag of Devouring were confused for a Bag of Holding, the contents were transported, thus stolen, to Shu's personal Realm. After his death, the Bag of Holding sends the contents instead to a random Realm of a surviving Enneade.

Bag of Holding

Wondrous item, Uncommon

This bag has an interior space considerably larger than its outside dimensions, roughly 0.5 m in diameter at the mouth and 1 m deep. The bag can hold up to 200 kg, not exceeding a volume of 2000 liters. The bag weighs 7 kg, regardless of its contents.

Retrieving an item from the bag requires an action. If the bag is overloaded, pierced, or torn, it ruptures and is destroyed, and its contents are scattered in the Stellar Expanse. If the bag is turned inside out, its contents spill forth, unharmed, but the bag must be put right before it can be used again. Breathing creatures inside the bag can survive up to a number of minutes equal to 10 divided by the number of creatures (minimum 1 minute), after which time they begin to suffocate. Placing a Bag of Holding inside an extra-dimensional space created by a *Handy Haversack*, *Portable Hole*, or similar item instantly destroys both items and opens a gate to the Stellar Expanse. The gate originates where the one item was placed inside the other. Any creature within 2 m of the gate is sucked through it to a random location in the Stellar Expanse. The gate then closes. The gate is one-way only and can't be reopened.

Bag of Tricks

Wondrous item, Uncommon

This ordinary bag appears empty. Reaching inside the bag, however, reveals the presence of a small, fuzzy object. The bag weighs 0.2 kg.

You can use an action to pull the fuzzy object from the bag and throw it up to 4 m. When the object lands, it transforms into a creature you determine by rolling a d8 and consulting the table that corresponds to the bag's color. The creature is friendly to you and your companions, and it acts on your turn. You can use a bonus action to command how the creature moves and what action it takes on its next turn, or to give it general orders, such as to attack your enemies. In the absence of such orders, the creature acts in a fashion appropriate to its nature. Once three fuzzy objects have been pulled from the bag, the bag can't be used again until the next dawn.

Gray Bag of Tricks

d8	Creature
1	Weasel
2	Giant rat
3	Badger
4	Boar
5	Panther
6	Giant badger
7	Dire wolf
8	Giant elk

Rust Bag of Tricks

d8	Creature
1	Rat
2	Owl
3	Mastiff
4	Goat
5	Giant goat
6	Giant boar
7	Lion
8	Brown bear

Tan Bag of Tricks

d8	Creature
1	Jackal
2	Ape
3	Baboon
4	Axe beak
5	Black bear
6	Giant weasel
7	Giant hyena
8	Tiger

Bead of Force

Wondrous item, rare

This small sphere measures 2 cm in diameter and weighs 30 gr. Typically, 1d4+4 Beads of Force are found together. You can use an action to throw the bead up to 12 m. The bead explodes on impact and is destroyed. Each creature within a 2 m radius of where the bead landed must succeed on a DV 15 Dexterity saving throw or take 5d4 force damage. A sphere of transparent force then encloses the area for 1 minute. Any creature that failed the save and is completely within the area is trapped inside this sphere. Creatures that succeed on the save, or are partially within the area, are pushed away from the center of the sphere until they are no longer inside it. Only breathable air can pass through the sphere's wall. No attack or other effect can.

An enclosed creature can use its action to push against the sphere's wall, moving the sphere up to half the creature's walking speed. The sphere can be picked up, and its magic causes it to weigh only 0.5 kg, regardless of the weight of creatures inside.

Belt of Dwarvenkind

Wondrous item, rare (requires attunement)

While wearing this belt, you gain the following benefits:

- ❖ Your Vitality score increases by 2, to a maximum of 20.
- ❖ You have advantage on Persuasion checks made to interact with dwarves.

In addition, while attuned to the belt, you have a 50 percent chance each day at dawn of growing a full beard if you're capable of growing one, or a visibly thicker beard if you already have one.

If you aren't a dwarf, you gain the following additional benefits while wearing the belt:

- ❖ You have advantage on saving throws against poison, and you have resistance against poison damage.
- ❖ You have darkvision out to a range of 12 m.
- ❖ You can speak, read, and write dwarvish.

Belt of Giant Strength

Wondrous item, rarity varies (requires attunement)

While wearing this belt, your Brawn score changes to a score granted by the belt. If your Brawn is already equal to or greater than the belt's score, the item has no effect on you.

Six varieties of this belt exist, corresponding with and having rarity according to the six kinds of true giants. The Belt of Stone Giant Strength and the Belt of Frost Giant Strength look different, but they have the same effect.

Type	Brawn	Rarity
Hill giant	21	Rare
Stone/Frost giant	23	Very rare
Fire giant	25	Very rare
Cloud giant	27	Legendary
Storm giant	29	Legendary

Berserker Axe

Weapon (any axe), rare (requires attunement)

You gain a +1 bonus to attack and damage rolls made with this magic weapon. In addition, while you are attuned to this weapon, your health point maximum increases by 1 for each total level you possess.

Curse: This axe is cursed, and becoming attuned to it extends the curse to you. As long as you remain cursed, you are unwilling to part with the axe, keeping it within reach at all times. You also have disadvantage on attack rolls with weapons other than this one, unless no foe is within 12 m of you that you can see or hear.

Whenever a hostile creature damages you while the axe is in your possession, you must succeed on a DV 15 Composure saving throw or go berserk. While berserk, you must use your action each round to attack the creature nearest to you with the axe. If you can make extra attacks as part of the attack action, you use those extra attacks, moving to attack the next nearest creature after you fell your current target. If you have multiple possible targets, you attack one at random. You are berserk until you start your turn with no creatures within 12 m of you that you can see or hear.

Boots of Elvenkind

Wondrous item, uncommon

While you wear these boots, your steps make no sound, regardless of the surface you are moving across. You also have advantage on Stealth (Dex) checks that rely on moving silently.

Boots of Levitation

Wondrous item, rare (requires attunement)

While you wear these boots, you can use an action to cast the *Levitate* spell on yourself at will.

Boots of Speed

Wondrous item, rare (requires attunement)

While you wear these boots, you can use a bonus action and click the boots' heels together. If you do, the boots double your walking speed, and any creature that makes an opportunity attack against you has disadvantage on the attack roll. If you click your heels together again, you end

the effect. When the boots' property has been used for a total of 10 minutes, the magic ceases to function until you finish a long rest.

Boots of Striding and Springing

Wondrous item, uncommon (requires attunement)

While you wear these boots, your walking speed becomes 6 m, unless your walking speed is higher, and your speed isn't reduced if you are encumbered or wearing heavy armor. In addition, you can jump three times the normal distance, though you can't jump farther than your remaining movement would allow.

Boots of the Winterlands

Wondrous item, uncommon (requires attunement)

While you wear these boots, you gain the following benefits:

- ❖ You have resistance to cold damage.
- ❖ You ignore difficult terrain created by ice or snow.
- ❖ You can tolerate temperatures as low as -45 degrees Celsius without any additional protection. If you wear heavy clothes, you can tolerate temperatures as low as -70 degrees Celsius.

Bowl of Commanding Water Elementals

Wondrous item, rare

While this bowl is filled with water, you can use an action to speak the bowl's command word and summon a *water elemental*, as if you had cast the *Conjure Elemental* spell. The bowl can't be used this way again until the next dawn. The bowl is about 0.2 m in diameter and half as deep. It weighs 1.5 kg and holds about 10 liters.

Bracers of Archery

Wondrous item, uncommon (requires attunement)

While wearing these bracers, you have proficiency with the longbow and shortbow, and you gain a +2 bonus to damage rolls on ranged attacks made with such weapons.

Bracers of Defense

Wondrous item, rare (requires attunement)

While wearing these bracers, you gain a +2 bonus to AV if you are wearing no armor and using no shield.

Brazier of Commanding Fire Elementals

Wondrous item, rare

While a fire burns in this brass brazier, you can use an action to speak the brazier's command word and summon a *fire elemental*, as if you had cast the *Conjure Elemental* spell. The brazier can't be used this way again until the next dawn. The brazier weighs 2.5 kg.

Brooch of Shielding

Wondrous item, uncommon (requires attunement)

While wearing this brooch, you have resistance to force damage, and you have immunity to damage from the *Magic Missile* spell.

Broom of Flying

Wondrous item, uncommon

This wooden broom, which weighs 1.5 kg, functions like a mundane broom until you stand astride it and speak its command word. It then hovers beneath you and can be ridden in the air. It has a flying speed of 10 m. It can carry up to 200 kg, but its flying speed becomes 6 m while carrying over 100 kg. The broom stops hovering when you land.

You can send the broom to travel alone to a destination within 2 km of you if you speak the command word, name the location, and are familiar with that place. The broom comes back to you when you speak another command word, provided that the broom is still within 2 km of you.

Candle of Invocation

Wondrous item, very rare (requires attunement)

This slender taper is dedicated to an Enneade. The candle's devotion can be detected with the Identify Spell.

d7 Enneade

1	Riahn
2	Gera
3	Teranis
4	Lapuana
5	Borias
6	Suhlmi
7	Vegomo

The candle's magic is activated when the candle is lit, which requires an action. After burning for 4 hours, the candle is destroyed. You can snuff it out early for use at a later time. Deduct the time it burned in increments of 1 minute from the candle's total burn time.

While lit, the candle sheds dim light in a 6 m radius. Any creature within that light whose devotion matches that of the candle makes attack rolls, saving throws, and ability checks with advantage. Alternatively, when you light the candle for the first time, you can cast the *Gate* spell with it. Doing so destroys the candle.

Cape of the Mountebank

Wondrous item, rare

While wearing this cape, you can use it to cast the *Dimension Door* spell as an action. This property of the cape can't be used again until the next dawn. When you disappear, you leave behind a cloud of smoke, and you appear in a similar cloud of smoke at your destination. The smoke lightly obscures the space you left and the space you appear in, and it dissipates at the end of your next turn. A light or stronger wind disperses the smoke.

Carpet of Flying

Wondrous item, very rare

You can speak the carpet's command word as an action to make the carpet hover and fly. It moves according to your spoken directions, provided that you are within 6 m of it. Four sizes of Carpet of Flying exist. The GM chooses the size of a given carpet or determines it randomly.

d100	Size	Capacity	Flying Speed
01–20	1 m × 1.5 m	100 kg	16 m
21–55	1.2 m × 1.8 m	200 kg	12 m
56–80	1.5 m × 2 m	300 kg	8 m
81–100	1.8 m × 2.8 m	400 kg	6 m

A carpet can carry up to twice the weight shown on the table, but it flies at half speed if it carries more than its normal capacity.

Censer of Controlling Air Elementals

Wondrous item, rare

While incense is burning in this censer, you can use an action to speak the censer's command word and summon an *air elemental*, as if you had cast the *Conjure Elemental* spell. The censer can't be used this way again until the next dawn. This 15 cm wide, 30 cm high vessel resembles a chalice with a decorated lid. It weighs 0.5 kg.

Chime of Opening

Wondrous item, rare

This hollow metal tube measures about 30 cm long and weighs 0.5 kg. You can strike it as an action, pointing it at an object within 24 m of you that can be opened, such as a door, lid, or lock.

The chime issues a clear tone, and one lock or latch on the object opens unless the sound can't reach the object. If no locks or latches remain, the object itself opens. The chime can be used ten times. After the tenth time, it cracks and becomes useless.

Circlet of Blasting

Wondrous item, uncommon

While wearing this circlet, you can use an action to cast the *Scorching Ray* spell with it. When you make the spell's attacks, you do so with an attack bonus of +5. The circlet can't be used this way again until the next dawn.

Cloak of Arachnida

Wondrous item, very rare (requires attunement)

While wearing this cloak, you gain the following benefits:

- ❖ You have resistance to poison damage.
- ❖ You have a climbing speed equal to your walking speed.
- ❖ You can move up, down, and across vertical surfaces and upside down along ceilings, while leaving your hands free.
- ❖ You can't be caught in webs of any sort and can move through webs as if they were difficult terrain.
- ❖ You can use an action to cast the *Web* spell (save DV 13). The web created by the spell fills twice its normal area. Once used, this property of the cloak can't be used again until the next dawn.

Cloak of Displacement

Wondrous item, rare (requires attunement)

While you wear this cloak, it projects an illusion that makes you appear to be standing in a place near your actual location, causing any creature to have disadvantage on attack rolls against you. If you take damage, the property ceases to function until the start of your next turn. This property is suppressed while you are incapacitated, restrained, or otherwise unable to move.

Cloak of Elvenkind

Wondrous item, Uncommon (requires attunement)

While you wear this cloak with its hood up, Perception (Int/Com) checks made to see you have disadvantage, and you have advantage on Stealth (Cun) checks made to hide, as the cloak's color shifts to camouflage you. Pulling the hood up or down requires an action.

Cloak of Protection

Wondrous item, Uncommon (requires attunement)

You gain a +1 bonus to AV and saving throws while you wear this cloak.

Cloak of the Bat

Wondrous item, rare (requires attunement)

While wearing this cloak, you have advantage on Stealth (Dex) checks. In an area of dim light or darkness, you can grip the edges of the cloak with both hands and use it to fly at a speed of 8 m. If you ever fail to grip the cloak's edges while flying in this way, or if you are no longer in dim light or darkness, you lose this flying speed. While wearing the cloak in an area of dim light or darkness, you can use your action to cast *Polymorph* on yourself, transforming into a bat. While you are in the form of the bat, you retain your mental and social Ability Scores. The cloak can't be used this way again until the next dawn.

Cloak of the Manta Ray

Wondrous item, uncommon

While wearing this cloak with its hood up, you can breathe underwater, and you have a swimming speed of 12 m. Pulling the hood up or down requires an action.

Crystal Ball

Wondrous item, very rare or legendary (requires attunement)

The typical Crystal Ball is about 15 cm in diameter. While touching it, you can cast the *Scrying* spell (save DV 17) with it. The following Crystal Ball variants are legendary items and have additional properties.

Crystal Ball of Mind Reading: You can use an action to cast the *Detect Thoughts* spell (save DV 17) while you are *Scrying* with the Crystal Ball, targeting creatures you can see within 6 m of the spell's sensor. You don't need to concentrate on this *Detect Thoughts* to maintain it during its duration, but it ends if *Scrying* ends.

Crystal Ball of Telepathy: While *Scrying* with the Crystal Ball, you can communicate telepathically with creatures you can see within 6 m of the spell's sensor. You can also use an action to cast *Suggestion* (save DV 17) through the sensor on one of those creatures. You don't need to concentrate on this *Suggestion* to maintain it during its duration, but it ends if *Scrying* ends. Once used, the *Suggestion* power of the Crystal Ball can't be used again until the next dawn.

Crystal Ball of True Seeing: While *Scrying* with the Crystal Ball, you have truesight with a radius of 24 m centered on the spell's sensor.

Cube of Force

Wondrous item, rare (requires attunement)

This cube is about an inch across. Each face has a distinct marking on it that can be pressed. The cube starts with 36 charges, and it regains 1d20 expended charges daily at dawn.

You can use an action to press one of the cube's faces, expending a number of charges based on the chosen face, as shown in the Cube of Force faces table. Each face has a different effect. If the cube has insufficient charges remaining, nothing happens. Otherwise, a barrier of invisible force springs into existence, forming a cube 3 m on a side. The barrier is centered on you, moves with you, and lasts for 1 minute, until you use an action to press the cube's sixth face, or the cube runs out of charges. You can change the barrier's effect by pressing a different face of the cube and expending the requisite number of charges, resetting the duration. If your movement causes the barrier to come into contact with a solid object that can't pass through the cube, you can't move any closer to that object as long as the barrier remains.

Cube of Force Faces

Face	Charges	Effect
1	1	Gases, wind, and fog can't pass through the barrier.
2	2	Nonliving matter can't pass through the barrier. Walls, floors, and ceilings can pass through at your discretion.
3	3	Living matter can't pass through the barrier.
4	4	Spell effects can't pass through the barrier.
5	5	Nothing can pass through the barrier. Walls, floors, and ceilings can pass through at your discretion.
6	0	The barrier deactivates.

The cube loses charges when the barrier is targeted by certain spells or comes into contact with certain spell or magic item effects, as shown in the table below.

Spell or Item	Charges Lost
<i>Disintegrate</i>	1d12
<i>Horn of Blasting</i>	1d10
<i>Prismatic Spray</i>	1d20
<i>Wall of Fire</i>	1d4

Cubic Gate

Wondrous item, legendary

This cube is 10 cm across and radiates palpable magical energy. The 8 sides of the cube are each keyed to a different Realm, excluding Frostmark. You can use an action to press one side of the cube to cast the *Gate* spell with it, opening a portal to the Realm keyed to that side. Alternatively, if you use an action to press one side twice, you can cast the *Realm Shift* spell (save DV 17) with the cube and transport the targets to the Realm keyed to that side.

The cube has 3 charges. Each use of the cube expends 1 charge. The cube regains 1d3 expended charges daily at dawn.

Dagger of Venom

Weapon (dagger), rare

You gain a +1 bonus to attack and damage rolls made with this magic weapon. You can use an action to cause thick, black poison to coat the blade. The poison remains for 1 minute or until an attack using this weapon hits a creature. That creature must succeed on a DV 15 Vitality saving throw or take 2d10 poison damage and become poisoned for 1 minute. The dagger can't be used this way again until the next dawn.

Dancing Sword

Weapon (any sword), very rare (requires attunement)

You can use a bonus action to toss this magic sword into the air and speak the command word. When you do so, the sword begins to hover, flies up to 6 m, and attacks one creature of your choice within 1 m of it. The sword uses your attack roll and Ability Score modifier to damage rolls. While the sword hovers, you can use a bonus action to cause it to fly up to 6 m to another spot within 6 m of you. As part of the same bonus action, you can cause the sword to attack one creature within 1 m of it.

After the hovering sword attacks for the fourth time, it flies up to 6 m and tries to return to your hand. If you have no hand free, it falls to the ground at your feet. If the sword has no unobstructed path to you, it moves as close to you as it can and then falls to the ground. It also ceases to hover if you grasp it or move more than 6 m away from it.

Decanter of Endless Water

Wondrous item, uncommon

The decanter weighs 1 kg. You can use an action to remove the stopper and speak one of three command words, whereupon an amount of fresh water or salt water (your choice) pours out of the flask. The water stops pouring out at the start of your next turn. Choose from the following options:

- ❖ “Stream” produces 4 liters of water.
- ❖ “Fountain” produces 20 liters of water.
- ❖ “Geyser” produces 100 liters of water that gushes forth in a geyser 6 m long and 30 cm wide. As a bonus action while holding the decanter, you can aim the geyser at a creature you can see within 6 m of you. The target must succeed on a DV 13 Brawn saving throw or take 1d4 bludgeoning damage and fall prone. Instead of a creature, you can target an object that isn't being worn or carried and that weighs no more than 100 kg. The object is either knocked over or pushed up to 3 m away from you.

Deck of Illusions

Wondrous item, uncommon

This box contains a set of cards. A full deck has 34 cards. A deck found as treasure is usually missing 1d20 – 1 cards. The magic of the deck functions only if cards are drawn at random (you can use an altered deck of playing cards to simulate the deck). You can use an action to draw a card at random from the deck and throw it to the ground at a point within 6 m of you.

An illusion of one or more creatures forms over the thrown card and remains until dispelled. An illusory creature appears real, of the appropriate size, and behaves as if it were a real creature except that it can do no harm. While you are within 24 m of the illusory creature and can see it,

you can use an action to move it magically anywhere within 6 m of its card. Any physical interaction with the illusory creature reveals it to be an illusion, because objects pass through it. Someone who uses an action to visually inspect the creature identifies it as illusory with a successful DV 15 Investigation check. The creature then appears translucent. The illusion lasts until its card is moved or the illusion is dispelled. When the illusion ends, the image on its card disappears, and that card can't be used again.

Playing Card	Illusion
Ace of hearts	Red dragon
King of hearts	3 Werewolves
Queen of hearts	Unicorn
Jack of hearts	5 Cockatrice
Ten of hearts	Cloud giant
Nine of hearts	Ettin
Eight of hearts	Bugbear
Two of hearts	Goblin
Ace of diamonds	Androsphinx
King of diamonds	2nd Order angel
Queen of diamonds	3 Green hags
Jack of diamonds	5 Pixies
Ten of diamonds	Fire giant
Nine of diamonds	Ogre
Eight of diamonds	Gnoll
Two of diamonds	Kobold
Ace of spades	Balor
King of spades	3 Ghosts
Queen of spades	Basilisk
Jack of spades	5 Gorgons
Ten of spades	Frost giant
Nine of spades	Troll
Eight of spades	Hobgoblin
Two of spades	Goblin
Ace of clubs	Iron golem
King of clubs	3 Yetis
Queen of clubs	Erinyes
Jack of clubs	5 Duergar
Ten of clubs	Hill giant
Nine of clubs	Ogre
Eight of clubs	Orc
Two of clubs	Kobold
Jokers (2)	You (the deck's owner)

Deck of Many Things

Wondrous item, legendary

Usually found in a box or pouch, this deck contains a number of cards made of ivory or vellum. Most (75 percent) of these decks have only thirteen cards, but the rest have twenty-two. Before you draw a card, you must declare how many cards you intend to draw and then draw them randomly (you can use an altered deck of playing cards to simulate the deck). Any cards drawn in excess of this number have no effect. Otherwise, as soon as you draw a card from the deck, its magic takes effect. You must draw each card no more than 1 hour after the previous draw. If you fail to draw the chosen number, the remaining number of cards fly from the deck on their own and take effect all at once.

Once a card is drawn, it fades from existence. Unless the card is the Fool or the Jester, the card reappears in the deck, making it possible to draw the same card twice.

Playing Card	Card
Ace of diamonds	Vizier*
King of diamonds	Sun
Queen of diamonds	Moon
Jack of diamonds	Star
Two of diamonds	Comet*
Ace of hearts	The Fates*
King of hearts	Throne
Queen of hearts	Key
Jack of hearts	Knight
Two of hearts	Gem*
Ace of clubs	Talons*
King of clubs	The Void
Queen of clubs	Flames
Jack of clubs	Skull
Two of clubs	Idiot*
Ace of spades	Donjon*
King of spades	Ruin
Queen of spades	Euryale
Jack of spades	Rogue
Two of spades	Balance*
Joker (with TM)	Fool*
Joker (without TM)	Jester

*Found only in a deck with twenty-two cards

Balance: Your mind suffers a wrenching alteration, causing your personality to change. How this affects your character is up to you, but there needs to be some kind of stark change.

Comet: If you single-handedly defeat the next hostile adversary or group of adversaries you encounter, you gain one level. Otherwise, this card has no effect.

Donjon: You disappear and become entombed in a state of suspended animation in an extra-dimensional sphere. Everything you were wearing and carrying stays behind in the space you occupied when you disappeared. You remain imprisoned until you are found and removed from the sphere. You can't be located by any divination magic, but a Wish spell can reveal the location of your prison. You draw no more cards.

Euryale: The card's snake-like visage curses you. You take a -2 penalty on saving throws while cursed in this way. Only an Enneade or the magic of The Fates card can end this curse.

The Fates: Reality's fabric unravels and spins anew, allowing you to avoid or erase one event as if it never happened. You can use the card's magic as soon as you draw the card or at any other time before you die.

Flames: A powerful devil becomes your enemy. The devil seeks your ruin and plagues your life, savoring your suffering before attempting to slay you. This enmity lasts until either you or the devil dies.

Fool: You lose a level and draw from the deck again, counting both draws as one of your declared draws.

Gem: Twenty-five pieces of jewelry worth 2,000 gp each or fifty gems worth 1,000 gp each appear at your feet.

Idiot: Permanently reduce your Intelligence by 1d4+1 (to a minimum score of 1). You can draw one additional card beyond your declared draws.

Jester: You gain a level, or you can draw two additional cards beyond your declared draws.

Key: A Rare or rarer magic weapon with which you are proficient appears in your hands. The GM chooses the weapon.

Knight: You gain the service of a 4th-level Tactics soldier who appears in a space you choose within 6 m of you. The soldier is of the same race as you and serves you loyally until death, believing the fates have drawn him or her to you. You control this character.

Moon: You are granted the ability to cast the Wish spell 1d3 times.

Rogue: A nonplayer character of the GM's choice becomes hostile toward you. The identity of your new enemy isn't known until the NPC or someone else reveals it. Nothing less than a Wish spell or divine intervention can end the NPC's hostility toward you.

Ruin: All forms of wealth that you carry or own, other than magic items, are lost to you. Portable property vanishes. Businesses, buildings, and land you own are lost in a way that alters reality the least. Any documentation that proves you should own something lost to this card also disappears.

Skull: You summon an avatar of death—a ghostly humanoid skeleton clad in a tattered black robe and carrying a spectral scythe. It appears in a space of the GM's choice within 2 m of you and attacks you, warning all others that you must win the battle alone. The avatar fights until you die or it drops to 0 health points, whereupon it disappears. If anyone tries to help you, the helper summons its own avatar of death. A creature slain by an avatar of death can't be restored to life.

Avatar of Death

CR 0 | Medium undead

AC: 20 HP: Equal to half the HP of the summoner Speed: 12 m bw, 12 m fly

Dmg Im: Necrotic, poison

Con Im: Charm, frighten, paralyze, petrified, poison, unconscious

Reaping Scythe: The avatar sweeps its spectral scythe through a creature within 1 m of it, dealing 1d8+3 slashing damage plus 1d8 necrotic damage.

Incorporeal Movement: The avatar can move through other creatures and objects as if they were DT. It takes 1d10 force dmg if it ends its turn inside an object.

Turning Immunity: The avatar is immune to abilities that turn undead.

Br 16 (+3)	Dex 16 (+3)	Vit 16 (+3)
Int 16 (+3)	Cun 16 (+3)	Res 16 (+3)
Pre 16 (+3)	Man 16 (+3)	Com 16 (+3)

Senses: Darkvision 12 m, truesight 12 m, passive Perc 13

Languages: All languages known to its summoner

Star: Increase one of your Ability Scores by 2. The score can exceed 20 but can't exceed 24.

Sun: You gain a level, and a wondrous item (which the GM determines randomly) appears in your hands.

Talons: Every magic item you wear or carry disintegrates. Artifacts in your possession aren't destroyed but do vanish.

Throne: You gain 2 ranks in the Persuasion skill, and you may reach rank 5 with the skill. In addition, you gain rightful ownership of a small keep somewhere in the world. However, the keep is currently in the hands of monsters, which you must clear out before you can claim the keep as yours.

Vizier: At any time you choose within one year of drawing this card, you can ask a question in meditation and mentally receive a truthful answer to that question. Besides information, the answer helps you solve a puzzling problem or other dilemma. In other words, the knowledge comes with wisdom on how to apply it.

The Void: This black card spells disaster. Your Soul is drawn from your body and contained in an object in a place of the GM's choice. One or more powerful beings guard the place. While your Soul is trapped in this way, your body is incapacitated. A Wish spell can't restore your Soul, but the spell reveals the location of the object that holds it. You draw no more cards.

Defender

Weapon (any sword), legendary (requires attunement)

You gain a +3 bonus to attack and damage rolls made with this magic weapon. The first time you attack with the sword on each of your turns, you can transfer some or all of the sword's bonus to your armor value, instead of using the bonus on any attacks that turn. For example, you could reduce the bonus to your attack and damage rolls to +1 and gain a +2 bonus to AV. The adjusted bonuses remain in effect until the start of your next turn, although you must hold the sword to gain a bonus to AV from it.

Demon Armor

Armor (plate), very rare (requires attunement)

While wearing this armor, you gain a +1 bonus to AV, and you can understand and speak abyssal. In addition, the armor's clawed gauntlets turn unarmed strikes with your hands into magic weapons that deal slashing damage, with a +1 bonus to attack rolls and damage rolls and a damage die of 1d8.

Curse: Once you don this cursed armor, you can't doff it unless you are targeted by the *Greater Restoration* spell or similar magic. While wearing the armor, you have disadvantage on attack rolls against demons and on saving throws against their spells and special abilities.

Dimensional Shackles

Wondrous item, rare

You can use an action to place these shackles on an incapacitated creature. The shackles adjust to fit a creature of Small to Large size. In addition to serving as mundane manacles, the shackles prevent a creature bound by them from using any method of extra-dimensional movement, including teleportation or travel to different Realms. They don't prevent the creature from passing through an interdimensional portal.

You and any creature you designate when you use the shackles can use an action to remove them. Once every 30 days, the bound creature can make a DV 30 Athletics (Br) check. On a success, the creature breaks free and destroys the shackles.

Dragon Scale Mail

Armor (scale mail), very rare (requires attunement)

Dragon Scale Mail is made of the scales of one kind of dragon. While wearing this armor, you gain a +1 bonus to AV, you have advantage on saving throws against the frightful presence and breath weapons of dragons, and you have resistance to one damage type that is determined by the kind of dragon that provided the scales (see the table). Additionally, you can focus your senses as an action to magically discern the distance and direction to the closest dragon within 50 km of you that is of the same type as the armor. This special action can't be used again until the next dawn.

Dragon	Resistance	Dragon	Resistance
Black	Acid	Gold	Fire
Blue	Lightning	Green	Poison
Brass	Fire	Red	Fire
Bronze	Lightning	Silver	Cold
Copper	Acid	White	Cold

Dragon Slayer

Weapon (any sword), rare

You gain a +1 bonus to attack and damage rolls made with this magic weapon. When you hit a dragon with this weapon, the dragon takes an extra 3d6 damage of the weapon's type. For the purpose of this weapon, "dragon" refers to any creature with the dragon type, including dragon turtles and wyverns.

Dust of Disappearance

Wondrous item, uncommon

There is enough dust in this small packet for one use. When you use an action to throw the dust into the air, you and each creature and object within 2 m of you become invisible for 2d4 minutes. The duration is the same for all subjects, and the dust is consumed when its magic takes effect. If a creature affected by the dust attacks or casts a spell, the invisibility ends for that creature.

Dust of Dryness

Wondrous item, uncommon

This small packet contains 1d6+4 pinches of dust. You can use an action to sprinkle a pinch of it over water. The dust turns a cube of water 3 m on a side into one marble-sized pellet, which floats or rests near where the dust was sprinkled. The pellet's weight is negligible.

Someone can use an action to smash the pellet against a hard surface, causing the pellet to shatter and release the water the dust absorbed. Doing so ends that pellet's magic. An elemental composed mostly of water that is exposed to a pinch of the dust must make a DV 13 Vitality saving throw, taking 10d6 necrotic damage on a failed save, or half as much damage on a successful one.

Dust of Sneezing and Choking

Wondrous item, uncommon

It appears to be Dust of Disappearance, and an Identify spell reveals it to be such. There is enough of it for one use.

When you use an action to throw a handful of the dust into the air, you and each creature that needs to breathe within 6 m of you must succeed on a DV 15 Vitality saving throw or become unable to breathe, while sneezing uncontrollably. A creature affected in this way is incapacitated and suffocating. As long as it is conscious, a creature can repeat the saving throw at the end of each of its turns, ending the effect on it on a success. The Lesser Restoration spell can also end the effect on a creature.

Dwarven Plate

Armor (plate), very rare

While wearing this armor, you gain a +2 bonus to AV. In addition, if an effect moves you against your will along the ground, you can use your reaction to reduce the distance you are moved by up to 2 m.

Dwarven Thrower

Weapon (warhammer), very rare (requires attunement by a dwarf)

You gain a +3 bonus to attack and damage rolls made with this magic weapon. It has the thrown property with a normal range of 4 m and a long range of 12 m. When you hit with a ranged attack using this weapon, it deals an extra 1d8 damage or, if the target is a giant, 2d8 damage. Immediately after the attack, the weapon flies back to your hand.

Efficient Quiver

Wondrous item, uncommon

Each of the quiver's three compartments connects to an extradimensional space that allows the quiver to hold numerous items while never weighing more than 1 kg. The shortest compartment can hold up to sixty arrows, bolts, or similar objects. The midsize compartment holds up to eighteen javelins or similar objects. The longest compartment holds up to six long objects, such as bows, quarterstaves, or spears. You can draw any item the quiver contains as if doing so from a regular quiver or scabbard.

Efreeti Bottle

Wondrous item, very rare

This painted brass bottle weighs 0.5 kg. When you use an action to remove the stopper, a cloud of thick smoke flows out of the bottle. At the end of your turn, the smoke disappears with a flash of harmless fire, and an efreeti appears in an unoccupied space within 6 m of you. The first time the bottle is opened, the GM rolls to determine what happens.

d100	Effect
01–10	The efreeti attacks you. After fighting for 5 rounds, the efreeti disappears, and the bottle loses its magic.
11–90	The efreeti serves you for 1 hour, doing as you command. Then the efreeti returns to the bottle, and a new stopper contains it. The stopper can't be removed for 24 hours. The next two times the bottle is opened, the same effect occurs. If the bottle is opened a fourth time, the efreeti escapes and disappears, and the bottle loses its magic.
91–00	The efreeti can cast the Wish spell three times for you. It disappears when it grants the final Wish or after 1 hour, and the bottle loses its magic.

Elemental Gem

Wondrous item, uncommon

When you use an action to break the gem, an elemental is summoned as if you had cast the Conjure Elemental spell, and the gem's magic is lost. The type of gem determines the elemental summoned by the spell.

Gem	Summoned Elemental
Blue sapphire	Air Elemental
Yellow diamond	Earth Elemental
Red corundum	Fire Elemental
Emerald	Water Elemental

Elven Chain

Armor (chain shirt), rare

You gain a +1 bonus to AV while you wear this armor. You are considered proficient with this armor even if you lack proficiency with medium armor.

Eversmoking Bottle

Wondrous item, uncommon

This bottle weighs 0.5 kg. When you use an action to remove the stopper, a cloud of thick smoke pours out in a 12 m radius from the bottle. The cloud's area is heavily obscured. Each minute the bottle remains open and within the cloud, the radius increases by 2 m until it reaches its maximum radius of 24 m.

The cloud persists as long as the bottle is open. Closing the bottle requires you to speak its command word as an action. Once the bottle is closed, the cloud disperses after 10 minutes. A moderate wind (5 to 10 meters per second) can also disperse the smoke after 1 minute, and a strong wind (11 or more meters per second) can do so after 1 round.

Eyes of Charming

Wondrous item, uncommon (requires attunement)

These lenses have 3 charges. While wearing them, you can expend 1 charge as an action to cast the Charm Person spell (Save DV 13) on a humanoid within 6 m of you, provided that you and the target can see each other. The lenses regain all expended charges daily at dawn.

Eyes of Minute Seeing

Wondrous item, uncommon

While wearing these lenses, you can see much better than normal out to a range of 0.3 m. You have advantage on Investigation checks that rely on sight while searching an area or studying an object within that range.

Eyes of the Eagle

Wondrous item, uncommon (requires attunement)

While wearing these lenses, you have advantage on Perception checks that rely on sight. In conditions of clear visibility, you can make out details of even extremely distant creatures and objects as small as 0.5 m across.

Feather Token

Wondrous item, rare

This tiny object looks like a feather. Different types of Feather Tokens exist, each with a different single use effect. The GM chooses the kind of token or determines it randomly.

d100	Feather Token	d100	Feather Token
01–20	Anchor	51–65	Swan boat
21–35	Bird	66–90	Tree
36–50	Fan	91–00	Whip

Anchor: You can use an action to touch the token to a boat or ship. For the next 24 hours, the vessel can't be moved by any means. Touching the token to the vessel again ends the effect. When the effect ends, the token disappears.

Bird: You can use an action to toss the token 1 m into the air. The token disappears and an enormous, multicolored bird takes its place. The bird has the statistics of a roc, but it obeys your simple commands and can't attack. It can carry up to 200 kg while flying at its maximum speed (7 meters per second for a maximum of 230 km per day, with a one-hour rest for every 3 hours of flying), or 500 kg at half that speed. The bird disappears after flying its maximum distance for a day or if it drops to 0 health points. You can dismiss the bird as an action.

Fan: If you are on a boat or ship, you can use an action to toss the token up to 2 m in the air. The token disappears, and a giant flapping fan takes its place. The fan floats and creates a wind strong enough to fill the sails of one ship, increasing its speed by 2 meters per second for 8 hours. You can dismiss the fan as an action.

Swan Boat: You can use an action to touch the token to a body of water at least 12 m in diameter. The token disappears, and a 10 m long, 1 m wide boat shaped like a swan takes its place. The boat is self-propelled and moves across water at a speed of 3 meters per second. You can use an action while on the boat to command it to move or to turn up to 90 degrees. The boat can carry up to thirty-two Medium or smaller creatures. A Large creature counts as four Medium creatures, while a Huge creature counts as nine. The boat remains for 24 hours and then disappears. You can dismiss the boat as an action.

Tree: You must be outdoors to use this token. You can use an action to touch it to an unoccupied space on the ground. The token disappears, and in its place a nonmagical oak tree springs into existence. The tree is 12 m tall and has a 1.5 m diameter trunk, and its branches at the top spread out in a 6 m radius.

Whip: You can use an action to throw the token to a point within 2 m of you. The token disappears, and a floating whip takes its place. You can then use a bonus action to make a melee spell attack against a creature within 2 m of the whip, with an attack bonus of +9. On a hit, the target takes 1d6+5 force damage.

As a bonus action on your turn, you can direct the whip to fly up to 4 m and repeat the attack against a creature within 2 m of it. The whip disappears after 1 hour, when you use an action to dismiss it, or when you are incapacitated or die.

Figurine of Wondrous Power

Wondrous item, rarity by figurine

A figurine of wondrous power is a statuette small enough to fit in a pocket. If you use an action to speak the command word and throw the figurine to a point on the ground within 12 m of you, the figurine becomes a living creature. If the space where the creature would appear is occupied by other creatures or objects, or if there isn't enough space for the creature, the figurine doesn't become a creature.

The creature is friendly to you and your companions. It understands your languages and obeys your spoken commands. If you issue no commands, the creature defends itself but takes no other actions.

The creature exists for a duration specific to each figurine. At the end of the duration, the creature reverts to its figurine form. It reverts to a figurine early if it drops to 0 health points or if you use an action to speak the command word again while touching it. When the creature becomes a figurine again, its property can't be used again until a certain amount of time has passed, as specified in the figurine's description.

Bronze Griffon (rare): This bronze statuette is of a griffon rampant. It can become a griffon for up to 6 hours. Once it has been used, it can't be used again until 5 days have passed.

Ebony Fly (rare): This ebony statuette is carved in the likeness of a horsefly. It can become a giant fly for up to 12 hours and can be ridden as a mount. Once it has been used, it can't be used again until 2 days have passed.

Giant Fly

Large animal

AC: 11 HP: 19 (3d10+3) Speed: 6 m bw, 12 m fly

Br 14 (+2)	Dex 13 (+1)	Vit 13 (+1)
Int 2 (-4)	Cun 10 (0)	Res 4 (-3)
Pre 6 (-2)	Man 3 (-4)	Com 10 (0)

Senses: Darkvision 12 m, passive Perc 10

Golden Lions (rare): These gold statuettes of lions are always created in pairs. You can use one figurine or both simultaneously. Each can become a lion for up to 1 hour. Once a lion has been used, it can't be used again until 7 days have passed.

Ivory Goats (rare): These ivory statuettes of goats are always created in sets of three. Each goat looks unique and functions differently from the others. Their properties are as follows:

- ❖ The **Goat of Traveling** can become a Large goat with the same statistics as a riding horse. It has 24 charges, and each hour or portion thereof it spends in beast form costs 1 charge. While it has charges, you can use it as often as you wish. When it runs out of charges, it

reverts to a figurine and can't be used again until 7 days have passed, when it regains all its charges.

- ❖ The **Goat of Travail** becomes a giant goat for up to 3 hours. Once it has been used, it can't be used again until 30 days have passed.
- ❖ The **Goat of Terror** becomes a giant goat for up to 3 hours. The goat can't attack, but you can remove its horns and use them as weapons. One horn becomes a +1 lance, and the other becomes a +2 longsword. Removing a horn requires an action, and the weapons disappear and the horns return when the goat reverts to figurine form. In addition, the goat radiates a 6 m radius aura of terror while you are riding it. Any creature hostile to you that starts its turn in the aura must succeed on a DV 15 Resolve saving throw or be frightened of the goat for 1 minute, or until the goat reverts to figurine form. The frightened creature can repeat the saving throw at the end of each of its turns, ending the effect on itself on a success. Once it successfully saves against the effect, a creature is immune to the goat's aura for the next 24 hours. Once the figurine has been used, it can't be used again until 15 days have passed.

Marble Elephant (rare): This marble statuette is about 10 cm high and long. It can become an elephant for up to 24 hours. Once it has been used, it can't be used again until 7 days have passed.

Obsidian Steed (very rare): This polished obsidian horse can become a nightmare for up to 24 hours. The nightmare fights only to defend itself. Once it has been used, it can't be used again until 5 days have passed.

The figurine has a 10 percent chance each time you use it to ignore your orders, including a command to revert to figurine form. If you mount the nightmare while it is ignoring your orders, you and the nightmare are instantly transported to a random location in a random Realm, where the nightmare reverts to figurine form.

Onyx Dog (rare): This onyx statuette of a dog can become a mastiff for up to 6 hours. The mastiff has an Intelligence of 8 and can speak Ancient Markish. It also has darkvision out to a range of 12 m and can see invisible creatures and objects within that range. Once it has been used, it can't be used again until 7 days have passed.

Serpentine Owl (rare): This serpentine statuette of an owl can become a giant owl for up to 8 hours. Once it has been used, it can't be used again until 2 have passed. The owl can telepathically communicate with you at any range if you and it are on within the same Realm.

Silver Raven (uncommon): This silver statuette of a raven can become a raven for up to 12 hours. Once it has been used, it can't be used again until 2 days have passed. While in raven form, the figurine allows you to cast the Animal Messenger spell on it at will.

Flame Tongue

Weapon (any sword), rare (requires attunement)

You can use a bonus action to speak this magic sword's command word, causing flames to erupt from the blade. These flames shed bright light in a 8-m radius and dim light for an additional 8 m. While the sword is ablaze, it deals an extra 2d6 fire damage to any target it hits. The flames last until you use a bonus action to speak the command word again or until you drop or sheathe the sword.

Folding Boat

Wondrous item, rare

This object appears as a wooden box that measures 30 cm long, 15 cm wide, and 15 cm deep. It weighs 2 kg and floats. It can be opened to store items inside. This item also has three command words, each requiring you to use an action to speak it.

One command word causes the box to unfold into a boat 3 m long, 1 m wide, and 0.5 m deep. The boat has one pair of oars, an anchor, a mast, and a lateen sail. The boat can hold up to four

Medium creatures comfortably. The second command word causes the box to unfold into a ship 7 m long, 2.5 m wide, and 2 m deep. The ship has a deck, rowing seats, five sets of oars, a steering oar, an anchor, a deck cabin, and a mast with a square sail. The ship can hold fifteen Medium creatures comfortably.

When the box becomes a vessel, its weight becomes that of a normal vessel its size, and anything that was stored in the box remains in the boat. The third command word causes the folding boat to fold back into a box, provided that no creatures are aboard. Any objects in the vessel that can't fit inside the box remain outside the box as it folds. Any objects in the vessel that can fit inside the box do so.

Frost Brand

Weapon (any sword), very rare (requires attunement)

When you hit with an attack using this magic sword, the target takes an extra 1d6 cold damage. In addition, while you hold the sword, you have resistance to fire damage. In freezing temperatures, the blade sheds bright light in a 2 m radius and dim light for an additional 2 m. When you draw this weapon, you can extinguish all nonmagical flames within 6 m of you. This property can be used no more than once per hour.

Gauntlets of Ogre Power

Wondrous item, uncommon (requires attunement)

Your Brawn score is 19 while you wear these gauntlets. They have no effect on you if your Brawn is already 19 or higher.

Gem of Brightness

Wondrous item, uncommon

This prism has 50 charges. While you are holding it, you can use an action to speak one of three command words to cause one of the following effects:

- ❖ The first command word causes the gem to shed bright light in a 6 m radius and dim light for an additional 6 m. This effect doesn't expend a charge. It lasts until you use a bonus action to repeat the command word or until you use another function of the gem.
- ❖ The second command word expends 1 charge and causes the gem to fire a brilliant beam of light at one creature you can see within 12 m of you. The creature must succeed on a DV 15 Vitality saving throw or become blinded for 1 minute. The creature can repeat the saving throw at the end of each of its turns, ending the effect on itself on a success.
- ❖ The third command word expends 5 charges and causes the gem to flare with blinding light in a 6 m cone originating from it. Each creature in the cone must make a saving throw as if struck by the beam created with the second command word. When all of the gem's charges are expended, the gem becomes a nonmagical jewel worth 50 gp.

Gem of Seeing

Wondrous item, rare (requires attunement)

This gem has 3 charges. As an action, you can speak the gem's command word and expend 1 charge. For the next 10 minutes, you have truesight out to 24 m when you peer through the gem. The gem regains 1d3 expended charges daily at dawn.

Giant Slayer

Weapon (any axe or sword), rare

You gain a +1 bonus to attack and damage rolls made with this magic weapon. When you hit a giant with it, the giant takes an extra 2d6 damage of the weapon's type and must succeed on a DV 15 Brawn saving throw or fall prone. For the purpose of this weapon, "giant" refers to any creature with the giant type, including ettins and trolls.

Glamoured Studded Leather

Armor (reinforced leather armor), rare

While wearing this armor, you gain a +1 bonus to AV. You can also use a bonus action to speak the armor's command word and cause the armor to assume the appearance of a normal set of

clothing or some other kind of armor. You decide what it looks like, including color, style, and accessories, but the armor retains its normal bulk and weight. The illusory appearance lasts until you use this property again or remove the armor.

Gloves of Missile Snaring

Wondrous item, uncommon (requires attunement)

When a ranged weapon attack hits you while you're wearing them, you can use your reaction to reduce the damage by 1d10 + your Dexterity modifier, provided that you have a free hand. If you reduce the damage to 0, you can catch the missile if it is small enough for you to hold in that hand.

Gloves of Swimming and Climbing

Wondrous item, uncommon (requires attunement)

While wearing these gloves, climbing and swimming don't cost you extra movement, and you gain a +5 bonus to Athletics (Br) checks made to climb or swim.

Goggles of Night

Wondrous item, uncommon

While wearing these lenses, you have darkvision out to a range of 12 m. If you already have darkvision, wearing the goggles increases its range by 12 m.

Hammer of Thunderbolts

Weapon (maul), legendary

You gain a +1 bonus to attack and damage rolls made with this magic weapon.

Giant's Bane (Requires attunement): You must be wearing a belt of *Giant Strength* (any variety) and *Gauntlets of Ogre Power* to attune to this weapon. The attunement ends if you take off either of those items. While you are attuned to this weapon and holding it, your Brawn score increases by 4 and can exceed 20, but not 30. When you roll a 20 on an attack roll made with this weapon against a giant, the giant must succeed on a DV 17 Vitality saving throw or die.

The hammer also has 5 charges. While attuned to it, you can expend 1 charge and make a ranged weapon attack with the hammer, hurling it as if it had the thrown property with a normal range of 4 m and a long range of 12 m. If the attack hits, the hammer unleashes a thunderclap audible out to 100 m. The target and every creature within 6 m of it must succeed on a DV 17 Vitality saving throw or be stunned until the end of your next turn. The hammer regains 1d4 + 1 expended charges daily at dawn.

Handy Haversack

Wondrous item, rare

This backpack has a central pouch and two side pouches, each of which is an extradimensional space. Each side pouch can hold up to 10 kg of material, not exceeding a volume of 60 liters. The large central pouch can hold up to 200 liters or 40 kg of material. The backpack always weighs 2 kg, regardless of its contents. Placing an object in the haversack follows the normal rules for interacting with objects. Retrieving an item from the haversack requires you to use an action. When you reach into the haversack for a specific item, the item is always magically on top.

The haversack has a few limitations. If it is overloaded, or if a sharp object pierces it or tears it, the haversack ruptures and is destroyed. If the haversack is destroyed, its contents are lost forever, although an artifact always turns up again somewhere. If the haversack is turned inside out, its contents spill forth, unharmed, and the haversack must be put right before it can be used again. If a breathing creature is placed within the haversack, the creature can survive for up to 10 minutes, after which time it begins to suffocate.

Placing the haversack inside an extradimensional space created by a Bag of Holding, Portable Hole, or similar item instantly destroys both items and opens a gate to the Stellar Expanse. The gate originates where the one item was placed inside the other. Any creature within 2 m of the gate is sucked through it and deposited in a random location in the Stellar Expanse. The gate then closes. The gate is one-way only and can't be reopened.

Hat of Disguise

Wondrous item, uncommon (requires attunement)

While wearing this hat, you can use an action to cast the *Disguise Self* spell from it at will. The spell ends if the hat is removed.

Headband of Intellect

Wondrous item, uncommon (requires attunement)

Your Intelligence score is 19 while you wear this headband. It has no effect on you if your Intelligence is already 19 or higher.

Helm of Brilliance

Wondrous item, very rare (requires attunement)

This dazzling helm is set with 1d10 diamonds, 2d10 rubies, 3d10 fire opals, and 4d10 opals. Any gem pried from the helm crumbles to dust. When all the gems are removed or destroyed, the helm loses its magic.

- ❖ You gain the following benefits while wearing it:
- ❖ You can use an action to cast one of the following spells (save DV 18), using one of the helm's gems of the specified type as a component: *Daylight* (opal), *Fireball* (fire opal), *Prismatic Spray* (diamond), or *Wall of Fire* (ruby). The gem is destroyed when the spell is cast and disappears from the helm.
- ❖ As long as it has at least one diamond, the helm emits dim light in a 6 m radius when at least one undead is within that area. Any undead that starts its turn in that area takes 1d6 radiant damage.
- ❖ As long as the helm has at least one ruby, you have resistance to fire damage.
- ❖ As long as the helm has at least one fire opal, you can use an action and speak a command word to cause one weapon you are holding to burst into flames. The flames emit bright light in a 2 m radius and dim light for an additional 2 m. The flames are harmless to you and the weapon. When you hit with an attack using the blazing weapon, the target takes an extra 1d6 fire damage. The flames last until you use a bonus action to speak the command word again or until you drop or stow the weapon.

Roll a d20 if you are wearing the helm and take fire damage as a result of failing a saving throw against a spell. On a roll of 1, the helm emits beams of light from its remaining gems. Each creature within 12 m of the helm other than you must succeed on a DV 17 Dexterity saving throw or be struck by a beam, taking radiant damage equal to the number of gems in the helm. The helm and its gems are then destroyed.

Helm of Comprehending Languages

Wondrous item, uncommon

While wearing this helm, you can use an action to cast the *Comprehend Languages* spell from it at will.

Helm of Telepathy

Wondrous item, uncommon (requires attunement)

While wearing this helm, you can use an action to cast the *Detect Thoughts* spell (save DV 13) from it. As long as you maintain concentration on the spell, you can use a bonus action to send a telepathic message to a creature you are focused on. It can reply, using a bonus action to do so, while your focus on it continues.

While focusing on a creature with *Detect Thoughts*, you can use an action to cast the *Suggestion* spell (save DV 13) from the helm on that creature. Once used, the suggestion property can't be used again until the next dawn.

Helm of Teleportation

Wondrous item, rare (requires attunement)

This helm has 3 charges. While wearing it, you can use an action and expend 1 charge to cast the *Teleport* spell from it. The helm regains 1d3 expended charges daily at dawn.

Holy Avenger

Weapon (any sword), legendary (requires attunement by [Divine Oath] level taker)

You gain a +3 bonus to attack and damage rolls made with this magic weapon. When you hit a creature of a type that your Enneade has as a favored enemy, that creature takes an extra 2d10 damage of a type equal to one of your Enneade's favorite damage types (your choice). If you are able to *Smite*, the damage the Holy Avenger does is the same as your *Smite* damage type.

While you hold the drawn sword, it creates an aura in a 2 m radius around you. You and all creatures friendly to you in the aura have advantage on saving throws against spells and other magical effects. If you have 17 or more levels in [Divine Oath], the radius of the aura increases to 6 m.

Horn of Blasting

Wondrous item, rare

You can use an action to speak the horn's command word and then blow the horn, which emits a thunderous blast in a 6 m cone that is audible 200 m. Each creature in the cone must make a DV 15 Vitality saving throw. On a failed save, a creature takes 5d6 thunder damage and is deafened for 1 minute. On a successful save, a creature takes half as much damage and isn't deafened. Creatures and objects made of glass or crystal have disadvantage on the saving throw and take 10d6 thunder damage instead of 5d6.

Each use of the horn's magic has a 20 percent chance of causing the horn to explode. The explosion deals 10d6 fire damage to the blower and destroys the horn.

Horn of Kess'Aai

Wondrous item, rare (silver or brass), very rare (bronze), or legendary (iron)

You can use an action to blow this horn. In response, warrior spirits from Kess'Aai appear within 12 m of you. They use the statistics of Beornish Raiders, Hunters and Berserkers. They return to Kess'Aai after 1 hour or when they drop to 0 health points. Once you use the horn, it can't be used again until 7 days have passed.

Four types of horn of Kess'Aai are known to exist, each made of a different metal. The horn's type determines how many spirits answer its summons, as well as the requirement for its use. The GM chooses the horn's type or determines it randomly.

d100	Horn Type	Spirits Summoned	Requirement
01–40	Silver	1d4 + 1 R	None
41–75	Brass	1d4 + 2 R +1d2 H	Proficiency with at least 2 melee weapons
76–90	Bronze	1d4 + 2 R +1d2 H+ 1 B	Proficiency with at least medium armor
91–00	Iron	1d4 + 3 R +1d4 H + 1d2 B	Proficiency with at least 1 heavy weapon

R = Beornish Raider

H = Beornish Hunter

B = Beornish Berserker

If you blow the horn without meeting its requirement, the summoned spirits attack you. If you meet the requirements, they are friendly to you and your companions and follow your commands.

Horseshoes of a Zephyr

Wondrous item, very rare

These horseshoes come in a set of four. While all four shoes are affixed to the hooves of a horse or similar creature, they allow the creature to move normally while floating 10 cm above the ground. This effect means the creature can cross or stand above nonsolid or unstable surfaces, such as water or lava. The creature leaves no tracks and ignores difficult terrain. In addition, the creature can move at normal speed for up to 12 hours a day without suffering exhaustion from a forced march.

Horseshoes of Speed

Wondrous item, rare

These horseshoes come in a set of four. While all four shoes are affixed to the hooves of a horse or similar creature, they increase the creature's walking speed by 6 m.

Immovable Rod

Rod, uncommon

This rod has a button on one end. You can use an action to press the button, which causes the rod to become magically fixed in place. Until you or another creature uses an action to push the button again, the rod doesn't move, even if it is defying gravity. The rod can hold up to 4,000 kg of weight. More weight causes the rod to deactivate and fall. A creature can use an action to make a DV 30 Brawn check, moving the fixed rod up to 2 m on a success.

Instant Fortress

Wondrous item, rare

You can use an action to place this 2 cm metal cube on the ground and speak its command word. The cube rapidly grows into a fortress that remains until you use an action to speak the command word that dismisses it, which works only if the fortress is empty.

The fortress is a square tower, 4 m on a side and 6 m high, with arrow slits on all sides and a battlement atop it. Its interior is divided into two floors, with a ladder running along one wall to connect them. The ladder ends at a trapdoor leading to the roof. When activated, the tower has a small door on the side facing you. The door opens only at your command, which you can speak as a bonus action. It is Immune to the Knock spell and similar magic, such as that of a chime of opening.

Each creature in the area where the fortress appears must make a DV 15 Dexterity saving throw, taking 10d10 bludgeoning damage on a failed save, or half as much damage on a successful one. In either case, the creature is pushed to an unoccupied space outside but next to the fortress. Objects in the area that aren't being worn or carried take this damage and are pushed automatically.

The tower is made of adamantite, and its magic prevents it from being tipped over. The roof, the door, and the walls each have 100 health points, Immunity to damage from nonmagical weapons excluding siege weapons, and resistance to all other damage. Only a Wish spell can repair the fortress (this use of the spell counts as replicating a spell of 8th level or lower). Each casting of Wish causes the roof, the door, or one wall to regain 50 health points.

Stone of Vegomo

Wondrous item, rarity varies (requires attunement)

Many types of Stone of Vegomo exist, each type a distinct combination of shape and color. When you use an action to toss one of these stones into the air, the stone orbits your head at a distance of 10 cm and confers a benefit to you. Thereafter, another creature must use an action to grasp or net the stone to separate it from you, either by making a successful attack roll against AV 24 or a successful DV 24 Athletics (Dex) check. You can use an action to seize and stow the stone, ending its effect. A stone has AV 24, 10 health points, and resistance to all damage. It is considered to be an object that is being worn while it orbits your head.

Absorption (very rare): While this pale lavender ellipsoid orbits your head, you can use your reaction to cancel a spell of 4th level or lower cast by a creature you can see and targeting only you. Once the stone has canceled 20 levels of spells, it burns out and turns dull gray, losing its magic. If you are targeted by a spell whose level is higher than the number of spell levels the stone has left, the stone can't cancel it.

Agility (very rare): Your Dexterity score increases by 2, to a maximum of 20, while this deep red sphere orbits your head.

Awareness (rare): You can't be surprised while this dark blue rhomboid orbits your head.

Fortitude (very rare): Your Vitality score increases by 2, to a maximum of 20, while this pink rhomboid orbits your head.

Greater Absorption (legendary): While this marbled lavender and green ellipsoid orbits your head, you can use your reaction to cancel a spell of 8th level or lower cast by a creature you can see and targeting only you.

Once the stone has canceled 50 levels of spells, it burns out and turns dull gray, losing its magic. If you are targeted by a spell whose level is higher than the number of spell levels the stone has left, the stone can't cancel it.

Insight (very rare): Your Cunning score increases by 2, to a maximum of 20, while this incandescent blue sphere orbits your head.

Intellect (very rare): Your Intelligence score increases by 2, to a maximum of 20, while this marbled scarlet and blue sphere orbits your head.

Leadership (very rare): Your Presence or Manipulation score increases by 2, your choice, to a maximum of 20, while this marbled pink and green sphere orbits your head.

Mastery (legendary): Your proficiency bonus increases by 1 while this pale green prism orbits your head.

Protection (rare): You gain a +1 bonus to AV while this dusty rose prism orbits your head.

Regeneration (legendary): You regain 15 health points at the end of each hour this pearly white spindle orbits your head, provided that you have at least 1 health point.

Reserve (rare): This vibrant purple prism stores spells cast into it, holding them until you use them. The stone can store up to 3 levels worth of spells at a time. When found, it contains 1d4–1 levels of stored spells chosen by the GM.

Any creature can cast a spell of 1st through 3rd level into the stone by touching it as the spell is cast. The spell has no effect, other than to be stored in the stone. If the stone can't hold the spell, the spell is expended without effect. The level of the slot used to cast the spell determines how much space it uses.

While this stone orbits your head, you can cast any spell stored in it. The spell uses the slot level, spell save DV, spell attack bonus, and spellcasting ability of the original caster, but is otherwise treated as if you cast the spell. The spell cast from the stone is no longer stored in it, freeing up space.

Strength (very rare): Your Brawn score increases by 2, to a maximum of 20, while this pale blue rhomboid orbits your head.

Sustenance (rare): You don't need to eat or drink while this clear spindle orbits your head.

Iron Bands of Binding

Wondrous item, rare

This sphere measures 7 cm in diameter and weighs 0.5 kg. You can use an action to speak the command word and throw the sphere at a Huge or smaller creature you can see within 12 m of you. As the sphere moves through the air, it opens into a tangle of metal bands.

Make a ranged attack roll with an attack bonus equal to your Dexterity modifier plus your

proficiency bonus. On a hit, the target is restrained until you take a bonus action to speak the command word again to release it. Doing so, or missing with the attack, causes the bands to contract and become a sphere once more.

A creature, including the one restrained, can use an action to make a DV 20 Brawn check to break the iron bands. On a success, the item is destroyed, and the restrained creature is freed. If the check fails, any further attempts made by that creature automatically fail until 24 hours have elapsed. Once the bands are used, they can't be used again until the next dawn.

Iron Flask

Wondrous item, legendary

This bottle has a brass stopper. You can use an action to speak the flask's command word, targeting a creature that you can see within 12 m of you. If the target is native to another Realm other than the one you're in, the target must succeed on a DV 17 Pre/Man saving throw or be trapped in the flask. If the target has been trapped by the flask before, it has advantage on the saving throw. Once trapped, a creature remains in the flask until released. The flask can hold only one creature at a time. A creature trapped in the flask doesn't need to breathe, eat, or drink and doesn't age.

You can use an action to remove the flask's stopper and release the creature the flask contains. The creature is friendly to you and your companions for 1 hour and obeys your commands for that duration. If you give no commands or give it a command that is likely to result in its death, it defends itself but otherwise takes no actions. At the end of the duration, the creature acts in accordance with its normal disposition and personality. An *Identify* spell reveals that a creature is inside the flask, but the only way to determine the type of creature is to open the flask. A newly discovered bottle might already contain a creature chosen by the GM or determined randomly.

d100	Contents
1–50	Empty
51–54	Barlgura (Demon)
55–58	Chasme (Demon)
59–62	Vrock (Demon)
63–64	Hezrou (Demon)
65	Nalfeshnee (Demon)
66	Goristro (Demon)
67	1st order angel
68–69	Ice Devil (greater)
70–73	Barbed Devil
74–75	Djinn
76–77	Efreeti
78–83	Elemental (any)
84–86	Phantom Hunter
87–90	Winter Hag
91	2nd Order Angel
92–95	Adult Hydrion
96	3rd Order angel
97–99	Leshy
100	Frost Roc

Javelin of Lightning

Weapon (javelin), uncommon

This javelin is a magic weapon. When you hurl it and speak its command word, it transforms into a bolt of lightning, forming a line 1 m wide that extends out from you to a target within 24 m. Each creature in the line excluding you and the target must make a DV 13 Dexterity saving throw, taking 4d6 lightning damage on a failed save, and half as much damage on a successful one. The lightning bolt turns back into a javelin when it reaches the target. Make a ranged weapon attack against the target. On a hit, the target

takes damage from the javelin plus 4d6 lightning damage.

The javelin's property can't be used again until the next dawn. In the meantime, the javelin can still be used as a magic weapon.

Lantern of Revealing

Wondrous item, uncommon

While lit, this hooded lantern burns for 6 hours on 0.5 l of oil, shedding bright light in a 6 m radius and dim light for an additional 6 m. Invisible creatures and objects are visible as long as they are in the lantern's bright light. You can use an action to lower the hood, reducing the light to dim light in a 1 m radius.

Luck Blade

Weapon (any sword), legendary (requires attunement)

You gain a +1 bonus to attack and damage rolls made with this magic weapon. While the sword is on your person, you also gain a +1 bonus to saving throws.

Luck: If the sword is on your person, you can call on its luck (no action required) to reroll one attack roll, ability check, or saving throw you dislike. You must use the second roll. This property can't be used again until the next dawn.

Wish: The sword has 1d4–1 charges. While holding it, you can use an action to expend 1 charge and cast the Wish spell from it. This property can't be used again until the next dawn. The sword loses this property if it has no charges.

Mace of Disruption

Weapon (mace), rare (requires attunement)

When you hit a fiend or an undead with this magic weapon, that creature takes an extra 2d6 radiant damage. If the target has 25 health points or fewer after taking this damage, it must succeed on a DV 15 Resolve saving throw or be destroyed. On a successful save, the creature becomes frightened of you until the end of your next turn.

While you hold this weapon, it sheds bright light in a 4 m radius and dim light for an additional 4 m.

Mace of Smiting

Weapon (mace), rare

You gain a +1 bonus to attack and damage rolls made with this magic weapon. The bonus increases to +3 when you use the mace to attack a construct. When you roll a 20 on an attack roll made with this weapon, the target takes an extra 2d6 bludgeoning damage, or 4d6 bludgeoning damage if it's a construct. If a construct has 25 health points or fewer after taking this damage, it is destroyed.

Mace of Terror

Weapon (mace), rare (requires attunement)

This magic weapon has 3 charges. While holding it, you can use an action and expend 1 charge to release a wave of terror. Each creature of your choice in a 6 m radius extending from you must succeed on a DV 15 Resolve saving throw or become frightened

of you for 1 minute. While it is frightened in this way, a creature must spend its turns trying to move as far away from you as it can, and it can't willingly move to a space within 6 m of you. It also can't take reactions. For its action, it can use only the dash action or try to escape from an effect that prevents it from moving. If it has nowhere it can move, the creatures can use the dodge action. At the end of each of its turns, a creature can repeat the saving throw, ending the effect on itself on a success. The mace regains 1d3 expended charges daily at dawn.

Mantle of Spell Resistance

Wondrous item, rare (requires attunement)

You have advantage on saving throws against spells while you wear this cloak.

Manual of Bodily Health

Wondrous item, very rare

If you spend 48 hours over a period of 6 days or fewer studying the book's contents and practicing its guidelines, your Vitality score increases by 2, as does your maximum for that score. The manual then loses its magic, but regains it in a century.

Manual of Gainful Exercise

Wondrous item, very rare

If you spend 48 hours over a period of 6 days or fewer studying the book's contents and practicing its guidelines, your Brawn score increases by 2, as does your maximum for that score. The manual then loses its magic, but regains it in a century.

Manual of Golems

Wondrous item, very rare

This tome contains information and incantations necessary to make a particular type of golem. The GM chooses the type or determines it randomly. To decipher and use the manual, you must be a spellcaster with at least two 5th-level spell slots. A creature that can't use a Manual of Golems and attempts to read it takes 6d6 psychic damage.

d20	Golem	Time	Cost
1–5	Clay	30 days	5 Soul Power (min 1 Soul of 3th lvl) 15,000 gp
6–17	Flesh	60 days	4 Soul Power (min 1 Soul of 2th lvl) 10,000 gp
18	Iron	120 days	9 Soul Power (min 1 Soul of 7th lvl) 25,000 gp
19–20	Stone	90 days	6 Soul Power (min 1 Soul of 4th lvl) 20,000 gp

To create a golem, you must spend the time shown on the table, working without interruption with the manual at hand and resting no more than 8 hours per day. You must also pay the specified cost to purchase supplies.

Once you finish creating the golem, the book is consumed in flames. The golem becomes animate when the ashes of the manual are sprinkled on it. It is under your control, and it understands and obeys your spoken commands.

Manual of Quickness of Action

Wondrous item, very rare

If you spend 48 hours over a period of 6 days or fewer studying the book's contents and practicing its guidelines, your Dexterity score increases by 2, as does your maximum for that score. The manual then loses its magic, but regains it in a century.

Marvelous Pigments

Wondrous item, very rare

Typically found in 1d4 pots inside a fine wooden box with a brush (weighing 0.5 kg in total), these pigments allow you to create three-dimensional objects by painting them in two dimensions. The paint flows from the brush to form the desired object as you concentrate on its image.

Each pot of paint is sufficient to cover 300 square meters of a surface, which lets you create inanimate objects or terrain features, such as a door, a pit, flowers, trees, cells, rooms, or weapons that are up to 3,000 cubic meters. It takes 10 minutes to cover 30 square meters.

When you complete the painting, the object or terrain feature depicted becomes a real, nonmagical object. Thus, painting a door on a wall creates an actual door that can be opened to whatever is beyond. Painting a pit on a floor creates a real pit, and its depth counts against the total area of objects you create.

Nothing created by the pigments can have a value greater than 25 gp. If you paint an object of greater value (such as a diamond or a pile of gold), the object looks authentic, but close inspection reveals it is made from paste, bone, or some other worthless material. If you paint a

form of energy such as fire or lightning, the energy appears but dissipates as soon as you complete the painting, doing no harm to anything.

Medallion of Thoughts

Wondrous item, uncommon (requires attunement)

The medallion has 3 charges. While wearing it, you can use an action and expend 1 charge to cast the *Detect Thoughts* spell (save DV 13) from it. The medallion regains 1d3 expended charges daily at dawn.

Mirror of Life Trapping

Wondrous item, very rare

When this 1 m tall mirror is viewed indirectly, its surface shows faint images of creatures. The mirror weighs 20 kg, and it has AV 11, 10 health points, and vulnerability to bludgeoning damage. It shatters and is destroyed when reduced to 0 health points.

If the mirror is hanging on a vertical surface and you are within 1 m of it, you can use an action to speak its command word and activate it. It remains activated until you use an action to speak the command word again. Any creature other than you that sees its reflection in the activated mirror while within 6 m of it must succeed on a DV 15 Pre/Man saving throw or be trapped, along with anything it is wearing or carrying, in one of the mirror's twelve extradimensional cells. This saving throw is made with advantage if the creature knows the mirror's nature, and constructs succeed on the saving throw automatically.

An extradimensional cell is an infinite expanse filled with thick fog that reduces visibility to 2 m. Creatures trapped in the mirror's cells don't age, and they don't need to eat, drink, or sleep. A creature trapped within a cell can escape using magic that permits Realm travel. Otherwise, the creature is confined to the cell until freed. If the mirror traps a creature but its twelve extradimensional cells are already occupied, the mirror frees one trapped creature at random to accommodate the new prisoner. A freed creature appears in an unoccupied space within sight of the mirror but facing away from it. If the mirror is shattered, all creatures it contains are freed and appear in unoccupied spaces near it.

While within 1 m of the mirror, you can use an action to speak the name of one creature trapped in it or call out a particular cell by number. The creature named or contained in the named cell appears as an image on the mirror's surface. You and the creature can then communicate normally. In a similar way, you can use an action to speak a second command word and free one creature trapped in the mirror. The freed creature appears, along with its possessions, in the unoccupied space nearest to the mirror and facing away from it.

Mithral Armor

Armor (Medium or heavy, but not hide), uncommon

Mithral is a light, flexible metal. A mithral chain shirt or breastplate can be worn under normal clothes. If the armor normally imposes disadvantage on Stealth (Dex) checks or has a Brawn requirement, the mithral version of the armor doesn't.

Necklace of Adaptation

Wondrous item, uncommon (requires attunement)

While wearing this necklace, you can breathe normally in any environment, and you have advantage on saving throws made against harmful gases and vapors (such as *Cloudkill* and *Stinking Cloud* effects, inhaled poisons, and the breath weapons of some dragons).

Necklace of Fireballs

Wondrous item, rare

This necklace has 1d6+3 beads hanging from it. You can use an action to detach a bead and throw it up to 12 m away. When it reaches the end of its trajectory, the bead detonates as a 3rd-level *Fireball* spell (save DV 15). You can hurl multiple beads, or even the whole necklace, as one action. When you do so, increase the level of the *Fireball* by 1 for each bead beyond the first.

Necklace of Prayer Beads

Wondrous item, rare (requires attunement by [Devotion], [Divine Oath] and [World Magic])

This necklace has 1d4+2 magic beads made from aquamarine, black pearl, or topaz. It also has many nonmagical beads made from stones such as amber, bloodstone, citrine, coral, jade, pearl, or quartz. If a magic bead is removed from the necklace, that bead loses its magic.

Six types of magic beads exist. The GM decides the type of each bead on the necklace or determines it randomly. A necklace can have more than one bead of the same type. To use one, you must be wearing the necklace. Each bead contains a spell that you can cast from it as a bonus action (using your spell save DV if a save is necessary). Once a magic bead's spell is cast, that bead can't be used again until the next dawn.

d20	Bead of ...	Spell
1–6	Blessing	<i>Bless</i>
7–12	Curing	<i>Cure Wounds</i> (2nd level) or <i>Lesser Restoration</i>
13–16	Favor	<i>Greater Restoration</i>
17–18	Smiting	<i>Scorching Ray</i>
19	Summons	<i>Realmwalker</i>
20	Wind	<i>Wind Walk</i>

Nine Lives Stealer

Weapon (any sword), very rare (requires attunement)

You gain a +2 bonus to attack and damage rolls made with this magic weapon. The sword has 1d8+1 charges. If you score a critical hit against a creature that has fewer than 100 health points, it must succeed on a DV 15 Vitality saving throw or be slain instantly as the sword tears its life force from its body (a construct or an undead is immune). The sword loses 1 charge if the creature is slain. When the sword has no charges remaining, it loses this property.

Oathbow

Weapon (longbow), very rare (requires attunement)

When you nock an arrow on this bow, it whispers in elvish, "Swift defeat to my enemies." When you use this weapon to make a ranged attack, you can, as a command phrase, say, "Swift death to you who have wronged me." The target of your attack becomes your sworn enemy until it dies or until dawn seven days later. You can have only one such sworn enemy at a time. When your sworn enemy dies, you can choose a new one after the next dawn.

When you make a ranged attack roll with this weapon against your sworn enemy, you have advantage on the roll. In addition, your target gains no benefit from cover, other than total cover, and you suffer no disadvantage due to long range. If the attack hits, your sworn enemy takes an extra 3d6 piercing damage. While your sworn enemy lives, you have disadvantage on attack rolls with all other weapons.

Oil of Ethereality

Potion, rare

The oil can cover a Medium or smaller creature, along with the equipment it's wearing and carrying (one additional vial is required for each size category above Medium). Applying the oil takes 10 minutes. The affected creature then gains the effect of the *Ethereality* spell for 1 hour.

Oil of Sharpness

Potion, very rare

The oil can coat one slashing or piercing weapon or up to 5 pieces of slashing or piercing ammunition. Applying the oil takes 1 minute. For 1 hour, the coated item is magical and has a +3 bonus to attack and damage rolls.

Oil of Slipperiness

Potion, uncommon

The oil can cover a Medium or smaller creature, along with the equipment it's wearing and carrying (one additional vial is required for each size category above Medium). Applying the oil takes 10 minutes. The affected creature then gains the effect of a Freedom of Movement spell for 8 hours. Alternatively, the oil can be poured on the ground as an action, where it covers a 2 m square, duplicating the effect of the Grease spell in that area for 8 hours.

Pearl of Power

Wondrous item, uncommon (requires attunement by a spellcaster)

While this pearl is on your person, you can use an action to speak its command word and regain one expended spell slot. If the expended Slot was of 4th level or higher, the new slot is 3rd level. Once you use the pearl, it can't be used again until the next dawn.

Periapt of Health

Wondrous item, uncommon

You are immune to contracting any disease while you wear this pendant. If you are already infected with a disease, the effects of the disease are suppressed while you wear the pendant.

Periapt of Proof against Poison

Wondrous item, rare

While you wearing this periapt it, poisons have no effect on you. You are immune to the poisoned condition and have immunity to poison damage.

Periapt of Wound Closure

Wondrous item, uncommon (requires attunement)

While you wear this pendant, you stabilize whenever you are dying at the start of your turn. In addition, whenever you roll a hit die to regain health points, double the number of health points it restores.

Philter of Love

Potion, uncommon

The next time you see a creature within 10 minutes after drinking this philter, you become charmed by that creature for 1 hour. If the creature is of a species and gender you are normally attracted to, you regard it as your true love while you are charmed.

Pipes of Haunting

Wondrous item, uncommon

You must be proficient with wind instruments to use these pipes. They have 3 charges. You can use an action to play them and expend 1 charge to create an eerie, spellbinding tune. Each creature within 6 m of you that hears you play must succeed on a DV 15 Resolve saving throw or become frightened of you for 1 minute. If you wish, all creatures in the area that aren't hostile toward you automatically succeed on the saving throw. A creature that fails the saving throw can repeat it at the end of each of its turns, ending the effect on itself on a success. A creature that succeeds on its saving throw is immune to the effect of these pipes for 24 hours. The pipes regain 1d3 expended charges daily at dawn.

Pipes of the Sewers

Wondrous item, uncommon (requires attunement)

You must be proficient with wind instruments to use these pipes. While you are attuned to the pipes, ordinary rats and giant rats are indifferent toward you and will not attack you unless you threaten or harm them.

The pipes have 3 charges. If you play the pipes as an action, you can use a bonus action to expend 1 to 3 charges, calling forth one swarm of rats with each expended charge, provided that enough rats are within 2 km of you to be called in this fashion (as determined by the GM). If there aren't enough rats to form a swarm, the charge is wasted. Called swarms move toward the music by the

shortest available route but aren't under your control otherwise. The pipes regain 1d3 expended charges daily at dawn.

Whenever a swarm of rats that isn't under another creature's control comes within 6 m of you while you are playing the pipes, you can make a Manipulation check contested by the swarm's Composure check. If you lose the contest, the swarm behaves as it normally would and can't be swayed by the pipes' music for the next 24 hours. If you win the contest, the swarm is swayed by the pipes' music and becomes friendly to you and your companions for as long as you continue to play the pipes each round as an action. A friendly swarm obeys your commands. If you issue no commands to a friendly swarm, it defends itself but otherwise takes no actions. If a friendly swarm starts its turn and can't hear the pipes' music, your control over that swarm ends, and the swarm behaves as it normally would and can't be swayed by the pipes' music for the next 24 hours.

Plate Armor of Etherealness

Armor (plate), legendary (requires attunement)

While you are wearing this armor, you can speak its command word as an action to gain the effect of the *Etherealness* spell, which lasts for 10 minutes or until you remove the armor or use an action to speak the command word again. This property of the armor can't be used again until the next dawn.

Portable Hole

Wondrous item, rare

This cloth is folded up to the dimensions of a handkerchief. It unfolds into a circular sheet 2 m in diameter. You can use an action to unfold a Portable Hole and place it on or against a solid surface, whereupon the Portable Hole creates an extradimensional hole 3 m deep. The cylindrical space within the hole exists somewhere in the Stellar Expanse, so it cannot be used to create open passages. Any creature inside an open Portable Hole can exit the hole by climbing out of it. You can use an action to close a Portable Hole by taking hold of the edges of the cloth and folding it up.

Folding the cloth closes the hole, and any creatures or objects within remain in the extradimensional space. No matter what is in it, the hole weighs next to nothing.

If the hole is folded up, a creature within the hole's extradimensional space can use an action to make a DV 10 Brawn check. On a successful check, the creature forces its way out and appears within 1 m of the Portable Hole or the creature carrying it. A breathing creature within a closed Portable Hole can survive for up to 10 minutes, after which time it begins to suffocate.

Placing a Portable Hole inside an extradimensional space created by a *Bag of Holding*, *Handy Haversack*, or similar item instantly destroys both items and opens a gate to the Stellar Expanse. The gate originates where the one item was placed inside the other. Any creature within 2 m of the gate is sucked through it and deposited in a random location inside the Stellar Expanse. The gate then closes. The gate is one-way only and cannot be reopened.

Potion of Animal Friendship

Potion, uncommon

When you drink this potion, you can cast the *Animal Connection* spell (save DV 13) for 1 hour at will.

Potion of Clairvoyance

Potion, rare

When you drink this potion, you gain the effect of the *Clairvoyance* spell.

Potion of Climbing

Potion, common

When you drink this potion, you gain a climbing speed equal to your walking speed for 1 hour. During this time, you have advantage on Athletics (Br) checks you make to climb.

Potion of Diminution

Potion, rare

When you drink this potion, you gain the “reduce” effect of the *Enlarge/Reduce* spell for 1d4 hours (no concentration required).

Potion of Flying

Potion, very rare

When you drink this potion, you gain a flying speed equal to your walking speed for 1 hour and can hover. If you're in the air when the potion wears off, you fall unless you have some other means of staying aloft.

Potion of Gaseous Form

Potion, rare

When you drink this potion, you gain the effect of the *Gaseous Form* spell for 1 hour (no concentration required) or until you end the effect as a bonus action.

Potion of Giant Brawn

Potion, rarity varies

When you drink this potion, your Brawn score changes for 1 hour. The type of giant determines the score (see the table below). The potion has no effect on you if your Brawn is equal to or greater than that score. The Potion of Frost Giant Brawn and the Potion of Stone Giant Brawn have the same effect.

Type of Giant	Brawn	Rarity
Hill Giant	21	Uncommon
Frost/Stone Giant	23	Rare
Fire Giant	25	Rare
Cloud Giant	27	Very rare
Storm Giant	29	Legendary

Potion of Growth

Potion, uncommon

When you drink this potion, you gain the “enlarge” effect of the *Enlarge/Reduce* spell for 1d4 hours (no concentration required).

Potion of Healing

Potion, rarity varies

You regain health points when you drink this potion. The number of health points depends on the potion's rarity, as shown in the Potions of Healing table.

Potions of Healing

Potion of ...	Rarity	HP Regained
Healing	Common	2d4 + 2
Greater healing	Uncommon	4d4 + 4
Superior healing	Rare	8d4 + 8
Supreme healing	Very rare	10d4 + 20

Potion of Heroism

Potion, rare

For 1 hour after drinking it, you gain 10 temporary health points that last for 1 hour. For the same duration, you are under the effect of the *Bless* spell (no concentration required).

Potion of Invisibility

Potion, very rare

When you drink it, you become invisible for 1 hour. Anything you wear or carry is invisible with you. The effect ends early if you attack or cast a spell.

Potion of Mind Reading

Potion, rare

When you drink this potion, you gain the effect of the *Detect Thoughts* spell (save DV 13).

Potion of Poison

Potion, uncommon

This concoction looks, smells, and tastes like a *Potion of Healing* or other beneficial potion. However, it is actually poison masked by Illusion magic. An *Identify* spell reveals its true nature.

If you drink it, you take 3d6 poison damage, and you must succeed on a DV 13 Vitality saving throw or be poisoned. At the start of each of your turns while you are poisoned in this way, you take 3d6 poison damage. At the end of each of your turns, you can repeat the saving throw. On a successful save, the poison damage you take on your subsequent turns decreases by 1d6. The poison ends when the damage decreases to 0.

Potion of Resistance

Potion, uncommon

When you drink this potion, you gain resistance to one type of damage for 1 hour. The GM chooses the type or determines it randomly from the options below.

D10 Damage Type

- | | |
|----|-----------|
| 1 | Acid |
| 2 | Cold |
| 3 | Fire |
| 4 | Force |
| 5 | Lightning |
| 6 | Necrotic |
| 7 | Poison |
| 8 | Psychic |
| 9 | Radiant |
| 10 | Thunder |

Potion of Speed

Potion, very rare

When you drink this potion, you gain the effect of the *Haste* spell for 1 minute (no concentration required).

Potion of Water Breathing

Potion, uncommon

You can breath underwater for 1 hour after drinking this potion.

Restorative Ointment

Wonderous Item, uncommon

This glass jar, 7 cm in diameter, contains 1d4+1 doses of a thick mixture. The jar and its content weighs about 400 gr. As an action one dose of the ointment can be swallowed or applied to the skin. The creature that receives it regains 2d8+2 health points, ceases to be poisoned, and is cured of any disease.

Ring of Animal Influence

Ring, rare

This ring has 3 charges, and it regains 1d3 expended charges daily at dawn. While wearing the ring, you can use an action to expend 1 of its charges to cast one of the following spells:

- ❖ *Animal Connection* (save DV 13)
- ❖ *Fear* (Save DV 13), targeting only beasts and animal that have an Intelligence of 3 or lower
- ❖ *Beast Bond*

Ring of Djinni Summoning

Ring, legendary (requires attunement)

While wearing this ring, you can speak its command word as an action to summon a particular djinni. The djinni appears in an unoccupied space you choose within 24 m of you. It remains as long as you concentrate (as if concentrating on a spell), to a maximum of 1 hour, or until it drops to 0 health points. It then returns to its home Realm.

While summoned, the djinni is friendly to you and your companions. It obeys any commands you give it, no matter what language you use. If you fail to command it, the djinni defends itself against attackers but takes no other actions. After the djinni departs, it can't be summoned again for 24 hours, and the ring becomes nonmagical if the djinni dies.

Ring of Elemental Command

Ring, legendary (requires attunement)

This ring is linked to one of the four elemental forces. The GM chooses or randomly determines which elemental force. While wearing this ring, you have advantage on attack rolls against elementals of that type, and they have disadvantage on attack rolls against you. In addition, you have access to properties based on the linked to that elemental type.

The ring has 5 charges. It regains 1d4+1 expended charges daily at dawn. Spells cast from the ring have a save DV of 17.

Ring of Air Elemental Command

You can expend 2 of the ring's charges to cast *Dominare Monster* on an air elemental. In addition, when you fall, you descend 12 m per round and take no damage from falling. You can also speak and understand auran.

If you help slay an *air elemental* while attuned to the ring, you gain access to the following additional properties:

- ❖ You have resistance to lightning damage.
- ❖ You have a flying speed equal to your walking speed and can hover.
- ❖ You can cast the following spells from the ring, expending the necessary number of charges: *Chain Lightning* (3 charges), *Gust Of Wind* (2 charges), or *Wind Wall* (1 charge).

Ring of Earth Elemental Command

You can expend 2 of the ring's charges to cast *Dominare Monster* on an *earth elemental*. In addition, you can move in difficult terrain that is composed of rubble, rocks, or dirt as if it were normal terrain. You can also speak and understand terran.

If you help slay an *earth elemental* while attuned to the ring, you gain access to the following additional properties:

- ❖ You have resistance to acid damage.
- ❖ You can move through solid earth or rock as if those areas were difficult terrain. If you end your turn there, you are shunted out to the nearest unoccupied space you last occupied.
- ❖ You can cast the following spells from the ring, expending the necessary number of charges: *Stone Shape* (2 charges), *Stoneskin* (3 charges), or *Wall of Stone* (3 charges).

Ring of Fire Elemental Command

You can expend 2 of the ring's charges to cast *Dominare Monster* on a *fire elemental*. In addition, you have resistance to fire damage. You can also speak and understand ignan. If you help slay a *fire elemental* while attuned to the ring, you gain access to the following additional properties:

- ❖ You are immune to fire damage.
- ❖ You can cast the following spells from the ring, expending the necessary number of charges: *Burning Hands* (1 charge), *Fireball* (2 charges), and *Wall of Fire* (3 charges).

Ring of Water Elemental Command

You can expend 2 of the ring's charges to cast *Dominare Monster* on a *water elemental*. In addition, you can stand on and walk across liquid surfaces as if they were solid ground. You can also speak and understand *aquan*.

If you help slay a *water elemental* while attuned to the ring, you gain access to the following additional properties:

- ❖ You can breathe underwater and have a swimming speed equal to your walking speed.
- ❖ You can cast the following spells from the ring, expending the necessary number of charges: *Create Or Destroy Food and Water* (1 charge), *Control Water* (3 charges), *Ice Storm* (2 charges), or *Wall of Ice* (3 charges).

Ring of Evasion

Ring, rare (requires attunement)

This ring has 3 charges, and it regains 1d3 expended charges daily at dawn. When you fail a Dexterity saving throw while wearing it, you can use your reaction to expend 1 of its charges to succeed on that saving throw instead.

Ring of Feather Falling

Ring, rare (requires attunement)

When you fall while wearing this ring, you descend 12 m per round and take no damage from falling.

Ring of Free Action

Ring, rare (requires attunement)

While you wear this ring, difficult terrain doesn't cost you extra movement. In addition, magic can neither reduce your speed nor cause you to be paralyzed or restrained.

Ring of Invisibility

Ring, legendary (requires attunement)

While wearing this ring, you can turn invisible as an action. Anything you are wearing or carrying is invisible with you. You remain invisible until the ring is removed, until you attack or cast a spell, or until you use a bonus action to become visible again.

Ring of Jumping

Ring, uncommon (requires attunement)

While wearing this ring, you can cast the *Jump* spell from it as a bonus action at will, but can target only yourself when you do so.

Ring of Mind Shielding

Ring, uncommon (requires attunement)

While wearing this ring, you are immune to magic that allows other creatures to read your thoughts, determine whether you are lying or know your creature type. Creatures can telepathically communicate with you only if you allow it.

You can use an action to cause the ring to become invisible until you use another action to make it visible, until you remove the ring, or until you die. If you die while wearing the ring, your Soul enters it, unless it already houses a Soul. You can remain in the ring or depart for reincarnation. As long as your Soul is in the ring, you can telepathically communicate with any creature wearing it. A wearer can't prevent this telepathic communication.

Ring of Protection

Ring, rare (requires attunement)

You gain a +1 bonus to AV and saving throws while wearing this ring.

Ring of Regeneration

Ring, very rare (requires attunement)

While wearing this ring, you regain 1d6 health points every 10 minutes, provided that you have at least 1 health point. If you lose a body part, the ring causes the missing part to regrow and return to full functionality after 1d6+1 days if you have at least 1 health point the whole time.

Ring of Resistance

Ring, rare (requires attunement)

You have resistance to one damage type while wearing this ring. The gem in the ring indicates the type, which the GM chooses or determines randomly.

d10	Damage Type	Gem
1	Acid	Pearl
2	Cold	Tourmaline
3	Fire	Garnet
4	Force	Sapphire
5	Lightning	Citrine
6	Necrotic	Jet
7	Poison	Amethyst
8	Psychic	Jade
9	Radiant	Topaz
10	Thunder	Spinel

Ring of Shooting Stars

Ring, very rare (requires attunement outdoors at night)

While wearing this ring in dim light or darkness, you can cast dancing lights and light from the ring at will. Casting either spell from the ring requires an action.

The ring has 6 charges for the following other properties. The ring regains 1d6 expended charges daily at dawn.

Faerie Fire: You can expend 1 charge as an action to cast Faerie Fire from the ring.

Ball Lightning: You can expend 2 charges as an action to create one to four 1 m diameter spheres of lightning. The more spheres you create, the less powerful each sphere is individually.

Each sphere appears in an unoccupied space you can see within 24 m of you. The spheres last as long as you concentrate (as if concentrating on a spell), up to 1 minute. Each sphere sheds dim light in a 6 m radius.

As a bonus action, you can move each sphere up to 6 m, but no farther than 24 m away from you. When a creature other than you comes within 1 m of a sphere, the sphere discharges lightning at that creature and disappears. That creature must make a DV 15 Dexterity saving throw. On a failed save, the creature takes lightning damage based on the number of spheres you created.

Spheres	Lightning Damage
4	2d4
3	2d6
2	5d4
1	4d12

Shooting Stars: You can expend 1 to 3 charges as an action. For every charge you expend, you launch a glowing mote of light from the ring at a point you can see within 12 m of you. Each creature within a 3 m cube originating from that point is showered in sparks and must make a DV 15 Dexterity saving throw, taking 5d4 fire damage on a failed save, or half as much damage on a successful one.

Ring of Spell Storing

Ring, rare (requires attunement)

This ring stores spells cast into it, holding them until the attuned wearer uses them. The ring can store up to 5 levels worth of spells at a time. When found, it contains 1d6–1 levels of stored spells chosen by the GM. Any creature can cast a spell of 1st through 5th level into the ring by touching the ring as the spell is cast. The spell has no effect, other than to be stored in the ring. If the ring can't hold the spell, the spell is expended without effect. The level of the slot used to cast the spell determines how much space it uses. While wearing this ring, you can cast any spell stored in it. The spell uses the slot level, spell save DV, spell attack bonus, and spellcasting ability of the original caster, but is otherwise treated as if you cast the spell. The spell cast from the ring is no longer stored in it, freeing up space.

Ring of Spell Turning

Ring, legendary (requires attunement)

While wearing this ring, you have advantage on saving throws against any spell that targets only you (not in an area of effect). In addition, if you roll a 20 for the save and the spell is 7th level or lower, the spell has no effect on you and instead targets the caster, using the slot level, spell save DV, attack bonus, and spellcasting ability of the caster.

Ring of Swimming

Ring, uncommon

You have a swimming speed of 8 m while wearing this ring.

Ring of Telekinesis

Ring, very rare (requires attunement)

While wearing this ring, you can cast the *Telekinesis* spell at will, but you can target only objects that aren't being worn or carried.

Ring of the Ram

Ring, rare (requires attunement)

This ring has 3 charges, and it regains 1d3 expended charges daily at dawn. While wearing the ring, you can use an action to expend 1 to 3 of its charges to attack one creature you can see within 12 m of you. The ring produces a spectral ram's head and makes its attack roll with a +7 bonus. On a hit, for each charge you spend, the target takes 2d10 force damage and is pushed 1 m away from you.

Alternatively, you can expend 1 to 3 of the ring's charges as an action to try to break an object you can see within 12 m of you that isn't being worn or carried. The ring makes a Brawn check with a +5 bonus for each charge you spend.

Ring of Three Wishes

Ring, legendary

While wearing this ring, you can use an action to expend 1 of its 3 charges to cast the *Wish* spell from it. The ring becomes nonmagical when you use the last charge.

Ring of Warmth

Ring, uncommon (requires attunement)

While wearing this ring, you have resistance to cold damage. In addition, you and everything you wear and carry are unharmed by temperatures as low as –50 degrees Celsius.

Ring of Water

Walking ring, Uncommon

While wearing this ring, you can stand on and move across any liquid surface as if it were solid ground.

Ring of X-ray

Vision Ring, rare (requires attunement)

While wearing this ring, you can use an action to speak its command word. When you do so, you can see into and through solid matter for 1 minute. This vision has a radius of 6 m. To you, solid objects within that radius appear transparent and don't prevent light from passing through them. The vision can penetrate 25 cm of stone, 5 cm of common metal, or up to 1 m of wood or dirt. Thicker substances block the vision, as does a thin sheet of lead. Whenever you use the ring again before taking a long rest, you must succeed on a DV 15 Vitality saving throw or gain one level of exhaustion.

Robe of Eyes

Wondrous item, rare (requires attunement)

This robe is adorned with eyelike patterns. While you wear the robe, you gain the following benefits:

- ❖ The robe lets you see in all directions, and you have advantage on Perception (Int) checks that rely on sight.
- ❖ You have darkvision out to a range of 24 m.
- ❖ You can see invisible creatures and objects, as well as see into the Ethereal Dimension, out to a range of 24 m. The eyes on the robe cannot be closed or averted. Although you can close or avert your own eyes, you are never considered to be doing so while wearing this robe.

A Light spell cast on the robe or a Daylight spell cast within 1 m of the robe causes you to be blinded for 1 minute. At the end of each of your turns, you can make a Vitality saving throw (DV 11 for Light or DV 15 for Daylight), ending the blindness on a success.

Robe of Scintillating Colors

Wondrous item, very rare (requires attunement)

This robe has 3 charges, and it regains 1d3 expended charges daily at dawn. While you wear it, you can use an action and expend 1 charge to cause the garment to display a shifting pattern of dazzling hues until the end of your next turn. During this time, the robe sheds bright light in a 6 m radius and dim light for an additional 6 m. Creatures that can see you have disadvantage on attack rolls against you. In addition, any creature in the bright light that can see you when the robe's power is activated must succeed on a DV 15 Composure saving throw or become stunned until the effect ends.

Robe of Stars

Wondrous item, very rare (requires attunement)

You gain a +1 bonus to saving throws while you wear it. Six stars, located on the robe's upper front portion, are particularly large. While wearing this robe, you can use an action to pull off one of the stars and use it to cast *Magic Missile* as a 5th level spell. Daily at dusk, 1d6 removed stars reappear on the robe.

While you wear the robe, you can use an action to enter the Stellar Expanse along with everything you are wearing and carrying. You remain there until you use an action to return to the Realm you were in. You reappear in the last space you occupied, or if that space is occupied, the nearest unoccupied space.

Robe of the Archmagi

Wondrous item, legendary (requires attunement by [Divine Bestowal], [Occult Learner], [Pact], or [Unique Ancestry])

You gain these benefits while wearing the robe:

- ❖ If you are not wearing armor, your base armor value is 15 + your Dexterity modifier.
- ❖ You have advantage on saving throws against spells and other magical effects.
- ❖ Your spell save DV and spell attack bonus each increase by 2.

Robe of Useful Items

Wondrous item, uncommon

While wearing the robe, you can use an action to detach one of the patches, causing it to become the object or creature it represents. Once the last patch is removed, the robe becomes an ordinary garment.

The robe has two of each of the following patches:

- ❖ Dagger
- ❖ Bullseye lantern (filled and lit)
- ❖ Steel mirror
- ❖ 3 m pole
- ❖ Hempen rope (15 m, coiled)
- ❖ Sack

In addition, the robe has 4d4 other patches. The GM chooses the patches or determines them randomly.

d100 Patch

- 01–08 Bag of 100 gp
- 09–15 Silver coffer (30 cm long, 15 cm wide and deep) worth 500 gp
- 16–22 Iron door (up to 3 m wide and 3 m high, barred on one side of your choice), which you can place in an opening you can reach; it conforms to fit the opening, attaching and hinging itself
- 23–30 10 gems worth 100 gp each
- 31–44 Wooden ladder (7 m long)
- 45–51 A *riding horse* with saddle bags
- 52–59 Pit (a cube 3 m on a side), which you can place on the ground within 3 m of you
- 60–68 4 *Potions of Healing*
- 69–75 Rowboat (3.5 m long)
- 76–83 Spell scroll containing one spell of 1st to 3rd level
- 84–90 2 *mastiffs*
- 91–96 Window (0.5 m by 1.5 m, up to 0.5 m deep), which you can place on a vertical surface you can reach
- 97–00 Portable ram

Rod of Absorption

Rod, very rare (requires attunement)

While holding this rod, you can use your reaction to absorb a spell that is targeting only you and not with an area of effect. The absorbed spell's effect is canceled, and the spell's energy, not the spell itself, is stored in the rod. The energy has the same level as the spell when it was cast. The rod can absorb and store up to 50 levels of energy over the course of its existence. Once the rod absorbs 50 levels of energy, it can't absorb more. If you are targeted by a spell that the rod can't store, the rod has no effect on that spell.

When you become attuned to the rod, you know how many levels of energy the rod has absorbed over the course of its existence, and how many levels of spell energy it currently has stored.

If you are a spellcaster holding the rod, you can convert energy stored in it into spell slots to cast spells you have prepared or know. You can create spell slots only of a level equal to or lower than your own spell slots, up to a maximum of 5th level. You use the stored levels in place of your slots, but otherwise cast the spell as normal. For example, you can use 3 levels stored in the rod as a 3rd level spell slot. A newly found rod has 1d10 levels of spell energy stored in it already. A rod that can no longer absorb spell energy and has no energy remaining becomes nonmagical.

Rod of Alertness

Rod, very rare (requires attunement)

This rod has the following properties:

- ❖ **Alertness:** While holding the rod, you have advantage on Perception (Com) checks and on rolls for initiative.

- ❖ **Spells:** While holding the rod, you can use an action to cast one of the following spells from it: *Detect Soul Aspect*, *Detect Magic*, *Detect Poison And Disease*, or *See Invisibility*.
- ❖ **Protective Aura:** As an action, you can plant the haft end of the rod in the ground, whereupon the rod's head sheds bright light in a 12 m radius and dim light for an additional 12 m. While in that bright light, you and any creature that is friendly to you gain a +1 bonus to AV and saving throws and can sense the location of any invisible hostile creature that is also in the bright light.
- ❖ The rod's head stops glowing and the effect ends after 10 minutes, or when a creature uses an action to pull the rod from the ground. This property can't be used again until the next dawn.

Rod of Lordly Might

Rod, legendary (requires attunement)

This rod functions as a magic mace that grants a +3 bonus to attack and damage rolls made with it. The rod has properties associated with six different buttons that are set in a row along the haft. It has three other properties as well, detailed below.

Six Buttons: You can press one of the Rod's six buttons as a bonus action. A button's effect lasts until you push a different button or until you push the same button again, which causes the rod to revert to its normal form.

If you press **button 1**, the rod becomes a Flame Tongue, as a fiery blade sprouts from the end opposite the rod's flanged head.

If you press **button 2**, the rod's flanged head folds down and two crescent, shaped blades spring out, transforming the rod into a magic battleaxe that grants a +3 bonus to attack and damage rolls made with it.

If you press **button 3**, the rod's flanged head folds down, a spear point springs from the rod's tip, and the rod's handle lengthens into a 2 m haft, transforming the rod into a magic spear that grants a +3 bonus to attack and damage rolls made with it.

If you press **button 4**, the rod transforms into a climbing pole up to 15 m long, as you specify. In surfaces as hard as granite, a spike at the bottom and three hooks at the top anchor the pole. Horizontal bars 10 cm long fold out from the sides, 30 cm apart, forming a ladder. The pole can bear up to 2,000 kg. More weight or lack of solid anchoring causes the rod to revert to its normal form.

If you press **button 5**, the rod transforms into a handheld battering ram and grants its user a +10 bonus to Brawn checks made to break through doors, barricades, and other barriers.

If you press **button 6**, the rod assumes or remains in its normal form and indicates magnetic north. (Nothing happens if this function of the rod is used in a location that has no magnetic north.) The rod also gives you knowledge of your approximate depth beneath the ground or your height above it.

Drain Life: When you hit a creature with a melee attack using the rod, you can force the target to make a DV 17 Vitality saving throw. On a failure, the target takes an extra 4d6 necrotic damage, and you regain a number of health points equal to half that necrotic damage. This property can't be used again until the next dawn.

Paralyze: When you hit a creature with a melee attack using the rod, you can force the target to make a DV 17 Brawn saving throw. On a failure, the target is paralyzed for 1 minute. The target can repeat the saving throw at the end of each of its turns, ending the effect on a success. This property can't be used again until the next dawn.

Terrify: While holding the rod, you can use an action to force each creature you can see within 6 m of you to make a DV 17 Resolve saving throw. On a failure, a target is frightened of you for 1 minute. A frightened target can repeat the saving throw at the end of each of its turns, ending the effect on itself on a success. This property can't be used again until the next dawn.

Rod of Rulership

Rod, rare (requires attunement)

You can use an action to present the rod and command obedience from each creature of your choice that you can see within 24 m of you. Each target must succeed on a DV 15 Composure saving throw or be charmed by you for 8 hours. While charmed in this way, the creature regards you as its trusted leader. If harmed by you or your companions, or commanded to do something contrary to its nature, a target ceases to be charmed in this way. The rod can't be used again until the next dawn.

Rod of Security

Rod, very rare

While holding this rod, you can use an action to activate it. The rod then instantly transports you and up to 199 other willing creatures you can see to a pocket Realm in Qedseba. You choose the form that this place takes. It could be a tranquil garden, lovely glade, cherry tavern, immense palace, tropical island, fantastic carnival, or whatever else you can imagine. Regardless of its nature, the pocket Realm contains enough water and food to sustain its visitors. Everything else that can be interacted with inside the pocket Realm can exist only there. For example, a flower picked from a garden in the pocket Realm disappears if it is taken outside the Realm.

For each hour spent in the pocket Realm, a visitor regains health points as if it had spent 1 Hit Die. Visitors can remain in the paradise for up to 200 days divided by the number of creatures present (round down).

When the time runs out or you use an action to end it, all visitors reappear in the location they occupied when you activated the rod, or an unoccupied space nearest that location. The rod can't be used again until ten days have passed.

Rope of Climbing

Wondrous item, uncommon

This 12 m length of silk rope weighs 1 kg and can hold up to 1,000 kg. If you hold one end of the rope and use an action to speak the command word, the rope animates. As a bonus action, you can command the other end to move toward a destination you choose. That end moves 2 m on your turn when you first command it and 2 m on each of your turns until reaching its destination, up to its maximum length away, or until you tell it to stop.

You can also tell the rope to fasten itself securely to an object or to unfasten itself, to knot or unknot itself, or to coil itself for carrying. If you tell the rope to knot, large knots appear at 30 cm intervals along the rope. While knotted, the rope shortens to a 15 m length and grants advantage on checks made to climb it. The rope has AV 20 and 20 health points. It regains 1 health point every 5 minutes as long as it has at least 1 health point. If the rope drops to 0 health points, it is destroyed.

Rope of Entanglement

Wondrous item, rare

This rope is 10 m long and weighs 1 kg. If you hold one end of the rope and use an action to speak its command word, the other end darts forward to entangle a creature you can see within 4 m of you. The target must succeed on a DV 15 Dexterity saving throw or become restrained.

You can release the creature by using a bonus action to speak a second command word. A target restrained by the rope can use an action to make a DV 15 Brawn or Dexterity check (target's choice). On a success, the creature is no longer restrained by the rope.

The rope has AV 20 and 20 health points. It regains 1 health point every 5 minutes as long as it has at least 1 health point. If the rope drops to 0 health points, it is destroyed.

Scarab of Protection

Wondrous item, legendary (requires attunement)

If you hold this medallion in your hand for 1 round, an inscription appears on its surface revealing its magical nature. It provides two benefits while it is on your person:

- ❖ You have advantage on saving throws against spells.
- ❖ The scarab has 12 charges. If you fail a saving throw against a vismancy spell or a harmful effect originating from an undead creature, you can use your reaction to expend 1 charge and turn the failed save into a successful one. The scarab crumbles into powder and is destroyed when its last charge is expended.

Scimitar of Speed

Weapon (scimitar), very rare (requires attunement)

You gain a +2 bonus to attack and damage rolls made with this magic weapon. In addition, you can make one attack with it as a bonus action on each of your turns.

Shield, +1, +2, or +3

Armor (shield), uncommon (+1), rare (+2), or very rare (+3)

While holding this shield, you have a bonus to AV determined by the shield's rarity. This bonus is in addition to the shield's normal bonus to AV.

Shield of Missile Attraction

Armor (shield), rare (requires attunement)

While holding this shield, you have resistance to damage from ranged weapon attacks.

Curse: This shield is cursed. Attuning to it curses you until you are targeted by the Greater Restoration spell or similar magic. Removing the shield fails to end the curse on you. Whenever a ranged weapon attack is made against a target within 2 m of you, the curse causes you to become the target instead.

Slippers of Spider Climbing

Wondrous item, uncommon (requires attunement)

While you wear these light shoes, you can move up, down, and across vertical surfaces and upside down along ceilings, while leaving your hands free. You have a climbing speed equal to your walking speed. However, the slippers don't allow you to move this way on a slippery surface, such as one covered by ice or oil.

Sovereign Glue

Wondrous item, legendary

This substance can form a permanent adhesive bond between any two objects. It must be stored in a jar or flask that has been coated inside with Oil of Slipperiness. When found, a container contains 5d100+50 gr. 50 grams of the glue can cover a 0.5 m square surface. The glue takes 1 minute to set. Once it has done so, the bond it creates can be broken only by the application of Universal Solvent or Oil of Etherealness, or with a Wish spell.

Spell Scroll

Scroll, varies

A spell scroll bears the words of a single spell, written in a mystical cipher. If the spell is of a school of magic that you have spells known from, you can read the scroll and cast its spell without providing any Soul components. Otherwise, the scroll is unintelligible.

Casting the spell by reading the scroll requires the spell's normal casting time. Once the spell is cast, the words on the scroll fade, and it crumbles to dust. If the casting is interrupted, the scroll is not lost. If the spell is of a higher level than you can normally cast, you must make an Ability Check using your spellcasting ability to determine whether you cast it successfully. The DV equals 10 + the spell's level. On a failed check, the spell disappears from the scroll with no other

effect. The level of the spell on the scroll determines the spell's saving throw DV and attack bonus, as well as the scroll's rarity, as shown in the spell scroll table.

Spell Scroll

Spell Level	Rarity	Save DV	Attack Bonus
Cantrip	Common	13	+5
1st	Common	13	+5
2nd	Uncommon	13	+5
3rd	Uncommon	15	+7
4th	Rare	15	+7
5th	Rare	17	+9
6th	Very rare	17	+9
7th	Very rare	18	+10
8th	Very rare	18	+10
9th	Legendary	19	+11

A spell on a spell scroll can be copied just as spells in spellbooks can be copied. When a spell is copied from a spell scroll, the copier must succeed on an Occult (Int) check with a DV equal to 10 + the spell's level. If the check succeeds, the spell is successfully copied. Whether the check succeeds or fails, the spell scroll is destroyed.

Spellguard Shield

Armor (shield), very rare (requires attunement)

While holding this shield, you have advantage on saving throws against spells and other magical effects, and spell attacks have disadvantage against you.

Sphere of Annihilation

Wondrous item, legendary

This 0.5 m diameter sphere is a hole in the World, hovering in space and stabilized by a magical field surrounding it. The sphere obliterates all matter it passes through and all matter that passes through it. Artifacts are the exception. Unless an artifact is susceptible to damage from a Sphere of Annihilation, it passes through the sphere unscathed. Anything else that touches the sphere but isn't wholly engulfed and obliterated by it takes 4d10 force damage.

The sphere is stationary until someone controls it. If you are within 12 m of an uncontrolled sphere, you can use an action to make a DV 25 Occult (Int) check. On a success, the sphere levitates in one direction of your choice, up to a number of m equal to your Intelligence modifier (minimum 1 m). On a failure, the sphere moves 2 m toward you. A creature whose space the sphere enters must succeed on a DV 13 Dexterity saving throw or be touched by it, taking 4d10 force damage.

If you attempt to control a sphere that is under another creature's control, you make an Occult (Int) check contested by the other creature's Occult (Int) check. The winner of the contest gains control of the sphere and can levitate it as normal.

If the sphere comes into contact with a Realm portal, such as that created by the Gate Spell, or an extradimensional space, such as that within a Portable Hole, the GM determines randomly what happens, using the following table.

d100	Result
01–50	The sphere is destroyed.
51–85	The sphere moves through the portal or into the extradimensional space.
86–00	A spatial rift sends each creature and object within 50 m of the sphere, including the sphere, to a random Realm.

Staff of Charming

Staff, rare (requires attunement by [Artistry], [Divine Bestowal], [Devotion], [Occult Student], [Pact], [Unique Ancestry] or [World Magic])

While holding this staff, you can use an action to expend 1 of its 10 charges to cast *Charm Person*, *Command*, or *Comprehend Languages* from it using your spell save DV. The staff can also be used as a magic quarterstaff.

If you are holding the staff and fail a saving throw against an Enchantment spell that targets only you, you can turn your failed save into a successful one. You can't use this property of the staff again until the next dawn. If you succeed on a save against an Enchantment spell that targets only you, with or without the staff's intervention, you can use your reaction to expend 1 charge from the staff and turn the spell back on its caster as if you had cast the spell. The staff regains 1d8+2 expended charges daily at dawn. If you expend the last charge, roll a d20. On a 1, the staff becomes a nonmagical quarterstaff.

Staff of Fire

Staff, very rare (requires attunement by [Divine Bestowal], [Occult Student], [Pact], [Unique Ancestry] or [World Magic])

You have resistance to fire damage while you hold this staff.

The staff has 10 charges. While holding it, you can use an action to expend 1 or more of its charges to cast one of the following spells from it, using your spell save DV: *Burning Hands* (1 charge), *Fireball* (3 charges), or *Wall of Fire* (4 charges). The staff regains 1d6 + 4 expended charges daily at dawn. If you expend the last charge, roll a d20. On a 1, the staff blackens, crumbles into cinders, and is destroyed.

Staff of Frost

Staff, very rare (requires attunement by [Divine Bestowal], [Occult Student], [Pact], [Unique Ancestry] or [World Magic])

You have resistance to cold damage while you hold this staff.

The staff has 10 charges. While holding it, you can use an action to expend 1 or more of its charges to cast one of the following spells from it, using your spell save DV: *Cone Of Cold* (5 charges), *Fog Cloud* (1 charge), *Ice Storm* (4 charges), or *Wall Of Ice* (4 charges). The staff regains 1d6 + 4 expended charges daily at dawn. If you expend the last charge, roll a d20. On a 1, the staff turns to water and is destroyed.

Staff of Healing

Staff, rare (requires attunement by [Divine Bestowal], [Occult Student], [Pact], [Unique Ancestry] or [World Magic])

This staff has 10 charges. While holding it, you can use an action to expend 1 or more of its charges to cast one of the following spells from it, using your spell save DV and spellcasting ability modifier: *Cure Wounds* (1 charge per Spell level, up to 4th), *Lesser Restoration* (2 charges), or *Mass Cure Wounds* (5 charges). The staff regains 1d6+4 expended charges daily at dawn. If you expend the last charge, roll a d20. On a 1, the staff vanishes in a flash of light, lost forever.

Staff of Power

Staff, very rare (requires attunement by [Divine Bestowal], [Occult Student], [Pact], [Unique Ancestry] or [World Magic])

This staff can be wielded as a magic quarterstaff that grants a +2 bonus to attack and damage rolls made with it. While holding it, you gain a +2 bonus to armor value, saving throws, and spell attack rolls.

The staff has 20 charges for the following properties. The staff regains 2d8+4 expended charges daily at dawn. If you expend the last charge, roll a d20. On a 1, the staff retains its +2 bonus to attack and damage rolls but loses all other properties. On a 20, the staff regains 1d8+2 charges.

Power Strike: When you hit with a melee attack using the staff, you can expend 1 charge to deal an extra 1d6 force damage to the target.

Spells: While holding this staff, you can use an action to expend 1 or more of its charges to cast one of the following spells from it, using your spell save DV and spell attack bonus: Cone Of Cold (5 charges), Fireball (5th-level version, 5 charges), Globe Of Invulnerability (6 charges), Hold Monster (5 charges), Levitate (2 charges), Lightning Bolt (5th-level version, 5 charges), Magic Missile (1 charge), Ray Of Enfeeblement (1 charge), or Wall of Force (5 charges).

Retributive Strike: You can use an action to break the staff over your knee or against a solid surface, performing a Retributive Strike. The staff is destroyed and releases its remaining magic in an explosion that expands to fill a 9 m radius sphere centered on it. You have a 50 percent chance to instantly travel to a random Realm, avoiding the explosion. If you fail to avoid the effect, you take force damage equal to 16× the number of charges in the staff.

Every other creature in the area must make a DV 17 Dexterity saving throw. On a failed save, a creature takes an amount of damage based on how far away it is from the point of origin, as shown in the following table. On a successful save, a creature takes half as much damage.

Distance from Origin	Damage
3 m away or closer	8 × the number of charges in the staff
3.1 to 6 m away	6 × the number of charges in the staff
6.1 to 9 m away	4 × the number of charges in the staff

Staff of Striking

Staff, very rare (requires attunement)

This staff can be wielded as a magic quarterstaff that grants a +3 bonus to attack and damage rolls made with it.

The staff has 10 charges. When you hit with a melee attack using it, you can expend up to 3 of its charges. For each charge you expend, the target takes an extra 1d6 force damage. The staff regains 1d6+4 expended charges daily at dawn. If you expend the last charge, roll a d20. On a 1, the staff becomes a nonmagical quarterstaff.

Staff of Swarming Insects

Staff, rare (requires attunement by [Divine Bestowal], [Occult Student], [Pact], [Unique Ancestry] or [World Magic])

This staff has 10 charges and regains 1d6+4 expended charges daily at dawn. If you expend the last charge, roll a d20. On a 1, a *swarm of insects* consumes and destroys the staff, then disperses.

Spells: While holding the staff, you can use an action to expend some of its charges to cast one of the following spells from it, using your spell save DV: *Giant Insect* (4 charges) or *Insect Plague* (5 charges).

Insect Cloud: While holding the staff, you can use an action and expend 1 charge to cause a swarm of harmless flying insects to spread out in a 6 m radius from you. The insects remain for 10 minutes, making the area heavily obscured for creatures other than you. The swarm moves with you, remaining centered on you. A wind of at least 5 m/s disperses the swarm and ends the effect.

Staff of the Magi

Staff, very rare (requires attunement by [Divine Bestowal], [Occult Student], [Pact], [Unique Ancestry] or [World Magic])

This staff can be wielded as a magic quarterstaff that grants a +2 bonus to attack and damage rolls made with it. While you hold it, you gain a +2 bonus to spell attack rolls.

The staff has 50 charges for the following properties. It regains 4d6+2 expended charges daily at dawn. If you expend the last charge, roll a d20. On a 20, the staff regains 1d12+1 charges.

Spell Absorption: While holding the staff, you have advantage on saving throws against spells. In addition, you can use your reaction when another creature casts a spell that targets only you. If you do, the staff absorbs the magic of the spell, canceling its effect and gaining a number of charges equal to the absorbed spell's level. However, if doing so brings the staff's total number of charges above 50, the staff explodes as if you activated its retributive strike (see below).

Spells: While holding the staff, you can use an action to expend some of its charges to cast one of the following spells from it, using your spell save DV and spellcasting ability: Conjure Elemental (7 charges), Dispel Magic (3 charges), Fireball (7th--level version, 7 charges), Flaming Sphere (2 charges), Ice Storm (4 charges), Invisibility (2 charges), Knock (2 charges), Lightning Bolt (7th level version, 7 charges), Passwall (5 charges), Realm Shift (7 charges),

The staff has 20 charges for the following properties. The staff regains 2d8+4 expended charges daily at dawn. If you expend the last charge, roll a d20. On a 1, the staff retains its +2 bonus to attack and damage rolls but loses all other properties. On a 20, the staff regains 1d8 +2 charges.

Power Strike: When you hit with a melee attack using the staff, you can expend 1 charge to deal an extra 1d6 force damage to the target.

Spells: While holding this staff, you can use an action to expend 1 or more of its charges to cast one of the following spells from it, using your spell save DV and spell attack bonus: Cone Of Cold (5 charges), Fireball (5th--level version, 5 charges), Globe of Invulnerability (6 charges), Hold Monster (5 charges), Levitate (2 charges), Lightning Bolt (5th--level version, 5 charges), Magic Missile (1 charge), Ray of Enfeeblement (1 charge), or Wall of Force (5 charges).

Retributive Strike: You can use an action to break the staff over your knee or against a solid surface, performing a retributive strike. The staff is destroyed and releases its remaining magic in an explosion that expands to fill a 9 m radius sphere centered on it.

You have a 50 percent chance to instantly travel to a random Realm, avoiding the explosion. If you fail to avoid the effect, you take force damage equal to 16 × the number of charges in the staff. Every other creature in the area must make a DV 17 Dexterity saving throw. On a failed save, a creature takes an amount of damage based on how far away it is from the point of origin, as shown in the following table. On a successful save, a creature takes half as much damage.

Distance from Origin	Damage
3 m away or closer	8 × the number of charges in the staff
3.1 to 6 m away	6 × the number of charges in the staff
6.1 to 9 m away	4 × the number of charges in the staff

Staff of Striking

Staff, very rare (requires attunement)

This staff can be wielded as a magic quarterstaff that grants a +3 bonus to attack and damage rolls made with it.

The staff has 10 charges. When you hit with a melee attack using it, you can expend up to 3 of its charges. For each charge you expend, the target takes an extra 1d6 force damage. The staff regains 1d6 + 4 expended charges daily at dawn. If you expend the last charge, roll a d20. On a 1, the staff becomes a nonmagical quarterstaff.

Staff of the Woodlands

Staff, rare (requires attunement by [World Magic])

This staff can be wielded as a magic quarterstaff that grants a +2 bonus to attack and damage rolls made with it. While holding it, you have a +2 bonus to spell attack rolls.

The staff has 10 charges for the following properties. It regains 1d6+4 expended charges daily at dawn. If you expend the last charge, roll a d20. On a 1, the staff loses its properties and becomes a nonmagical quarterstaff.

Spells: You can use an action to expend 1 or more of the staff's charges to cast one of the following spells from it, using your spell save DV: *Animal Connection* (1 charge), *Awaken* (5 charges), *Barkskin* (2 charges), *Locate Animals Or Plants* (2 charges), *Beast Bond* (1 charge), or *Wall of Thorns* (6 charges).

You can also use an action to cast the *Pass Without Trace* spell from the staff without using any charges.

Tree Form: You can use an action to plant one end of the staff in fertile earth and expend 1 charge to transform the staff into a healthy tree. The tree is 12 m tall and has a 1 m diameter trunk, and its branches at the top spread out in a 4 m. The tree appears ordinary but radiates a faint aura of transmutation magic if targeted by *Detect Magic*. While touching the tree and using another action to speak its command word, you return the staff to its normal form. Any creature in the tree falls when it reverts to a staff.

Staff of Thunder and Lightning

Staff, very rare (requires attunement)

This staff can be wielded as a magic quarterstaff that grants a +2 bonus to attack and damage rolls made with it. It also has the following additional properties. When one of these properties is used, it can't be used again until the next dawn.

Lightning: When you hit with a melee attack using the staff, you can cause the target to take an extra 2d6 lightning damage.

Thunder: When you hit with a melee attack using the staff, you can cause the staff to emit a crack of thunder, audible out to 100 m. The target you hit must succeed on a DV 17 Vitality saving throw or become stunned until the end of your next turn.

Lightning Strike: You can use an action to cause a bolt of lightning to leap from the staff's tip in a line that is 1 m wide and 24 m long. Each creature in that line must make a DV 17 Dexterity saving throw, taking 9d6 lightning damage on a failed save, or half as much damage on a successful one.

Thunderclap: You can use an action to cause the staff to issue a deafening thunderclap, audible out to 200 m. Each creature within 12 m of you (not including you) must make a DV 17 Vitality saving throw. On a failed save, a creature takes 2d6 thunder damage and becomes deafened for 1 minute. On a successful save, a creature takes half damage and isn't deafened.

Thunder and Lightning: You can use an action to use the Lightning Strike and Thunderclap properties at the same time. Doing so doesn't expend the daily use of those properties, only the use of this one.

Staff of Withering

Staff, rare (requires attunement by a [Divine Bestowal], [Devotion], [Pact or World Magic])

This staff has 3 charges and regains 1d3 expended charges daily at dawn. The staff can be wielded as a magic quarterstaff. On a hit, it deals damage as a normal quarterstaff, and you can expend 1 charge to deal an extra 2d10 necrotic damage to the target. In addition, the target must succeed on a DV 15 Vitality saving throw or have disadvantage for 1 hour on any ability check or saving throw that uses Brawn or Vitality.

Stone of Controlling Earth Elementals

Wondrous item, rare

If the stone is touching the ground, you can use an action to speak its command word and summon an *earth elemental*, as if you had cast the *Conjure Elemental* spell. The stone can't be used this way again until the next dawn. The stone weighs 2 kg.

Stone of Good Luck (Luckstone)

Wondrous item, uncommon (requires attunement)

While this polished agate is on your person, you gain a +1 bonus to ability checks and saving throws.

Sun Blade

Weapon (any sword), rare (requires attunement)

This item appears to be a sword hilt. While grasping the hilt, you can use a bonus action to cause a blade of pure radiance to spring into existence, or make the blade disappear. While the blade exists, this magic sword has the finesse property.

You gain a +2 bonus to attack and damage rolls made with this weapon, which deals radiant damage instead of slashing damage. When you hit an undead with it, that target takes an extra 1d8 radiant damage.

The sword's luminous blade emits bright light in a 3 m radius and dim light for an additional 3 m. The light is sunlight. While the blade persists, you can use an action to expand or reduce its radius of bright and dim light by 1 m each, to a maximum of 6 m each or a minimum of 2 m each.

Sword of Life Stealing

Weapon (any sword), rare (requires attunement)

When you attack a creature with this magic weapon and roll a 20 on the attack roll, that target takes an extra 3d6 necrotic damage, provided that the target isn't a construct or an undead. You gain temporary health points equal to the extra damage dealt.

Sword of Sharpness

Weapon (any sword that deals slashing damage), very rare (requires attunement)

When you attack an object with this magic sword and hit, maximize your weapon damage dice against the target.

When you attack a creature with this weapon and roll a 20 on the attack roll, that target takes an extra 4d6 slashing damage. Then roll another d20. If you roll a 20, you lop off one of the target's limbs, with the effect of such loss determined by the GM. If the creature has no limb to sever, you lop off a portion of its body instead. In addition, you can speak the sword's command word to cause the blade to shed bright light in a 2 m radius and dim light for an additional 2 m. Speaking the command word again or sheathing the sword puts out the light.

Sword of Wounding

Weapon (any sword), rare (requires attunement)

Health points lost to this weapon's damage can be regained only through a short or long rest, rather than by regeneration, magic, or any other means. Once per turn, when you hit a creature with an attack using this magic weapon, you can wound the target. At the start of each of the wounded creature's turns, it takes 1d4 necrotic damage for each time you've wounded it, and it can then make a DV 15 Vitality saving throw, ending the effect of all such wounds on itself on a success. Alternatively, the wounded creature, or a creature within 1 m of it, can use an action to make a DV 15 Medicine (Cun) check, ending the effect of such wounds on it on a success.

Talisman of the Sphere

Wondrous item, legendary (requires attunement)

When you make an Occult (Int) check to control a *Sphere Of Annihilation* while you are holding this talisman, you double your proficiency bonus on the check. In addition, when you start your turn with control over a *Sphere Of Annihilation*, you can use an action to levitate it 2 m plus a number of additional m equal to $10 \times$ your Intelligence modifier.

Tome of Clear Thought

Wondrous item, very rare

If you spend 48 hours over a period of 6 days or fewer studying the book's contents and practicing its guidelines, your Intelligence score increases by 2, as does your maximum for that score. The manual then loses its magic, but regains it in a century.

Tome of Leadership and Influence

Wondrous item, very rare

If you spend 48 hours over a period of 6 days or fewer studying the book's contents and practicing its guidelines, your Manipulation score increases by 2, as does your maximum for that score. The manual then loses its magic, but regains it in a century.

Tome of Understanding

Wondrous item, very rare

If you spend 48 hours over a period of 6 days or fewer studying the book's contents and practicing its guidelines, your Cunning score increases by 2, as does your maximum for that score. The manual then loses its magic, but regains it in a century.

Trident of Fish Command

Weapon (trident), uncommon (requires attunement)

This trident is a magic weapon. It has 3 charges. While you carry it, you can use an action and expend 1 charge to cast *Dominare Beast* (save DV 15) from it on a beast that has an innate swimming speed. The trident regains 1d3 expended charges daily at dawn.

Universal Solvent

Wondrous item, legendary

This tube holds milky liquid with a strong alcohol smell. You can use an action to pour the contents of the tube onto a surface within reach. The liquid instantly dissolves up to 1 square m of adhesive it touches, including *Sovereign Glue*.

Vicious Weapon

Weapon (any), rare

When you roll a 20 on your attack roll with this magic weapon, your critical hit deals an extra 2d6 damage of the weapon's type.

Vorpal Sword

Weapon (any sword that deals slashing damage), legendary (requires attunement)

You gain a +3 bonus to attack and damage rolls made with this magic weapon. In addition, the weapon ignores resistance to slashing damage. When you attack a creature that has at least one head with this weapon and roll a 20 on the attack roll, you cut off one of the creature's heads. The creature dies if it can't survive without the lost head.

A creature is immune to this effect if it is immune to slashing damage, doesn't have or need a head, has legendary actions, or the GM decides that the creature is too big for its head to be cut off with this weapon. Such a creature instead takes an extra 6d8 slashing damage from the hit.

Wand of Binding

Wand, rare (requires attunement by a spellcaster)

This wand has 7 charges for the following properties. It regains 1d6+1 expended charges daily at dawn. If you expend the wand's last charge, roll a d20. On a 1, the wand crumbles into ashes and is destroyed.

Spells: While holding the wand, you can use an action to expend some of its charges to cast one of the following spells (save DV 17): Hold Monster (5 charges) or Hold Person (2 charges).

Assisted Escape: While holding the wand, you can use your reaction to expend 1 charge and gain advantage on a saving throw you make to avoid being paralyzed or restrained, or you can expend 1 charge and gain advantage on any check you make to escape a grapple.

Wand of Enemy Detection

Wand, rare (requires attunement)

This wand has 7 charges. While holding it, you can use an action and expend 1 charge to speak its command word. For the next minute, you know the direction of the nearest creature hostile to you within 12 m, but not its distance from you. The wand can sense the presence of hostile creatures that are ethereal, invisible, disguised, or hidden, as well as those in plain sight. The effect ends if you stop holding the wand.

The wand regains 1d6+1 expended charges daily at dawn. If you expend the wand's last charge, roll a d20. On a 1, the wand crumbles into ashes and is destroyed.

Wand of Fear

Wand, rare (requires attunement)

This wand has 7 charges for the following properties. It regains 1d6+1 expended charges daily at dawn. If you expend the wand's last charge, roll a d20. On a 1, the wand crumbles into ashes and is destroyed.

Command: While holding the wand, you can use an action to expend 1 charge and command another creature to flee or grovel, as with the Command spell (save DV 15).

Cone of Fear: While holding the wand, you can use an action to expend 2 charges, causing the wand's tip to emit a 12 m cone of amber light. Each creature in the cone must succeed on a DV 15 Resolve saving throw or become frightened of you for 1 minute. While it is frightened in this way, a creature must spend its turns trying to move as far away from you as it can, and it can't willingly move to a space within 6 m of you. It also can't take reactions. For its action, it can use only the dash action or try to escape from an effect that prevents it from moving. If it has nowhere it can move, the creature can use the dodge action. At the end of each of its turns, a creature can repeat the saving throw, ending the effect on itself on a success.

Wand of Fireballs

Wand, rare (requires attunement by a spellcaster)

This wand has 7 charges. While holding it, you can use an action to expend 1 or more of its charges to cast the *Fireball* spell (save DV 15) from it. For 1 charge, you cast the 3rd-level version of the spell. You can increase the spell slot level by one for each additional charge you expend. The wand regains 1d6+1 expended charges daily at dawn. If you expend the wand's last charge, roll a d20. On a 1, the wand crumbles into ashes and is destroyed.

Wand of Lightning Bolts

Wand, rare (requires attunement by a spellcaster)

This wand has 7 charges. While holding it, you can use an action to expend 1 or more of its charges to cast the *Lightning Bolt* spell (save DV 15) from it. For 1 charge, you cast the 3rd-level version of the spell. You can increase the spell slot level by one for each additional charge you expend. The wand regains 1d6+1 expended charges daily at dawn. If you expend the wand's last charge, roll a d20. On a 1, the wand crumbles into ashes and is destroyed.

Wand of Magic Detection

Wand, uncommon

This wand has 3 charges. While holding it, you can expend 1 charge as an action to cast the *Detect Magic* spell from it. The wand regains 1d3 expended charges daily at dawn.

Wand of Magic Missiles

Wand, uncommon

This wand has 7 charges. While holding it, you can use an action to expend 1 or more of its charges to cast the magic missile spell from it. For 1 charge, you cast the 1st-level version of the spell. You can increase the spell slot level by one for each additional charge you expend. The wand regains 1d6+1 expended charges daily at dawn. If you expend the wand's last charge, roll a d20. On a 1, the wand crumbles into ashes and is destroyed.

Wand of Paralysis

Wand, rare (requires attunement by a spellcaster)

This wand has 7 charges. While holding it, you can use an action to expend 1 of its charges to cause a thin blue ray to streak from the tip toward a creature you can see within 12 m of you. The target must succeed on a DV 15 Vitality saving throw or be paralyzed for 1 minute. At the end of each of the target's turns, it can repeat the saving throw, ending the effect on itself on a success. The wand regains 1d6+1 expended charges daily at dawn. If you expend the wand's last charge, roll a d20. On a 1, the wand crumbles into ashes and is destroyed.

Wand of Polymorph

Wand, very rare (requires attunement by a spellcaster)

This wand has 7 charges. While holding it, you can use an action to expend 1 of its charges to cast the *Polymorph* spell (save DV 15) from it. The wand regains 1d6+1 expended charges daily at dawn. If you expend the wand's last charge, roll a d20. On a 1, the wand crumbles into ashes and is destroyed.

Wand of Secrets

Wand, uncommon

The wand has 3 charges. While holding it, you can use an action to expend 1 of its charges, and if a secret door or trap is within 6 m of you, the wand pulses and points at the one nearest to you. The wand regains 1d3 expended charges daily at dawn.

Wand of the War Mage, +1, +2, or +3

Wand, uncommon (+1), rare (+2), or very rare (+3) (requires attunement by a spellcaster)

While holding this wand, you gain a bonus to spell attack rolls determined by the wand's rarity. In addition, you ignore half cover when making a spell attack.

Wand of Web

Wand, uncommon (requires attunement by a spellcaster)

This wand has 7 charges. While holding it, you can use an action to expend 1 of its charges to cast the *Web* spell (save DV 15) from it. The wand regains 1d6+1 expended charges daily at dawn. If you expend the wand's last charge, roll a d20. On a 1, the wand crumbles into ashes and is destroyed.

Wand of Wonder

Wand, rare (requires attunement by a spellcaster)

This wand has 7 charges. While holding it, you can use an action to expend 1 of its charges and choose a target within 24 m of you. The target can be a creature, an object, or a point in space. Roll d100 and consult the following table to discover what happens. If the effect causes you to cast a spell from the wand, the spell's save DV is 15. If the spell normally has a range expressed in m, its range becomes 24 m if it isn't already.

If an effect covers an area, you must center the spell on and include the target. If an effect has multiple possible subjects, the GM randomly determines which ones are affected. The wand regains 1d6+1 expended charges daily at dawn. If you expend the wand's last charge, roll a d20. On a 1, the wand crumbles into dust and is destroyed.

d100	Effect
01–05	You cast <i>Slow</i> .
06–10	You cast <i>Faerie Fire</i> .
11–15	You are stunned until the start of your next turn, believing something awesome just happened.
16–20	You cast <i>Gust Of Wind</i> .
21–25	You cast <i>Detect Thoughts</i> on the target you chose. If you didn't target creature, you instead take 1d6 psychic damage.
26–30	You cast <i>Stinking Cloud</i> .
31–33	Heavy rain falls in a 12 m radius centered on the target. The area becomes lightly obscured. The rain falls until the start of your next turn.
34–36	An animal appears in the unoccupied space nearest the target. The animal isn't under your control and acts as it normally would. Roll a d100 to determine which animal appears. On a 01–25, a <i>rhinoceros</i> appears; on a 26–50, an <i>elephant</i> appears; and on a 51–100, a <i>rat</i> appears.
37–46	You cast <i>Lightning Bolt</i> .
47–49	A cloud of 600 oversized butterflies fills a 6 m radius centered on the target. The area becomes heavily obscured. The butterflies remain for 10 minutes.
50–53	You enlarge the target as if you had cast <i>Enlarge/Reduce</i> . If the target can't be affected by that spell, or if you didn't target a creature, you become the target.
54–58	You cast <i>Darkness</i> .
59–62	Grass grows on the ground in a 12 m radius centered on the target. If grass is already there, it grows to ten times its normal size and remains overgrown for 1 minute.
63–65	An object of the GM's choice disappears into the Ethereal Dimension. The object must be neither worn nor carried, within 24 m of the target, and no larger than 2 m in any dimension.
66–69	You shrink yourself as if you had cast <i>Enlarge/Reduce</i> on yourself.
70–79	You cast <i>Fireball</i> .
80–84	You cast <i>Invisibility</i> on yourself.
85–87	Leaves grow from the target. If you chose a point in space as the target, leaves sprout from the creature nearest to that point. Unless they are picked off, the leaves turn brown and fall off after 24 hours.
88–90	A stream of 1d4 × 10 gems, each worth 1 gp, shoots from the wand's tip in a line 6 m long and 1 m wide. Each gem deals 1 bludgeoning damage, and the total damage of the gems is divided equally among all creatures in the line.
91–95	A burst of colorful shimmering light extends from you in a 6 m radius. You and each creature in the area that can see must succeed on a DV 15 Vitality saving throw or become blinded for 1 minute. A creature can repeat the saving throw at the end of each of its turns, ending the effect on itself on a success.
96–97	The target's skin turns bright blue for 1d10 days. If you chose a point in space, the creature nearest to that point is affected.
98–00	If you targeted a creature, it must make a DV 15 Vitality saving throw. If you didn't target a creature, you become the target and must make the saving throw. If the saving throw fails by 5 or more, the target is instantly petrified. On any other failed save, the target is restrained and begins to turn to stone. While

restrained in this way, the target must repeat the saving throw at the end of its next turn, becoming petrified on a failure or ending the effect on a success. The petrification lasts until the target is freed by the *Greater Restoration* spell or similar magic.

Weapon, +1, +2, or +3

Weapon (any), uncommon (+1), rare (+2), or very rare (+3)

You have a bonus to attack and damage rolls made with this magic weapon. The bonus is determined by the weapon's rarity.

Well of Many Worlds

Wondrous item, legendary

This cloth is folded up to the dimensions of a handkerchief. It unfolds into a circular sheet 2 m in diameter. You can use an action to unfold and place the well of many worlds on a solid surface, whereupon it creates a two-way portal to another Realm, Stellar Expanse or Ethereal Dimension. Each time the item opens a portal, the GM decides where it leads. You can use an action to close an open portal by taking hold of the edges of the cloth and folding it up. Once the Well Of Many Worlds has opened a portal, it can't do so again for 1d8 hours.

Wind Fan

Wondrous item, uncommon

While holding this fan, you can use an action to cast the *Gust Of Wind* spell (save DV 13) from it. Once used, the fan shouldn't be used again until the next dawn. Each time it is used again before then, it has a cumulative 20 percent chance of not working and tearing into useless, nonmagical tatters.

Winged Boots

Wondrous item, uncommon (requires attunement)

While you wear these boots, you have a flying speed equal to your walking speed. You can use the boots to fly for up to 4 hours, all at once or in several shorter flights, each one using a minimum of 1 minute from the duration. If you are flying when the duration expires, you descend at a rate of 6 m per round until you land. The boots regain 2 hours of flying capability for every 12 hours they aren't in use.

Wings of Flying

Wondrous item, rare (requires attunement)

While wearing this cloak, you can use an action to speak its command word. This turns the cloak into a pair of bat wings or bird wings on your back for 1 hour or until you repeat the command word as an action. The wings give you a flying speed of 12 m. When they disappear, you can't use them again for 1d12 hours.

Sentient Magic Items

Some magic items possess sentience and personality. Such an item might be possessed by a willful Soul or self-aware thanks to the magic used to create it. In any case, the item behaves like a character, complete with personality quirks, dreams and flaws. A sentient item might be a cherished ally to its wielder or a continual thorn in the side.

Most sentient items are weapons. Other kinds of items can manifest sentience, but consumable items such as potions and scrolls are never sentient. Sentient magic items function as NPCs under the GM's control. Any activated property of the item is under the item's control, not its wielder's. As long as the wielder maintains a good relationship with the item, the wielder can access those properties normally. If the relationship is strained, the item can suppress its activated properties or even turn them against the wielder.

Creating Sentient Magic Items

When you decide to make a magic item sentient, you create the item's persona in the same way you would create an NPC, with a few exceptions described here.

Abilities

A sentient magic item has mental and social Ability Scores. You can choose the item's abilities or determine them randomly. To determine them randomly, roll 4d6 for each one, dropping the lowest roll and totaling the rest.

Communication

A sentient item has some ability to communicate, either by sharing its emotions, broadcasting its thoughts telepathically, or speaking aloud. You can choose how it communicates or roll on the following table.

d100	Communication
01–60	The item communicates by transmitting emotion to the creature carrying or wielding it.
61–90	The item can speak, read, and understand one or more languages.
91–00	The item can speak, read, and understand one or more languages. In addition, the item can communicate telepathically with any character that carries or wields it.

Senses

With sentience comes awareness. A sentient item can perceive its surroundings out to a limited range. You can choose its senses or roll on the following table.

d4	Senses
1	Hearing and normal vision out to 6 m.
2	Hearing and normal vision out to 12 m.
3	Hearing and normal vision out to 24 m.
4	Hearing and darkvision out to 24 m.

Special Purpose

You can give a sentient item an objective it pursues, perhaps to the exclusion of all else. As long as the wielder's use of the item aligns with that special purpose, the item remains cooperative. Deviating from this course might cause conflict between the wielder and the item, and could even cause the item to prevent the use of its activated properties. You can pick a special purpose or roll on the following table.

d10	Purpose
1	Aligned: The item seeks to defeat or destroy those of a particular faction
2	Bane: The item seeks to defeat or destroy creatures of a particular kind, such as fiends, shapechangers, trolls, or World magicians.
3	Protector: The item seeks to defend a particular race or kind of creature, such as elves or those afflicted with [Divine Bestowal].
4	Crusader: The item seeks to defeat, weaken, or destroy the servants of a particular deity.
5	Templar: The item seeks to defend the servants and interests of a particular deity.
6	Destroyer: The item craves destruction and goads its user to fight arbitrarily.
7	Glory Seeker: The item seeks renown as the greatest magic item in the world, by establishing its user as a famous or notorious figure.
8	Lore Seeker: The item craves knowledge or is determined to solve a mystery, learn a secret, or unravel a cryptic prophecy.
9	Destiny Seeker: The item is convinced that it and its wielder have key roles to play in future events.
10	Creator Seeker: The item seeks its creator and wants to understand why it was created.

Conflict

A sentient item has a will of its own, shaped by its personality and goals. If its wielder acts in a manner opposed to the item's personality or purpose, conflict can arise. When such a conflict occurs, the item makes a Presence check contested by the wielder's Presence check. If the item wins the contest, it makes one or more of the following demands:

- ❖ The item insists on being carried or worn at all times.
- ❖ The item demands that its wielder dispose of anything the item finds repugnant.
- ❖ The item demands that its wielder pursue the item's goals to the exclusion of all other goals.
- ❖ The item demands to be given to someone else. If its wielder refuses to comply with the item's wishes, the item can do any or all of the following:
 - ❖ Make it impossible for its wielder to attune to it.
 - ❖ Suppress one or more of its activated properties.
 - ❖ Attempt to take control of its wielder.

If a sentient item attempts to take control of its wielder, the wielder must make a Composure saving throw, with a DV equal to 12 + the item's Resolve modifier. On a failed save, the wielder is charmed by the item for 1d12 hours. While charmed, the wielder must try to follow the item's commands. If the wielder takes damage, it can repeat the saving throw, ending the effect on a success. Whether the attempt to control its user succeeds or fails, the item can't use this power again until the next dawn.

Soul Gems

These clear crystals, named Ya'ami, were one of Ya'ammu's, the dead Enneade of magic and sacrifice, creations in the Age of Genesis. Ya'ami crystals have extraordinary capabilities of trapping Potency within their matrix, creating patches of swirling color within the otherwise clear rock. Natural crystals in the wild are able to draw Souls in their vicinity and hold them within for about 7 days.

Researchers of magic later discovered that the crystal could be permanently induced with Potency by chiseling a Soul Mark pattern on it and sacrificing Souls to it, just like how a spellcaster would gain their abilities. If successful, these crystals are renamed Soul Gems, increasing their capacity of Soul storage. Souls captured within are trapped for as long as the Soul Gem remains intact.

These crystals can be found randomly within Realms' crusts but are generally as rare as adamantium. The Ya'ami crystal can be found with different purities. The purer the crystal is, the rarer and stronger it is. Besides the magical mastery needed to create a Soul Gem, as mentioned above, Potency must be consumed to transform the crystal into a Soul Gem.

Souls required to create a Soul Gem

Gem	Total Potency	Minimum Soul Power
Murky	2 Potency	The Soul Consumed must be Potency 2
Blemished	4 Potency	1 Soul of at least Potency
Fair	6 Potency	1 Soul of at least Potency
Flawless	8 Potency	1 Soul of at least Potency
Immaculate	10 Potency	1 Soul of at least Potency

Just like a seashell, when holding a Soul Gem with Souls within it up to the ear, sometimes a strong and willful soul within can whisper words, broken sentences, or roar.

Murky Soul Gem

Wondrous item, Common

This Ya'ami crystal is clouded in impurities. This crystal can store at maximum 2 Potency and no single Soul may be of a higher Potency than 1.

Blemished Soul Gem

Wondrous item, Uncommon

This Ya'ami crystal is like an inverted night sky, full of small black stars within. This crystal can store at a maximum of 5 Potency and no single Soul may be of a Potency level than 2.

Fair Soul Gem

Wondrous item, Rare

This Ya'ami crystal possesses a few specks of impurities. This crystal can store at a maximum of 10 Potency and no single Soul may be of a higher Potency than 3.

Flawless Soul Gem

Wondrous item, Very Rare

This Ya'ami crystal's impurities are too small to see with the naked eye. This crystal can store at maximum 15 Potency and no single Soul may be of a higher Potency than 4.

Immaculate Soul Gem

Wondrous item, Legendary

This Ya'ami crystal is completely pure. This crystal can store at maximum 20 Potency and has no Potency limit of Souls it can store.

PLAYING FROSTMARK

[Here](#) are the rules of combat and some other handy rules to have for your Frostmark game. Remember, that rules can be broken. It is up to the individual GM what kind of game they want to run and what kind of rules support that best.

Ability Score and Modifiers

The most common rolls of the game are the ability score check, skill check, saving throw and the attack roll. All of them depend upon nine ability scores which can read more about in the character creation section. These checks are normally rolled like:

1d20 + ability score modifier + proficiency (if applied) and compared to a target number

Ability scores consist both of innate talent and experience, where 10 is the normal human average and a score of 18 is usually the highest a human can achieve. As heroes, you can have scores as high as 20, but creatures and other beings can have scores as high as 30. Every ability score has a modifier which can be found under the character creation section. For ability scores higher or lower than presented there, just follow the same pattern (-5 for 1 and +10 for an ability score of 30).

Advantage and Disadvantage

Sometimes either the GM (circumstances influence the chances) or a special trait you possess will tell you that you have advantage or disadvantage on an ability check or a skill check. When advantage is asked for you roll two d20s and keep the highest result, and when disadvantage is called you roll two d20s and keep the lowest. If two sources would ask for advantage or disadvantage you still only roll a maximum of two d20s. On the other hand, if you would be laden with advantage and disadvantage you only roll one d20, the two cancel each other out.

Proficiency Bonus

Your proficiency bonus is a bonus your character acquires as they gain experience, as such determined by level. Enemy templates also have this bonus but are included in its statistics. You can only add your proficiency bonus to a test once, but abilities may enable you to double it or divide it.

Proficiency Bonus / Level

Level	Proficiency	Level	Proficiency
1st	+2	11th	+4
2nd	+2	12th	+4
3rd	+2	13th	+5
4th	+2	14th	+5
5th	+3	15th	+5
6th	+3	16th	+5
7th	+3	17th	+6
8th	+3	18th	+6
9th	+4	19th	+6
10th	+4	20th	+6

Ability and Skill Checks

Ability and skill checks are performed when there is an effort to overcome a challenge, where there is a chance for failure. For every check, the GM decides which ability and/or skill is used and how difficult the task is. This is measured through difficulty value (DV). When rolling a check against a DV you succeed when your result is equal to, or higher than the DV.

Task Difficulty	DV
Very easy	5
Easy	10
Medium	15
Hard	20
Very hard	25
Nearly impossible	30

Contests

When an action is contested by another creature, trying to do the same things or directly stop another, it is a contested check. The GM establishes which checks should be made in a contest and the one with the highest result wins the contest. If it turns out to be a tie nothing in the situation changes.

Passive Checks

Passive checks don't involve any die rolls, instead, it is the average result for a task. A passive check is calculated as follows:

10 + all the modifiers that normally apply to the check

This kind of check is useful when a task is done repeatedly and continues rolling turn exhausting, or when the GM wants to secretly determine if the characters notice something hidden. If the check would somehow have advantage, add 5, if it would have disadvantage subtract 5.

Teaming Up

When two characters team up for a check, the one with the highest ability modifier or the one who is leading the effort rolls with advantage, if it is a skill that benefits from two people. Another player can only help in the task if the GM believes they are able, for example, picking a lock requires both to have proficiency with thieves' tools.

The whole group can also make checks together when the whole group is attempting something together. Everyone in the group rolls and if at least half the group succeeds the entire group succeeds as well. In the same way, if at least half the group fails, the entire group fails as well.

Using Each Ability Score

Brawn

Brawn measures bodily power, athletic training, and raw physical force. With Brawn, you can attempt to lift, push, pull, or break something. Examples could be forced open obstacles, break free of bonds, hang on to a rope, etc.

Arts & Crafts (Br): If crafting would take some considerable physical power, like blacksmithing or carpentry, the GM may call for Brawn.

Athletics (Br): Used for example climbing, jumping, swimming, etc.

Carrying Capacity = Brawn * 5 (kg)

Push, Drag or Lift = Brawn * 10 (kg) - your speed drops to 1 m

Size and Brawn: For each size category above Medium, double the carrying capacity and the amount it can push, drag, and lift. For a tiny creature, half these weights.

Optional Rule: Encumbrance

The rules for lifting and carrying are intentionally simple. Here is a variant if you are looking for more detailed rules for determining how a character is hindered by the weight of equipment. When you use this variant, ignore the Brawn column of the armor table in the character creation chapter.

- ❖ If your carry weight is more than 5 times your Brawn score, you are *encumbered*, which means your speed drops by 2 m.
- ❖ If you carry weight over 10 times your Brawn score, up to your maximum carrying capacity, you are instead *heavily encumbered*, which means your speed drops by 4 m and you have disadvantage on ability checks, attack rolls, and saving throws that use Brawn, Dexterity, or Vitality.

Dexterity

Moving nimbly, quickly, or quietly with balance. Examples could be controlling a heavily laden cart on a steep descent, steer a chariot around a tight turn, and wriggle free of bonds.

Arts & Crafts (Dex): Dexterity should be used with Arts & Crafts when nimbleness is needed, it could be playing a stringed instrument, painting a picture, or performing finely detailed etchings on a weapon.

Athletics (Dex): Staying on your feet whilst running on ice, balancing on a tightrope, or staying upright on a ship's deck in the middle of a storm. Performing acrobatic stunts such as dives, rolls, somersaults, and flips.

Subterfuge (Dex): Whenever you attempt an act of manual trickery, such as planting something on someone else or concealing an object on your person. Subterfuge can also be used whilst pickpocketing, picking a lock, shadowing through rough terrain, disabling a trap that requires a fast and nimble hand, or even securely tying up a prisoner.

Stealth (Dex): Dexterity is used with Stealth and hides checks when bodily control is required to remain silent rather than slyness.

Armor Value: Depending upon the armor you wear, you might add some or all of your Dexterity modifier to your armor value.

Initiative: At the beginning of every combat you roll initiative by making a Dexterity check. initiative determines the order of turns in combat.

Vitality

Vitality checks with skills are uncommon, as a person's endurance and health are more of a passive trait. Though it should be used when you try to push past your physical limits, like holding your breath, march or labor for hours without rest, go without sleep, survive without food or water, or handle toxins of different kinds.

Health Points: Your Vitality score gives bonuses to your health points and health dice, adding the modifier for each level you gain when determining your new health point maximum and adding to your health Dice when you regain health during a short rest. Important to note that if you increase your Vitality modifier at a later level than 1, you go back to your earlier levels and increase the Vitality modifier as it was always a higher score. For example, if it increases from +1 to +2 at 4th level, you gain +3 health points from those earlier three levels. The same goes if your Vitality modifier is lowered.

Intelligence

Intelligence is all about memory, education, and knowledge and is mostly used in conjunction with skills. Though there are some examples when a pure Intelligence check should be done, like, estimating the value of a precious item, recall lore about a craft or a trade, or win a game of skill through memorized tactics. The GM should be extra attentive to the background of a character when determining if they could roll a skill check with Intelligence. A city-dwelling expert of the natural sciences would not necessarily be able to add his knowledge to Survival (Int) check.

Arts & Crafts (Int): Intelligence should be used with this skill when reciting poetry, lines in a theatre, remembering properties about materials, etc.

Academics (Int): A multifaceted skill that all use Intelligence to recall information.

Medicine (Int): To understand what is ailing a creature, to diagnose, is intelligence-based for Medicine.

Occult (Int): To remember details about what the creature has read or heard about the Occult.

Perception (Int): Perception is used with Intelligence when perceiving something is out of the ordinary, finding clues at a murder scene, seeing through illusions, or noticing that your drink doesn't taste as it should.

Survival (Int): All about remembering information about surviving out in the wild, like which berries are poisonous, you need to find drinkable within three days, or recalling which footprint belongs to which animal.

Cunning

Cunning is all about connecting the dots, to apply the knowledge you have or gathered to a conclusion or a theory. Basically, to apply the knowledge you have and adapt it to the circumstances. Pure Cunning tests could be done when trying to solve a puzzle, win a game of skill by adapting and deceiving, sell a ware as expensive as possible or come to a conclusion after a successful research attempt.

Animal Handling (Cun): Cunning with Animal Handling is rolled when you need to understand creatures' needs and behaviors.

Investigation (Cun): Investigation is coupled with Cunning and used to understand cause and effect. Connecting evidence from a murder scene to a working theory, combining prior research into a comprehensive conclusion, or understanding a trap's mechanism to both name it's type but also realize how to disarm it.

Medicine (Cun): Cunning accompanies Medicine when trying to heal a creature. Creating an anti-toxin, performing surgery, or first aid.

Occult (Cun): Occult with Cunning is used when creating conclusions, solving puzzles, and putting your knowledge of the Occult into context.

Stealth (Cun): Stealth with Cunning is applied when the situation requires more mental prowess to go unnoticed, hiding in a crowd, slipping between shadows, or even hiding in plain sight.

Subterfuge (Cun): Cunning can be used with Subterfuge when forging documents, shadowing someone where quick-thinking is more important than nimbleness, or creating disguises by recalling details.

Survival (Cun): Applying your knowledge about Survival to the situation, to see pitfalls before falling into them, crafting a shelter, tracking animals, etc.

Resolve

Resolve enables you to go further than what your physical limitations allow. Your strength of will. The GM should allow in critical situations that characters may attempt a Resolve test to push their body and mind a little bit further. It could be everything from clinging on to your life after a failed death saving throw, holding your breath longer than what your Vitality allows, or wrestling control from another Soul.

Concentration Checks: Concentration checks are made with Resolve and you can read more about it in the spellcasting section.

Presence

To be able to intimidate, seduce, convince, deceive, etc., with only saying a few half-hearted words or even not saying anything at all - that's Presence. Your innate aura of charisma. Pure Presence checks could be gaining attention in the middle of a squabbling crowd, inspiring your troops across the battlefield, or conveying a simple message to another person by only a stare.

Animal Handling (Pre): Presence is rolled with Animal Handling when you interact with creatures with low Intelligence scores.

Deception (Pre): As the description above, Presence with Deception is all about deceiving someone else through mostly body language and confidence.

Leadership (Pre): To be inspiring or intimidating without having to say a word.

Persuasion (Pre): To have a high modifier in Persuasion (Pre) is to be inherently authentic and other people would often find you to be trustworthy.

Manipulation

On the other hand, Manipulation needs a silver-tongue to work its magic. Where Presence convinces or deceives through body language, Manipulation does the same through words. Manipulation is mostly performed with a skill, but the GM should not be afraid to ask for a pure Manipulation check if they find the situation falling outside of any specific skill.

Deception (Man): As the description above, Manipulation with Deception is all about deceiving someone else through mostly choice of words and how you say them.

Empathy (Man): Manipulation coupled with Empathy is often used in interrogation like circumstances, where you try to manipulate their emotions towards whatever goal you might have in mind. Empathy and Manipulation could also be used when calming or riling up a crowd.

Leadership (Man): To be inspiring or intimidating by using your words.

Persuasion (Man): To know what to say and how to deliver your sentiment to appear trustworthy and authentic.

Composure

Composure is your strength of character, how well you pay attention to your surroundings, if they are affecting you and, if and how you feel affected by that. Composure checks could be rolled when you need to stay calm in a stressful environment, to control your emotions during harrowing times, or checking if you manage to stay vigilant in confusing circumstances.

Empathy (Com): Your Empathy (Com) check decides whether you can determine the true intentions of a creature, such as when searching out a lie or predicting someone's next move. Doing so involves gleaning clues from body language, speech habits, and changes in mannerisms.

Perception (Com): Composure is conjoined with Perception when the character needs to be stalwart and vigilant. Examples can be walking in the forest and after a few hours noticing a twig being snapped suspiciously, a guard on a night shift noticing that a particular shadow flickering in the corner of their eye, or picking out in a loud crowd the whispering of an incantation. Composure and Perception are used to calculate your passive Perception score. Passive Perception as a flat value to compare to various Stealth rolls is recommended when an active skill check is unnecessary. When creatures are already on their toes and vigilant, use passive Perception rather than a Perception (Com) check. If the creature is not on the lookout for danger, roll an active Perception check with Composure instead.

Passive Perception = 10 + Your Perception modifier (Com)

Saving Throws

A saving throw - also called a save - represents an attempt to resist a spell, a trap, a poison, a disease, or a similar threat. Saving throws are something that you're forced to roll whenever you're at risk of some kind of harm. The difficulty value of the saving throw is determined by the effect that causes it. For example, the DV for a saving throw allowed by a spell is determined by the caster's spellcasting ability and proficiency bonus.

1d20 + ability modifier + proficiency (if any)

Two saving throws are special, Intelligence/Cunning (Int/Cun) and Presence/Manipulation (Pre/Man), as you get to decide which modifier of the two you want to use for that saving throw. You should make this decision at the beginning of the game and it remains that decision for the rest of it.

Time & Movement

In situations where keeping track of the passage of time is important, the GM determines the time a task requires. The GM might use a different time scale depending on the context of the situation at hand. In an investigation situation, time might go by as minutes, in a city or wilderness time could pass as hours and on a long journey even as days.

Movement

Movement can be handled narratively, that the GM describes relatively unimportant stretches of distance traveled at their own leisure. Sometimes it's important, though, to know how long it takes to get from one spot the another which depends upon two factors: the speed and travel pace and the terrain that is traversed.

Every creature has a speed, which is the distance in meters that the creature can walk in 1 round. This number assumes short bursts of energetic movement amid a life-threatening situation. While traveling, a group of creatures can move at a normal, fast, or slow pace, and if that has any effects, as shown below:

Travel Pace

Pace	Distance/Min	Distance/Hour	Distance/Day	Effect
Fast	100 m	6 km	48 km	-5 penalty to passive Perception
Normal	75 m	4.5 km	36 km	-
Slow	50 m	3 km	24 km	Able to use Stealth

A fast pace makes creatures less perceptive whilst a slow pace makes it possible to sneak around and to search an area more carefully. The travel pace table assumes that creatures travel for 8 hours in a day (there can be exemptions to this rule if the creature has different physiology and sleeping habits than humans). They can push on beyond that limit, at the risk of exhaustion. For each hour traveled beyond 8 hours the character must make a Vitality saving throw:

$DV = 10 + 1$ for each hour past 8 hours

On a failed save, a character suffers one level of exhaustion. For up to an hour, many animals move faster than humanoids. A mounted character can ride at a gallop for about an hour, covering twice the usual distance for a fast pace. If fresh mounts are available every 10 to 15 km, characters can cover larger distances at this pace. Characters in wagons, carriages, or other land vehicles choose a pace as normal. Characters in a waterborne vessel are limited to the speed of the vessel, and they don't suffer penalties for a fast pace or gain benefits from a slow pace. Depending upon the vessel and the size of the crew, ships might be able to travel for up to 24 hours per day. Certain special mounts or special vehicles allow you to travel more swiftly.

Difficult Terrain

The travel speeds given in the travel pace table assume relatively simple terrain: roads, open plains, or tunnels. But sometimes dense forests, deep swamps, ruins, steep mountains, snow, and ice-covered ground can block your path - all considered difficult terrain. Moving 1 m in difficult terrain costs 2 m of speed - so you can only cover half the normal distance.

Special Types of Movement

Climbing, Swimming, and Crawling

Just like difficult terrain, swimming and climbing costs 1 extra meter (this stacks with difficult terrain), unless a creature has a climbing or swimming speed. Crawling costs 2 extra meters per meter traversed. At the GM's option, climbing a slippery vertical surface might require an Athletics (Dex), or one with few handholds requires a successful Athletics (Br) check. Similarly, gaining any distance in rough water might require a successful Athletics (Br) check.

Jumping: Your Brawn determines how far you can jump.

- ❖ **Long Jump:** You can cover a number of meters up to your Brawn score modifier (minimum 1) if you move at least 2 meters on foot immediately before the jump. When you make a standing long jump, you leap only half the distance (rounded down). Either way, each meter you clear on the jump costs a meter of movement. This rule assumes that the height of your jump doesn't matter, at your GM's option you must succeed on a DV 10 Athletics (Br) check. When you land in difficult terrain, you must succeed on a DV Athletics (Dex) to land on your feet, otherwise, you land prone.
- ❖ **High Jump:** You can leap into the air a number of meters equal to half your Brawn modifier (minimum 1) if you move at least 2 meters on foot immediately before the jump. When you make a standing high jump, you can only cover half that distance. Each meter used in the high jump costs 1 meter of movement. In some circumstances, your GM might allow you to take a pure Brawn check to jump higher than you normally can. You can extend your arms half your height above yourself and reach even further, adding half your height to the long jump for reaching purposes.

The Environment

Falling

At the end of a fall, a creature takes 1d6 bludgeoning damage for every 3 meters it falls, to a maximum of 20d6. The creature lands prone unless it avoids taking damage from the fall.

Suffocating

A creature can hold its breath for a number of minutes equal to 1 + Vitality modifier (minimum of 30 seconds). When a creature runs out of breath or is choking, it can survive for a number of rounds equal to its Vitality modifier (minimum of 1 round). At the start of its next turn, it drops to 0 health points and is dying, and it cannot regain health points or be stabilized until it can breathe again.

Vision and Light

A given area might be lightly or heavily obscured. In a lightly obscured area, such as dim light, patchy fog, or moderate foliage, creatures have disadvantage on Perception checks that rely on sight.

A *heavily obscured* area – such as darkness, opaque fog, or dense foliage – blocks vision entirely. A creature effectively suffers from the blinded condition when trying to see something in that area.

The presence or absence of light in an environment creates three categories of illumination: bright light, dim light, and darkness. Any source of magical bright light or darkness always dominates sources of nonmagical bright light or darkness, but does not snuff out the nonmagical source. For example, a torch is still aflame within a *Darkness* spell and sheds bright and dim light as soon as it is taken outside of the range of the *Darkness* spell. Higher level spells or ability effects dominate lower level spells or ability effects. For example, a *Light* spell is still active inside of a *Darkness* spell and still sheds bright and dim light as soon as it is taken outside of the range of the *Darkness* spell. If the range of a source of darkness and a range of source of bright light of the same level would overlap, they cancel each other out and create dim light in that area.

Bright Light let's most creatures see normally. Even gloomy days provide bright light, as do torches, lanterns, fires, and other sources of illumination within a specific radius.

Dim Light, also called shadows, creates a lightly obscured area. An area of dim light is usually a boundary between a source of bright light, such as a torch, and surrounding darkness. The soft light of twilight and dawn also counts as dim light. A particularly brilliant full moon might bathe the land in dim light.

Darkness creates a heavily obscured area. Characters face darkness outdoors at night (even most moonlit nights), within the confines of an unlit dungeon or a subterranean vault, or in an area of magical darkness.

Blindsight

A creature with blindsight can perceive its surroundings without relying on sight, within a specific radius. Creatures without eyes, such as oozes, and creatures with echolocation or heightened senses, such as bats and some dragons, have this sense.

Darkvision

Within a specified range, a creature with darkvision can see in darkness as if the darkness were dim light, so areas of darkness are only lightly obscured as far as that creature is concerned. However, the creature cannot discern color in darkness, only shades of gray.

Truesight

A creature with truesight can, out to a specific range, see in normal and magical darkness, see invisible creatures and objects, automatically detect visual illusions and succeed saving throws against them, and perceives the original form of a shapeshifter or a creature that is transformed by magic. Furthermore, the creature can see into the Ethereal Dimension.

Food and Water

Characters who do not eat or drink suffer the effects of exhaustion, which can only be resolved by eating and drinking the full required amount.

A humanoid character of relative size to a human needs one pound of food per day and can make food last longer by subsisting on half rations. A character can go without food for a number of days equal to 3+ his or her Vitality modifier (minimum of 1). At the end of each day beyond that limit, a character automatically suffers one level of exhaustion. A normal day of eating resets the count of days without food to zero.

A humanoid character of relative size of a human needs 4 liters of water per day, or 7 liters per day if the weather is hot. A character who drinks only half that much water must succeed on a DV 15 Vitality saving throw or suffer one level of exhaustion at the end of the day. A character with access to even less water automatically suffers one level of exhaustion at the end of the day. If the character already has one or more levels of exhaustion, the character takes two levels in either case.

Resting

Even heroes need rest, time to sleep and eat, tend their wounds, refresh their minds and Souls for spellcasting, and brace themselves for further adventure.

Short Rest

A short rest is a period of downtime, at least 1 hour long, during which a character does nothing more strenuous than eating, drinking, reading, and tending to wounds. Characters can heal during a short rest by spending health dice and by spending a use of a herbalism kit or a healer's kit. To use a herbalism kit or a healer's kit in this way, one ally must at least possess one skill rank with the appropriate skill. The healer can tend to a number of creatures (including themselves) equal to their proficiency bonus. The healer cannot perform any other activities like keeping watch or attuning if they help to heal their allies during the short rest.

A character can spend one or more health dice at the end of a short rest, up to the character's maximum number of health dice, which is equal to the character's level. For each health dice spent this way, the player rolls the die and adds the character's Vitality modifier to it. The character regains health points equal to the total. The player can decide to spend additional health dice after each roll, using the biggest health dice to the lowest health dice. For example, if a character has three 1d10 and two 1d8 the player spends the 1d10 first and then the 1d8s. A character regains some spent health dice upon finishing a long rest, as explained below.

Long Rest

A long rest is at least 8 hours long, during which a character sleeps or performs light activity: reading, talking, eating, or stand to watch for no more than 2 hours. If the rest is interrupted by a period of strenuous activity, at least 1 hour of walking, fighting or casting spells, or similar adventuring activity, the characters must begin the rest again to gain any benefit from it.

A character can spend one or more health dice at the end of a long rest, up to the character's maximum number of health dice, which is equal to the character's level. For each health dice spent this way, the player rolls the die and adds the character's Vitality modifier to it. The character regains health points equal to the total. The player can decide to spend additional health dice after each roll, using the biggest health dice to the lowest health dice. For example, if a character has three 1d10 and two 1d8 the player spends the 1d10 first and then the 1d8s.

The character also regains spent health dice at the end of a long rest, up to a number of dice equal to half of the character's total number of them (minimum of 1 die). The character regains the smallest health dice first this way. For example, if a character has two 1d12 and three 1d6, they regain the 1d6 health dice before the 1d12. A character can't benefit from more than one long rest in a 24 hour period, and a character must have at least 1 health point at the start of the rest to gain its benefits.

Between Adventures

Between trips and battles, adventurers might find themselves with time on their hands, voluntarily or not. Many adventurers use this time to perform other tasks, such as crafting arms and armor, performing research, or spending their hard-earned gold. In some cases, the passage of time is narratively in nature where the GM might simply declare that a certain amount of time has passed and allow you to describe in general terms what your character has been doing. At other times, the GM might want to keep track of just how much time is passing as events beyond your perception stay in motion.

Lifestyle Expenses

Between adventures, you choose a particular quality of life and pay the cost of maintaining that lifestyle. Living a particular lifestyle doesn't have a huge effect on your character, but your lifestyle can affect the way other individuals and groups react to you. For example, when you lead an aristocratic lifestyle, it might be easier for you to influence the nobles of the city than if you live in poverty.

Downtime Activities

You might be asked what your character is doing during his or her downtime. Periods of downtime can vary in duration, but each downtime activity requires a certain number of days to complete before you gain any benefit, and at least 8 hours of each day must be spent on the downtime activity for the day to count. The days do not need to be consecutive. If you have more than the minimum days to spend, you can keep doing the same thing for a longer period of time, or switch to a new downtime activity. Downtime activities other than the ones presented below are possible. If you want your character to spend his or her downtime performing an activity not covered here, discuss it with your GM. The GM should also reward a player's hard work by giving them skill points if it is reasonable.

Crafting

You can craft nonmagical objects, including adventuring equipment and works of art. You must be proficient with tools related to the object you are trying to create. You might also need access to special materials or locations necessary to create it.

For every day of downtime you spend crafting, you can craft one or more items with a total market value not exceeding 5 gp, and you must expend raw materials worth half the total market value. If something you want to create has a market value greater than 5gp, you make progress every day in 10 gp increments (minimum 2 days) until you reach the market value of the item.

Multiple characters can combine their efforts toward the crafting of a single item, provided that the characters all have proficiency with the prerequisite tools and are working together in the same place. Every character assisting contributes with 10gp of value per day.

Practicing a Profession

You can work between adventures, allowing you to maintain a modest lifestyle without having to pay 1 gp per day. This benefit lasts as long as you continue to practice your profession.

If you are a member of an organization that can provide gainful employment, such as a temple or a guild, you earn enough to support a comfortable lifestyle instead.

If you have proficiency in the Arts & Craft skill with a specialty of some kind of performance, you can use your skill to earn a modest to wealthy lifestyle instead, the GM discerning which.

Recuperating

You can use downtime between adventures to recover from a debilitating injury, disease, or poison. After three days of downtime spent recuperating, you can make a DV 15 Vitality saving throw. On a successful save you can choose one of the following results:

- ❖ End one effect on you that prevents you from regaining health points.
- ❖ For the next 24 hours gain advantage on saving throws against one disease or poison currently affecting you.

Researching

The time between adventures is a great chance to perform research. Research can include poring over dusty tomes and crumbling scrolls in a library or buying drinks for the locals to pry rumors and gossip from their lips.

When you begin your research, the GM determines whether the information is available, how many days of downtime it will take to find it, and whether there are any restrictions on your research. The GM might also require you to make one or more ability checks to find clues or secure aid. Once those conditions are met, you learn the available information.

Training

You can spend time between adventures learning a new language or training with a set of tools, or other options if the GM allows. First, you must find an instructor willing to teach you, which is determined by the GM. The training lasts for 200 days and costs 1 gp per day. After you spend the requisite amount of time and money, you learn the new language or gain proficiency with the new tool.

The Order of Combat

The game organizes the chaos of combat into a cycle of rounds and turns. A round represents about 5 seconds in the game world. During a round, each participant in a battle takes a turn. The order of turns is determined at the beginning of a combat encounter when everyone rolls initiative. Once everyone has taken a turn, the fight continues to the next round if neither side has defeated the other.

1. **Determine Surprise:** The GM determines whether anyone involved in the combat encounter is surprised.
2. **Establish Positions:** The GM decides where all the characters and monsters are located. Given the adventurers' marching order or their stated positions in the room or other location, the GM figures out where the adversaries are – how far away and in what direction.
3. **Roll Initiative:** Everyone involved in the combat encounter rolls initiative, determining the order of combatants' turns.
4. **Take Turns:** Each participant in the battle takes a turn in initiative order.
5. **Begin the Next Round:** When everyone involved in the combat has had a turn, the round ends. Repeat step 4 until the fighting stops.

Surprise

A band of adventurers sneaks up on a bandit camp, springing from trees to attack them, in this situation, one side of the battle gains surprise over the other. The GM determines who might be surprised. If neither side tries to be stealthy, they automatically notice each other. Otherwise, the GM compares the Stealth vs passive Perception of each creature on the opposing side. Any character or monster that doesn't notice a threat is surprised at the start of the encounter.

If you're surprised, you can't move or take an action on your first turn of the combat, and you can't take a reaction until that turn ends. A member of a group can be surprised even if the other members aren't.

Initiative

Initiative determines the order of turns during combat. When combat starts, every participant makes a Dexterity check to determine their place in the initiative order. The GM makes one roll for an entire group of identical creatures, so each member of the group acts at the same time.

The GM ranks the combatants in order from the one with the highest Dexterity check total to the one with the lowest. This is the order (called the initiative order) in which they act during each round. The initiative order remains the same from round to round. If a tie occurs the GM decides the order among tied GM-controlled, and the players decide the order among their tied characters. The GM can decide the order if the tie is between a monster and a player character. Optionally, the GM can have the tied characters roll a d20 to determine the order, highest roll going first.

Imposing Fear

Characters can still experience fear and intimidation even if there is no enemy actively imposing it on them. Examples of when characters could experience dread in combat include; when the odds seem insurmountable, if the combat takes a turn for the worst, a new stronger enemy shows up, when the characters face a creature they weren't prepared for, a creature that is alien to them, etc.

At the GM's discretion, at the start of a round or during an enemy's turn, the GM may ask for a Resolve saving throw against a DV the GM sets to not be frightened for 1 minute. The characters can repeat this saving throw at the end of their turns. As a rule of thumb, this rule should not be used in all combats, and one single combat should only utilize this once, or maybe twice.

Your Turn

On your turn, you can move a distance up to your speed and take one action. You decide whether to move first or take your action first. Your speed sometimes called your walking speed, is noted on your character sheet.

The most common actions you can take are described in the "actions in combat" section later in this chapter. Many abilities provide additional options for your action.

The "movement and position" section later in this chapter gives the rules for your movement.

You can forgo movement, taking an action, or doing anything at all on your turn. If you can't decide what to do on your turn, consider taking the dodge or ready action, as described in "actions in combat".

Bonus Actions

Various traits and abilities let you take an additional action on your turn called a bonus action. You can take a bonus action only when a trait or spell states that you can do something as a bonus action. You can take only one bonus action on your turn, so you must choose which bonus action to use when you have more than one available.

You choose when to take a bonus action during your turn, unless the bonus action's timing is specified, and anything that deprives you of your ability to take actions also prevents you from taking a bonus action.

Other Activity on Your Turn

Your turn can include a variety of flourishes that require neither your action nor your movement.

- ❖ You can communicate however you're able, through brief utterances and gestures, as you take your turn.
- ❖ You can also interact with one object or feature of the environment for free, during either your movement or your action. Examples include opening an unlocked door or drawing a weapon.
- ❖ If you want to interact with a second object, you need to use your action. Some magic items and other special objects always require an action to use, as stated in their descriptions.
- ❖ The GM might require you to use an action for any of these activities when it needs special care or when it presents an unusual obstacle.
- ❖ More examples; withdraw a potion from your pack, pick up a dropped weapon, take a bauble from a table, remove a ring from your finger, stuff some food into your mouth, plant a banner into the ground, fish a few coins from your pouch, drink all the ale in a flagon, throw a lever or a switch, pull a torch from a sconce, take a book from a shelf you can reach, extinguish a small flame, don a mask, pull the hood of your cloak up and over your head, put your ear to a door, kick a small stone, turn a key in a lock, tap the floor with a 2 m pole and hand an item to another character.

Reactions

Certain abilities or when you attack opportunity, described later in this chapter, is called a reaction. A reaction is an instant response to a trigger of some kind, which can occur on your turn or on someone else's.

When you take a reaction, you can't take another one until the start of your next turn. If the reaction interrupts another creature's turn, that creature can continue its turn right after the reaction.

Movement and Position

On your turn, you can move a distance up to your speed. You can use as much or as little of your speed as you like on your turn, following the rules here.

Your movement can include jumping, climbing, and swimming. These different modes of movement can be combined with walking, or they can constitute your entire movement. However you're moving, you deduct the distance of each part of your movement from your speed until it is used up or until you are done moving.

Breaking Up Your Move

You can break up your movement on your turn, using some of your speed before and after your action. For example, if you have a speed of 6 meters, you can move 2 meters, take your action, and then move 4 meters. If you take an action that includes more than one weapon attack, you can break up your movement even further by moving between those attacks.

Using Different Speeds

If you have more than one speed, such as your walking speed and a flying speed, you can switch back and forth between your speeds during your movement. Whenever you switch, subtract the distance you've already moved from the new speed.

Difficult Terrain

Every meter in difficult terrain costs 1 extra meter. This rule is true even if multiple things in a space count as difficult terrain. Low furniture, rubble, undergrowth, steep stairs, snow, and shallow bogs are examples of difficult terrains. The space of another creature, whether hostile or not, also counts as difficult terrain.

Being Prone

Combatants often find themselves lying on the ground, either because they are knocked down or because they throw themselves down. You can drop prone without using any of your speed. Standing up takes more effort; doing so costs an amount of movement equal to half your speed. You can't stand up if you don't have enough movement left or if you don't have enough movement left or if your speed 0.

To move while prone, you must crawl or use magic such as teleportation. Every meter of movement while crawling costs 1 extra meter. Crawling 1 meter in difficult terrain, therefore, costs 3 m of movement.

Moving Around Other Creatures

You can move through a non-hostile creature's space but you can only move through a hostile creature's space only if the creature is at least two sizes larger or smaller than you. Remember that another creature's space is difficult terrain for you.

Whether a creature is a friend or an enemy, you can't willingly end your movement in its space. If you leave a hostile creature's reach during your movement, you provoke an opportunity attack, as explained later in this chapter.

Flying Movement

Flying creatures enjoy many benefits of mobility, but they must also deal with the danger of falling. If a flying creature is knocked prone, has its speed reduced to 0, or is otherwise deprived of the ability to move, the creature falls, unless it can hover or it is being held aloft by magic, such as the Fly spell.

Creature Size

Each creature takes up a different amount of space. The size categories table shows how much space a creature of a particular size controls in combat. Objects sometimes use the same size categories.

Size	Space
Tiny	0.5 by 0.5 m
Small	1 by 1 m
Medium	1 by 1 m
Large	2 by 2 m
Huge	3 by 3 m
Gargantuan	4 by 4 m or larger

Space

A creature's space is the area in meters that it effectively controls in combat, not an expression of its physical dimensions. A typical Medium creature isn't 1 * 1 square meter wide, for example, but it does control a space that wide. If a Medium creature stands in a 1-m-wide doorway, other creatures can't get through unless the creature lets them. A creature's space also reflects the area it needs to fight effectively. For that reason, there's a limit to the number of creatures that can surround another creature in combat. Assuming Medium combatants, eight creatures that can fit in a 1-meter radius around another one.

Because larger creatures take up more space, fewer of them can surround a creature. If five Large creatures crowd around a Medium or smaller one, there's little room for anyone else. In contrast, as many as twenty Medium creatures can surround a Gargantuan one.

Squeezing into a Smaller Space

A creature can squeeze through a space that is large enough for a creature one size smaller than it. Thus, a Large creature can squeeze through a passage that's only 1 meter wide. While squeezing through a space, a creature must spend 1 m for every meter it moves there, and it has disadvantage on attack rolls and Dexterity saving throws. Attack rolls against the creature have advantage while it's in the smaller space.

Actions in Combat

When you take your action on your turn, you can take one of the actions presented here, an action you gained from your ability origins or a feature, or an action that you improvise. Many monsters have action options of their own in their stat blocks. When you describe an action not detailed elsewhere in the rules, the GM tells you whether that action is possible and what kind of roll you need to make, if any, to determine success or failure.

Attack

With this action, you make one melee or ranged attack. See the "Making an Attack" section for the rules that govern attacks. Certain abilities, such as the Extra Attack ability, allow you to make more than one attack with this action.

Cast a Spell

Each spell has a casting time, which specifies whether the caster must use an action, a reaction, minutes, or even hours to cast the spell. Casting a spell is, therefore, not necessarily an action. Most spells do have a casting time of 1 action, so a spellcaster often uses his or her action in combat to cast such a spell.

Dash

When you take the dash action, you gain extra movement for the current turn. The increase equals your speed, after applying any modifiers. With a speed of 6 m, for example, you can move up to 12 m on your turn if you dash.

Any increase or decrease to your speed changes this additional movement by the same amount. If your speed of 6 m is reduced to 3 m, for instance, you can move up to 6 m this turn if you dash.

Disengage

If you take the disengage action, your movement doesn't provoke opportunity attacks for the rest of the turn.

Dodge

When you take the dodge action, you focus entirely on avoiding attacks. Until the start of your next turn, any attack roll made against you has disadvantage if you can see the attacker, and you make Dexterity saving throws with advantage. You lose this benefit if you are incapacitated or if your speed drops to 0.

Help

When you take the help action, the creature you aid gains advantage on the next ability check it makes to perform the task you are helping with, provided that it makes the check before the start of your next turn.

Alternatively, you can aid a friendly creature in attacking a creature within 1 m of you. You feint, distract the target, or in some other way team up to make your ally's attack more effective. If your ally attacks the target before your next turn, the first attack roll is made with advantage.

Hide

When you take the hide action, you make a Stealth check in an attempt to hide, following the rules for hiding. If you succeed, you gain certain benefits, as described in the “Unseen Attackers and Targets” section later in this chapter.

Ready

Sometimes you want to get the jump on a foe or wait for a particular circumstance before you act. To do so, you can take the ready action on your turn, which lets you act using your reaction before the start of your next turn.

First, you decide what perceivable circumstance will trigger your reaction. Then, you choose the action you will take in response to that trigger, or you choose to move up to your speed in response to it.

When the trigger occurs, you can either take your reaction right after the trigger finishes or ignore the trigger. Remember that you can take only one reaction per round. When you ready a spell, you cast it as normal but hold its energy, which you release with your reaction when the trigger occurs. To be readied a spell must have a casting time of 1 action or less, and holding onto the spell's magic requires concentration. If your concentration is broken, the spell dissipates without taking effect.

Search

When normally interacting with an object while doing something else, such as when you draw a sword as part of an attack. When an object requires your action for its use, you take the use an object action. This action is also useful when you want to interact with more than one object on your turn.

Making an Attack

Whether you are striking with a melee weapon, firing a weapon at range, or making an attack roll as part of a spell, an attack has a simple structure.

1. **Choose a Target:** Pick a target within your attack's range: a creature, an object, or a location.
2. **Determine Modifiers:** The GM determines whether the target has cover and whether you have advantage or disadvantage against the target. In addition, spells, special abilities, and other effects can apply penalties or bonuses to your attack roll.
3. **Resolve the Attack:** You make the attack roll. On a hit, you roll damage, unless the particular attack has rules that specify otherwise. Some attacks cause special effects in addition to or instead of damage.

If there is ever any question whether something you're doing counts as an attack, the rule is simple: if you're making an attack roll, you're making an attack.

Attack Rolls

When you make an attack, your attack roll determines whether the attack hits or misses. To make an attack roll, roll a d20 and add the appropriate modifiers. If the total of the roll plus modifiers equals or exceeds the target's armor value, the attack hits.

Modifiers to the Roll

When a character makes an attack roll, the two most common modifiers to the roll are an ability modifier and the character's proficiency bonus.

Ability Modifier: The ability modifier used for a melee weapon attack is Brawn, and the ability modifier used for a ranged weapon attack is Dexterity. Weapons that have the thrown property use however Brawn and melee weapons with the property of finesse uses Dexterity.

Proficiency Bonus: You add your proficiency bonus to your attack roll when you attack using a weapon with which you have proficiency, as well as when you attack with a spell.

Unseen Attackers and Targets

When you Attack a target that you can't see, you have disadvantage on the attack roll. This is true whether you're guessing the target's location or you're targeting a creature you can hear but not see. If the target isn't in the location you targeted, you automatically miss, but the GM typically just says that the attack missed, not whether you guessed the target's location correctly.

When a creature can't see you, you have advantage on attack rolls against it. If you are hidden - both unseen and unheard - when you make an attack, you give away your location when the attack hits or misses.

Ranged Attacks

Ranged attacks could be anything from firing a bow, hurling a handaxe, a monster shooting spines from its tail, or releasing a ranged spell.

Range

You can make ranged attacks only against targets within a specified range. If a ranged attack, such as one made with a spell, has a single range, you can't attack a target beyond this range. Some ranged attacks, such as those made with a longbow or a shortbow, have two ranges. The smaller number is the long range. Your attack roll has disadvantage when your target is beyond normal range, and you can't attack a target beyond the long range.

Ranged Attacks in Close Combat

Aiming a ranged attack is more difficult when a foe is next to you. When you make a ranged attack with a weapon, a spell, or some other means, you have disadvantage on the attack roll if you are within 1 m of a hostile creature who can see you and who isn't incapacitated.

Melee Attacks

Melee attacks could be hand to hand, handheld weapons, or natural ones like claws, horns, or teeth. Most creatures have a 1-m **reach** and can thus attack targets within 1 m of them when making a melee attack. Certain creatures (typically those larger than Medium), have melee attacks with a greater reach than 1 m, noted in their descriptions.

Instead of using a weapon to make a melee weapon attack, you can use an unarmed strike. On a hit, an unarmed strike deals bludgeoning damage equal to 1 + your Brawn modifier. You are proficient with your unarmed strikes.

Opportunity Attacks

You can make an opportunity attack when a hostile creature that you can see moves out of your reach. To make the opportunity attack, you use your reaction to make one melee attack against the provoking creature that leaves your reach.

You can avoid provoking an opportunity attack by taking the disengage action. You also don't provoke an opportunity attack when you teleport or when someone or something moves you without using your movement, action, or reaction. For example, you don't provoke an opportunity attack if an explosion hurls you out of a foe's reach or if gravity causes you to fall past an enemy.

Two-Weapon Fighting

When you take the attack action and attack with a light melee weapon that you're holding in one hand, you can use a bonus action to attack with a different melee weapon that you're holding in the other hand. You don't add your ability modifier to the damage of the bonus attack unless that modifier is negative.

If either weapon has the thrown property, you can throw the weapon, instead of making a melee attack with it.

Grappling

When you want to grab a creature or wrestle with it, you can use the attack action to make a special melee attack, a grapple. If you're able to make multiple attacks with the attack action, this attack replaces one of them.

The target of your grapple must be no more than one size larger than you and must be within your reach. Using at least one free hand you try to seize the target by making a grapple check instead of an attack roll: an Athletics (Br) check contested by a Athletics (Br/Dex) check (the target chooses the ability to use). If you succeed, you subject the target to the grappled condition. The condition specifies the things that end it, and you can release the target whenever you like (no action required).

Escaping a Grapple: A grappled creature can use its action to escape. To do so, it must succeed on an Athletics (Br/Dex) check contested by your Athletics (Br) check.

Moving a Grappled Creature: When you move, you can drag or carry the grappled creature with you, but your speed is halved unless the creature is two or more sizes smaller than you.

Contests in Combat

Battle often involves pitting your prowess against that of your foe. Such a challenge is represented by a contest. This section includes the most common contests that require an action in combat: grappling and shoving a creature. The GM can use these contests as models for improvising others.

Shoving a Creature

Using the attack action, you can make a special melee attack to shove a creature, either to knock it prone or push it away from you. If you're able to make multiple attacks with the attack action, this attack replaces one of them.

The target must be no more than one size larger than you and must be within your reach. Instead of making an attack roll, you make an Athletics (Br) check contested by the target's Athletics (Br/Dex) check (the target chooses the ability to use). If you win the contest, you either knock the target prone or push it 1 m away from you.

You can also shove a creature aside, moving the creature directly 1 m to the left or right. When attempting to shove a creature aside the same check as above applies but you roll with disadvantage.

Cover

Walls, trees, creatures, and other obstacles can provide cover during combat, making a target more difficult to harm. A target can benefit from cover only when an attack or other effect originates on the opposite side of the cover.

There are three degrees of cover. If a target is behind multiple sources of cover, only the most protective degree of cover applies; the degrees aren't added together.

A target with **half cover** has a +2 bonus to AV and Dexterity saving throws. A target has half cover if an obstacle blocks at least half of its body. The obstacle might be a low wall, a large piece of furniture, a narrow tree trunk, or a creature, whether that creature is an enemy or a friend.

A target with **three-quarters cover** has a +5 bonus to AV and Dexterity saving throws. A target has three-quarters cover if about three-quarters of it are covered by an obstacle. The obstacle might be a portcullis, an arrow slit, or a thick tree trunk.

A target with **total cover** can't be targeted directly by an attack or a spell, although some spells can reach such a target by including it in an area of effect. A target has total cover if it is completely concealed by an obstacle.

On a tactical map, trace imaginary lines between one of the closest corners of an attacker's square or the point of origin of an area of effect to corners of squares the target occupies. If one or two of these lines have a blocked line of sight, the target has half cover. If only one or two imaginary lines have line of sight the target has three quarters cover.

Flanking

When two allies are within melee range of an enemy and the allies are positioned opposite from each other with the enemy in between them, the enemy is considered flanked. All allies who attack that enemy in melee receive a +2 bonus to their attack as long as the enemy remains flanked.

Creatures do not get this bonus if one of the flanking allies is incapacitated, paralyzed, stunned, petrified, blinded, grappled, prone, restrained, or unconscious. The flanking bonus is also lost after a flanking creature's turn if they attack or target an action or bonus action on another enemy.

The flanking bonus is regained on that creature's next turn if they only attack and target that enemy with their action and bonus action, and they have an ally in a flanking position and who fulfill the requirements.

More than one pair of allies can fulfill the requirements of flanking an enemy. In that case, the bonus granted by flanking doesn't stack. However, if one pair's flanking requirements are not fulfilled, they still receive the flanking bonus if the other pair's flanking requirements are.

Advanced Combat Options

The combat options listed here come with ability origin and subtype requirements. If a character does not possess at least one level in an ability origin, or subtype of an ability origin, listed under the combat option, the character cannot perform the combat option.

Disarm

A creature can use their martial prowess to make a target drop their weapon to their feet. The attacker makes an attack roll against the target's Athletics (Br/Dex). On a success the attacker makes the target drop the weapon but deals no damage. If the target is holding the weapon with two hands the attacker makes their attack roll with disadvantage. Disarm can be used against any creature of the same size as the attacker, smaller than the attacker and one size larger than the attacker. If disarm is used against a target one size larger, the attack roll is made with disadvantage. If the disarm is used against a target that is smaller, the attack roll is made with advantage.

Ability Origin and Subtype Requirement: Dancer or Duelist from [Artistry], Battle, Deceit, Passion or Preservation from [Devotion], [Discipline], [Finesse], [Predator], [Soul Oath], Rival, Sage, Soul Blade or Vanguard from [Soul Weapon] or [Tactics]

Run Through

A creature can attempt to run through a hostile creature's space. The creature spends an action or a bonus action and makes an Athletics (Br) against the hostile creature's Athletics (Br). On a success, the character can move through that hostile creature's space this turn once.

Run through can be used against any hostile creature of the same size as the mover, smaller than the mover and one size larger than the hostile creature. If run through is used against a hostile creature one size larger, the skill check is made with disadvantage. If the run through is used against a hostile creature that is smaller, the skill check is made with advantage.

Ability Origin and Subtype Requirement: Battle, Might, Passion or Preservation from [Devotion], [Discipline], [Divine Oath], [Power], [Soul Oath], Rival, Sage or Vanguard from [Soul Weapon] or [Tactics]

Twist Through

A creature can attempt to twist, duck and weave through a hostile creature's space. The creature spends an action or a bonus action and makes an Athletics (Dex) against the hostile creature's Athletics (Dex). On a success, the character can move through that hostile creature's space this turn once.

Ability Origin and Subtype Requirement: Dancer or Duelist from [Artistry], Battle or Deceit from [Devotion], [Discipline], [Finesse], [Predator], Rival, Sage or Soul Blade from [Soul Weapon], or [Tactics]

Mounted Combat

A willing creature that is at least one size larger than you and that has an appropriate anatomy can serve as a mount, using the following rules.

Mounting and Dismounting

Once during your movement, you can mount a creature that is within 1 m of you or dismounts. Doing so costs an amount of movement equal to half your speed. You can't mount a steed if you have less than half your movement.

If an effect moves your mount against its will while you're on it, you must succeed on a DV 10 Dexterity saving throw or fall of the mount, landing prone in a space within 1 m of it. If you're knocked prone while mounted, you must make the same saving throw.

If your mount is knocked prone, you can use your reaction to dismount it as it falls and land on your feet. Otherwise, you are dismounted and fall prone in a space within 1 m of it.

Controlling a Mount

While you're mounted, you have two options. You can either control the mount or allow it to act independently. Intelligent creatures, such as dragons, act independently. You can control a mount only if it has been trained to accept a rider. Domesticated horses, donkeys, and similar creatures are assumed to have such training. The initiative of a controlled mount changes to match yours when you mount it. It moves as you direct it, and it has only three action options: dash, disengage, and dodge. A controlled mount can move and act even on the turn that you mount it.

An independent mount retains its place in the initiative order. Bearing a rider puts no restrictions on the actions the mount can take, and it moves and acts as it wishes. It might flee from combat, rush to attack and devour a badly injured foe, or otherwise act against your wishes. In either case, if the mount provokes an opportunity attack while you're on it, the attacker can target you or the mount.

Underwater Combat

When a creature that doesn't have a swimming speed makes a **melee weapon attack** the attack has disadvantage unless the attack is made with a dagger, javelin, shortsword, spear, or trident. A **ranged weapon attack** automatically misses a target beyond the weapon's normal range. Even against a target within normal range, the attack roll has disadvantage unless the weapon is a crossbow, a net, or a weapon that is thrown like a javelin (including a spear, trident, or dart). Creatures and objects that are fully immersed in water have resistance to fire damage.

Damage and Healing

Health Points

A creature's current health points can be any number from the creature's health point maximum down to 0. This number changes frequently as a creature takes damage or receives healing. Whenever a creature takes damage, that damage is subtracted from its health points. The loss of health points does not affect a creature's capabilities until the creature drops to 0 health points.

Damage Rolls

Each weapon, spell, and harmful monster ability specifies the damage it deals. You roll the damage die or dice, add any modifiers and apply the damage to your target. Magic weapons, special abilities, and other factors can grant a bonus to damage. With a penalty, it is possible to deal 0 damage, but never negative damage.

When attacking with a **weapon**, you add your ability modifier, the same modifier used for the attack roll, to the damage. A **spell** tells you which dice to roll for damage and whether to add any modifiers.

If a spell or other effect deals damage to **more than one target** at the same time, roll the damage once for all of them.

Multiple Damage Source Limitation

Several sources of extra damage can be applied to damage rolls through abilities and feats. Whenever a creature makes a damage roll, that damage roll can not be augmented by more than three extra sources of damage from abilities and feats. For example, if a melee weapon attack would include extra damage from Rage [Power], Bruiser – Savage Aggression [Tactics], Fighting Style – Dueling, and the Risk and Reward option from the Great Weapon Master feat, the GM or the player must decide which three damage sources they like to apply to the attack. This decision can be declared after the attack has been declared a hit or a miss.

Rolling 1 or 20 and Critical Hits

If the d20 roll for an attack is a 1, the attack misses regardless of any modifiers or the target's AV.

If the d20 roll for an attack is a 20, the attack hits regardless of any modifiers or the target's AV. This is called a critical hit. When you score one you get to roll extra damage against the target. Roll all of the attack's damage dice twice and add them together. Then add any relevant modifiers as normal. To speed up play, you can roll all the damage dice at once. If the attack involves other damage dice, you roll those dice twice as well. Some abilities allow your character to acquire an improved critical range. This allows the player to score a critical hit on values lower than 20. A character's critical range can never go below 18.

Damage Types

Different attacks, damaging spells, and other harmful effects deal different types of damage. Damage types have no rules of their own, but other rules, such as damage resistance, rely on the types.

The damage types follow, with examples to help a GM assign a damage type to a new effect.

- ❖ **Acid:** The corrosive spray of a black dragon's breath and the dissolving enzymes secreted by a black pudding deal acid damage.
- ❖ **Bludgeoning:** Blunt force attacks – hammers, falling, constriction, and the like, deal bludgeoning damage.
- ❖ **Cold:** The infernal chill radiating from an ice devil's spear and the frigid blast of a white dragon's breath deal cold damage.
- ❖ **Fire:** Red dragons breathe fire, and many spells conjure flames to deal fire damage.
- ❖ **Force:** Force is pure magical energy focused into a damaging form. Most effects that deal force damage are spells, including Magic Missile and Spiritual Weapon.
- ❖ **Lightning:** A Lightning Bolt spell and a blue dragon's breath deal lightning damage.
- ❖ **Necrotic:** Necrotic damage, dealt by certain undead and a spell such as Chill Touch, withers matter and even the soul.
- ❖ **Piercing:** Puncturing and impaling attacks, including spears and monsters' bites, deal piercing damage.
- ❖ **Poison:** Venomous stings and the toxic gas of a green dragon's breath deal poison damage.
- ❖ **Psychic:** Mental abilities such as a Tentacles' psionic blast deal psychic damage.

- ❖ **Radiant:** Radiant damage, dealt by a Flame Strike spell or an angel's smiting weapon, sears the flesh like fire and overloads the spirit with power.
- ❖ **Slashing:** Swords, axes, and monsters' claws deal slashing damage.
- ❖ **Thunder:** A concussive burst of sound, such as the effect of the Thunderwave spell, deals thunder damage.

Damage Resistance and Vulnerability

If a creature or an object has **resistance** to a damage type, damage of that type is halved against it. If a creature or an object has **vulnerability** to a damage type, damage of that type is doubled against it.

Resistance and then vulnerability are applied after all other modifiers to damage. Multiple instances of resistance or vulnerability that affect the same damage type count as only one instance.

Healing

Unless it results in death, damage isn't permanent. Even death is reversible through powerful magic. Rest can restore a creature's health points, and magical methods such as a Cure Wounds spell or a Potion of Healing can remove damage in an instant.

When a creature receives healing of any kind, health points regained are added to its current health points. A creature's health points can't exceed its health point maximum, so any health points regain more than this number are lost.

A creature that has died can't regain health points until magic such as the Revivify spell has restored it to life.

Dropping to 0 Health Points

When you drop to 0 health points, you either die outright or fall unconscious, as explained in the following sections.

Instant Death

Massive damage can kill you instantly. When damage reduces you to 0 health points and there is damage remaining, you die if the remaining damage equals or exceeds your health point maximum.

Falling Unconscious

If damage reduces you to 0 health points and fails to kill you, you fall unconscious. This unconsciousness ends if you regain any health points.

Death Saving Throws

Whenever you start your turn with 0 health points, you must make a special saving throw, to determine whether you creep closer to death or hang onto life. Unlike other saving throws, this one isn't tied to any ability score.

Roll a d20, if the roll is 10 or higher, you succeed. Otherwise, you fail. A success or failure does not have any effect on its own. On your third success, you become stable. On your third failure, you die. The successes and failures don't need to be consecutive; keep track of both until you collect three of a kind. The number of both is reset to zero when you regain any health points or become stable.

Rolling 1 or 20: When you make a death saving throw and roll a 1 on the d20, it counts as two failures. If you roll a 20 on the d20, you regain 1 health point.

Damage at 0 Health Points: If you take any damage while you have 0 health points, you suffer a death saving throw failure. If the damage is from a critical hit, you suffer two failures instead. If the damage equals or exceeds your health points maximum, you suffer instant death.

Stabilizing a Creature

The best way to save a creature with 0 health points is to heal it. If healing is unavailable, the creature can at least be stabilized so that it isn't killed by a failed death saving throw.

You can use your action to administer first aid to an unconscious creature and attempt to stabilize it, which requires a successful DV 10 Medicine (Cun) check.

A stable creature doesn't make death saving throws, even though it has 0 health points, but it does remain unconscious. The creature stops being stable, and must start making death saving throws again if it takes any damage. A stable creature that isn't healed regains 1 health point after 1d4 hours.

Monsters and Death

Most GMs have a monster die the instant it drops to 0 health points, rather than having it fall unconscious and make death saving throws. Mighty villains and special nonplayer characters are common exceptions; the GM might have them fall unconscious and follow the same rules as player characters.

Knocking a Creature Out

Sometimes an attacker wants to incapacitate a foe, rather than deal a killing blow. When an attacker reduces a creature to 0 health points with a melee attack, the attacker can knock the creature out. The attacker can make this choice the instant the damage is dealt. The creature falls unconscious and is stable.

Temporary Health Points

Some spells and special abilities confer temporary health points to a creature. Temporary health points are not actual health points; they are a buffer against damage, a pool of health points that protect you from injury. When you have temporary health points and take damage, the temporary health points are lost first, and any leftover damage carries over to your normal health points. Loss of temporary health points still triggers concentration checks if applicable.

Because temporary health points are separate from your actual health points, they can exceed your health point maximum. A character can, therefore, be at full health points and receive temporary health points.

Healing can't restore temporary health points, and they can't be added together. If you have temporary health points and receive more of them, you decide whether to keep the ones you have or to gain the new ones. If you have 0 health points, receiving temporary health points doesn't restore you to consciousness or stabilize you. They can still absorb damage directed at you while you're in that state, but only true healing can save you. Unless an ability that grants you temporary health points has a duration, they last until they're depleted or you finish a long rest.

Persisting Injuries

Combat is a dangerous activity. Even if you make it out alive, you might be afflicted by wounds or scars who might take a long time to heal or require strong healing magic to rid yourself of. In unfortunate circumstances, player characters and important NPCs may acquire injuries.

Unless the GM decides that a character is afflicted by an injury, a character makes a persisting injury check after taking massive damage, falls to 0 HP, or makes a catastrophic death saving throw. A character can only be afflicted by one persisting injury once from the three categories per combat. In other words, once the character has suffered a persisting injury from taking massive damage in a combat, they cannot gain another persisting injury from massive damage that combat.

Massive Damage

The character takes damage from a single source that is equal to or higher than their total hit points. Make a Vitality saving throw against DC 12. On a failure, the creature rolls on the relevant Injury table. On a success, the creature suffers no persisting injury.

0 Hit Points

The character drops to 0 HP. Make a Vitality saving throw against DC 14. On a failure, the creature rolls on the relevant Injury table. On a success, the creature suffers no persisting injury.

Catastrophic Death Save Roll

The character fails a death saving throw by 5 or less. Make a Vitality saving throw against DC 16. On a failure, the creature rolls on the relevant Injury table. On a success, the creature suffers no persisting injury.

Injury Tables

The kind of injury the character is afflicted by depends upon the source of damage that was dealt to them (or last dealt). The requirements to heal an injury can be found in the specific injury's description. If a character starts to accumulate several injuries only apply injuries that make sense. Two minor concussions could turn into one major concussion. On the other hand, if the character already has a major concussion and then rolls a minor on the table, the minor concussion would have no effect. If both hands are unusable, acquiring a third hand injury would have no effect. The GM is free to ask for a reroll if a particular injury doesn't make sense or ignore an injury if things couldn't get much worse.

Naturally Healing Injuries

Some injuries resolve on their own accord given time and proper management. Those injuries that are able to heal with time mentions thus in their description. How long it takes for the injury to heal is determined by the severity of it and shown in the table below. The GM is free to extend this period if circumstances is not conducive to healing and may discuss steps that the players must take to decrease the time necessary.

- 2-20 - Never heals naturally on its own
- 3-19: 49 days minus your Vitality modifier
- 4-18: 35 days minus your Vitality modifier
- 5-17: 35 days minus your Vitality modifier
- 6-16: 21 days minus your Vitality modifier
- 7-15: 21 days minus your Vitality modifier
- 8-14: 14 days minus your Vitality modifier
- 9-13: 14 days minus your Vitality modifier
- 10-12: 7 days minus your Vitality Modifier

Acid

2 & 20 - Blindness: Your eyes are destroyed. You gain the blinded condition permanently. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal your eyesight.

3 & 19 - Destroyed Foot: You are unable to walk on one of your legs. Your speed is 1 m and you can only crawl. If you are in possession of a crutch of some sort your speed is instead halved. You fall prone after using the dash action. You also have disadvantage to any dexterity check that involves your legs. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal the damaged appendage.

4 & 18 - Destroyed Hand: Your hand has melted to the point that you are unable to hold anything in it. You cannot wield, use or hold an object with one of your hands. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal your damaged appendage.

5 & 17 - Major Nerve Damage: You are in constant pain from nerve damage. At the beginning of your turn in combat, you must make a DV 10 Resolve saving throw. If you fail, you lose your action and are unable to do reactions until your next turn. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, heals this injury. Naturally heals.

6 & 16 - Partial Blindness: Your eyes are damaged. You have disadvantage on Perception checks and ranged attack rolls. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, are required to heal this injury.

7 & 15 - Minor Nerve Damage: The same effect as Major Nerve Damage except the DV is 5. Healing spells of at least level 5, a healing spell of at least 1st level where you consume Potency 5 in total, heals this injury. Naturally heals.

8 & 14 - Major Disfigurement: You have gained acid burns to the point where the scars can't be easily concealed. You have disadvantage on all Presence and Manipulation checks you make, except for intimidation attempts you make with Presence and Manipulation which may receive advantage. Magical healing of at least 4th level, or a healing spell of at least 1st level where you consume Potency 4 in total, removes the acid burn scars.

9 & 13 - Blisters: You suffer severe blisters. You have disadvantage on all Dexterity checks. The blisters heal if you receive magical healing of at least level 3, or a healing spell of at least 1st level where you consume Potency 4 in total. Naturally heals.

10-12 - Disfigurement: You suffer acid burn scars, but they are mild and can be somewhat covered up. Magical healing of at least 2nd level, or a healing spell of at least 1st level where you consume Potency 2 in total, removes the acid burn scars.

Bludgeon or Force

2 & 20 - Brain Injury: You have suffered a brain injury. You have disadvantage on all mental and social ability score checks and their respective saving throws. If you would fail a saving throw against bludgeoning, force, or psychic damage, you are also stunned until the end of your next turn. *Regenerate*, similarly powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can restore your brain.

3 & 19 - Broken Leg: You are unable to walk on one of your legs. Your speed is 1 m and you can only crawl. If you are in possession of a crutch of some sort your speed is instead halved. You fall prone after using the dash action. You also have disadvantage to any dexterity check that involves your legs. If your leg is splinted with a successful DV 15 Medicine (Cun) check, then magical healing of at least 6th, or a healing spell of at least 1st level where you consume Potency 6 in total, mends the broken leg. Naturally heals.

4 & 18 - Broken Arm: Your hand is broken to the point that you are unable to hold anything in it. You cannot wield, use or hold an object with one of your hands. If your arm is splinted with a successful DV 15 Medicine (Cun) check, then magical healing of at least 6th, or healing spell of at least 1st level where you consume Potency 6 in total, mends the broken arm. Naturally heals.

5 & 17 - Internal Injury: You are in constant pain from internal damage. At the beginning of your turn in combat, you must make a DV 10 Resolve saving throw. If you fail, you lose your action and are unable to do reactions until your next turn. Healing spells of at least level 6, a healing spell of at least 1st level where you consume Potency 6 in total, heals this injury. Naturally heals.

6 & 16 - Broken Ribs: The same effect as Internal Injury except the DV is 5, healing spells of at least level 5, a healing spell of at least 1st level where you consume Potency 5 in total, heals this injury. Naturally heals.

7 & 15 - Major Concussion: You have disadvantage on social and mental checks as well as Resolve saving throws made to maintain concentration. Healing spells of at least level 5, a healing spell of at least 1st level where you consume Potency 5 in total, heals this injury. Naturally heals.

8 & 14 - Minor Concussion: You have disadvantage on mental checks. Healing spells of at least level 4, a healing spell of at least 1st level where you consume Potency 4 in total, heals this injury. Naturally heals.

9 & 13 - Major Bruising: You suffer severe bruising over an extensive part of your body. You gain vulnerability to bludgeon and force damage. The bruises heal if you receive magical healing of at least level 3, or a healing spell of at least 1st level where you consume Potency 3 in total. Naturally heals.

10-12 - Broken Nose: Your broken nose is painful but doesn't have any extra effect. If your nose is straightened with a successful DV 10 Medicine (Cun) check, then magical healing of at least 2nd level, or a healing spell of at least 1st level where you consume Potency 2 in total, mends the broken nose. Naturally heals.

Cold

2 & 20 - Internal Frostbite: You are suffering internal frostbite damage. You have disadvantage on physical ability checks and saving throws. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal you.

3 & 19 - Gangrene of the Foot: You are unable to walk on one of your legs. Your speed is 1 m and you can only crawl. If you are in possession of a crutch of some sort your speed is instead halved. You fall prone after using the dash action. You also have disadvantage to any Dexterity check that involves your legs. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal the damaged appendage.

4 & 18 - Gangrene of the Hand: Your hand has decayed to the point that you are unable to hold anything in it. You cannot wield, use or hold an object with one of your hands. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal your damaged appendage.

5 & 17 - Major Nerve Damage: You are in constant pain from nerve damage. At the beginning of your turn in combat, you must make a DV 10 Resolve saving throw. If you fail, you lose your action and are unable to do reactions until your next turn. Healing spells of at least level 6, a healing spell of at least 1st level where you consume Potency 6 in total, heals this injury. Naturally heals.

6 & 16 - Frostbite of the Eye: One of your eyes is damaged by frostbite. You have disadvantage on Perception checks and ranged attack rolls. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, are required to heal this injury.

7 & 15 - Minor Nerve Damage: The same effect as Major Nerve Damage except the DV is 5, healing spells of at least level 5, a healing spell of at least 1st level where you consume Potency 5 in total, heals this injury. Naturally heals.

8 & 14 - Frostbitten Foot: Your speed on foot is reduced by 1 m. You must succeed on a DV 10 Dexterity saving throw after using the Dash action or fall prone. Magical healing of at least 4th level, or a healing spell of at least 1st level where you consume Potency 4 in total, cures the frostbite. Naturally heals.

9 & 13 - Frostbitten Hand: In order to grasp or manipulate an object with one of your hands (determined at random), you must succeed at a DV 10 Dexterity check. Magical healing of at least 4th level, or a healing spell of at least 1st level where you consume Potency 4 in total, cures the frostbite. Naturally heals.

10-12 - Anosmia: You lose your sense of smell and taste. You automatically fail any ability checks that involve your sense of smell or taste. The condition heals if you receive any healing of at least 2nd level, or a healing spell of at least 1st level where you consume Potency 2 in total.

Fire

2 & 20 - Fourth Degree Burns: You have suffered severe burns. You have disadvantage on all mental and social ability score checks and their respective saving throws. If you would fail a saving throw against fire, you are also stunned until the end of your next turn. *Regenerate*, similarly powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can cure this injury.

3 & 19 - Third Degree Burns: You have disadvantage on physical ability checks and Vitality saving throws. If you fail a saving throw against an effect that causes fire damage, you also gain the stunned condition until the end of your next turn. Magic such as the *Regenerate*, or a healing spell of at least 1st level where you consume Potency 7 in total, cures this damage. Naturally heals.

4 & 18 - Lose an Eye: One of your eyes is damaged by fire. You have disadvantage on Perception checks and ranged attack rolls. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, are required to heal this injury.

5 & 17 - Major Nerve Damage: You are in constant pain from nerve damage. At the beginning of your turn in combat, you must make a DV 10 Resolve saving throw. If you fail, you lose your action and are unable to do reactions until your next turn. Healing spells of at least level 6, a healing spell of at least 1st level where you consume Potency 6 in total, heals this injury. Naturally heals.

6 & 17 - Second Degree Burns: You have disadvantage on Brawn, Dexterity, and Vitality checks. You gain vulnerability to fire damage. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, heals this injury. Naturally heals.

7 & 15 - Minor Nerve Damage: The same effect as Major Nerve Damage except the DV is 5, healing spells of at least level 5, a healing spell of at least 1st level where you consume Potency 5 in total, heals this injury. Naturally heals.

8 & 14 - Major Disfigurement: You have gained burns to the point where the scars can't be easily concealed. You have disadvantage on all Presence and Manipulation checks you make, except for intimidation attempts you make with Presence and Manipulation which may receive advantage. Magical healing of at least 4th level, or a healing spell of at least 1st level where you consume Potency 4 in total, removes the burn scars.

9 & 13 - Blisters: You suffer severe blisters. You have disadvantage on all Dexterity checks. The blisters heal if you receive magical healing of at least level 3, or a healing spell of at least 1st level where you consume Potency 3 in total. Naturally heals.

10-12 - First Degree Burns: You have superficial but painful burns. 2nd level healing spells, or a healing spell of at least 1st level where you consume Potency 2 in total, cures the burns. Naturally heals.

Lightning

2 & 20 - Brain Injury: You have suffered a brain injury. You have disadvantage on all mental and social ability score checks and their respective saving throws. If you would fail a saving throw against bludgeoning, force, or psychic damage, you are also stunned until the end of your next turn. *Regenerate*, similarly powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can restore your brain.

3 & 19 - Fried Foot: You are unable to walk on one of your legs. Your speed is 1 m and you can only crawl. If you are in possession of a crutch of some sort your speed is instead halved. You fall prone after using the dash action. You also have disadvantage to any dexterity check that involves your legs. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal damaged the appendage.

4 & 18 - Fried Hand: Your hand has fried to the point that you are unable to hold anything in it. You cannot wield, use or hold an object with one of your hands. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal your damaged appendage.

5 & 17- Kidney Failure: When you complete a long rest, you must succeed at a Vitality saving throw DV 10 or gain the poisoned condition until you complete a long rest. Healing of at least level 6th, or a healing spell of at least 1st level where you consume Potency 6 in total, can cure your kidney failure. Naturally heals.

6 & 16 - Arc Flash: Roll on the Fire table.

7 & 15 - Cardiac Injury: You gain a level of exhaustion which cannot be removed by normal means. If you fail a saving throw against fear or fear effects, you gain another level of exhaustion that can be removed by normal means. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, and above are required to heal the injury.

8 & 14 - Skeletal Muscle Breakdown: You have disadvantage on Brawn checks and Brawn saving throws. Healing spells of at least level 4, or a healing spell of at least 1st level where you consume Potency 4 in total, can cure your muscle breakdown. Naturally heals.

9 & 13 - Muscle Spasms: You have disadvantage on Dexterity checks. Spells of at least 3rd level, or a healing spell of at least 1st level where you consume Potency 3 in total, cures your muscle spasms. Naturally heals.

10-12 - Flash Burns: You have superficial burns. You turn red as a lobster, but otherwise suffer no mechanical effects. Healing spells of at least 2nd level, or a healing spell of at least 1st level where you consume Potency 2 in total, cures your flash burns. Naturally heals.

Necrotic

2 & 20 - Soul Necrosis: You are afflicted with intense apathy and depression. You have disadvantage on mental and social ability checks and saving throws. *Greater Restoration* cast with a spell slot of level 7 or above, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal this damage.

3 & 19 - Withered Foot: You are unable to walk on one of your legs. Your speed is 1 m and you can only crawl. If you are in possession of a crutch of some sort your speed is instead halved. You fall prone after using the Dash action. You also have disadvantage to any Dexterity check that involves your legs. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal the damaged appendage.

4 & 18 - Withered Hand: Your hand has decayed to the point that you are unable to hold anything in it. You cannot wield, use or hold an object with one of your hands. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal your damaged appendage.

5 & 17 - Major Organ Necrosis: You are in constant pain from organ failure. At the beginning of your turn in combat, you must make a DV 10 Resolve saving throw. If you fail, you lose your action and are unable to do reactions until your next turn. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, are required to heal the necrosis.

6 & 16 - Spreading Rot: Your health point maximum is reduced by 1d4 every 24 hours the wound persists. If your health point maximum drops to 0, you die. The wound heals if you receive magical healing of at least level 5, or a healing spell of at least 1st level where you consume Potency 5 in total. Naturally heals.

7 & 15 - Minor Organ Necrosis: The same effect as Minor Organ Necrosis except the DV is 5, healing spells of at least level 4, or a healing spell of at least 1st level where you consume Potency 4 in total, is required to heal the organ damage.

8 & 14 - Stench of Death: You smell like rotting flesh. You have disadvantage on Presence and Manipulation ability checks. Magical healing of at least 4th level, or a healing spell of at least 1st level where you consume Potency 4 in total, removes the smell.

9 & 13 - Inflammation: Your muscles are irritated and inflamed. You have disadvantage on Brawn checks and Brawn saving throws. Healing spells of at least 3rd level, or a healing spell of at least 1st level where you consume Potency 3 in total, resolves the inflammation. Naturally heals.

10-12 - Necrotic Discoloration: You get huge patches of blackened and purple discolored skin that looks inflamed and rotten. The patches don't have any adverse effect. Healing spells of at least 2nd level, or a healing spell of at least 1st level where you consume Potency 2 in total, clears your skin.

Piercing or Slashing

2 & 20 - Groin Injury: You are unable to walk on one of your legs. Your speed is 1 m and you can only crawl. If you are in possession of a crutch of some sort your speed is instead halved. You fall prone after using the Dash action. You also have disadvantage to any Dexterity check that involves your legs, and you are also sterile. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal the damage.

3 & 19 - Throat Injury: You gain a level of exhaustion which cannot be removed by normal means. You also have disadvantage on Vitality checks and you lose most of your voice. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, are required to heal this injury.

4 & 18 - Lose an Eye: One of your eyes is pierced. You have disadvantage on Perception checks and ranged attack rolls. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, is required to heal this injury.

5 & 17 - Cardiac Injury: You gain a level of exhaustion which cannot be removed by normal means. If you fail a saving throw against fear or fear effects, you gain another level of exhaustion that can be removed by normal means. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, is required to heal this injury.

6 & 16 - Organ Damage: You are in constant pain from organ failure. At the beginning of your turn in combat, you must make a DV 10 Resolve saving throw. If you fail, you lose your action and

are unable to do reactions until your next turn. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, is required to heal the necrosis. Naturally heals.

7 & 15 - Pierced Stomach: When you complete a long rest, you must succeed at a Vitality saving throw DV 10 or gain the poisoned condition until you complete a long rest. Magic of at least 5th level, or a healing spell of at least 1st level where you consume Potency 5 in total, can cure your kidney failure. Naturally heals.

8 & 14 - Injured Hamstring: Your speed on foot is reduced by 1 m. You must succeed on a DV 10 Dexterity saving throw after using the Dash action or fall prone. Magical healing of at least 3rd level, or a healing spell of at least 1st level where you consume Potency 3 in total, cures the hamstring. Naturally heals.

9 & 13 - Blood Loss: You have disadvantage on death saving throws for the duration for 3 days. Healing spells of at least 3rd level, or a healing spell of at least 1st level where you consume Potency 3 in total, cures the blood loss.

10-12 - Scar: You suffer a great scar that can be somewhat covered up. Magical healing of at least 2nd level, or a healing spell of at least 1st level where you consume Potency 2 in total, removes scars.

Poison

2 & 20 - Systemic Damage: You are suffering from severe internal damage. You have disadvantage on physical ability checks and saving throws. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal you.

3 & 19 - Major Liver Damage: When you complete a long rest, you must succeed at a Vitality saving throw DV 14 or gain the poisoned condition until you complete a long rest. Additionally, you gain vulnerability to poison damage and anytime you drink alcohol or take another drug, you take 1d6 poison damage. Magic such as the *Regenerate* spell, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can cure your liver damage.

4 & 18 - Minor Liver Damage: When you complete a long rest, you must succeed at a Vitality saving throw DV 12 or gain the poisoned condition until you complete a long rest. Additionally, whenever you take poison damage you take an additional 1d4 poison damage, and anytime you drink alcohol or take another drug, you suffer 1d4 poison damage. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, heals the liver damage.

5 & 17 - Major Kidney Failure: When you complete a long rest, you must succeed at a Vitality saving throw DV 10 or gain the poisoned condition until you complete a long rest. Healing magic of at least 6th level, or a healing spell of at least 1st level where you consume Potency 6 in total, can cure your kidney failure. Alternatively, someone can tend to the kidney failure. Naturally heals.

6 & 16 - Cardiac Injury: You gain a level of exhaustion which cannot be removed by normal means. If you fail a saving throw against fear or fear effects, you gain another level of exhaustion that can be removed by normal means. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, heals the cardiac injury.

7 & 15 - Minor Kidney Failure: This has the same effect as Major Kidney Failure above, except healing spells of level 5, or a healing spell of at least 1st level where you consume Potency 5 in total, can cure it. Naturally heals.

8 & 14 - Vertigo: You have disadvantage on Dexterity checks. Healing spells of at least level 4, or a healing spell of at least 1st level where you consume Potency 4 in total, heals this injury. Naturally heals.

9 & 13 - Nausea: You have disadvantage on Vitality checks. Healing spells of at least 3rd level, or a healing spell of at least 1st level where you consume Potency 3 in total, heals your nausea. Naturally heals.

10-12 - Minor Nausea: You must succeed at a DV 10 Vitality saving throw every 10 minutes before you can consume food. Healing spells of at least level 2, or a healing spell of at least 1st level where you consume Potency 2 in total, heals your minor nausea. Naturally heals.

Psychic

2 & 20 - Brain Injury: You have suffered a brain injury. You have disadvantage on all mental and social ability score checks and their respective saving throws. If you would fail a saving throw against bludgeoning, force, or psychic damage, you are also stunned until the end of your next turn. *Regenerate*, similarly powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can cure your brain injury.

3 & 19 - Indefinite Madness: Roll on the Indefinite Madness table.

4 & 18 - Migraine: You have disadvantage on mental ability checks and saving throws. If you fail a saving throw against bludgeoning, force, or psychic, you are also stunned until the end of your next turn. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can cure your migraines.

5 & 17 - Phobia: You develop a debilitating fear of something in the situation from which you gained your injury. Discuss what this is with your GM. When you are confronted with your phobia, you have disadvantage on all ability checks and saving throws. *Greater Restoration* cast at 6th level, or a healing spell of at least 1st level where you consume Potency 6 in total, cures your phobia.

6 & 16 - Long Term Madness: Roll on the Long-term Madness table.

7 & 15 - Subdued Charisma: You don't feel like yourself. You have disadvantage on social checks. Healing spells of at least level 5, or a healing spell of at least 1st level where you consume Potency 5 in total, heals your charisma. Naturally heals.

8 & 14 - Minor Headaches: You have disadvantage on mental checks. Healing spells of at least level 4, or a healing spell of at least 1st level where you consume Potency 4 in total, cures your headaches. Naturally heals.

9 & 13 - Inappropriate Volume: You can't regulate your volume. You shout when you intend to whisper, and whisper when you intend to shout. Healing spells of at least level 3, or a healing spell of at least 1st level where you consume Potency 3 in total, cures your inappropriate volume.

10-12 - Short-Term Madness: Roll on the Short-term Madness table.

Radiant

2 & 20 - Blindness: Your eyes are destroyed. You gain the blinded condition permanently. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can heal your eyesight.

3 & 19 - Third Degree Burns: You have disadvantage on physical ability checks and Vitality saving throws. If you fail a saving throw against an effect that causes fire damage, you also gain the stunned condition until the end of your next turn. Magic such as the *Regenerate*, or a healing spell of at least 1st level where you consume Potency 7 in total, cures this damage. Naturally heals.

4 & 18 - Partial Blindness: Your retinas are damaged. You have disadvantage on Perception checks and ranged attack rolls. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, are required to heal this injury.

5 & 17 - Second Degree Burns: You have disadvantage on physical checks. You gain vulnerability to fire damage. Healing spells of at least 6th level, or a healing spell of at least 1st level where you consume Potency 6 in total, cures this damage. Naturally heals.

6 & 16 - Large Skin Tumors: You develop several large, painful skin tumors. You have disadvantage on social checks. Healing spells of at least level 6, or a healing spell of at least 1st level where you consume Potency 6 in total, are required to heal this injury. If your large skin tumors are not cured within six months, you develop Systemic Damage as per the poison table.

7 & 15 - Small Skin Tumors: You develop several small, painless skin tumors. You have disadvantage on Presence and Manipulation checks. Healing spells of at least level 5, or a healing spell of at least 1st level where you consume Potency 5 in total, are required to heal this injury. If your small skin tumors are not cured within one year, you develop Large Skin Tumors.

8 & 14 - Minor Subdued Charisma: You don't feel as yourself. You have disadvantage on Presence and Manipulation checks. Healing spells of at least level 4, or a healing spell of at least 1st level where you consume Potency 4 in total, heals your charisma. Naturally heals.

9 & 13 - Blisters: You suffer severe blisters. You have disadvantage on all Dexterity checks.

The blisters heal if you receive magical healing of at least level 3, or a healing spell of at least 1st level where you consume Potency 3 in total. Naturally heals.

10-12 - First Degree Burns: You have superficial but painful burns. Healing spells of at least 2nd level, or a healing spell of at least 1st level where you consume Potency 2 in total, cures the burns. Naturally heals.

Thunder

2 & 20 - Brain Injury: You have suffered a brain injury. You have disadvantage on all mental and social ability score checks and their respective saving throws. If you would fail a saving throw against bludgeoning, force, or psychic damage, you are also stunned until the end of your next turn. *Regenerate*, similarly powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can cure your brain injury.

3 & 19 - Deafness: Your eardrums have been destroyed, you gain the deafened condition. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can restore your hearing.

4 & 18 - Migraine: You have disadvantage on mental ability checks and saving throws. If you fail a saving throw against bludgeoning, force, or psychic, you are also stunned until the end of your next turn. *Regenerate*, similar powerful magic, or a healing spell of at least 1st level where you consume Potency 7 in total, can cure your migraines.

5 & 17 - Internal Injury: You are in constant pain from internal injuries. At the beginning of your turn in combat, you must make a DV 10 Resolve saving throw. If you fail, you lose your action and are unable to do reactions until your next turn. Healing spells of at least level 6, a healing spell of at least 1st level where you consume Potency 6 in total, heals this injury. Naturally heals.

6 & 16 - Major Concussion: You have disadvantage on social and mental checks as well as Resolve saving throws made to maintain concentration. Healing spells of at least level 5, a healing spell of at least 1st level where you consume Potency 5 in total, heals this injury. Naturally heals.

7 & 15 - Minor Concussion: You have disadvantage on mental checks. Healing spells of at least level 4, a healing spell of at least 1st level where you consume Potency 4 in total, heals this injury. Naturally heals.

8 & 14 - Minor Headaches: You have disadvantage on mental checks. Healing spells of at least level 3rd, or a healing spell of at least 1st level where you consume Potency 3 in total, cures your headaches. Naturally heals.

9 & 13 - Bruising: You suffer bruising over an extensive part of your body. Whenever you take bludgeoning, force or thunder damage you take an additional 1d4 damage of that type. The bruises heal if you receive magical healing of at least level 3, or a healing spell of at least 1st level where you consume Potency 3 in total. Naturally heals.

10-12 - Partial Deafness: Your eardrums have been damaged, you are hard of hearing. You have disadvantage on any ability check that requires hearing. Your hearing will be restored if you receive magical healing of at least level 2, or a healing spell of at least 1st level where you consume Potency 2 in total.

Conditions

Conditions alter a creature's capabilities in a variety of ways and can arise as a result of a spell, an ability from an ability origin, a monster's attack, or other effects. Most conditions, such as blinded, are impairments, but a few, such as invisible, can be advantageous.

A condition lasts either until it is countered (the prone condition is countered by standing up, for example) or for a duration specified by the effect that imposed the condition. If multiple effects impose the same condition on a creature, each instance of the condition has its own duration, but the condition's effects don't get worse. A creature either has a condition or doesn't. The following definitions specify what happens to a creature while it is subjected to a condition.

Blinded

- ❖ A blinded creature can't see and automatically fails any ability check that requires sight.
- ❖ Attack rolls against the creature have advantage, and the creature's attack rolls have disadvantage.

Charmed

- ❖ A charmed creature can't attack the charmer or target the charmer with harmful abilities or magical effects.
- ❖ The charmer has advantage on any ability check to interact socially with the creature.

Deafened

- ❖ A deafened creature can't hear and automatically fails any ability check that requires hearing.

Exhaustion

Some special abilities and environmental hazards, such as starvation and the long-term effects of freezing or scorching temperatures as well as ritual casting, can lead to a special condition called exhaustion. Exhaustion is measured in six levels. An effect can give a creature one or more levels of exhaustion, as specified in the effect's description.

Level	Effect
1	Disadvantage on ability checks
2	Speed halved
3	Disadvantage on attack rolls and saving throws
4	HP maximum halved
5	Speed reduced to 0
6	Death

If an already exhausted creature suffers another effect that causes exhaustion, its current level of exhaustion increases by the amount specified in the effect's description. A creature suffers the effect of its current level of exhaustion as well as all lower levels. For example, a creature suffering level 2 exhaustion has its speed halved and has Disadvantage on ability checks. An effect that removes exhaustion reduces its level as specified in the effect's description, with all exhaustion effects ending if a creature's exhaustion level is reduced below 1. Finishing a long rest reduces a creature's exhaustion level by 1, provided that the creature has also ingested some food and drink.

Frightened

- ❖ A frightened creature has disadvantage on ability checks and attack rolls while the source of its fear is within line of sight.
- ❖ The creature can't willingly move closer to the source of its fear.

Grappled

- ❖ A grappled creature's speed becomes 0, and it can't benefit from any bonus to its speed.
- ❖ The condition ends if the grappler is incapacitated (see the condition).
- ❖ The condition also ends if an effect removes the grappled creature from the reach of the grappler or grappling effect, such as when a creature is hurled away by the Thunder Wave spell.

Incapacitated

- ❖ An incapacitated creature can't take actions or reactions.

Invisible

- ❖ An invisible creature is impossible to see without the aid of magic or a special sense. For the purpose of hiding, the creature is heavily obscured. The creature's location can be detected by any noise it makes or any tracks it leaves.
- ❖ Attack rolls against the creature have disadvantage, and the creature's attack rolls have advantage.

Paralyzed

- ❖ A paralyzed creature is incapacitated (see the condition) and can't move or speak.
- ❖ The creature automatically fails Brawn and Dexterity saving throws.
- ❖ Attack rolls against the creature have advantage.
- ❖ Any attack that hits the creature is a critical hit if the attacker is within 1 m of the creature.

Petrified

- ❖ A Petrified creature is transformed, along with any non-magical object it is wearing or carrying, into a solid inanimate substance (usually stone). Its weight increases by a factor of ten, and it ceases aging.
- ❖ The creature is incapacitated (see the condition), can't move or speak, and is unaware of its surroundings.
- ❖ Attack rolls against the creature have advantage.
- ❖ The creature automatically fails Brawn and Dexterity saving throws.
- ❖ The creature has resistance to all damage.
- ❖ The creature is immune to poison and disease, although a poison or disease already in its system is suspended, not neutralized.

Poisoned

- ❖ A Poisoned creature has disadvantage on attack rolls and ability checks.

Prone

- ❖ A prone creature's only movement option is to crawl unless it stands up and thereby ends the condition.
- ❖ The creature has disadvantage on attack rolls.
- ❖ An attack roll against the creature has advantage if the attacker is within 1 m of the creature. Otherwise, the attack roll has disadvantage.

Restrained

- ❖ A restrained creature's speed becomes 0, and it can't benefit from any bonus to its speed.
- ❖ Attack rolls against the creature have advantage, and the creature's attack rolls have disadvantage.
- ❖ The creature has disadvantage on Dexterity saving throws.

Stunned

- ❖ A stunned creature is Incapacitated (see the condition), can't move, and can speak only falteringly.
- ❖ The creature automatically fails Brawn and Dexterity saving throws.
- ❖ Attack rolls against the creature have advantage.

Unconscious

- ❖ An unconscious creature is incapacitated (see the condition), can't move or speak, and is unaware of its surroundings.
- ❖ The creature drops whatever it's holding and falls prone.
- ❖ The creature automatically fails Brawn and Dexterity saving throws.
- ❖ Attack rolls against the creature have advantage.
- ❖ Any attack that hits the creature is a critical hit if the attacker is within 1 m of the creature.

Traps

Traps can be found almost anywhere. One wrong step in an ancient tomb might trigger a series of scything blades, which cleave through armor and bone. The seemingly innocuous vines that hang over a cave entrance might grasp and choke anyone who pushes through them. A net hidden among the trees might drop on travelers who pass underneath. In a fantasy game, unwary adventurers can fall to their deaths, be burned alive, or fall under a fusillade of poisoned darts.

A trap can be either mechanical or magical in nature. Mechanical traps include pits, arrow traps, falling blocks, water-filled rooms, whirling blades, and anything else that depends on a mechanism to operate. Magic traps are either magical device traps or spell traps. Magical device traps initiate spell effects when activated. Spell traps are spells such as Glyph of Warding and symbols that function as traps.

Traps in Play

When adventurers come across a trap, you need to know how the trap is triggered and what it does, as well as the possibility for the characters to detect the and to disable or avoid it.

Triggering a Trap

Most traps are triggered when a creature goes somewhere or touches something that the trap's creator wanted to protect. Common triggers include stepping on a pressure plate or a false section of floor, pulling a tripwire, turning a doorknob, and using the wrong key in a lock. Magic traps are often set to go off when a creature enters an area or touches an object. Some magic traps (such as the Glyph of Warding spell) have more complicated trigger conditions, including a password that prevents the trap from activating.

Detecting and Disabling a Trap

Usually, some element of a trap is visible to careful inspection. Characters might notice an uneven flagstone that conceals a pressure plate, spot the gleam of light off a tripwire, notice small holes in the walls from which jets of flame will erupt, or otherwise detect something that points to a trap's presence.

A trap's description specifies the checks and DVs needed to detect it, disable it, or both. A character actively looking for a trap can attempt a Perception (Int) check against the trap's DV. You can also compare the DV to detect the trap with each character's Perception (Com) check to determine whether anyone in the party notices the trap in passing. If the adventurers detect a trap before triggering it, they might be able to disarm it, either permanently or long enough to move past it. You might call for an Investigation check for a character to deduce what needs to be done, followed by a Dexterity check using thieves' tools, or something that can act like thieves' tools, to perform the necessary sabotage.

Any character can attempt an Occult (Cun) check to detect or disarm a magic trap, in addition to any other checks noted in the trap's description. The DVs are the same regardless of the check used. In addition, Dispel Magic has a chance of disabling most magic traps. A magic trap's description provides the DV for the ability check made when you use Dispel Magic.

In most cases, a trap's description is clear enough that you can adjudicate whether a character's actions locate or foil the trap. As with many situations, you shouldn't allow die rolling to override clever play and good planning. Use your common sense, drawing on the trap's description to determine what happens. No trap's design can anticipate every possible action that the characters might attempt.

You should allow a character to discover a trap without making an ability check if an action would clearly reveal the trap's presence. For example, if a character lifts a rug that conceals a pressure plate, the character has found the trigger and no check is required.

Foiling traps can be a little more complicated. Consider a trapped treasure chest. If the chest is opened without first pulling on the two handles set in its sides, a mechanism inside fires a hail of poison needles toward anyone in front of it. After inspecting the chest and making a few checks, the characters are still unsure if it's trapped. Rather than simply open the chest, they prop a shield in front of it and push the chest open at a distance with an iron rod. In this case, the trap still triggers, but the hail of needles fires harmlessly into the shield.

Traps are often designed with mechanisms that allow them to be disarmed or bypassed. Intelligent creatures that place traps in or around their lairs need ways to get past those traps without harming themselves. Such traps might have hidden levers that disable their triggers, or a secret door might conceal a passage that goes around the trap.

Trap Effects

The effects of traps can range from inconvenient to deadly, making use of elements such as arrows, spikes, blades, poison, toxic gas, blasts of fire, and deep pits. The deadliest traps combine multiple elements to kill, injure, contain, or drive off any creature unfortunate enough to trigger them. A trap's description specifies what happens when it is triggered.

The attack bonus of a trap, the save DV to resist its effects, and the damage it deals can vary depending on the trap's severity. Use the trap save DVs and attack bonuses table and the damage severity by level table for suggestions based on three levels of trap severity.

A trap intended to be a setback is unlikely to kill or seriously harm characters of the indicated levels, whereas a dangerous trap is likely to seriously injure (and potentially kill) characters of the indicated levels. A deadly trap is likely to kill characters of the indicated levels.

Trap Save DVs and Attack Bonuses

Trap Danger	Save DV	Attack Bonus
Setback	10–11	+3 to +5
Dangerous	12–15	+6 to +8
Deadly	16–20	+9 to +12

Damage Severity by Level

Character Lvl	Setback	Dangerous	Deadly
1st–4th	1d10	2d10	4d10
5th–10th	2d10	4d10	10d10
11th–16th	4d10	10d10	18d10
17th–20th	10d10	18d10	24d10

Complex Traps

Complex traps work like standard traps, except once activated they execute a series of actions each round. A complex trap turns the process of dealing with a trap into something more like a combat encounter. When a complex trap activates, it rolls initiative. The trap's description includes an initiative bonus. On its turn, the trap activates again, often taking an action. It might make successive attacks against intruders, create an effect that changes over time, or otherwise produce a dynamic challenge. Otherwise, the complex trap can be detected and disabled or in the usual ways.

For example, a trap that causes a room to slowly flood works best as a complex trap. On the trap's turn, the water level rises. After several rounds, the room is completely flooded.

Sample Traps

The magical and mechanical traps presented here vary in deadliness and are presented in alphabetical order.

Collapsing Roof

Mechanical Trap

This trap uses a tripwire to collapse the supports keeping an unstable section of a ceiling in place. The tripwire is 10 cm off the ground and stretches between two support beams. The DV to spot the tripwire is 10. A successful DV 15 Dexterity check using thieves' tools disables the trip wire harmlessly. A character without thieves' tools can attempt this check with disadvantage using any edged weapon or edged tool. On a failed check, the trap triggers.

Anyone who inspects the beams can easily determine that they are merely wedged in place. As an action, a character can knock over a beam, causing the trap to trigger. The ceiling above the tripwire is in bad repair, and anyone who can see it can tell that it's in danger of collapse.

When the trap is triggered, the unstable ceiling collapses. Any creature in the area beneath the unstable section must succeed on a DV 15 Dexterity saving throw, taking 22 (4d10) bludgeoning damage on a failed save, or half as much damage on a successful one. Once the trap is triggered, the floor of the area is filled with rubble and becomes difficult terrain.

Falling Net

Mechanical Trap

This trap uses a tripwire to release a net suspended from the ceiling. The tripwire is 10 cm off the ground and stretches between two columns or trees. The net is hidden by cobwebs or foliage. The D value to spot the tripwire and net is 10. A successful DV 15 Dexterity check using thieves' tools breaks the trip wire harmlessly. A character without thieves' tools can attempt this check with disadvantage using any edged weapon or edged tool. On a failed check, the trap triggers.

When the trap is triggered, the net is released, covering a 2-m-square area. Those in the area are trapped under the net and restrained, and those that fail a DV 10 Brawn saving throw are also knocked prone. A creature can use its action to make a DV 10 Brawn check, freeing itself or another creature within its reach on a success. The net has AV 10 and 20 health points. Dealing 5 slashing damage to the net (AV 10) destroys a 1 m square section of it, freeing any creature trapped in that section.

Fire-Breathing Statue

Magic Trap

This trap is activated when an intruder steps on a hidden pressure plate, releasing a magical gout of flame from a nearby statue. The statue can be of anything, including a dragon or a mage casting a spell.

The DV is 15 to spot the pressure plate, as well as faint scorch marks on the floor and walls. A spell or other effect that can sense the presence of magic, such as Detect Magic, reveals an aura of evocation magic around the statue.

The trap activates when more than 10 kg of weight is placed on the pressure plate, causing the statue to release a 6 m cone of fire. Each creature in the fire must make a D value 13 Dexterity saving throw, taking 22 (4d10) fire damage on a failed save, or half as much damage on a successful one.

Wedging an iron spike or other object under the pressure plate prevents the trap from activating. A successful Dispel Magic (DV 13) cast on the statue destroys the trap.

Pits

Mechanical Trap

Four basic pit traps are presented here:

Simple Pit: A simple pit trap is a hole dug in the. The hole is covered by a large cloth anchored on the pit's edge and camouflaged with dirt and debris. The DV to spot the pit is 10. Anyone stepping on the cloth falls through and pulls the cloth down into the pit, taking damage based on the pit's depth (usually 3 m, but some pits are deeper).

Hidden Pit: This pit has a cover constructed from material identical to the floor around it. A successful DV 15 Perception (Int) check discerns an absence of foot traffic over the section of the floor that forms the pit's cover. A successful DV 15 Investigation check is necessary to confirm that the trapped section of the floor is actually the cover of a pit.

When a creature steps on the cover, it swings open like a trapdoor, causing the intruder to spill into the pit below. The pit is usually 3 or 5 m deep but can be deeper. Once the pit trap is detected, an iron spike or similar object can be wedged between the pit's cover and the surrounding floor in such a way as to prevent the cover from opening, thereby making it safe to cross. The cover can also be magically held shut using the Arcane Lock spell or similar magic.

Locking Pit: This Pit trap is identical to a hidden Pit trap, with one key exception: the trap door that covers the Pit is spring-loaded. After a creature falls into the Pit, the cover snaps shut to trap its victim inside.

A successful DV 20 Brawn check is necessary to pry the cover open. The cover can also be smashed open. A character in the pit can also attempt to disable the spring mechanism from the inside with a DV 15 Dexterity check using thieves' tools, provided that the mechanism can be reached and the character can see. In some cases, a mechanism (usually hidden behind a secret door nearby) opens the pit.

Spiked Pit: This pit trap is a simple, hidden, or locking pit trap with sharpened wooden or iron spikes at the bottom. A creature falling into the pit takes 11 (2d10) piercing damage from the spikes, in addition to any falling damage. Even nastier versions of poison smeared on the spikes. In that case, anyone taking piercing damage from the spikes must also make a DV 13 Vitality saving throw, taking a 22 (4d10) poison damage on a failed save, or half as much damage on a successful one.

Poison Darts

Mechanical Trap

When a creature steps on a hidden pressure plate, poison-tipped darts shoot from spring-loaded or pressurized tubes cleverly embedded in the surrounding walls. An area might include multiple pressure plates, each one rigged to its own set of darts.

The tiny holes in the walls are obscured by dust and cobwebs, or cleverly hidden amid bas-reliefs, murals, or frescoes that adorn the walls. The DV to spot them is 15. With a successful DV 15 Investigation check, a character can deduce the presence of the pressure plate from variations in the mortar and stone used to create it, compared to the surrounding floor. Wedging an iron spike or other object under the pressure plate prevents the trap from activating. Stuffing the holes with cloth or wax prevents the darts contained within from launching.

The trap activates when more than 10 kg of weight is placed on the pressure plate, releasing four darts. Each dart makes a ranged attack with a +8 bonus against a random target within 2 m of the pressure plate (vision is irrelevant to this attack roll). (If there are no targets in the area, the darts don't hit anything.) A target that is hit takes 2 (1d4) piercing damage and must succeed on a DV 15 Vitality saving throw, taking 11 (2d10) poison damage on a failed save, or half as much damage on a successful one.

Poison Needle

Mechanical Trap

A poisoned needle is hidden within a treasure chest's lock, or in something else that a creature might open. Opening the chest without the proper key causes the needle to spring out, delivering a dose of poison.

When the trap is triggered, the needle extends 10 cm straight out from the lock. A creature within range takes 1 piercing damage and 11 (2d10) poison damage, and must succeed on a DV 15 Vitality saving throw or be poisoned for 1 hour. A successful DV 20 Investigation check allows a character to deduce the trap's presence from alterations made to the lock to accommodate the needle. A successful DV 15 Dexterity check using thieves' tools disarms the trap, removing the needle from the lock. Unsuccessfully attempting to pick the lock triggers the trap.

Rolling Sphere

Mechanical Trap

When 10 or more kg of pressure are placed on this trap's pressure plate, a hidden trapdoor in the ceiling opens, releasing a 2 m diameter rolling sphere of solid stone.

With a successful DV 15 Perception (Int) check, a character can spot the trapdoor and pressure plate. A search of the floor accompanied by a successful DV 15 Investigation check reveals variations in the mortar and stone that betray the pressure plate's presence. The same check was made while inspecting the ceiling notes variations in the stonework that reveal the trapdoor. Wedging an iron spike or other object under the pressure plate prevents the trap from activating.

Activation of the sphere requires all creatures present to roll Initiative. The sphere rolls initiative with a +8 bonus. On its turn, it moves 12 m in a straight line. The sphere can move through creatures' spaces, and creatures can move through its space, treating it as difficult terrain. Whenever the sphere enters a creature's space or a creature enters its space while it's rolling, that creature must succeed on a DV 15 Dexterity saving throw or take 55 (10d10) bludgeoning damage and be knocked prone. The sphere stops when it hits a wall or a similar barrier. It can't go around corners, but smart dungeon builders incorporate gentle, curving turns into nearby passages that allow the sphere to keep moving.

As an action, a creature within 1 m of the sphere can attempt to slow it down with a DV 20 Brawn check. On a successful check, the sphere's speed is reduced by 3 m. If the sphere's speed drops to 0, it stops moving and is no longer a threat.

Sphere of Annihilation

Magic Trap

Magical, impenetrable darkness fills the gaping mouth of a stone face carved into a wall. The mouth is 0.5 m in diameter and roughly circular. No sound issues from it, no light can illuminate the inside of it, and any matter that enters it is instantly obliterated.

A successful DV 20 Occult (Int) check reveals that the mouth contains a Sphere of Annihilation that can't be controlled or moved. It is otherwise identical to a normal Sphere of Annihilation.

Some versions of the trap include an enchantment placed on the stone face, such that specified creatures feel an overwhelming urge to approach it and crawl inside its mouth. This effect is otherwise like the Sympathy aspect of the Antipathy/Sympathy spell. A successful Dispel Magic (DV 18) removes this enchantment.

Poisons

Given their insidious and deadly nature, poisons are illegal in most societies but are a favorite tool among assassins, drow, and other evil creatures. Poisons come in the following four types.

Contact

Contact poison can be smeared on an object and remains potent until it is touched or washed off. A creature that touches contact poison with exposed skin suffers its effects.

Ingested

A creature must swallow an entire dose of ingested poison to suffer its effects. The dose can be delivered in food or a liquid. You may decide that a partial dose has a reduced effect, such as allowing advantage on the saving throw or dealing only half damage on a failed save.

Inhaled

These poisons are powders or gases that take effect when inhaled. Blowing the powder or releasing the gas subjects creatures in a 5-foot cube to its effect. The resulting cloud dissipates immediately afterward. Holding one's breath is ineffective against inhaled poisons, as they affect nasal membranes, tear ducts, and other parts of the body.

Injury

Injury poison can be applied to weapons, ammunition, trap components, and other objects that deal piercing or slashing damage and remains potent until delivered through a wound or washed off. A creature that takes piercing or slashing damage from an object coated with the poison is exposed to its effects.

Ingredients

Poisons are specific ingredients with specific physical properties that are further concentrated and purified to magnify the poisonous effect. These poisons are presented in doses that are balanced for Small or Medium humanoids and are all purified or handled in some way. Let the GM lessen the effects of the poison if it is fed raw to a Small or Medium humanoid. Double the dosage for each size above Medium. Tiny creatures only need half a dosage to be affected as written below.

Identifying Poisonous Ingredients

A poisoner can roll an Academics (applicable) skill check with intelligence to recall poisonous ingredients. The result is limited by what the poisoner could possibly know of. Otherwise, this information can be sought out in books or taught from other people. Casting *Detect Poisons and Disease* will reveal if an ingredient is poisonous, what kind of poison it is, but will not reveal the purifying process of it.

Store the Creation

You must also possess an empty poison vial, or vessels for powders, balms and salves, to properly store your finished item. A finished item can linger within the poisoner's kit or herbalism kit until they can be transferred over to another proper vessel. Until it has been transferred, no other creation can be made with the kits unless you throw away the stored item.

Upkeep Cost

Here and there, you must refill your poisoner's kit/herbalism kit with different reagents that aid you in the crafting, as well as exchange faulty equipment. You can do so in settlements that are able to supply such tools and reagents. After 10 dosages have been attempted to be created with the poisoner's kit/herbalism kit, the poisoner's kit requires 2 gp cost for upkeep and the herbalism kit requires a 5 sp for upkeep.

Concentration Requirements

You must give your poisoner's kit or herbalism kit your attention when you are creating a poison. You cannot travel whilst you brew (wagon, walking, horse - but a stable enough boat can do), participate in another activity or sleep. But you can eat and talk. Moving the kit around can run the risk of losing the concoction. If the kit is handled in a rough way, not only the kit itself can take damage, but the poison itself can be lost. This is up to the GM's discretion.

Crafting Process and Difficulty

Each poison is different. Some compounds don't require any kind of roll because of their potent nature, only time to process. Other compounds such as acids and cyanide gas can include difficult crafting checks, not necessarily only to create them, but also not harming yourself in the process. Time also depends upon the circumstances, whilst making an acid can be only hours, drying a powder naturally depends upon the temperature around you and the moisture in the air, unless you have access to an oven. Average times for each step in the purifying process is presented with each poison.

Cost of Materials and Products

The cost of poisonous materials and finished products varies greatly from place to place and time to time. If the material or product would be legal it would definitely carry legal fees as a controlled substance, if it would be illegal, the vendor decides what price they are willing to buy or sell a poisonous ingredient or product to make up for the risks. Oftentimes, the ingredient itself is often laughably cheap.

The cost of buying and selling a potion is up to the GM, but here are some guidelines:

If the person doesn't know what they are buying or selling, the cost of poisons and ingredients are going to be very cheap. A flower merchant not knowing some of their stock is poisonous. A produce merchant selling interesting amounts of apples to one person. Selling honey at a marketplace but it is actually "Miss Death Honey". In this case, follow the prices set in the trade goods or food tables.

If the substance is legal and controlled, the cost of poisons is going to be moderate. What you are really buying here is time, the upkeep costs of keeping up storing facilities that are safe from burglary, the packaging of the poison, and taxes for the vendor. Selling poisons to the vendor might require some kind of receipt from another vendor/producer to show that the poison was not illegally procured. In this case, depending upon the complexity of the poison, the cost of a dose will probably cost around 1 gp to 20 gp.

If poisons are illegal with less risk attached, the cost of poisons are going to be more expensive. However, being a vendor of poisons out in the middle of nowhere or with a legal system that is either not that advanced or has other priorities, a vendor can afford to sell and buy poisons a bit more cheaply. Still, little attention from a legal system could also mean attention from more unsavory sorts who rather not pay for the goods. In this case, depending upon the complexity of the poison, the cost of a dose will probably cost between 50 and 200 gp.

If poisons are illegal with risk attached, the cost of poisons are going to skyrocket. A seller is only going to risk selling a poison to you if the cost is worth their while. The cost for doses in this case can vary wildly, but a ballpark is between 100 to 5000 gp.

Applying Poison to Weapons

One dose of a poison can be added to one weapon or three pieces of ammunition, if the poison specifies an injury saving throw, as a bonus action. The poison persists on the weapon or ammunition for 10 rounds.

List of Poisons and ingredients

The effects and purifying process for the poisons below are written per dose meant for a Small or Medium humanoid creature.

Acids

A form of poison, right? Acid can only be crafted with a poisoner's kit or a chemistry kit.

Hydrochloric Acid - Muriatic Acid ($K_a = -5.9$)

A clear liquid that creates vapor when in contact with air, which has a pungent smell. The acid itself is odorless, however. Muriatic acid is created through mixing 0.5 kg of salt (sodium chloride) and 1 dose of sulphuric acid, which creates fumes. Through a tube and an enclosed system you can infuse the fumes in water which afterwards can be mostly removed, creating concentrated hydrochloric acid. As a vial it deals 8d6 acid damage on impact.

Process

1. Mixing and infusing in water: 3 hours crafting time and DC 15 Aca(poison) or Aca(chemistry) with Composure or Cunning. A failure means you have failed to capture the fumes and your ingredients are spent. A failure of 10 or more results in a DC 15 Vitality saving throw or taking 4d6 acid damage for all creatures within 2 meters of your poisoner's kit.
2. Dehydrate: 1 hour of crafting time and a DC 18 Aca(poison) or Aca(chemistry) with Cunning. A failure means you have failed to concentrate the acid, lowering the damage of the final product to 4d6 acid instead of 8d6 acid damage.

Nitric Acid - Aqua Fortis/Spirit of Niter ($K_a = -1.4$)

This acid is slightly yellow with an acrid smell. Aqua Fortis is created through mixing 0.5 kg of saltpeter and 0.5 kg of alum - a special type of rock salt. This creates fumes that can be infused into water through an enclosed system and a tube. Afterwards, the water content can be lowered to create concentrated nitric acid. Vial of nitric acid represents the Acid Flask in the adventure equipment section.

Process

1. Mixing and infusing in water: 3 hours crafting time and DC 10 Aca(poison) or Aca(chemistry) with Composure or Cunning. A failure means you have failed to capture the fumes and your ingredients are spent. A failure of 10 or more results in a DC 10 Vitality saving throw or taking 1d6 acid damage for all creatures within 2 meters of your poisoner's kit.
2. Dehydrate: 1 hour of crafting time and a DC 12 Aca(poison) or Aca(chemistry) with Cunning. A failure means you have failed to concentrate the acid, lowering the damage of the final product to 1d6 acid instead of 2d6 acid damage.

Potassium Nitrate - Saltpeter (ingredient)

Saltpeter is primarily used as a food preserver if you have no access to salt. Saltpeter is created through blending cow manure and/or planting soil with some green plants and ash in a dry area and underneath a roof. Then cow urine is regularly poured over the mound, which creates saltpeter crystals on the top. This whole process takes about 3 to 4 months to complete. It can however be bought for the same cost as salt in the trade goods table.

Process

Requires only time, patience and access to the materials described above.

Sulphuric Acid - Oil of Vitriol ($K_a = -2.8$)

A colorless and odorless acid. Sulphuric acid is created through burning 0.5 kg sulfur with 0.5 kg saltpeter in the presence of steam, which can then be infused into water through an enclosed system and a tube. Afterwards, the water content can be lowered to create concentrated sulphuric acid. As a vial it deals 4d6 acid damage on impact.

Process

1. Mixing and infusing in water: 3 hours crafting time and DC 13 Aca(poison) or Aca(chemistry) with Composure or Cunning. A failure means you have failed to capture the fumes and your ingredients are spent. A failure of 10 or more results in a DC 13 Vitality saving throw or taking 2d6 acid damage for all creatures within 2 meters of your poisoner's kit.
2. Dehydrate: 1 hour of crafting time and a DC 15 Aca(poison) or Aca(chemistry) with Cunning. A failure means you have failed to concentrate the acid, lowering the damage of the final product to 2d6 acid instead of 4d6 acid damage.

Poisons List

Crow's Tears - Secret Tears Poison (DC 15 injury - incub. 1 min)

This poison is extracted as a flower oil from the rare Secret Tears plant that grows in the Iskerian woodlands. This plant has clusters of white flower bells with sky blue pistils. The oil's taste and smell is sweet and floral. Despite it being an Iskerian native plant, it has gained its popular name from how it has become a favorite kind of poison of the Church of Riahn - which is vehemently denied by the organization. You need 0.25 kg of flowers to create one dose of poison.

A creature subjected to this poison must succeed on a DC 15 Vitality saving throw or take 3d4 poison damage, gain the poisoned condition until they finish a long rest, as well as the persisting injury of muscle spasms. On a success, the creature takes half damage and suffers no persisting injuries or conditions.

If the check fails by 10 or more, the creature also gains the nerve damage injury. If it is a critical failure, the poison also causes the blindness persisting injury. Damage is dealt immediately, but conditions and persisting injuries sets in after 1 minute incubation time.

Process

1. Pressing (pressing the plant matter to extract oil): 30 minute crafting time
2. Dehydrate (removing excess water): 30 minute crafting time
3. Purification (distillation and/or synthesis): 1 hour of crafting time and a DC 15 Academics (applicable) check. On a failure, you ruin the poison's effects.

Corona - The Devil's Syrup - Miss Death Honey (DC 18 ingested - incub. 1 min)

The Corona poison is a type of honey secreted by the Coronias bee species, native to the island of Crowhill. When you let the Coronias only feed on nectar from flowers that produce pyrrolizidine alkaloids (PAs) and the plants are sufficiently stressed to increase their natural production of this compound, the resulting honey is infused with a more potent form of PAs. The Coronias bee is immune to PAs. The corona honey carries a distinct bitter aftertaste and floral overtones, and its color is slightly more orange than normal honey.

A creature subjected to this poison must make a DC 18 Vitality saving throw. On a fail, the creature suffers 4d6 poison damage, is poisoned until they finish a long rest, gain two levels of exhaustion, gain nausea and major liver damage. On a success, the creature only suffers nausea and half poison damage. On a fail of 10 or more, the creature suffers all the effects of a normal fail but also major kidney failure and becomes paralyzed for 1 minute.

Process

This poison requires months of creation and preparation with specific materials and set up. Creating this poison is handled by GM discretion.

Death Cap Poison (DC 22 ingested - incub. 5d4 hours)

The Death Cap mushroom looks like other edible mushrooms, but can be discerned through their white stems, white/yellow/brown caps and a "skirt" just underneath the cap. They also give off a smell similar to honey. It has a pleasant, typical mushroom taste, and it grows close to other

edible mushrooms in most forests of Frostmark from southern Beornhelm and southwards, though often can be found growing close to oaks. One medium sized mushroom will yield enough powder for one dose. This poison is the most effective as a powder. It is a beige powder with a distinct mushroom flavor, but can also be ingested raw (-2 to the DC in all instances).

After the incubation period is over, the creature must roll a DC 18 Vitality saving throw, or gain the nausea persisting injury, the poisoned condition until the creature finishes a long rest and takes 2d10 poison damage. On a success, the creature suffers no persisting injuries or conditions and takes half damage.

These initial symptoms that last for 1d4 hours are followed by a brief period of apparent improvement for 1d4 hours. Afterwards, without treatment, it may cause liver damage. The creature must roll a DC 22 Vitality save, on a fail they suffer minor kidney failure or minor liver failure at random. If they fail this saving throw by 10 or more, you suffer major kidney failure or major liver failure at random. If they fail the saving throw by a critical fail, they fall unconscious and start making death saving throws on their next turn.

Process

1. Dehydrate: 3 days of drying in a sunny and warm environment, or 30 minute in an oven like apparatus.
2. Grinding: 15 minutes of grinding and sieving.

Filthy Wound (DC 10 injury - incub. 1d6+1 hours)

Wounding a creature with a weapon covered in filth has a chance to infect them. If an open wound has not been cleaned properly before the incubation period ends, the creature must roll a DC 10 Vitality saving throw or have the wound become inflamed. This means that the creature suffers the inflammation persisting injury, takes 1d10 poison damage and becomes poisoned until they finish a long rest. On a success, the creature suffers no persisting injuries, suffers no conditions, and takes half damage.

Process

This poison requires no creation time, only access to a source of filth.

Foxglove (DC 14 ingestion - incub. 4d10 min)

This poison comes from the flowering Foxglove plant. It has a long stalk with several trumpet-like white, yellow, pink or purple flowers. All parts of the Foxglove plant are toxic, but the leaves contain the highest concentration of the poison, digitoxin. The leaves or other plant matter can be dried and then turned into a light brown powder that has an unpleasant odor and tastes incredibly bitter. 0.25 kg of leaves or 0.5 kg of other plant matter is required to create one dosage. Grows in, and south of, the Green Elder Valley in Greenfield.

When a creature ingests powdered Foxglove, after the incubation period has passed, they must roll a Vitality saving throw with a DC 15. On a failure, the creature gains the nausea persisting injury, the poisoned condition until they finish a long rest, and takes 3d10 poison damage. On a success, the creature suffers no persisting injuries or conditions and takes half damage.

If the creature fails the saving throw by a critical fail, 1d4+4 hours after ingestion, the creature suffers the Cardiac Injury persisting injury, 2d6 poison damage per hour until they fall unconscious, and at the creature's next turn they start rolling death saving throws.

Process

1. Dehydrate: 3 days of drying in a sunny and warm environment, or 30 minute in an oven like apparatus.
2. Grinding: 30 minutes of grinding and sieving.

Hemlock (DC 18 ingestion - incub. 1d40 min) (DC 14 injury - incub. 1d4 turns)

Hemlock is a plant that belongs to the carrot family with clusters of small white flowers, purple markings, and leaves that look similar to ferns. It can grow quite tall, normally between 2 and 3.5 meters. You can tell wild carrot plant and hemlock apart from the fact that carrot plants have hairy stems, without purple markings and don't grow as tall. It has a distinctive and unpleasant odor. All parts of the plant are toxic, alkaloids, but especially so are the roots and seeds. 0.1 kg of the roots and/or seeds - or 0.2 kg of other plant matter is required to create one dosage. Its concentrated form is most effectful as an oil, which has the same unpleasant odor but tastes faintly of parsnips. This poison is also potent in its raw form, but then requires ingestion. About 8 leaves or a few grams of roots/seeds is enough to suffer for a creature to roll against the effects below but the DC is 12. Grows in all Frostmark but for middle Beornhelm and northward.

After the incubation period, at the start of their turn, the creature rolls a DC 14/18 Vitality. On a failure, the creature gains the nausea persisting injury, the minor nerve damage injury, the poisoned condition until they finish a long rest, and takes 3d10 poison damage. On a success, the creature suffers no persisting injuries or conditions and takes half damage.

If the creature failed the saving throw by 10 or more, they gain the major nerve damage injury instead of the minor nerve damage. If they fail the saving throw by a critical failure, in addition to everything above, after 1d8+4 hours of incubation, the creature suffers 2d6 poison damage per hour until they fall unconscious, and at the creature's next turn they start rolling death saving throws.

Process

1. Pressing (pressing the plant matter to extract oil): 30 minute crafting time
2. Dehydrate (removing excess water): 30 minute crafting time
3. Purification (distillation and/or synthesis): 1 hour of crafting time and a DC 14 Academics (applicable) check. On a failure, you ruin the poison's effects.

Monkshood/Wolfsbane (DC 16 ingestion/injury - incub. 1 min)

Monkshood is a flowering plant with a hood-like flower that has a range of different colors. Most common are white, yellow, purple and blue. All parts of the plant are toxic, but the roots contain the highest concentration of aconitine, which can be purified to a brown powder. You need 0.25 kg of roots or 0.5 kg of other plant matter to create a dosage. The powder has no strong smell to it, but the taste is very bitter followed by a burning sensation in the mouth. It grows in mountain meadows around the middle to southern parts of the Oreal's Point, around Zerra Peak, in the Moqard Sierra, Gallean Rise, Qebaran Range, Menas Ridge and the Tosian Bluffs.

When ingesting Monkshood, after the incubation period, the creature rolls a DC 16 Vitality saving throw. On a failure, the creature gains the nausea persisting injury, disadvantage on all perception checks, the poisoned condition until they finish a long rest, and takes 3d8 poison damage. On a success, the creature suffers no persisting injuries or conditions and takes half damage.

If the creature fails the saving throw with a critical fail, after 1d4+4 hours after ingestion, the creature suffers 2d6 poison damage per hour until they fall unconscious, and at the creature's next turn they start rolling death saving throws.

Process

1. Dehydrate: 3 days of drying in a sunny and warm environment, or 30 minute in an oven like apparatus.
2. Grinding: 30 minutes of grinding and sieving.

Myristicin Poison (DC 20 ingestion - incub. 1 min) (DC 18 injury)

This poison is extracted from nutmeg, but can also be found in trace amounts in black pepper or vegetables in the umbelliferae family (carrots, parsnips, dill, parsley, etc.). Only the nutmeg has high enough concentration of myristicin to be worthwhile. 100 grams of nutmeg is enough to

create one dose of poisonous oil. This oil has a light brown color to it and a distinctive bitter taste.

If this oil is delivered through injury, the creature rolls the saving throw at the start of their next turn, but ingested it has a minute incubation time. To save against this poison, the creature must make a DC 20 or DC 18 saving throw. On a fail, the character suffers severe hallucinations for 1d4+1 hours, 2d10 poison damage and the poisoned condition until they finish a long rest. After the hallucinations, the creature also suffers 1d4 hours of the persisting injury of nausea.

If the saving throw fails by 15 or more, the creature falls unconscious (after the incubation period for ingestion), takes the poison damage and gains the poisoned condition. If the saving throw was a critical fail, the creature falls unconscious, suffers the major organ necrosis injury, takes the poison damage, and gains the poisoned condition until they finish a long rest.

Process

1. Shredding (pressing the plant matter to extract oil): 30 minute crafting time
2. Dehydrate (removing excess water): 30 minute crafting time
3. Purification (distillation and/or synthesis): 1 hour of crafting time and a DC 18 Academics (applicable) check. On a failure, you ruin the poison's effects.

Pyrrolizidine Alkaloids (ingestion DC 16) (incubation 1d4 hours)

Pyrrolizidine alkaloids (PAs) is a sugar structure produced in plants that can flower as a natural defense against herbivores. It can be found in many flowers, orchids, daisies, sunflowers, etc. Purified PAs is a slightly brown sugar powder that can be dissolved into water. The taste and smell of PAs are foul, but in dried form the taste and smell lessens a bit in potency. Plants that can produce PAs grow all over Frostmark, it is just a matter of knowing which plant in which habitat can produce the compound.

To poison a humanoid through ingestion of raw or dried plant matter requires large intake and lowers the DC to 10, where the creature suffers nausea, 1d6 poison damage and gains the poisoned condition until they finish a long rest. The purified PAs have a DC of 16, where a failure leads to the above mentioned effects as well as minor liver damage, takes 1d12 poison damage and gains the poisoned condition until they finish a long rest. On a success, the creature suffers no persisting injuries or conditions and takes half damage. A failure of 10 or more, leads to the above mentioned effects for the DC 16 version, but major liver damage and minor kidney failure instead.

Rhubarb (DC 14 ingestion - incub. 1d4 hours)

The stalk of the rhubarb can be used as a food source, but the leaves contain trace amounts of oxalic acid. An adult medium creature must eat about 8 kg of rhubarb leaves to receive a potential lethal dose. Therefore, the oxalic acid must be extracted from the leaves to be an effective poison. The leaves taste as sour as the rhubarb stalk. The acid extracted is further sour and has a very faint floral scent to it. Grows naturally from northern Karthmere and middle Malgrave to the Green Elder Valley in the north.

After the initial incubation period, the creature must roll a DC 14 Vitality saving throw or gain the nausea persisting injury, 1d12 poison damage and the poisoned condition until they finish a long rest. On a success, the creature suffers no persisting injuries or conditions and takes half damage.

This effect passes after 1d4+4 hours, then the creature rolls a DC 8 Vitality saving throw. If the creature succeeds they gain the nausea effect again for 1d4 hours. If the creature fails, they gain the poisoned condition until they finish a long rest, they take 2d6 poison damage per hour until they fall unconscious and the creature starts rolling death saves at the start of their next turn. If the creature successfully saves on the first check, they gain advantage on the second check.

Process

1. Shredding (pressing the plant matter to extract acid): 30 minute crafting time
2. Dehydrate (removing excess water): 30 minute crafting time
3. Purification (distillation and/or synthesis): 1 hour of crafting time and a DC 14 Academics (applicable) check. On a failure, you ruin the poison's effects.

Seed of Death (DC 12 ingestion - incub. 1d2 hours)

The seeds of apples, pears, peaches, apricots and plums contain trace amounts of cyanide. When consuming an excess of crushed seeds (about 50 of them), the creature must roll a DC 12 Vitality saving throw or gain the persisting injuries of nausea, minor headaches, 1d10 poison damage and the poisoned condition until the creature finishes a long rest. On a success, the creature suffers no persisting injuries or conditions and takes half damage.

If you fail the check by 10 or more, you also gain the cardiac injury persisting effect.

Process

This poison requires no time consuming or difficult process. Only deseed your fruit of choice and make your target consume them.

Solanine (18 ingestion - incub. 1d4 hours) (DC 14 injury from berries)

Solanine poisoning can be obtained from the nightshade plant - or Belladonna. You can either create a brown powdered sugar that can be dissolved in water from plant matter that has a bitter taste and aroma, or a thick brown liquid from the berries which taste sweet. Both the plant matter and the berries burn slightly in the back of the tongue and mouth. You only need about 0.1 kg of plant matter for a dose. Nightshade grows from southern Sirendale/Greenfield/Oldwood to middle Karthmere, southern Malgrave, northern Stormholme and to middle Eastcreek.

When ingesting purified Solanine, after the incubation period, the creature rolls a Vitality saving throw with a DC 14/18. On a failure, the creature gains the nausea persisting injury, the poisoned condition until they finish a long rest, and takes 2d10 (DC 14) or 3d10 (DC 18) poison damage. On a success, the creature suffers no persisting injuries or conditions and takes half damage.

If the creature failed the saving throw by a critical fail, after 1d4+4 hours after ingestion/injury, the creature suffers 2d6 poison damage per hour until they fall unconscious, and at the creature's next turn they start rolling death saving throws.

Process - Ingestion

1. Dehydrate: 3 days of drying in a sunny and warm environment, or 30 minute in an oven like apparatus.
2. Grinding: 30 minutes of grinding and sieving.

Process - Injury

1. Pressing (pressing the plant matter to extract oil): 30 minute crafting time
2. Dehydrate (removing excess water): 30 minute crafting time
3. Purification (distillation and/or synthesis): 1 hour of crafting time and a DC 14 Academics (applicable) check. On a failure, you ruin the poison's effects.

Wild Cherries (DC 12 ingestion - incub. 1d2 hours)

Wild cherry grows south of southern Beornhelm and has several different species, like black cherry and bitter cherry. The cherry itself is safe to consume, but the leaves, bark, twigs, and the pits of the cherries all contain a cyanide producing compound. A few cherry pits will give you a stomach-ache.

If a creature would eat an excess of it or consume a bitter powder created from 0.5 kg of plant matter from the wild cherry, the creature must roll a DC 12 Vitality saving throw. If it is a failure, after the incubation period, the creature gains the persisting injuries of nausea and minor headaches, as well as 1d10 poison damage and the poisoned condition until they finish a long rest. On a success, the creature suffers no persisting injuries or conditions and takes half damage.

If you fail the check by 10 or more, you also gain the cardiac injury persisting injury.

Process

1. Dehydrate: 3 days of drying in a sunny and warm environment, or 30 minute in an oven like apparatus.
2. Grinding: 30 minutes of grinding and sieving.

Madness

Madness is an optional rule that introduces another challenge for your adventurers. If you are playing a campaign with themes of horror, realism and/or grittiness, consider adding madness to your game. There are also a few mechanics that refer to madness like the psychic damage injury table and the spell Contact Other Realm. You can also add madness checks and effects to environmental effects, artifacts, poisons, disease, etc. If you don't, like the madness mechanic, you can swap insanity and madness effects for whatever you like.

Resisting a madness-inducing effect requires a Resolve saving throw.

Madness Effects

Madness can be short-term, long-term, or indefinite. Most relatively mundane effects impose short-term madness, which lasts for just a few minutes. More horrific effects or cumulative effects can result in long-term or indefinite madness.

A character afflicted with short-term madness is subjected to an effect from the Short-Term Madness table for 1d10 minutes.

A character afflicted with long-term madness is subjected to an effect from the Long-Term Madness table for 1d10 × 10 hours.

A character afflicted with indefinite madness gains a new character flaw from the Indefinite Madness table that lasts until cured.

Curing Madness

A Calm Emotions spell can suppress the effects of madness, while a Lesser Restoration spell can rid a character of a short-term or long-term madness. A Greater Restoration spell or more powerful magic is required to rid a character of indefinite madness.

Short-Term Madness

D100 - Effects (lasts 1d10 minutes)

01-20 - The character retreats into his or her mind and becomes paralyzed. The effect ends if the character takes any damage.

21-30 - The character becomes incapacitated and spends the duration screaming, laughing, or weeping.

31-40 - The character becomes frightened and must use his or her action and movement each round to flee from the source of the fear.

41-50 - The character begins babbling and is incapable of normal speech or spellcasting.

51-60 - The character must use his or her action each round to attack the nearest creature.

61-70 - The character experiences vivid hallucinations and has disadvantage on ability checks.

71-75 - The character does whatever anyone tells him or her to do that isn't obviously self-destructive.

76-80 - The character experiences an overpowering urge to eat something strange such as dirt, slime, or offal.

81-90 - The character is stunned.

91-100 - The character falls unconscious.

Long-Term Madness

D100 - Effects (lasts 1d10 × 10 hours)

01-10 - The character feels compelled to repeat a specific activity over and over.

11-20 - The character experiences vivid hallucinations and has disadvantage on ability checks.

21-30 - The character suffers extreme paranoia. The character has disadvantage on social checks.

31-40 - The character regards something (usually the source of madness) with intense revulsion, as if affected by the antipathy effect of the antipathy/sympathy spell.

41-45 - The character experiences a powerful delusion. Choose a potion. The character imagines that he or she is under its effects.

46-55 - The character becomes attached to a "lucky charm," such as a person or an object, and has disadvantage on attack rolls, ability checks, and saving throws while more than 6 m from it.

56-65 - The character is blinded (25%) or deafened (75%).

66-75 - The character experiences uncontrollable tremors or tics, which impose disadvantage on attack rolls, ability checks, and saving throws that involve Brawn or Dexterity.

76-85 - The character suffers from partial amnesia. The character knows who he or she is and retains racial traits and class features, but doesn't recognize other people or remember anything that happened before the madness took effect.

86-90 - Whenever the character takes damage, he or she must succeed on a DC 15 Resolve saving throw or be affected as though he or she failed a saving throw against the confusion spell. The confusion effect lasts for 1 minute.

91-95 - The character loses the ability to speak.

96-100 - The character falls unconscious. No amount of jostling or damage can wake the character.

Indefinite Madness

d100 Flaw (lasts until cured)

01-15 - Alcoholic

16-25 - Selfishly greedy

26-30 - Think they are someone else

31-35 - Obsessively lying

36-45 - Obsessively following a goal

46-50 - Becomes less sympathetic

51-55 - Easily becomes angry and aggressive

56-70 - Genuinely believes themselves to be the best and brightest

71-80 - Cripplingly paranoid

81-85 - Gains an illusory/hallucinatory friend that they only trust

86-95 - Can't take anything seriously and cripplingly humorous

96-100 - Becomes obsessive with hurting and killing creatures

PRELIMINARY GM GUIDE

This is a preliminary and short game master (GM) guide for the Frostmark RPG. It is meant to give you the tools to GM your own Frostmark game. Remember, this is only a preliminary guide that might come to change, a proper one will be present in the released version. This guide does not go through the universal basics of GMing, as in describing what a GM is, how to build encounters, etc., instead it only deals with Frostmark related topics. If you feel uncertain of the basics, for now, there are great resources out there to acquire such knowledge. “WMP-RPG” refers to the world’s most popular RPG system.

MECHANICS AND SYSTEM

This section discusses points of interest related to the system, mechanics, and gameplay.

Player Character Balance

Player character (PC) balance in Frostmark is more varied than WMP-RPG and therefore should be considered when creating a party. Overpowered or underpowered parties or player characters can prove a challenge for the GM to create encounters for and for the players to feel like they are properly challenged, as well as useful. Take note that when discussing encounters, it doesn’t only mean combat encounters, but also social or mental ones.

In Frostmark, you as a GM should be involved in your player’s character creation process (unless you are playing a short campaign where balance matters less). This matters because Frostmark cares about balancing characters differently. The golden rule that both the GM and player should help each other to enforce is:

“Do not choose in accordance with what would be more optimal for your character concept, instead choose in accordance with what makes more thematic sense.”

The player knows their intended character’s backstory and personality the best, but the GM can help the player not be tempted with the optimal choice. Therefore, creating

characters is akin to a discussion between the character and the GM where you together explore the mechanical expression of the concept. If a player is thinking about choosing a mechanic, or has already taken a mechanic that you do not think fits their character’s theme and backstory, talk to the player about it and share your opinion. The optimal outcome would be that the issue takes care of itself through the conversation. In the end, the GM has the final say on what a player is allowed to have on their character sheet. Be mindful of this, players often feel a sense of ownership of their characters, and it can certainly create friction.

This process is certainly an effort from the GM’s side, therefore be pragmatic with where your time is required. Some players might need more attention than others. The benefit of this effort is that once you do your preparation for the campaign or a session, you know your player characters more familiarly.

It should also be pointed out that for this balancing to be effective (choosing in accordance with theme and not optimization), backstories are a necessity for a game of Frostmark. These backstories don’t have to be as long as books, but should adequately describe a character’s past and their personality at least. You as GM decide if a player has given you enough of a backstory for your game. Certainly, shorter campaigns may not require as much complexity as longer ones.

Still, you may end up with a party that is generally more or less effective in encounters than the norm. Then, balance your encounters after this fact. Things become more difficult if you have certain player characters who are stronger or weaker than the rest. There are two terms here to keep track of: “Vastness” and “Usefulness”.

Vastness denotes the difference in power between PCs. If the difference is small, then just variance in encounters that could favor other builds can alleviate the perceived difference to create a balanced mechanical expression between the PCs. If the difference in power is vaster, you might have

to take more drastic action by favoring other builds in your encounters. This can both become monotone as well as narratively unfriendly. This is why you should be active with your players during the character creation process. You might be able to catch power differences at that stage and steer your party to a more cohesive unit. It is also important to consider what kind of players you choose for your party. There are certainly players who find greater fun with optimal builds and those who are either unfamiliar with the mechanics or do not care as much about it. These two types of players, from the start, might not form a cohesive party.

The second term is “usefulness”, which often matters to players. Even if there is some vastness between two-character builds in your party, as long as all of them feel properly useful to the party as a whole, they might be comfortable with it. Frostmark seeks to generally create high stakes in not only combat, but also in mental and social situations (discussed more below), and thus PCs might be stronger or weaker in different kinds of encounters. Perhaps you got a strong social PC but weak in combat and a vice versa PC in your party, as long as your two players feel useful in the party it will cause less friction.

However, in the end, all groups are different. Sometimes, what is discussed above, doesn't matter at all for the player group. Maybe the GM has no issues balancing it and is a fountain of ideas of how to vary things up. Or the situation is reversed. Only you can know your player group and what works for you. Be mindful of it nonetheless as this can have an impact on the longevity of the game as well as player and GM satisfaction.

Using the Ability Scores and Skills

Since the ability scores and skills in Frostmark are different from what many have become accustomed to with the WMP-RPG, let me break down the ability scores and the skill checks written on the character sheet for you as overtly as possible.

Brawn: Physical and offensive - bodily strength.

Dexterity: Physical and finesse - hand to eye coordination, balance, and agility.

Vitality: Physical and defensive - health, stamina, and physical resistance.

Intelligence: Mental and offensive - memory and education.

Cunning: Mental and finesse - deduction and reasoning.

Resolve: Mental and defensive - willpower and conviction.

Presence: Social and offensive - charisma, magnetism, and body language.

Manipulation: Social and finesse - wit and eloquence.

Composure: Social and defensive - observant, the strength of character and self-control.

A note about Intelligence vs Cunning:

Intelligence is all about what a character already knows and can recall. Recalling facts and details. Cunning is about deducing a theory or applying knowledge. Figuring things out and using knowledge for new expressions.

Animal Handling (Cun/Pre): Interacting with creatures with low intelligence scores (not only strictly animals). Cunning is about understanding what a creature's nature is and what they might be communicating. Presence is your communication in turn to the creature, for example, calming it down or making it submit to an order.

Athletics (Br/Dex): Athletics is about applied physical activity. The simplest expressions of Brawn and Dexterity are pure ability score checks. For example, arm wrestling contests or lifting something heavy for Brawn, or keeping your balance for Dexterity. Actions that require more experience, such as swimming with Brawn or doing a summersault with Dexterity, are made with the Athletics skill.

Deception (Pre/Man): Whenever the character is trying to convince another character of something, using predominantly body language (Presence) or language (Manipulation), when they know they are deceitful, roll a Deception check.

Empathy (Man/Com): The empathy skill is all about understanding emotions, their expressions, and influence them. Whenever a character wants to change the emotional state of another character, roll with Manipulation. When a character wants to understand and notice emotional states, roll with Composure.

Investigation (Cun): Investigation is about overseeing a scene or a situation to form a theory from the data collected. Investigation usually takes time to perform (unless an ability states otherwise), or else Perception, Academics, etc., might be required to notice clues and data if they are not immediately apparent on short notice.

Leadership (Pre/Man): Leadership is rolled to inspire trust, obedience, and confidence. When inspiring people, making somebody comply with an order, or increase morale, use Leadership with Presence or Manipulation depending upon if the character leaned on their words or their charisma.

Medicine (Int/Cun): Intelligence is used with medicine when diagnosing a medical problem. On the other hand, Cunning is used when you are trying to actively cure or otherwise use your medical knowledge practically.

Occult (Int/Cun): When wanting to recall information about magic or adjacent topics, roll with Intelligence. Roll instead with Cunning when forming hypotheses and practically interacting with them.

Perception (Int/Com): Perception is about noticing details on short notice. Perception with Intelligence is all about having the wherewithal and experience to quickly point out what is of interest. When not actively perceiving, Composure is rolled with Perception as a form of vigilance.

Persuasion (Pre/Man): Whenever the character is trying to convince another character of something, using predominantly body language (Presence) or language (Manipulation), when they know they are deceitful, roll a Deception check.

Subterfuge (Dex/Cun): Subterfuge is all about hiding intentions and trickery. Sleight of hand, pickpocketing, picking a lock, forging, shadowing, etc., are examples of Subterfuge. When a challenge requires physical precision, roll with Dexterity. If it requires mental brilliance, use Cunning instead.

Stealth (Dex/Cun): Sometimes to stay quiet or move quietly, you require body control or a sharp mind to know exactly how or when to move. When rolling a Stealth skill check and it is a physical challenge, use Dexterity. When it is a mental challenge, use Cunning.

Survival (Int/Cun): Survival is all about surviving in different environments. Finding food, building a shelter, avoiding hazards. To recall information, roll with Intelligence, and to use your knowledge practically or create a theory, roll with Cunning.

A note about social skills: Navigating the social skills can be a bit diffuse if you are looking for clear distinctions between them. This is meant to be, so these social skills can be dynamic to both answer all social skill roll needs and introduce challenges by the variance of social skill checks. There is one mental process you can go through whenever you are considering a social skill check to make this easier, however. First, ask yourself if the player is expressing authority to progress or if compliance of a target is necessary, then roll Leadership. Secondly, consider if the player is seeking to change the emotional state of another or the situation requires such, roll Empathy. If the above statements are not applicable, then consider if it would be a Deception or Persuasion check.

Academics and Art & Craft are special skills that the player or GM defines. Characters can have several Academics and Art & Craft skills, as long as they state different topics. For example, a character can have Academics (History) and Academics (the Rianish Religion). Depending upon how the

GM or the player title the Academics or Art & Craft skill, that decides the scope of the skill. Art (Stringed Instruments) would mean a character knows how to play stringed instruments, but Art (Lyre) means that the character knows how to play the lyre, better so than the character with Art (Stringed Instruments) but would have a harder time playing other stringed instruments than the lyre.

Academics (Int): Academics are all bodies of knowledge. Most often Academics is rolled with Intelligence as most of the time you will be recalling information about your particular field of Academics.

Art & Craft: This skill grouping includes a vast variance of skills about different topics that you can either perform, work with, express yourself or craft. No recommended ability scores are given with Art & Craft since this skill group is so varied.

The Skill Discussion

When rolling skill checks, the ability scores discussed above (and are also on the character sheet) are the recommended most common couplet of skill and ability scores. The GM is free to use other ability scores with the skills if they think that would be a better fit, and the player is also free to suggest other pairings as per the Skill Discussion.

The Skill Discussion is a process that happens whenever the session requires a skill check to overcome challenges.

- ❖ The GM first recognizes that a skill check is required and suggests an ability score and skill (if that player has proficiency in that skill).
- ❖ The player or players may then accept this suggestion or suggest another ability score and/or skill to be used in the challenge instead with an immersive or character thematic justification.
- ❖ The GM can then change their mind if they please.

Converting Monsters

There are links to monsters and NPCs in the “Playing Frostmark” pdf but maybe a monster or NPC is not there that you want from WMP-RPG. Here is a checklist of what you need to do to convert the monster or NPC to Frostmark (anything not listed below remains the same).

- ❖ Some **creature types** might be different in Frostmark. For example, normal animals are named animals, whilst more magical animals are named beasts. Check out the list of creature types in the Adversary section.
- ❖ **HP** is calculated through the max value of the HD multiplied with 0.75 and then plus the vitality bonus for each HD (instead of HD).
- ❖ Change the feet to meters in the **speed** section (see below)
- ❖ Change the Strength value to Brawn, Constitution for Vitality. Intelligence, Wisdom, and Charisma **ability scores** you can either put out where it suits you and then decide upon what values the other mental and social scores of Frostmark have.
- ❖ Change the **saving throws** ability score to the Frostmark version or choose new ones in accordance with immersion.
- ❖ Change any feet mentions for any **senses** to meters.
- ❖ Increase **challenge rating** with +1 ($\frac{1}{8}$ and $\frac{1}{4}$ becomes $\frac{1}{2}$)
- ❖ Change any mentions of feet, ability scores, and skills to the appropriate versions in Frostmark in the **ability** section.
- ❖ If the monster or NPC has **spellcasting**, give the monster or NPC an appropriate amount of Souls. Innate spellcasting becomes Soul Mastery spellcasting.
- ❖ Change the distance of **attacks** from feet to meters.

There might be certain abilities or attacks that require more edits due to changes in WMP-RPG’s class features (Frostmark character “abilities”) or rule differences. These edits must be handled on a case-by-case basis.

Using Metric

Frostmark uses the metric system rather than the imperial system. To convert the imperial system to metric, follow these two guidelines;

- ❖ When converting meters for abilities, spells, weapons, or anything else that requires several squares on a battle map, 5 feet equals 1 meter.
- ❖ When converting weight, volume, long distances, or any other measure where its distance on a battle map is of consequence, use an online converter and round it up or down to whatever seems sensible depending upon what the value is used for and its size.

If the metric system is hard to wrap your mind around, consider that meters equal squares instead. A spell with a range of 6 m becomes a spell that has the range of 6 squares instead.

Milestone Leveling

Frostmark uses only milestone leveling - as in the GM decides when the players level. Since physical, mental, and social encounters have the same weight in Frostmark, all three can lead to a level up or contribute to one. When preparing your campaign or an adventure, consider which points in the story would be suitable for a level up. Examples of suitable milestones could be defeating a dangerous enemy, completing a great task, securing advantages, or discovering a clue that pushes the story forward, etc.

Choosing Power Level of Campaign

The power level of a campaign, mundane, heroic, and champion, decides how many points the player has to spend on their character ability scores and accomplishments. This difference in character power is not great, but still significant, but mostly so at earlier levels. The power levels are supposed to mirror and accompany the intended scope of your campaign.

In general, the power levels of the campaign would work best with;

- ❖ **Mundane:** More of a local campaign, few instances of extensive travel, even within a Realm, with lower stakes and localized consequences.
- ❖ **Heroic:** Regional campaign with some instances of extensive travel, maybe some to other Realms, medium stakes, and regional to inter-Realm consequences.
- ❖ **Champion:** Often a realm-jumping extravaganza, high stakes at every turn as well as severe and extensive consequences.

Starting Money at Higher Levels

This table is optional if you want to give out more money and items for more established and influential characters of higher levels. The table assumes the starting money and equipment are for humans in Frostmark. You may want to add, or exchange money for magical equipment if the players are not starting in a standard Frostmark campaign or come from another Realm.

1-4: Normal

5-9: Normal + 750 gp + 1 common item

10-15: Normal + 1500 gp + 1 common + 1 uncommon

16-20: Normal + 3000 gp + 1 common + 2 uncommon

Choosing your Playstyle

Even if the playing Frostmark pdf presents the rules as they are, it doesn't mean you have to use them all or be happy with those presented. Customize the rules to suit your play style to increase the fun that you and your players have. Here are some examples of rules that you can ignore to change the feel of your game;

- ❖ **Encumbrance:** If you do not want encumbrance bookkeeping.
- ❖ **Ammo:** If you do not want to track ammo.
- ❖ **Living Costs:** If you do not want to track living costs for your players.
- ❖ **Injuries:** If you do not want combat to grant potentially lasting afflictions.

Not using the Frostmark World

You can play Frostmark's system with your own world quite easily. If you keep how Souls and magic interact or a semblance of it, you do not have to do much. Maybe you would want to change some mechanics of backgrounds, races, and abilities, but such would be relatively easy. If your homebrew world does not include Souls as Frostmark

does, you might have to make some changes to spellcasting. If you want to have a WMP-RPG friendly setting but playing with Frostmark's rules, just lower the amount of potential with 5 for Minor, and 10 for Moderate and Major. You can also create your own spell tables and spellists for Ability Origins or players. You might also want to introduce other ways of spellcasting, like preparing spells.

SETTING AND NARRATIVE

This section discusses topics surrounding the setting, world, and narratives of Frostmark.

Choosing a Path

The first thing you should consider when you sit down to prepare a campaign or adventure in Frostmark's setting, is: What do I and my players want to experience? There is a multitude of different themes and storylines that can be explored in the Realm of Frostmark itself at the start of the new age. On top of that, you can explore past ages and other Realms. You can also transform or disregard the setting of Frostmark to introduce your own world.

Both player and GM must enjoy the themes explored and story told when embarking on a campaign or adventure. To ensure this, there are generally two ways to go about it. Either you as GM pitch an idea for a story and explain its themes and scope to a group of people and see if they are interested in tag along with you. Or you and a group of players decide together what you want to play. With the knowledge of what you and your group of players will enjoy, you can go on to fill in the details of your campaign or adventure.

Session 0

If you are deciding what kind of campaign of Frostmark you want to play with your players it is a wonderful opportunity to do so in a session 0. Either way, a session 0 is an optional - but often successful - step to take before you start playing a campaign. And if you have already decided upon what kind of campaign you want to run and

gathered players who want to play with you, a session 0 is still useful.

Essentially, a session 0 sets communal expectations for a campaign. Everybody can weigh in on and agree to the rules, themes, and information about the campaign you are about to play. Here are some talking points to consider to include in your session 0 (in no particular order):

Table Etiquette: Everything that has to do with how people behave around the roleplaying table and how the players and GM interact with each other out of character and in character. This can include topics like player vs player, out-of-character, arguments, etc.

Campaign Type: If you have not already decided what kind of campaign you and your group want to play, then do so. Also, consider which themes they want to experience. Horror, lightheartedness, intrigue, mystery, romance, grit, etc.

Balance of Combat/Exploration/Roleplay and Thrill/Narrative/Setting: This is a great thing to ask your players - in what balance they want to experience combat, exploration of the world, and roleplay. You also have the thrill/narrative/setting trio, where the thrill is any kind of intensity, drama, or stakes, narrative is about exploring the plot points of a PC's backstory and goals and setting is experiencing the world around you.

The power level of campaign, character creation restrictions: Decide what power level the campaign has, and if there are any character creation restrictions or guidelines. This could be which level to start at, which

racers are allowed if characters must belong to a certain organization, come from the same place, or any other limitations to character creation.

Uncomfortable Topics: Ask your players if any topics make them uncomfortable and if they want a safe word. Uncomfortable topics may be sexuality, slavery, torture, children getting hurt, gore, etc.

Changes: Inform your players or explore if there are any mechanics or lore that has been changed or added that they need to know.

The Mundane: When, how, and where? Schedule your game, decide on the length of a session, how you will be playing, the length of the campaign, etc.

The Standard Frostmark Campaign

The standard Frostmark campaign is about a group of people discovering and experiencing the return of gods, magic, and fantastic creatures to Frostmark - and its consequences. In general, where the already provided history ends in 745 AEF, you as a GM take over to tell the story of what happens after this date. The party grows with the world and gains more and more agency to influence the status of local areas, regions, kingdoms, a Realm, and maybe even several Realms. Typically this kind of campaign starts in a localized area where everything seems normal for Frostmark standards, and then progressively the characters learn more about the world, experiencing their world-changing and growing with it.

Choose an area to start the campaign in and then increase the scope of the campaign, the levels of the characters, their influence, and the degree of change around them. Remember to always encourage player characters' personal stakes and attachment to the story told. If they are happy in a region and situation that is somewhat stable, what motivation would they have to venture out of their comfort zone and take risks?

A good tip is to localize the characters around your starting point or starting cause to initially bring your party together in some regard. For example, the character can all come from the same town, region, or

kingdom. They can belong to the same organization, share the same profession, or otherwise share a goal. This can give you a good stepping-off point for the rest of your campaign. After all, it will be tricky to create a cohesive adventuring party with a Crow Inquisitor of the Church of Riahn and a Beornish Shaman in the same group. Not only because of their very different opinions and outlooks but also because of the distance between Beornhelm and Crowhill. Frostmark's continent is ultimately more than 3000 km long from the northern livable area of Beornhelm to the southern coastline of Karthmere. Traveling through medieval means takes time. But there are always exceptions and possibilities. The golden rule is here that these exceptions should be immersive.

The Fiery Barrier

The Fiery Barrier is an invisible wall around Frostmark that prevents travel in between Frostmark and the other Realms, and also greatly hinders the other Enneads' attempt to communicate and influence Frostmark. It was created on the day of Empress Leana's coronation. A great lattice of fire that was first woven around Frostmark, visible from all corners of the Realm, then slowly faded away to become invisible for the human eye. History books describe it as Riahn brightened the world on Leana's coronation to bless the Empire and to declare his intentions to protect humanity. The fact it was a great net of fire has faded into obscurity or thought to be religious inflation of the truth.

The strength of the barrier is in direct correlation with the power of Riahn. Riahn also has another Realm to rule, Eternal Suns, so his attention and energy are not infinite when it comes to keeping up the Fiery Barrier. As long as a vast majority of Frostmark's population actively believe in him, the Fiery Barrier is almost, to completely, air-tight.

After the fall of the Empire, the Church has started to lose its grip in all areas of Frostmark. Lately, the Fiery Barrier has been starting to falter in Frostmark's history, which will allow Realm travel once more and the other Enneads' presence. The degree of this and how quick it is up to you as GM.

Generally, there are three paces the Fiery Barrier falters and breaks;

On A Timeline: Before the campaign, you set up a timeline of how much the Fiery Barrier breaks and what that means for Frostmark. For example, it could be that each month passes the Fiery Barrier falters by 10%, which correlates with a certain magnitude of interference and change that you decide. With this approach, the players have to either work themselves to a point where they are on top of changes or risk falling behind the transformation of Frostmark.

In Step With The Players: You time the extent of the Fiery Barrier falters with the levels and/or achievements of your players. This way, the extent of the world-changing will feel more manageable for both you to balance and for the players to deal with. In this scenario, there is hope to reestablish the Fiery Barrier. If the Church reconquers and reaffirms its control over religious beliefs, the damage can be undone - a crisis averted.

Sudden Break: Instead of having a gradual deterioration of the Fiery Barrier, the Fiery Barrier can just break all together one day. You still decide when this happens, before the start of the campaign, in the beginning, in the middle, etc.

If you want to include a visible representation of a gradual fade, include in your story points where the players would be able to see parts of the latticework of fire and have it break apart from the rest, fall, and fade away well before it would hit the ground, leaving behind a hole in the net that would soon fade from view again. Or, if you want to have it very dramatic, have the fiery barrier visible at all times during the night, so the progress of the breaking of the Fiery Barrier is visible at all times.

If you want a visual representation of a sudden break, have the sky lit up in the great fiery net and then have it suddenly break completely, falling down towards Frostmark but the flames dying out and disappearing long before they can hit the ground.

Remember, that even if the Fiery Barrier is leaving holes open, or is completely gone, for Enna and Enneade to exploit, it doesn't

necessarily mean they are prepared to immediately do so. The Enneade are still scared of Riahn, alone he is more powerful than any one of the other Enneade. And they also have each other to maneuver around. Therefore, it is unlikely they are going to be immediately aggressive. Unless, the Enneade in your Frostmark world has actually created an alliance between some or all of the six, something they have been able to do so far in the standard-setting.

Similarly, Enna might not have an immediate incentive to travel to Frostmark, for benevolent, neutral, or nefarious reasons. If not there is some kind of invasion planned, supernatural events and Enna visitors will probably be a gradual pop-up that increases in frequency as time goes on. This is positive for you as GM. It is extremely difficult to handle the geopolitical changes of a whole continent with an immediate and vast stream of new agents entering the arena.

If the Fiery Barrier is fading away rather than breaking all at once, there are generally two ways to simulate this with inter-Realm travel or communication. Either you decide on a percentage chance that travel or communication from or to Frostmark succeeds. Or it requires more effort to pierce through it, for example requiring higher-level spell slots to do it.

Narrative Slider

An easy way to envision a standard Frostmark campaign structure is to use a slider. If you want to, you can create your own loose slider when you prepare a standard Frostmark campaign.

As the slider heads from left to right time passes and the amount of the Fiery Barrier faltering/Frostmark changes happens. The actual distance between points (as in the amount of time) on the slider below is undefined. Some points on the slider can also flow into each other, as in not having a neat start or endpoints. When you create your own slider, you decide what period of time you want between each point, which points you want, and in which order.

The Fall of the Empire --->
Year 744 AEF --->
First Sign --->
Some Incidents --->
Discovery --->
Several Incidents + Tensions --->
One Major/ Several Incidents + Major
Tension(s) --->
Stabilization

The Fall of the Empire: This marks the point of the end of the Church's absolute control. Until the next point, several historical events mark this time period that you can explore. Alternatively, before this point, you can play with the events leading up to the fall of the Empire, its golden age, or its creation.

Year 744 AEF: This marks the end of the historical events offered in the Frostmark lore. After this point, the GM takes over and dictates the continuation or end of situations and tensions within and between kingdoms. Examples include the occupation of Eastcreek and Greenfield, the three-way power split in Oldwood, the rebellion of Chieftain Falconer in Beornhelm, Armathain's shrinking economy, the fate of the Wardens, etc.

First Sign: At some point in your story, the weakening grip of the Church and Riahn should manifest itself in an incident. How this incident manifests and its consequences depend upon your thoughts surrounding the Fiery Barrier. If it suddenly breaks, it will probably be a massive event. If it is more of a gradual breakdown, maybe the first sign that Frostmark is changing is more mysterious and/or hidden. Here your players must be involved indirectly or directly, so it does not feel like distant news they wouldn't immediately care about. Either the players witness or discover this first sign, or they are close enough to travel to it to investigate.

A Few Incidents and Tensions: After the first sign, have one or two larger events or some smaller events caused by the Fiery Barrier breaking or fading, so the players and the Realm itself can start to piece together what is happening. To make the world feel alive, have some of these events far away from the players so they cannot be involved with them, and some events closer to the players. Decide or randomize the

consequences for the events the players cannot participate in. This is all a balance act between engaging the players and immersion. It would be strange if all events conveniently occur around the players, but at the same time, you are telling a story surrounding your players' characters.

Discovery: At some point after a few incidents, organizations and leadership are going to start to piece together what is going on. This can be an endless source of adventure material as well. What if certain parties in an organization or leadership realize or choose to believe in it before others and capitalize on it? What if the players belong to an organization that does not acknowledge it before they have proof, and the players are planning on/been ordered to go and get it?

Either way, discoveries of current events are going to impact Realm politics, influence, and power struggles. For example, when the Church finds out they might very well change tactics and become more aggressive, maybe the Creekish tribes receive divine or Enna aid and they can push back the Crow invaders, maybe Beornhelm's belief in Borias is the final push that makes Greenfield fall, etc. Take your time and ponder upon how your Frostmark changes after discovery have been achieved.

Several Incidents + Tensions: At this middle point there should be more frequency of events, now several out of the character's reach but plenty for them to take care of as well. At this point, it is important to start weaving together another story than just "Frostmark dealing with the supernatural" (if you haven't already done that) since that won't be interesting forever. Create more personal motivations, recurring villains and allies, events that tie several incidents and tensions together for the larger story, etc.

One Major/Several Incidents + Major Tension(s): This should be the culmination of a long, major event and/or the climax of several minor incidents whose consequences have led to the Realm of Frostmark here. This climax should be of dramatic proportions for the players so they feel that this part of the story has the highest stakes. This doesn't have to revolve around a lot of lives being threatened or a

lot of destruction unless that is what is most important for your players.

Stabilization: After your climax, there are undoubtedly consequences. Depending upon your player's actions and immersion, some of these consequences might be welcomed or unwelcomed by the players. Either way, things should stabilize for a while after a great culmination to allow breathing room and to either build-up to the next great culmination or to describe the end of the campaign. If you choose to go on, return back to "A few incidents + tensions" and continue down the slider from there.

Random Tables for Incidents

This section will be finished later when there is a comprehensible list of the first release adversary list. Either way, if you do not want to decide what all incidents that afflict your Frostmark or you find an unbiased approach more fun, you can definitely randomize. Make a list of potential actors, be it races, organizations, or gods, where they pop up in Frostmark and what they want. An example of this will be provided later on here.

Divine Interaction

You should also consider in what way you want to involve and portray the gods in your game. There are two questions to think about here; How "human" or "alien" your Enneade are, and how "close" or "distant" your gods are. Your answers will set a theme and inform the stories you tell as GM. Example divine interaction could be "distant tacticians" or "whispering companions". Having the gods be more interactive and understanding will involve your Enneade more closely to the story. The players might form relationships with them, or personally blame them for their shortcomings. Less divine interaction will make the divine feel more distant and less responsible for the events that occur in Frostmark. In other words, either people's actions are guided by the divine, or merely encouraged or discouraged. Also, think about the power level of your campaign, a mundane campaign probably fits better with less divine interaction.

Using the NPCs

The human adversaries with character sheets provided should be considered as the typical adversary of that position or type. If you want to create an NPC that will significantly matter for one or several player characters of yours, it is probably better to customize a character sheet of that profession/position or create something new on your own. However, the character sheets provided of professions/positions are supposed to show the standard way people are trained or develop tactics in that profession/position on Frostmark. Therefore, if you would use the normal character sheets for an Inquisitor and then have a named Inquisitor whose character sheet is radically different without an immersive reason why it will affect the internal consistency of your game.

A quick way to create some customization is to change up the skills, saving throws, and ability scores a bit. As stated above, the character sheets are the typical version of a profession or position, meaning if you got an NPC in training or a veteran, increase or decrease the CR of your NPC to accurately express their experience. A human in training is probably 1 to 3 CR levels lower, a veteran is probably 1 to 3 CR levels higher, and a master in their field is probably 4 to 5 CR levels higher.

Tiers of Play

As your player characters level up their ability to influence the world around them grows as well, but so does the danger. What your characters can achieve through influence (or be subjected to) should be handled through comparing their level to other leaders in the area but also through immersion. Power is not everything in Frostmark, through skill and strategy, a low-level character can influence mighty people and perilous events plenty. In this perspective, the level shouldn't hinder the players or other NPCs to wield influence if they make the correct decisions and actions, be it either negative or positive for them.

That being said, power in combat has its place too and comes with its own kind of influence. If things go sour, living up to an intimidation made, punish dissent, remove

troublemakers, etc., all require combative power. Of course, a character can also have the ability to order other characters into action who have the necessary combative power.

Tiers of play basically denote different spans of levels of player characters and what they are expected to do and what the world around them responds with. WMP-RPG does this, saying that the difficulty and stakes of the story told must follow the character's power level. Frostmark takes a more measured approach to this. You can still create a compelling story and roleplay by subjecting your characters to higher stakes than what they are prepared to do, or no danger and have them struggle with the power they wield. Combat doesn't always have to be won, or won through great risk, to tell an interesting story. A world becomes more alive when it doesn't cater to where the player's power level is at. If a town guard is stronger than the player characters, so be it. If threatening a ruler creates retaliation that the players are weaker than, so be it. And vice versa.

On the other hand, some strings should be pulled behind the scenes to make it a compelling story, even if the world does not indulge the characters' current power level. A story that ends prematurely or does not create any risks at all will feel disappointing for the players. In the end, what Frostmark recommends is a balancing act between these two concepts. A living world with its own internal consistency and some modification to create a pleasant story. As a GM, to minimize the amount of modification you have to do, which means diminish the consistency of your world, encourage or discourage your players as much as possible with verbal guidance. Warnings such as "the town guards are well trained and have developed efficient tactics" or "these knights are renowned for their battle-prowess", etc., are important tools in your storytelling belt. A story where the players must overcome great odds and wield their power responsibly is ultimately a more nuanced story told than perfectly balanced encounters at every point in the campaign.

In Frostmark, the difference between player characters and other NPCs is smaller than how WMP-RPG does it. The difference in

Frostmark is that characters start out with a background and have the advantage of having the GM's focus on them, tailoring their story. Beyond this, becoming more than just a normal person living in Frostmark, is the actions, ideology, determination, and bravery of your players to become larger than life.

Despite this, just below are some guidelines of how much influence different character levels in the Realm of Frostmark have. The variance of levels below very much depends upon which kingdom you are considering. Some kingdoms experience war and strife more than others, and some kingdoms have more resources to train their guards and soldiers. In general, if your players do not unnecessarily provoke powers that be, Beornhelm, Greenfield, and Crowhill are dangerous places, whilst Eastcreek, Oldwood, Malgrave, Stormholme, Armathain, and Karthmere are moderately so, and then Applegate and Sirendale are more peaceful.

Level 1-5: Militia, mook, or private - Foot-soldiers who are a part of a professional who may have jurisdiction/impact but sit at the lowest positions in an organization or have the least amount of jurisdiction/impact.

Level 5-9: Officer, adept - The middle positions in an organization that has more impact/jurisdictions than the footsoldiers.

Level 8 to 14: Martial paragons, experts - The higher positions in an organization and have more impact/jurisdictions.

Level 12 to 17: Leaders, movers and shakers, the strong among the strong - a lot of influence

Level 16 and Above: The strongest in Frostmark. The Solar Priest, Beornish warlords, the most grizzled of Armathainian and Karthmerian knights, etc.

Once again - important to remember that the CR level does not necessarily equal the amount of influence and power in Frostmark on the geopolitical stage. It has more to do with having the right titles in some countries, being a part of the right family in others, possessing knowledge nobody has or being the best at what you do.

Player's Renown and Influence

As your players interact with the world around them they may create lasting impressions and acquire achievements. Let this be handled immersively and logically, with the right decisions, actions, and luck, a low-level party can accrue more renown than a higher level one. Renown and influence are also not equal in all eyes. What is positive for one group may be neutral or negative for another, creating different levels of renown and different kinds of renown.

Renown and influence on their own can also have more effects than just positive ones. A group of players who are very active and gather a lot of renown and influence will certainly gain contacts, it will open doors, accrue rewards, gain allies, etc., but it may also gather unwanted attention. Retaliation from disgruntled parties, recognizability, responsibility, duties, limited freedoms, etc. On the other hand, very little renown comes with its own positives and negatives. Introduce some of these elements to the story that you tell because it will make the world feel more immersive and alive, and may create interesting adventures.

Non-human PCs

Non-human characters in a standard Frostmark campaign are definitely possible. Due to the Fiery Barrier, no Enna can have traveled to Frostmark during that time, but Enna may have gone into hiding in Frostmark before the Fiery Barrier or joins the party soon after it falters or breaks. Hiding places in Frostmark can be deep underground, on a remote island, far in the north in the tundra, on a distant sky island, etc. During Geanor's conquest and Leana's imperial foundation, Enna was hunted to banishment or exile, and this was done not only from skill and magic but the assistance of Riahn as well. So for Enna to go unnoticed all this time there must be an immersive reason why.

For a standard Frostmark campaign my advice is to decide on only human characters or limit the number of non-human characters you have in your party. There are some reasons for this, the more pressing are;

Language Barrier: Humans speak Modern Markish and Enna Ancient Markish. These two languages are similar and may have several words that overlap. But without practice and resources, somebody that speaks Modern Markish won't understand Ancient Markish but for the simplest sentences, and vice versa. Of course, there might come a time where your human and non-human characters learn the other language, but until then it can prove a challenge to prepare for in a story as a GM and hard to roleplay with as a player.

Exoticism: Non-human characters have a lot of exoticism in Frostmark and will gather a lot of attention. For GM and players, this can be a bit exhausting to deal with for each new NPC they meet. It may also come with both positive and negative consequences, akin to what is discussed under "Player's Renown and Influence".

Losing Theme: With too many non-human player characters the central story of Frostmark in this new age may be shifted from, drawing too much attention to other themes and adventures.

If all of the points above don't matter to you as a GM or you want to work around them, then of course go for as many non-human player characters you want!

Stellar Expanse

The Stellar Expanse is the space in between the Realms. It links the floating Realms together and it is mostly empty. It is also very strange for mortal perception. The Stellar Expanse looks like an endless cloud of grey-blue smoke (6 m visibility) which is all around, even below. The surface you walk on appears flat and smooth, and wherever you step this surface remains the same no matter if you take a step down or up. Gravity doesn't work the same way either, you can meet somebody in the Stellar Expanse who comfortably stands vertically or horizontally in comparison to you. Wherever you want to go, up, down, sides, diagonally in a 3D space, you can in the Stellar Expanse. The flat surface only exists underneath your feet, hands, or body if you would fall, but this surface is unnoticeable and untouchable for other creatures.

Distance and direction are non-intuitive in the Stellar Expanse and without equipment or appropriate spells, it is often impossible for Enna and humans to navigate here. To find and enter a Realm within the Stellar Expanse is to navigate an invisible 3D labyrinth that can take minutes to years to complete if you know where to go. Once very close to another Realm, the entry point will appear as a small shining bead that when you touch transports you to a random location within that Realm. As long as the Fiery Barrier is at 100% capacity, it is impossible to find an entry point to the Realm of Frostmark. If the Fiery Barrier is faltering, perhaps the chances of finding an entry point are lesser, or perhaps using an entry point requires the consumption of Soul potency. Many of those who brave the confusing wasteland of the Stellar Expanse never make it out and die of dehydration or worse.

From the Realms, the Stellar Expanse is the sky, but the Stellar Expanse looks different when viewed from without than from within. Instead of grey-blue smoke, it looks like a normal sky. The celestial bodies, suns, moons, and stars are actual objects that exist in the Stellar Expanse and shine their way through to their nearest Realm. These shining bodies are not piercing far through the smoke when you view them from within the Stellar Expanse, so it is entirely possible to stumble upon a sun or moon within the Stellar Expanse. This also means that if you are somehow able to exist in the atmosphere, you will enter the Stellar Expanse, which will appear as a slightly shimmering and mostly invisible membrane that you can step through. Once you do, instead of clear skies, you see the iconic smoke.

The stars are further away from anyone single Realm, scattered in the space around and between the Realms. They are not only shiny bodies decorating the sky but also depositories of knowledge, a project that Vegomo and Nastra (the Enneade of Stars) worked on during the Age of Genesis. Each star contains a part of Vegomo's and other Enneade's knowledge, like a great shining library for the gods. Most stars are protected by a powerful Enna guard, in service to the Enneade. The Enneade can

read the stars when they approach, for Enna and humans it works differently. If another Enna or human would be deemed worthy of the star or would defeat the Enna protector, one Enna or human can absorb the star, gaining its knowledge. A star can grant spells as Soul Mastery, teach spells that have been forgotten, give feats, skills at skill rank 5, abilities, or great and grave secrets to the host. Once a star has been absorbed it can never be recovered from that Enna or human and disappears from the sky.

Ethereal Dimension

The Ethereal Dimension was created by the Enneade at the beginning of the World as a comfort for the gods. It is another dimension that suffuses and mirrors the World, except in the Ethereal Dimension there are no physical objects, only Soul potency. You can also view the Physical World in the Ethereal Dimension. Ethereal Dimension mimics the Physical World in a slightly distorted manner and through a lens of a purple hue, like if you were looking at it through thick and uneven glass, but you can't interact with the Physical World and the Physical World cannot see in the Ethereal Dimension (without the special ability to do so). Physical objects have no mass, they feel like slightly heavier air to pass through. On the other hand, Souls in the Physical World have mass in the Ethereal Dimension. This includes living beings, items who have become magical through Soul enchanting, and Souls themselves.

When an Enna or human enters the Ethereal Dimension, the Soul and the body exchange roles. In the Ethereal Dimension, your Soul has mass, your body loses its mass, and the Soul becomes the host for the body. There can be no pretense of who you are in the Ethereal Realm because the form you become is the physical expression of your Soul. You also gain a flying speed equal to your base walking speed if you do not have a flying speed already. With this flying speed you can travel to anywhere in the Ethereal Dimension, and in extension, the Physical World, just not through Souls. Just don't transition from the Ethereal Dimension into the Physical World when you are within an object, such will result in injury or death. Where the Realm meets the Stellar Expanse,

the Ethereal Dimension also transitions into the Stellar Expanse.

The Enneade can travel between the Ethereal Dimension and the Physical World at will. Within the Ethereal Dimension their true form is revealed – gigantic swirling clouds of Souls. When the Enneade travel through it they can watch their Realm without being seen and travel across a Realm within seconds. That another Enneade travels through an Ethereal Dimension of a Realm of another Enneade is not welcomed, but due to the fast nature of it, as long as the Enneade is quick about their visit it is plausible.

Another phenomenon in the Ethereal Dimension is the release of Souls without an alive body. When a creature dies, their Soul leaves their body after 6 minutes, whereas it transitions over to the Ethereal Dimension where it dissipates to become a part of the World or travels to become a part of an Enneade. It is here in the Ethereal Dimension that Souls can get stuck in this transition phase, becoming ghosts and other mysterious creatures.

Traveling In and Between Realms

When you teleport within a Realm using abilities or spells such as Misty Step or Teleport, the spell or ability transports you into the Ethereal Dimension and grants you momentarily the speed of the Enneade, making you exit the Ethereal Dimension somewhere else in the Physical World almost instantaneously.

Teleporting to another Realm through abilities and spells such as Realm Shift and Gate allows you to enter into the Ethereal Dimension to the Stellar Expanse, or beyond the Stellar Expanse into the Ethereal Dimension of another Realm and deposited somewhere in the Physical World in that Realm, once again, gaining the speed of the Enneade.

As discussed above, Realm travel to and from Frostmark, either it's Ethereal or Physical, is impossible as long as the Fiery Barrier remains intact for everybody but Riahn. If the Fiery Barrier has broken entirely, traveling to and from Frostmark works like any other Realm travel. If the Barrier is

fading, you can simulate this by ruling that each cast or use of an ability or spell that allows Realm travel has a chance of succeeding or ruling that you need to cast Realm travel spells with higher-level spell slots and/or Soul consumption.

If your campaign is a standard Frostmark campaign, be deliberate in how you use Realm travel, so it doesn't distract from the story you tell about Frostmark's fate. Weave the fate of Frostmark and humanity into the story beats you explore outside of Frostmark, so it links together. Realm travel is also a fantastic way to shake a story up a bit if the campaign is turning stale in the Realm of Frostmark in the later levels. So far, there are only simple descriptions of the other Realms, so be prepared to do some world-building if your group lands in another Realm.

Rewards and Magic items

Common monetary/combat reward types you can give your party are coins, equipment, gems, art, and magical items. There are few magical items on Frostmark in this age due to its history, but the degree of this lack of magical artifacts is up to you. You can have it completely void of magical items and only have magical items enter the arena through the Fiery Barrier breaking, be it through Enna bringing it with them, given by the Enneade, or found in another Realm.

Or perhaps there are some organized cults out there who have been able to hide magical items in their midst for centuries. Perhaps the Church looks the other way when an influential family possesses an heirloom that is “blessed and given from Riahn”. Maybe the black markets of Stormholme have “interesting artifacts” in circulation only for the wealthiest to acquire. Visions, Wayfarers, and Shamans can have been passed on the ancient information of how to enchant, so newly crafted magical items can be created.

Also, you can make it so that the Church has been storing magical items in vaults and caches, maybe secretly, only to be used in a crisis. Or maybe these vaults are public, used to empower and reward members of the Church. Spell scroll creation and potion making, especially potions of healing or

“Riahn’s Waters”, is a craft the Church knows about. But how widespread is it and how powerful spell scrolls do they create? For what purpose? If there are quite a few of them, then they can be stolen and sold in secret markets, or perhaps alchemists in Malgrave have been studying the process and have started to brew their own? Are there Soul Gem quarries on Frostmark, sold to the Church for their use?

Every question above and more is worth pondering upon when you create your Realm of Frostmark. How widespread these magical items are will influence your themes, making Frostmark more mundane or fantastical. A quick way to decide on how many magical items should be available is to compare them to the power level of your campaign. A mundane campaign could have little magical items, heroic could have a moderate amount, and champion quite a few magical items.

No matter what you choose for your standard Frostmark campaign, you are going to experience fewer magical items at the beginning of the campaign than WMP-RPG. With that in mind, consider your magical items carefully. Use them within your adventures and stories rather than items with no narrative value. If magical items are scarce, consider the cost of them as well. Maybe magical items cost more in Frostmark than other Realms? Also, consider how a character will stick out with magical items. It is not commonplace in Frostmark after all. They may be quickly recognized, reported, feared, and of course, there are also greedy eyes that watch on.

But magical items and other monetary/combat rewards are not the only kinds that exist or have to be highly useful to the party. An important clue or piece of knowledge that pushes the story forward or gives an edge to the party can be as important as a reward. There may also be titles, land, medals, letters of recommendation and/or entry, etc. that give the party both monetary and social

advantages. Then strictly social rewards such as contacts, allies, friends, renown, and influence can also be incredibly important and useful to the party. The bottom line is, not all adventures have to end in a huge reward of coins, gems, and magical items. In Frostmark, a major contact, ally, and friend could be worth as many in-game terms as those coins, gems, and magical items.

Make it your Own

There is quite a lot of lore about the setting and the fundamentals of the Frostmark’s universe and Frostmark has a Realm, and I am sure there will be more in the future. Right now, there is a lot of information given about the Realm of Frostmark and less about the other Realms. Either way, no matter if it is about the Realm of Frostmark or any other Realm, you should still make your World of Frostmark. Deviate where it suits your campaign, add where something is missing, cut where it doesn’t make sense, etc. You decide how your Frostmark looks, feels, and smells. When deviating from the lore as written and when you add upon the lore of Frostmark that a player would know of, communicate this to your players before the campaign (maybe during the session 0), or as soon as possible so they know what to expect.

Other Frostmark Lore-Friendly Campaign Ideas

- ❖ [Play](#) during the age of genesis. Standard fantasy adventure.
- ❖ Play during the war of the gods.
- ❖ Play a comparing during the conquest of Frostmark on Geanor’s team or against
- ❖ Play during the Empire or after, without the barrier-breaking. Keep it low magic and centered around human nature, power and nations.
- ❖ Play in another Realm.
- ❖ Play in a post-calamity Frostmark where the barrier has already broken, Enna and magic are back
